

DECEMBER 7-8 & 10, 2017 | DALLAS

Lot 3233

Heritage Signature® Auction #1265

U.S. Coin Auction

December 7-8 & 10, 2017 | Dallas

Signature® Floor Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 2nd Floor
3500 Maple Avenue • Dallas, TX 75219

Session 1 - PREMIER

Thursday, December 7 • 6:00 PM CT • Lots 3001–3400

Session 2

Friday, December 8 • 1:00 PM CT • Lots 3401–4053

Session 3

Friday, December 8 • 6:00 PM CT • Lots 4054–4446

Signature® Internet Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 4

Sunday, December 10 • 2:00 PM CT • Lots 7001–8346

LOT SETTLEMENT AND PICK-UP

Friday, December 8 • 10:00 AM – 1:00 PM CT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

TX Auctioneer Licenses: Paul Minshull 16591; Teia Baber 16624; Edward Beardsley 16632; Holly Culbreath 17513; Sarah Davies 17505; Samuel Foose 11727; Alissa Ford 17104; Kathleen Guzman 16142; Gregory Holman 17653; Jennifer Jayne Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Brian Nalley 17134; Scott Peterson 13256; Michael Provenzale 17157; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Phillip Wooten 17656; Brian Weidman 17894; Adam Williams 17893; Catherine Rigdon 17897; Rochelle Mortenson 17898; Sophie Duncan 17901; Francesca Felgar 17902.

BIDDING METHODS

HERITAGE Live!®¹ Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

Live Floor Bidding

Bid in person during the floor sessions.

Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. HA.com/1265

Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Direct Client Service Line: 866-835-3243

HERITAGE AUCTIONS

HA.com

Dear Bidder,

Welcome to Dallas for our final U.S. Coins Signature event of 2017! This is an extra-busy time at Heritage's World Headquarters, having just completed November's presentation of the Eric P. Newman Collection Parts VII, VIII, and IX (currency and U.S. Coins), plus our traditional November Signature event. The combined prices realized from these auctions topped \$16.5 million, with the Eric P. Newman coin and currency lots representing more than \$6.5 million of the impressive total.

Now, we are back in Dallas for a December auction (also held here at our headquarters located at 3500 Maple Avenue). Collectors and dealers alike will find this auction the perfect opportunity to adjust their holdings prior to year-end, and to prepare for January's upcoming FUN show.

Here are just a few highlights of what promises to be an active and interesting auction, headlined by a pair of exceptional high-grade dimes:

- **LOT 3047:** 1805 Draped Bust dime, MS66+ PCGS CAC, vibrantly lustrous JR-2 variety, few are finer.
- **LOT 3049:** 1858-S Seated dime, MS66 NGC, one of the top three specimens known of this key San Francisco date, Fortin-101, high R.7 in Premium Gem condition.
- **LOT 3009:** An 1848 Original half cent, PR65 Red and Brown PCGS CAC. The former Garrett Specimen, B-1 variety, a Condition Census coin with generous amounts of mint red, most recently Ex: The Missouri Cabinet.
- **LOT 3229:** 1878 three dollar gold, MS67+ PCGS. Although a readily available date in the series, it is very rare in this high-end Superb Gem grade — an “eyeful” with scintillating color and luster, an extraordinary type coin.
- **LOT 3247:** A rare 1842-C Small Date half eagle, AU58 NGC, as an issue called “the rarest collectible coin from Charlotte” by Doug Winter, with great color in near-Mint State condition.
- **LOT 3392:** 1852/1 Humbert twenty dollar gold piece, AU58 NGC, Kagin-9 variety, the first Assay Office twenty. Rare (R.6) Territorial gold type.
- **LOT 3396:** 1854 Kellogg twenty, AU58 NGC CAC, Kagin-2 variety, with outstanding original color.

Session 1 is the Premier Session, scheduled for Thursday evening (December 7) at 6:00 p.m. Central Time, with 400 high-value lots that represent a cross section of federal coinage. On Friday afternoon, Session 2 features Colonials through dollars, while the Friday evening Session 3 includes gold coinage, patterns, and commemoratives. Our popular Signature® Internet Session follows on Sunday, December 10.

As always, we welcome all of our friends, clients, and dealer associates to Dallas. We are pleased to personally assist you with lot viewing, buying, selling, consigning, or simply answer any questions you might have. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!®.

Good luck and best wishes during the holiday season!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

Errors	8279-8285
Ingots	4053

SESSION ONE

COLONIALS

1652 Pine Tree Sixpence, XF45
Sharp and Well-Centered Noe-33

- 3001** 1652 Pine Tree Sixpence, Pellets at Trunk, XF45 NGC. Noe-33, W-670, Salmon 2-B, R.3. 31.4 grains. The obverse die is displaced only slightly upward on this Choice XF example, with the inscription partially visible between 11 and 1 o'clock, and mostly visible before and after. A steel-gray and blue example with finely granular surfaces and surprisingly crisp motifs for the assigned grade. The planchet shows a hint of waviness from the rocker dies. Listed on page 41 of the 2018 *Guide Book*. Census: 4 in 45, 8 finer (10/17). NGC ID# BYVT, PCGS# 45367 Base PCGS# 22

1778-79 Rhode Island Ship Token, XF45
Important Pewter Emission

- 3002** 1778-79 Rhode Island Ship Token, Wreath Below, Pewter, XF45 NGC. W-1745, High R.6. Two varieties are known in pewter, W-1735 with VLUGTENDE removed, and W-1745 with a branch placed in the position of that word. The *Whitman Encyclopedia of Colonial and Early American Coins* reports the respective rarities as URS-3 (three to four known) and URS-5 (nine to 16 known) for the two varieties. This Choice XF example features pleasing surfaces with dark brownish-gray patina and respectable eye appeal. Very slight corrosion on each side is typical of these pewter pieces. Listed on page 52 of the 2018 *Guide Book*. Census: 1 in 45, 1 finer (10/17). NGC ID# 2AUN, PCGS# 585

1776 Continental Dollar, XF Details
Pewter, Newman 3-D

1796 One Half Penny Token, PR64 Brown
Copper Company of Upper Canada
Myddelton Token Mule, W-8910

- 3003** 1776 Continental Dollar, CURRENCY, Pewter, EG FECIT — Obverse Scratched, Cleaned — NGC Details. XF. Newman 3-D, W-8460, R.4. A circular die crack connects seven rings from 12 o'clock to 5 o'clock on this nicely detailed Continental dollar. The light gray centers of this example gradually change to deeper gray near the borders. The obverse is scratched between the inner and outer rings from 12:30 to 4:30. After much speculation throughout the 19th and early 20th centuries, Eric P. Newman was able to attribute the initials EG as Elisha Gallaudet (1730-1805), a New York silversmith and engraver.

1787 Connecticut Copper, MS62 Brown
Miller 33.29-gg.1, ETLIR

- 3004** 1787 Connecticut Copper, ETLIR, MS62 Brown NGC. M. 33.29-gg.1, W-3810, R.5. Of the 15 ETLIR varieties, only three are generally considered available, and several are distinct rarities. This variety is decidedly scarce, although it is not so rare as to be uncollectible. This piece shows a relatively well-centered strike and smooth glossy brown surfaces. The die state is late, with bulges at 7 and 9 o'clock on the obverse. The seated figure on the reverse is weakly struck, as seen to some extent on virtually all Connecticut coppers. No distracting marks are seen. NGC ID# 2B36, PCGS# 391

- 3005** 1796 Copper Company of Upper Canada, Half Penny Token, W-8910, R.7, PR64 Brown PCGS Secure. The obverse of the Copper Company of Upper Canada One Half Penny token is from the identical die used for the Myddelton tokens with the legend BRITISH SETTLEMENT KENTUCKY. The reverse is inscribed COPPER COMPANY OF UPPER CANADA at the center, with ONE HALF PENNY around. The *Whitman Colonial Encyclopedia* assigns a rarity rating of URS-4, meaning that just five to eight examples are known. This lovely walnut-brown piece has mirrored surfaces and bold design motifs, and exhibits exceptional aesthetic appeal despite faint hairlines and trivial surface marks. Listed on page 79 of the 2018 *Guide Book*. NGC ID# 2B66, PCGS# 646

1791 Washington Liverpool Halfpenny, AU58
W-10650, Copper, Conditionally Rare

- 3006** 1791 Washington Liverpool Halfpenny, Copper, AU58 PCGS. Baker-17, W-10650, Musante GW-19, R.6. Ex: Garrett. The 1791 Liverpool halfpenny is sometimes confused with the 1793 Ship halfpenny, but the former is much rarer. This lightly marked golden-brown representative shows the die rust and reverse breaks that are characteristic of the issue. The strike is sharp for the issue, with nearly complete definition on Washington's epaulets. An opportunity to acquire an example pedigreed to one of the most prestigious collections of early American coinage. Listed on page 83 of the 2018 *Guide Book*. Population: 3 in 58, 1 finer (10/17). Ex: Garrett Collection, Part IV (Bowers and Ruddy, 3/1981), lot 1708; Jones Beach Collection (Heritage, 1/2007), lot 750, which realized \$25,300; FUN Signature (Heritage, 1/2017), lot 3041. NGC ID# 2B7H, PCGS# 698

HALF CENTS

1807 C-1, B-1 Half Cent, MS63 Brown
Usual Late Die State

- 3007** 1807 C-1, B-1, R.1, MS63 Brown PCGS. CAC. Manley Die State 3, as usual. The fields are rough from die wear, and the dentilation is mostly eroded away. The reverse peripheral legend merges with the rim in places. Satiny, lustrous surfaces display attractive walnut-brown color with hints of reddish underlying luster. A lack of major abrasions increases the appeal. A small point of verdigris is visible between the LF in HALF. Our EAC grade AU55. NGC ID# 222K, PCGS# 35203 Base PCGS# 1104

1811 C-2, B-2 Half Cent, XF40
Close Date

- 3008** 1811 Close Date, C-2, B-2, Low R.3, XF40 PCGS. This intermediate die state, Manley State 2.0, has light clash marks behind the head and elsewhere. Chocolate-brown surfaces exhibit orange-tan patina on this smooth and pleasing half cent key. Both sides exhibit unidentified residue within various design elements, including the stars and letters. Our EAC Grade VF20. NGC ID# 222S, PCGS# 35242 Base PCGS# 1135

PROOF BRAIDED HAIR HALF CENT

1848 Original Half Cent, PR65 Red and Brown
 Condition Census B-1
 The Garrett Specimen

3009 1848 Original, B-1, Low R.6, PR65 Red and Brown PCGS. CAC. Ex: Missouri Cabinet Collection. Any condition census is subject to the opinion of that person who prepares the compilation. Rick Coleman, in his detailed study of proof half cents, records this piece first in his roster, ahead of all others. Walter Breen and Jon Hansen, in their condition census published in Walter Breen's *Half Cent Encyclopedia*, list this piece fifth in their roster, but all examples carry the same "Proof" grade. This Red and Brown Gem is well within the Condition Census, and likely the second or third finest known example. Walter Breen recorded 13 known proofs, including two that he attributed as "Restrike Series VII." Most others classify those pieces alongside Original proofs, and today we believe that just over two dozen of these 1848 Original proof half cents exist.

Considerable mint red remains on the reflective surfaces with splashes of blue toning on the reverse. Identifying spots are noted left of the 1, right of the lower hair bun, and at the top of the head below and right of star 7. This piece exhibits a full strike as expected, with mild field reflectivity. Our EAC grade PR63.

Ex: T. Harrison Garrett (circa 1890s); John Work Garrett; Garrett Estate; Johns Hopkins University (Bowers and Ruddy, 11/1979), lot 41; R.E. Naftzger, Jr.; Auction '89 (Stack's, 7/1989), lot 1525; R. Tettenhorst; Missouri Cabinet (Goldberg Coins, 1/2014), lot 186. PCGS# 1297

LARGE CENT

1812 S-291, B-1 Cent, AU58
Late Die State

3010 1812 Small Date, S-291, B-1, R.2, AU58 PCGS. Breen Die State IV, with heavy obverse cracks and a small chip on the right side of the 2. Although cleaned and retoned, this Classic cent has intermingled burgundy and olive-brown on the obverse, with pale orange and olive-brown on the reverse. Our EAC grade XF45. NGC ID# 224W, PCGS# 36502 Base PCGS# 1561

PROOF LARGE CENT

1849 N-30 Cent, PR63 Brown
Few Proofs Known

3011 1849 PR63 Brown PCGS. N-30, R.6, R.7 as a Proof. Grellman Die State a, without reverse die crumbling inside the N of ONE. A glass reveals myriad obverse die lines. There is a difference of opinion among specialists regarding the proof status of these coins that were once attributed as N-1 proofs, but now correctly identified as N-30. The obverse is the same die as N-1, but the reverse is a die that was unknown to Newcomb.

Bob Grellman believes that all are business strikes. However, the cataloger agrees with Denis Loring who records a small number of proofs in his census. This sharply struck piece has underlying mint red beneath bluish-brown patina on each side. The few scattered marks on each side are entirely inconsequential. Our EAC grade PR60. NGC ID# 226Y, PCGS# 1976

FLYING EAGLE CENT

1857 Flying Eagle Cent, MS65+
Minor Doubled Die Obverse

- 3012 1857 MS65+ PCGS. CAC. Snow-14, Doubled Die Obverse.** This is a tan-pink representative with richly frosted surfaces and no strike weakness. Whispers of honey-tinged patina are scattered about, and no distracting abrasions are seen. Two small flecks above the date serve as pedigree markers. This obverse is die-doubled clockwise on the the peripheral legend.

Ex: Santa Clara Signature (Heritage, 11/2001), lot 5158. NGC ID# 226P, PCGS# 2016

PROOF FLYING EAGLE CENT

Proof 1856 Flying Eagle Cent, AU Details
Less Often Seen Snow-3 Variety

- 3013 1856 Snow-3 — Improperly Cleaned — NGC Details. Proof, AU.** Rick Snow estimates that only about 20% of known 1856 Flying Eagle cents represent the Snow-3 die pair. Repunching on the 5 in the date is an aid in attributing the obverse, while the reverse is identified by the placement of ONE CENT in relation to the wreath leaves. NGC calls this piece cleaned, although the subdued, satiny luster is likely not much different than what the coin originally had; Snow-3 is known for satin luster and often incomplete details. This bronze-colored example is well-struck and shows pleasing eye appeal.

INDIAN CENTS

1877 Cent, MS63 Brown
Key Date

- 3014 1877 MS63 Brown NGC.** Olive-green, golden-brown, and deep russet hues make up the Brown designation on this Select Uncirculated 1877 Indian cent. The top three headdress feathers exhibit slight weakness, but the strike is otherwise bold. Light abrasions define the grade. Sought-after key-date coins, circulation-strike 1877 cents can be identified by a shallow N in ONE. Census: 31 in 63 Brown, 39 finer (10/17). NGC ID# 2284, PCGS# 2127

1891 Cent, MS66 Red
Among the Finest Certified

- 3015 1891 MS66 Red PCGS.** All Premium Gems certified by PCGS are Red coins, and these are the finest at that service. This piece displays a sharp strike and frosty cartwheel luster. Deep copper-red interiors transition to brighter gold in the margins. A single speck rests at the base of the T in CENT. A rare Registry Set candidate. Population: 19 in 66 (3 in 66+) Red, 0 finer (10/17). NGC ID# 228K, PCGS# 2180

LINCOLN CENTS

1909-S VDB Cent, MS66 Red and Brown
Luminous Mint Luster

- 3016 1909-S VDB MS66 Red and Brown PCGS.** This high-end 1909-S VDB cent displays sharp design elements and satiny golden luster. Subtle amber overtones on each side account for the Brown aspect of the grade, although the surfaces heavily lean Red. Red and Brown examples of this key date are scarce in this grade and almost unknown finer, although the Red category is more heavily populated. NGC ID# 22B2, PCGS# 2427

1909-S VDB Lincoln Cent, MS65+ Red
Low-Mintage, First-Year Key

- 3017** 1909-S VDB MS65+ Red PCGS. The acquisition of a nice 1909-S VDB cent represents the pinnacle of achievement for collectors who specialize in this series. It claims a famously low mintage of 484,000 coins. Intense copper-orange hues color the majority of each side, yielding to occasional cherry-red and mint-green accents. Additional attributes include needle-sharp detail, minimal carbon spots, and vibrant mint frost. NGC ID# 22B2, PCGS# 2428

1914-D Lincoln Cent, MS65
Well-Preserved Red and Brown Example

- 3018** 1914-D MS65 Red and Brown PCGS. The original red surfaces of this impressive Gem have mellowed to light brown in many areas, but few signs of contact and no carbon spots are evident. The mint luster is somewhat subdued by the patina but the design elements are sharply detailed throughout. Population: 62 in 65 (2 in 65+) Red and Brown, 4 finer (10/17).
Ex: New York Signature (Heritage, 10/2015), lot 3058. NGC ID# 22BH, PCGS# 2472

1914-D Lincoln Cent, MS64 Red
Elusive Early Series Issue

- 3019** 1914-D MS64 Red PCGS. CAC. Satiny original mint luster gives each side of this near-Gem red 1914-D Lincoln cent an amber-tinged copper-orange hue, while a lack of any severe abrasions defines the grade. The coin is well-struck, and a few scattered flecks are not bothersome. Finer Red examples of this key Denver issue are scarce. NGC ID# 22BH, PCGS# 2473

1955 Doubled Die Obverse Cent
CAC-Approved MS64 Red

- 3020** 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. CAC. This remarkable *Guide Book* variety is collectible in MS64 Red but genuinely rare in Gem condition, even without a Red designation. This CAC-endorsed near-Gem is housed in a green label holder and has outstanding original copper-red luster and a bold strike. A few minor flecks are of low impact and fade from view entirely at certain angles. NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

1992-D Cent, MS65 Red
Close AM *Guide Book* Variety

- 3021** 1992-D Close AM, FS-901, MS65 Red NGC. The bases of the AM in AMERICA touch on this scarce *Guide Book* variety, and the designer's initials are more distant from the Lincoln Memorial than on the common variety. This Gem Red coin displays satiny, carbon-free surfaces and good eye appeal. The strike is weak along the base of Lincoln's portrait and through STATES OF on the reverse. NGC has certified four examples in MS65 Red and none finer (10/17). NGC ID# 22JJ, PCGS# 391429 Base PCGS# 83101

PROOF LINCOLN CENTS

1913 Lincoln Cent, PR67 Brown
Popular Matte Proof Type

- 3022** 1913 PR67 Brown PCGS. CAC. What was largely viewed with contempt in the early 19th century is now a challenging and popular collectible. The matte proof Lincoln cents of 1909 to 1916 were struck in limited quantities that exceeded 4,000 coins (barely) on only one occasion. The 1913 matte proof's mintage was 2,983 pieces. This Superb Gem is tied with one other PR67 PCGS coin as the finest certified in the Brown color category (10/17). The coin is razor-sharp and nearly perfect. Rich burgundy-brown toning with reddish undertones conceals a few insignificant specks. NGC ID# 22KW, PCGS# 3315

1990 No S Cent, PR68 Red Deep Cameo
A Magnificent Example

- 3023** 1990 No S, FS-101, PR68 Red Deep Cameo PCGS Secure. A popular modern mint error, this proof San Francisco issue is missing its mintmark. The intrigue of this variety is that the missing mintmark was apparently unnoticed despite the numerous quality checks that proof dies went through in 1990. The present coin is nearly pristine and displays stark cameo contrast. Under a strong loupe, tiny traces of the zinc core are visible on the edges of the letters in ERICA on the reverse. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

1990 No S Cent, PR69 Red Deep Cameo
None Known Finer

- 3024** 1990 No S, FS-101, PR69 Red Deep Cameo PCGS. As of yet, not a single 1990 No S Deep Cameo proof cent has achieved the PR70 Red grade, and PR69 Red representatives are rare in a PCGS holder. This example displays picture-perfect contrast and seemingly flawless preservation. The devices are fully rendered. The 1990 No S proof cent is one of the keys to the proof Registry Set, particularly in this exalted grade. Population: 50 in 69 Deep Cameo, 0 finer (10/17). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

1990 No S Cent, PR69 Red Deep Cameo
Among the Finest Known

- 3025** 1990 No S, FS-101, PR69 Red Deep Cameo PCGS. A small number of 1990 proof sets were issued with cents that lacked the S mintmark of the San Francisco mint that struck them. Only 50 examples of this *Guide Book* variety are certified PR69 Red Deep Cameo at PCGS, and none are finer (10/17). This piece is fully struck and lovely copper-red in color with stark contrast. An important Registry Set candidate. Includes the original cardboard Mint box and certificate, plus the other four coins from the proof set, uncertified; the nickel, dime, quarter, and half dollar are brilliant and contrasted. (Total: 5 coins) NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECE

1864 Two Cent Piece, MS65 Red
High-End Small Motto Coin

- 3026** 1864 Small Motto, FS-401, MS65 Red PCGS. The 1864 Small Motto two cent piece is a *Guide Book* variety collected as a separate issue from the available Large Motto variant. It is one of the two key issues in the series along with the 1872. Small Motto coins are sought-after in all grades, but only in Red Mint State is the scarcity of the variety fully realized. PCGS has certified only 45 Red Uncirculated Small Motto two cent pieces, mostly clustered in MS64 and MS65. This Gem displays frosty copper-red luster and remarkably well-preserved surfaces. The strike is sharp, and only a few unimportant flecks are seen under a loupe. Housed in an old "rattler" holder. Population: 0 in 65 Red, 0 finer (10/17). PCGS# 38234 Base PCGS# 3581

PROOF THREE CENT SILVER

1863/2 Three Cent Silver, Toned PR64

- 3027** 1863/2 PR64 PCGS. Ex: The Strong: Nat. Mus. of Play. The so-called 1863/2 *Guide Book* variety, which PCGS has long authenticated. Raised metal connects the lower loop of the 3 to the middle of the numeral. This near-Gem proof displays full detail and deep sea-green and gold toning, which allows subtle cameo contrast on each side. Population: 11 in 64, 8 finer (10/17). NGC ID# 22ZP, PCGS# 3713

PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR66+
CAC-Approved Ultra Cameo

- 3028** 1865 PR66+ Ultra Cameo NGC. CAC. With only 15 Ultra Cameo proofs certified at NGC, the numeric grade is a secondary consideration to finding one of these coins at all. Nonetheless, this high-end Premium Gem, with CAC endorsement, is something special. Brilliant surfaces display dramatic field-device contrast and razor-sharp detail. The preservation is virtually flawless. Census: 5 in 66 Ultra Cameo (1 in 66+), 3 finer. CAC: 3 in 66, 1 finer (10/17). NGC ID# 52MV, PCGS# 93761

1876 Three Cent Nickel, PR66
Elusive Deep Cameo Example

- 3029** 1876 PR66 Deep Cameo PCGS. CAC. This delightful Premium Gem proof exhibits strongly impressed design elements, but some detail in the wreath is incomplete, due to lapping. The deeply mirrored fields contrast boldly with the frosty devices to produce a stunning cameo effect. Virtually pristine surfaces add to the terrific eye appeal. From a proof mintage of 1,150 pieces. PCGS# 93772

1882 Three Cent Nickel, PR68
None Certified Finer

- 3030** 1882 PR68 PCGS. A mintage of 3,100 proof three cent nickels was accomplished in 1882. Few examples can match the quality and eye appeal of this incredible PR68 example with sharply detailed design elements and impeccably preserved surfaces. The dusky fields are reflective and eye appeal is terrific. Housed in a green label holder. Population: 7 in 68, 0 finer (10/17). NGC ID# 2764, PCGS# 3778

PROOF SHIELD NICKEL

1877 Shield Nickel, PR66+ Cameo
Proof-Only Key Issue

- 3031** 1877 PR66+ Cameo PCGS. CAC. The Shield nickel was only struck in proof format in 1877, when a meager mintage of 900 pieces was accomplished. High-grade specimens with cameo contrast are quite elusive. This delightful Plus-graded Premium Gem exhibits sharply detailed, frosty design elements that contrast boldly with the reflective fields. Impeccably preserved surfaces add to the outstanding eye appeal. NGC ID# 276U, PCGS# 83831

PROOF LIBERTY NICKEL

1883 Liberty Nickel, PR67+
Famous No Cents Issue

- 3032** 1883 No Cents PR67+ PCGS. CAC. Despite producing numerous transitional patterns during the previous two years, the lack of the word CENTS on the reverse went unnoticed, or was considered unimportant. Unfortunately, some unscrupulous con men took advantage of the situation and gold plated some of these pieces to pass them off as half eagles. This oversight was corrected later in the year. This Plus-graded Superb Gem exhibits sharply detailed design elements and the fields are deeply reflective. The impeccably preserved surfaces show highlights of greenish-gold and lavender toning. NGC ID# 22PU, PCGS# 3878

BUFFALO NICKELS

1914 Buffalo Nickel, MS67
Outstanding Luster and Toning

- 3033** 1914 MS67 PCGS. Subtle hints of violet and pale gold toning visit the impeccably preserved surfaces of this spectacular Superb Gem, with vibrant mint luster over both sides. The design elements are sharply detailed throughout and the overall eye appeal is terrific. Population: 32 in 67 (1 in 67+), 0 finer (10/17). NGC ID# 22R4, PCGS# 3924

1918-D Buffalo Nickel, MS65
Excellent Strike Quality

- 3034** 1918-D MS65 PCGS. CAC. Struck from fresh dies with impressive sharpness at the borders and only the slightest weakness on the bison's shoulder. Champagne-gold toning warms unabraded surfaces, and eye appeal is outstanding. The 1918-D is scarce in this grade and rare finer, often overshadowed by its famous overdate counterpart. Population: 74 in 65 (4 in 65+), 28 finer. CAC: 14 in 65, 6 finer (10/17). NGC ID# 22RH, PCGS# 3938

1920-S Buffalo Nickel, MS65
Remarkable Surface Quality
Delicate Pastel Toning

- 3035** 1920-S MS65 PCGS. A certain combination of strike sharpness and surface quality is required for a Buffalo nickel to warrant an MS65 grade, a combination seldom seen on the 1920-S. This issue is a rarity in Gem condition and extremely rare any finer. Here is a pastel-toned example with delicate lavender, ice-blue, and champagne hues. The centers are not quite full but do exhibit above-average definition. Under a loupe, the remarkable surface quality is immediately apparent. Of the Gem 1920-S nickels that we have handled over the years, only a small fraction have been PCGS-certified. Moreover, this is among the most attractive examples we have seen to date. Population: 26 in 65 (1 in 65+), 1 finer (10/17). NGC ID# 22RS, PCGS# 3946

1921-S Nickel, Golden-Toned MS64
Better San Francisco Issue

- 3036 1921-S MS64 PCGS. CAC. The strike is remarkably sharp on this near-Gem, particularly on the hair above the Indian's braid, despite heavy die erosion on each side that produces flowlines and softens minute details. Warm golden toning graces each side and there are no major abrasions. Finer 1921-S nickels are scarce, and this San Francisco issue is a better date overall. NGC ID# 22RU, PCGS# 3948

1921-S Nickel, Lightly Toned MS65

- 3037 1921-S MS65 PCGS. The 1921-S Buffalo nickel is a better date in all grades and is genuinely scarce in MS65. This Choice example remains collectible for the average enthusiast. Heavy metal flowlines appear in the fields on each side, and the obverse exhibits numerous small die cracks extending inward from the rims. Satiny luster displays warm golden toning, and no abrasions are apparent to the unaided eye. NGC ID# 22RU, PCGS# 3948

1927-D Nickel, MS65
Few Pieces Available Finer

- 3038 1927-D MS65 PCGS. CAC. This Gem 1927-D is well-preserved and satiny with yellow-gold and mint-green toning overall. The strike is weakly executed on the bison's shoulder and the Indian's hair. Some metal flowlines in the fields denote worn dies, as usual. Finer 1927-D nickels are rarely encountered. Population: 89 in 65 (11 in 65+), 7 finer. CAC: 23 in 65, 1 finer (10/17). NGC ID# 22S9, PCGS# 3961

1937-D Three-Legged Nickel, MS64
FS-901, Perennial Collector Favorite

- 3039 1937-D Three-Legged, FS-901, MS64 NGC. This long-time *Guide Book* listing is a perennial fan-favorite. The missing leg was eliminated by die lapping on this Choice example. Each side is satiny nickel-gray, and while the obverse is well-struck with minor die erosion near the rims, the reverse lacks bold detail on the bison's head. A couple of stray ticks limit the grade, but they are of little consequence. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Buffalo Nickel, MS64
FS-901, Three-Legged

- 3040 1937-D Three-Legged, FS-901, MS64 NGC. This famous polished die variety characteristically exhibits moderate die erosion, as a late die state is what prompted the inadvertent polishing away of the bison's forward leg. This piece exhibits the usual die erosion in the recesses and has satiny golden luster. Well-struck with minimal abrasions.
Ex: Houston Signature (Heritage, 12/2015), lot 3075. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS64+
Impressively Well-Struck

- 3041 1937-D Three-Legged, FS-901, MS64+ PCGS. The bison's right front leg is effaced by die lapping on this ever-popular variety, while the fields and recesses of the Indian portrait show metal flowlines from die fatigue. The mintmark is clear, and this piece is remarkably sharp on the central devices where incomplete details usually are apparent. This high-end near-Gem will please the Buffalo nickel specialist who appreciates the difficulty of finding a 1937-D Three-Legged nickel with decent eye appeal. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF JEFFERSON NICKEL

1940 Jefferson Nickel, PR68
Reverse of 1940

- 3042 1940 Reverse of 1940, PR68 NGC. CAC. The Reverse of 1940 has sharply defined steps on Monticello, while the older Reverse of 1938 is not well-defined in this area. This magnificent PR68 specimen exhibits sharp definition throughout, with deeply reflective fields and impeccably preserved surfaces, under shades of sea-green and ice-blue toning. Census: 6 in 68 (2 in 68★), 1 finer. CAC: 3 in 68, 0 finer (10/17). NGC ID# 279Z, PCGS# 4177

BUST HALF DIME

1834 Half Dime, Splendid MS67
V-1, LM-2, Vibrant Gold and Indigo Toning

- 3043 1834 V-1, LM-2, R.1, MS67 NGC. This is a beautiful Superb Gem coin with a rich and natural color scheme, ranging from deep-gold to indigo — reminiscent of coins that resided in a carefully preserved Wayte Raymond album or coin board, acquiring the vibrant hues from the sulfite-infused paperboard. Glowing luster and a strong strike only serve to further the visual appeal. To date, the major grading services have certified no 1834 half dimes in a numerically finer grade, regardless of variety. Census: 7 in 67 (1 in 67★), 0 finer (10/17). NGC ID# 232G, PCGS# 38702 Base PCGS# 4281

SEATED HALF DIME

1853 Arrows Half Dime, MS67
Among the Finest Known

- 3044 1853 Arrows MS67 NGC. The With Arrows 1853 half dime is plentiful for type purposes, although Superb Gems are conditionally rare. This toned MS67 coin displays lavender and gold obverse toning with rose and aquamarine on the reverse. Sharply struck from heavily clashed dies and entirely unabraded. Census: 23 in 67 (8 in 67★), 0 finer (10/17). NGC ID# 233Y, PCGS# 4356

EARLY DIMES

1796 JR-2 Dime, Choice XF
Partially Reflective Fields

- 3045 1796 JR-2, R.4, XF45 PCGS. CAC. Ex: Indiana Collection. JR-2 is scarce and, like the other varieties of this date, is usually seen only well-worn or with environmental problems. This CAC-approved Choice XF example is a condition rarity. The grading services have only attributed a handful of JR-2 coins this fine, and CAC, which does not distinguish between die varieties, has only green-stickered six coins in this grade (11/17). The coin displays uniform, deep olive-gray patina with subtle hints of semireflectivity in protected portions of the fields. The strike is even and crisp, although minor softness occurs on the eagle's head and breast, and on the central part of Liberty's hair curls. Light clash marks add character to otherwise smooth, problem-free surfaces. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

1800 JR-2 Dime, Sharp MS62
Excellent Eye Appeal

3046 1800 JR-2, R.5, MS62 PCGS. Just two die marriages exist for the 1800 dimes, both sharing the same obverse with different reverses. JR-2 is the later die stage of the obverse, paired with a reverse that shows field star 12 clamped between the beaks of the eagle. The same reverse is later employed on the 1801 JR-1 dimes. A die break and lump between 1 and 8 in the date confirms the JR-2 obverse.

As a variety, JR-2 is slightly more available than its 1800 JR-1 counterpart, but only in lesser grades. All Mint State 1800 dimes are rarities. This MS62 example is exceeded by only a handful of specimens at PCGS. Dappled amber-gold toning intermixes with lilac and bright-silver areas on the obverse, while the reverse is a bit more toned in the same shades. A strong strike on the devices counterbalances lightly abraded fields. Star 1 is spindly from die lapping. This lightly toned example offers nice eye appeal and is an important opportunity for the advanced early dime specialist. Population (both varieties combined): 4 in 62, 4 finer (10/17). NGC ID# 236H, PCGS# 38755 Base PCGS# 4470

1805 Draped Bust Dime, MS66+
Four Berries Reverse, JR-2
Registry Set Contender

3047 1805 4 Berries, JR-2, R.2, MS66+ PCGS. CAC. From a reported mintage of 120,780 pieces, the 1805 Draped Bust dime is probably the most available date in the series. Only two die varieties are known for the date and this coin represents the more available JR-2 pairing, with four berries in the branch on the reverse. The obverse die was used previously to strike the JR-1 variety of this date and the reverse may have been a left over die from 1798, as it employs the old style narrow A's and small stars arranged in a diagonal pattern.

The 1805 Draped Bust dime has been a popular issue with collectors since the earliest days of the hobby and examples began appearing at auction at least as early as lot 280 of the A.C. Kline Sale (Moses Thomas & Sons, 6/1855). Early catalogers were quick to notice the four berries reverse on the JR-2 variety and numismatists like Howard Rounds Newcomb began listing the 1805 "Four Berries" reverse as early as the catalog for the 1914 ANS Exhibition. The record price realized at auction for the issue is the \$188,000 brought by the MS67 PCGS Secure example in Heritage's ANA Signature sale in August of 2014.

The present coin is a high-end Premium Gem with sharply detailed design elements, aside from a touch of softness on some star radials. A spidery die crack is evident from the rim above B in LIBERTY to star 8, and some clash marks show at the top of the date. The well-preserved surfaces display mingled shades of greenish-gold, magenta, lavender-gray, and amber patina. Vibrant mint luster shines through the toning and eye appeal is outstanding. Few coins can match this combination of high technical quality, terrific visual appeal, and great historic interest. We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called. Population: 5 in 66 (2 in 66+), 3 finer (10/17).

Ex: ANA Signature (Heritage, 8/2015), lot 3990; ANA Signature (Heritage, 3/2016), lot 4791. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

SEATED DIMES

1856-S Seated Dime, MS62
Prooflike Mint State Rarity

3048 1856-S F-101, R.5, MS62 NGC. This piece is in a late stage of the F-101 die state but not quite all the way to the F-101a state. Faint die cracks are visible around the obverse border, but the defect under the flag of the 5 is still visible. Both sides have prooflike fields and sharp design elements. The coin is brilliant and has few abrasions. The 1856-S dime comes from a mintage of only 70,000 pieces and is rare in Mint State, with only four such coins at NGC in all grades. Census: 1 in 62, 2 finer (10/17). NGC ID# 238W, PCGS# 538089 Base PCGS# 4613

Sketch by Thomas Sully

Pencil Drawing by Christian Gobrecht

1858-S Dime, Fully Defined MS66
The Sole Finest Example at NGC
Low-Mintage Key Date

3049 1858-S F-101, R.5, MS66 NGC. Its low mintage and paltry survival rank the 1858-S among the most elusive dimes in the Seated Liberty series, especially in high grades. Only 60,000 pieces were struck, and nearly every coin experienced some degree of circulation in the West; certified examples average between VF30 and VF35. Approximately 300 to 350 coins survive, but the number of certified pieces amounts to just 145 coins at NGC and PCGS combined. Remarkably, there are only eight grading events in Mint State (10/17).

The finest-known examples are well-documented among Seated dime specialists: this piece, the MS66 PCGS coin (Ex: Gardner), and the Eliasberg piece, which has not been seen since that 1996 Bowers and Merena sale and may be the MS64 coin listed at NGC. The price record for this date is held by the PCGS Premium Gem, lot 30258 in our June 2014 Gardner Signature offering, which brought \$88,125. All three top examples are from the same die pair, Fortin-101, which is rated High R.7 in Mint State.

Pinpoint-sharp definition on the stars, Liberty's head, and the wreath is a hallmark of this incredible Condition Census rarity. The 1858-S is usually found "well struck" but with "distracting problems" per Brian Greer. This coin has the former quality with none of the latter. Brightly satiny surfaces show just a hint of delicate champagne toning, and the luster is vibrant. The overall desirability is indisputable. This coin presents a fantastic opportunity for the Seated dime specialist.

Ex: Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98257. NGC ID# 2393, PCGS# 538131 Base PCGS# 4618

1860-O Dime, Choice XF New Orleans Rarity

- 3050** 1860-O F-101, R.3, XF45 PCGS. CAC. Only 40,000 dimes were minted in New Orleans in 1860, and high-grade survivors are near the top of many Seated Liberty dime collectors' want lists. XF and AU coins are genuinely rare, and Mint State pieces are prohibitively so. This example offers surfaces that still have hints of luster, with tinges of ochre on the reverse and amber and ice-blue on the obverse. An appealing piece, lacking distractions. Population: 3 in 45, 8 finer. CAC: 2 in 45, 4 finer (10/17). Ex: *Central States Signature (Heritage, 5/2007)*, lot 296. PCGS# 538160 Base PCGS# 4632

1888-S Seated Liberty Dime, MS66 Extremely Rare Any Finer

- 3051** 1888-S F-110, R.3, MS66 PCGS. CAC. Deep ocean-blue, olive-green, cherry-red, and peach patina encompass this satiny and well-struck Premium Gem. The surfaces appear pristine aside from a small, bright area on the field below the TES in STATES. Fortin-110 is noteworthy for its low and right placement of the mintmark. Population: 4 in 66 (1 in 66+), 1 finer. CAC: 6 in 66, 0 finer (10/17). PCGS# 538792 Base PCGS# 4701

PROOF SEATED DIME

1856 Seated Liberty Dime, PR65 Small Date Variant

- 3052** 1856 Doubled Die Obverse, F-101, High R.6, PR65 PCGS. The mintage of the 1856 proof dime was unrecorded. The survival estimate is a minimal 30-40 pieces in all grades. This Gem example displays a full strike and deeply mirrored fields. The obverse is lightly doubled north, seen most easily in the lower gown area. A short die line is evident on the reverse from the rim to the R in AMERICA. A trace of light golden toning on each side is the only mentionable color. Population: 4 in 65, 3 finer (10/17). NGC ID# 23CA, PCGS# 538996 Base PCGS# 4745

PROOF BARBER DIMES

1896 Barber Dime, PR67 Cameo One Numerically Finer Coin at PCGS

- 3053** 1896 PR67 Cameo PCGS. CAC. Only 762 proof Barber dimes were struck in 1896, but the issue was well-produced and it has a relatively high survival rate. This magnificent Superb Gem offers sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The virtually pristine surfaces show subtle hints of pale gold and emerald-green toning. Population: 5 in 67, 10 in 67 (1 in 67+) Cameo, 3 in 67 Deep Cameo, 1 finer. CAC: 11 in 67, 1 finer (10/17). NGC ID# 23G9, PCGS# 84880

1904 Barber Dime, PR67 Cameo Only 670 Pieces Struck

- 3054** 1904 PR67 Cameo PCGS. A small mintage of just 670 proof Barber dimes was accomplished in 1904, and few survivors can match the quality and eye appeal of the present coin. This spectacular Superb Gem exhibits sharply detailed design elements, with a rich coat of mint frost that creates intense cameo contrast with the deeply mirrored fields. Spectacular shades of golden-brown and violet toning visit the impeccably preserved surfaces. Population: 5 in 67 (1 in 67+) Cameo, 0 finer (10/17). NGC ID# 23GH, PCGS# 84888

MERCURY DIMES

1918-S Dime, MS65 Full Bands An Exceptional Strike

- 3055** 1918-S MS65 Full Bands PCGS. CAC. In Gem condition, Full Bands 1918-S Mercury dimes are rare, and finer pieces are exceedingly so. This satiny example is not only sharp on the central fascies, but the strike is full throughout. The obverse displays mottled gold, lavender, and blue toning, while the reverse is lemon-gold and sea-green. Extremely rare this fine with a CAC green label. Population: 25 in 65 Full Bands, 19 finer. CAC: 4 in 65, 5 finer (10/17). NGC ID# 23H7, PCGS# 4921

1921-D Dime, MS65 Full Bands
Remarkably Sharp Strike

- 3056 1921-D MS65 Full Bands NGC.** This semikey Denver issue is elusive and sought-after in Mint State Full Bands, particularly in Gem condition. This satiny coin displays a trace of light golden color and is devoid of obtrusive abrasions. The strike can only be described as full — even the date and peripheral legends are sharply defined. Higher-grade Full Bands examples of the 1921-D will be out of reach for most collectors. Census: 39 in 65 (1 in 65+) Full Bands, 15 finer (10/17). NGC ID# 23HF, PCGS# 4937

1926-S Dime, MS65 Full Bands
Better Date in High Grade

- 3057 1926-S MS65 Full Bands PCGS.** The full fasces bands are only part of the sharp strike that adorns this Gem 1926-S dime. Brilliant interiors cede to russet-gold border toning. Only a few tiny luster grazes limit an even finer grade. In Full Bands, the 1926-S Mercury dime is scarce regardless of grade, but Gems are rare, and finer pieces are exceedingly so. Population: 27 in 65 Full Bands, 13 finer (10/17). NGC ID# 5LX7, PCGS# 4959

1927-D Mercury Dime, MS66
Rare Full Bands Example

- 3058 1927-D MS66 Full Bands PCGS.** The 1927-D Mercury dime claims a modest mintage of 4.8 million pieces and the issue is quite difficult to locate in higher Mint State grades, with the Full Bands designation. The U.S. Mint tried to extend die life in the 1920s, by spacing the dies farther apart than in earlier years. This reduced impact-stress during striking, but was not optimum for bringing up design detail. The Mint also continued to use the dies long after they began to show wear and deterioration, resulting in blending of the bands on the fasces and flattening of the letters in the peripheral legends.

The present coin is a spectacular Premium Gem, with a better-than-average strike that shows fully split and rounded bands on the fasces. The central design elements are sharply detailed, but even this coin shows some slight flattening of the letters in the legends near the border. The well-preserved surfaces radiate vibrant mint luster, with a few subtle hints of greenish-gold toning. Population: 16 in 66 (1 in 66+) Full Bands, 0 finer (10/17). NGC ID# 23HV, PCGS# 4963

1942/1-D Dime, MS63 Full Bands
Popular Guide Book Variety

- 3059** 1942/1-D FS-101 MS63 Full Bands PCGS. Interestingly, most Mint State examples of this variety are in the Full Bands category, and the 1942-D dime in general is well-represented with a sharp central strike. This piece is bold and satiny, showing tinges of deep olive toning near the borders and silvery brilliance in the centers. Light handling marks determine the grade but are not distracting. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

PROOF TWENTY CENT PIECE

1878 Twenty Cent Piece, PR64
Final Proof-Only Issue

- 3060** 1878 PR64 PCGS. BF-1, R.3. The short-lived twenty cent denomination came to an end in 1878, with a final proof-only mintage of 600 pieces. This impressive Choice specimen offers sharply detailed design elements and reflective fields, under vivid shades of greenish-gold, lavender-gray, and violet toning. The well-preserved surfaces add to the attractive overall presentation. PCGS has graded 38 numerically finer examples (10/17). NGC ID# 27H5, PCGS# 5306

EARLY QUARTER

1806 Draped Bust Quarter, MS63
Browning-9, Terminal Die State

- 3061** 1806 B-9, R.1, MS63 NGC. Tompkins Die State 6/5, the latest obverse and reverse die states recorded in that reference. The obverse shows a bisecting rim-to-rim crack from the 1 in the date to the E in LIBERTY. A second crack from the rim to the drapery joins the first crack behind the neck.

Both sides display extensive clash marks, and the reverse has a number of small rim breaks. The date is notably clashed at TES OF. This lovely Select Uncirculated quarter exhibits gray-gold toning over ivory luster with delicate blue overtones. Trivial marks limit the grade but fail to diminish the eye appeal. Census (all varieties): 9 in 63 (1 in 63+), 15 finer (10/17). NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

BUST QUARTERS

1831 Small Letters Quarter, B-2, MS64
First-Year Reduced Size Type Coin

- 3062** 1831 Small Letters, B-2, R.2, MS64 PCGS. Tompkins Die State 2/4. The fields of this richly toned near-Gem example are prooflike, although the effect is diminished by the intense blue and umber toning that blankets both sides. Struck during the first year of the close collar, reduced diameter quarters, this Browning-2 example displays a Small Letters reverse with numerous die cracks that circumnavigate the outer edges of the letters and arrowheads. A sharply struck Choice Uncirculated example with original surfaces, nearly free of marks and quite pleasing. Population (Small Letters varieties): 66 in 64 (7 in 64+), 17 finer (10/17). NGC ID# 23RW, PCGS# 38981 Base PCGS# 5348

1834 B-4 Quarter, MS66
Marvelous Toning and Preservation
The Eugene Gardner Specimen

- 3063** 1834 B-4, R.1, MS66 NGC. Tompkins Die State 1/3. The left edge of the curl is over the left side of the 4. The eagle has no tongue, and the second T in STATES is low. Extensive die cracks encircle portions of the reverse periphery, although the obverse is devoid of cracks in this middle die stage. The obverse die was also used for marriages and remarriages of different reverse dies to create the 1834 B-3 and 1834 B-5 varieties, and specialists can track the progress of the various die cracks known via those matings.

This richly toned Premium Gem shows a profusion of silver, gold, violet, and mauve. Lavender shades tinged with jade further enliven the lustrous surfaces that are extremely well-preserved and equally well-struck. A loupe is needed to observe tiny ticks on Liberty's cheek, but the top-notch strike and superb eye appeal more than compensate. This is the sole finest Browning-4 identified in the NGC Census (10/17).

Ex: Purchased by Haig A. Koshkarian from Legend Numismatics (6/1997); Koshkarian Collection (American Numismatic Rarities, 3/2004) lot 63; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98404. NGC ID# 23RZ, PCGS# 38995 Base PCGS# 5353

SEATED QUARTERS

1841 Quarter Dollar, MS65
Conditionally Rare

- 3064** 1841 MS65 NGC. Near the Condition Census, this Gem 1841 quarter dollar is extremely rare so well-preserved. Only two finer coins are reported at NGC and PCGS combined. Many 1841 quarter dollars remaining in circulation in the 1850s were melted when the silver value climbed in response to the discovery of gold in California. Few Uncirculated examples of this date are known in any grade. This piece is sharp and satiny with olive-gold and blue-gray toning. Census: 4 in 65, 1 finer (10/17). NGC ID# 23SK, PCGS# 5399

1853 Quarter, Rare MS66
One-Year Arrows and Rays Type

- 3065** 1853 Arrows and Rays MS66 PCGS. CAC. The 1853 Arrows and Rays quarter boasts a mintage in excess of 15 million pieces, and therefore is unsurprisingly one of the most plentiful issues in Mint State condition. Pieces grading as high as this Premium Gem, however, are rarely encountered. Remarkably clean, frosty surfaces illuminate lightly mottled amber and olive-gold toning over each side. The reverse border is slightly soft from 8 to 12 o'clock, though the design elements are otherwise well-defined. A pair of minor rim cud appear at 9 and 11 o'clock on the reverse, and a die crack occurs on the obverse from the rim below the 3 in the date, through the right arrow, to Liberty's foot. An exceptional example of this "common" date in an uncommon grade. Population: 9 in 66, 2 finer. CAC: 2 in 66, 0 finer (10/17). NGC ID# 23U4, PCGS# 5426

1854 Quarter Dollar, MS65
Satin Arrows Type Coin

3066 1854 Arrows MS65 NGC. Even though the 1854 has a sizeable mintage (more than 12 million pieces) and is the most common issue of the 1854-1855 Arrows type, it is anything but available in the finer Mint State grades. This Gem is bright and satiny, with just the slightest hint of gray-lilac patina on each side. Fully struck, the surfaces are virtually free of abrasions of any size. Census: 20 in 65, 7 finer (10/17).

Ex: Long Beach Signature (Heritage, 2/2003), lot 6630; Portland Signature (Heritage, 3/2004), lot 5644. NGC ID# 23U6, PCGS# 5432

1885 Quarter Dollar, PR67+
Remarkable Surface Quality

3069 1885 PR67+ PCGS. CAC. Briggs 3-B. This nearly perfect Superb Gem proof displays dusky gray and russet toning over deeply reflective fields. The right-hand stars are not fully defined, but the remainder of the design is sharp. The 1885 proof is in high demand due to the low 13,600-coin mintage of its circulation strike counterpart. Population: 4 in 67 (2 in 67+), plus 15 finer pieces in 67 or better Cameo and Deep Cameo grades. CAC: 3 in 67, 0 finer (10/17). NGC ID# 23XH, PCGS# 5586

1878-S Quarter Dollar, MS64
Conditionally Rare

3067 1878-S MS64 PCGS. Briggs 1-A. The 1878-S quarter comes from a mintage of only 140,000 pieces and is scarce in all grades. In fact, this San Francisco issue is far scarcer than the lower-mintage Philadelphia coins of the 1880s. The 1878-S circulated extensively and is rarely seen in Mint State today. This near-Gem displays a sharp strike and frosty luster. Deep olive-gold toning blankets each side. Population: 5 in 64, 5 finer (10/17). NGC ID# 23VA, PCGS# 5510

1886 Quarter, Toned PR67
Paltry Total Mintage

3070 1886 PR67 NGC. Briggs 2-B. A total mintage of 5,886 quarters in 1886, including 886 proofs, explains the challenge this date poses. Superb Gem proofs with or without contrast are exceedingly scarce. Gorgeous intermixed shades of violet, blue, and peach-gold cover pristine fields, ensuring the originality of this PR67 offering. Excellent aesthetic appeal. Census: 15 in 67 (1 in 67+), 4 finer in non-Cameo (10/17). NGC ID# 23XJ, PCGS# 5587

PROOF SEATED QUARTERS

1862 Seated Liberty Quarter, PR65+
Rare Cameo Example

3068 1862 PR65+ Cameo PCGS. CAC. Briggs 5-E. Champagne to golden-brown patina graces the margins of this gleaming PR65+ specimen, while the mirrored fields have excellent contrast with white-frosted and sharply impressed central devices. This Civil War-era proof issue comes from a limited mintage of 550 pieces and is a Cameo condition rarity in the Gem range. Population: 2 in 65 (1 in 65+) Cameo, 5 finer. CAC: 4 in 65, 1 finer (10/17). NGC ID# 2A4Z, PCGS# 85558

BARBER QUARTER

1897-O Barber Quarter, MS67+
Fantastic Rim Patina
Tied for Finest Certified

- 3071 1897-O MS67+ NGC.** This 1897-O quarter would be a capstone acquisition, a prize for many a nice set of Barber quarters. It will also attract the considerable attention of Registry Set enthusiasts and others who simply appreciate its enormous aesthetics. Small areas of untuned silver in the centers are bounded by incredibly attractive rim toning on each side. The reverse palette is dominated by intense but not deep amber-gold and orange with small slivers of pale ice-blue at the extreme rims. The ice-blue becomes more dominant on the obverse, with central rose and pale violet hues. A few faint marks on the neck of Liberty are consistent with the high Superb Gem grade. The strike is close to full on the obverse, save for slight weakness on stars 7, 10, and 11. Minor strike weakness also shows on the lower reverse at the right (facing) eagle's claws and the fletchings, but this is quibbling on a coin of such exceptional overall quality. The eye appeal of this much better-date early Barber quarter issue could scarcely be bettered. Census: 3 in 67 (1 in 67+), 0 finer (10/17). NGC ID# 23YB, PCGS# 5617

PROOF BARBER QUARTER

1901 Barber Quarter, PR67
Only 813 Examples Struck

- 3072 1901 PR67 PCGS. CAC.** Attractive shades of sea-green, cerulean-blue, and lavender toning visit the virtually pristine surfaces of this spectacular Superb Gem proof. The design elements are sharply detailed in most areas, but a touch of the usual softness is evident on the eagle's claw and arrow fletchings. From a proof mintage of 813 pieces. NGC ID# 242G, PCGS# 5687

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter, VF30
Collector-Grade Example

- 3073 1916 VF30 PCGS.** Due to the poor detail of the 1916 design and the shallow relief of the devices, even light wear can make this key-date issue appear to grade lower than it normally would for the amount of wear present. This olive-gray high-end VF coin shows pleasing detail for the issue and generally smooth surfaces. The date is clear, although the tops of the numerals merge with the pedestal. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU55
Satiny and Well-Detailed

- 3074 1916 AU55 NGC.** One of the trickiest, yet most underrated niches in U.S. numismatics is the lightly circulated key-date coin. There are many more collectors who want an attractive AU example than there are survivors, pushing many would-be owners either into the uncomfortably costly Mint State range or down on the grade scale. This Choice AU 1916 Standing Liberty quarter offers a great opportunity for collectors in the niche, for while light wear is distinct on the high points, the still-lustrous surfaces — pale gold-gray with dots of blue and violet — are generally smooth. A small abrasion is present to the left of Liberty's legs. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, Unc Details

- 3075 1916 — Improperly Cleaned — NGC Details. Unc.** This full-date, unworn 1916 Standing Liberty quarter shows generally good detail but does not quite qualify for Full Head consideration. The reverse is satiny and champagne-tinted, although the obverse is heavily cleaned — possibly whizzed and cleaned — with milky-gray patina. The 1916 is the key date in the Standing Liberty quarter series, being recognized as such almost from its creation when only 52,000 pieces were struck.

1918-D Quarter, MS66+ Full Head
Only Two Finer at PCGS

- 3076 1918-D MS66+ Full Head PCGS.** Strike characteristics of Denver Mint Standing Liberty quarters differ markedly from those of the Philadelphia issues. Concerning the 1918 coins, the Philadelphia issue is frequently sharp on the shield and gown folds and weak on the temple and date. The Denver product, by contrast, is usually weak on the shield and gown lines and the head is often defined at the temple but weak in the vicinity of the ear. Full Head Denver coins are infrequently encountered. This high-end Premium Gem is a conditional rarity that shows generally a typical D-mint strike except that Liberty's head is fully defined and the date numerals are crisp. Beautifully preserved surfaces exhibit a delightful blend of gold, violet, green, and blue toning. Population: 31 in 66 (4 in 66+) Full Head, 2 finer (10/17). NGC ID# 3TWU, PCGS# 5723

1919-D Quarter, MS64 Full Head
A Rarity With a Sharp Strike

- 3077 1919-D MS64 Full Head PCGS.** The 1919-D is a semikey in all grades but it becomes a major key date in Full Head. In our experience, this Denver issue is even rarer in Full Head than certified population reports indicate — only the 1927-S and the 1918/7-S are seen at auction less frequently with Full Head detail. Most Full Head examples offered at auction grade MS64 or MS65, although this should not be mistaken to indicate that most known coins are in these grades. Where large advances in value exist between two grade levels, as in these grades for the 1919-D quarter, numerous resubmissions can occur, and the auction data is skewed with the sales of freshly regraded coins. The 1919-D is also in-demand among Registry Set collectors who often trade Choice and Gem Full Head coins.

This piece is sharp on Liberty's head and the date, and at least partial definition is visible on all shield rivets. The inner shield shows sharp vertical lines but ill-defined horizontal lines. Gold border toning surrounds champagne-gray interiors on each side, and the luster is satiny with minimal abrasions. Population: 31 in 64 (4 in 64+) Full Head, 24 finer (10/17). NGC ID# 243C, PCGS# 5731

1920-D Quarter Dollar, MS66+
Well-Struck, Few Known Finer

- 3078 1920-D MS66+ PCGS.** This high-end 1920-D quarter dollar displays partial head detail and above-average definition on the shield rivets. The top of the date numerals are weak, as usual. Original, frosty luster appears on each side with golden and russet border toning around the obverse. A few faint grazes on the left wall next to Liberty are all that prevent an even finer grade. Population: 37 in 66 (2 in 66+), 3 finer (7/17). NGC ID# 243F, PCGS# 5736

1928-S Quarter, MS67 Full Head
Exceptional Quality

- 3079 1928-S MS67 Full Head PCGS.** Large S. Liberty's head and toes are sharp, and the shield rivets show partial definition at the usual weak point. The leading edge of the eagle's left (facing) wing is slightly soft. This top-grade Full Head PCGS coin has clash marks and die polishing lines in the obverse recesses but otherwise has no distinctive features aside from frosty mint luster and attractive multicolor toning. No abrasions are seen. Population: 24 in 67 (3 in 67+) Full Head, 0 finer (10/17). NGC ID# 243Z, PCGS# 5771

WASHINGTON QUARTER

1932-D Quarter, MS65
Low-Mintage Key

- 3080 1932-D MS65 PCGS.** Always a popular coin and the key to the series, especially at this lofty grade level, the low-mintage 1932-D Washington quarter is very scarce at the Gem grade level. Only three examples have graded higher at both services (two at PCGS, one at NGC), and not many MS65 examples are likely to compare favorably to the present piece. Speckled russet-red and sea-green patina is present on both sides, and there are no distracting abrasions. A small contact mark on the eagle's neck, just below the head, is noted only for the sake of accuracy. Population: 89 in 65 (4 in 65+), 2 finer (10/17). NGC ID# 2448, PCGS# 5791

EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, Fine 15
Historic First-Year Issue, O-101a

- 3081 1794 O-101a, T-7, High R.3, Fine 15 PCGS.** Half dollars were struck for the first time in 1794, when a small mintage of 23,464 pieces was produced, with 11 die varieties known for the date. This coin was struck from the O-101 die pair, with star 1 piercing the middle of the lowest curl and 21 berries in the wreath. A die crack from the edge through the F in OF, turns sharply upward, and just misses the outer berry, to the last S in STATES, identifying the late die state O-101a.

This is a problem-free Fine 15 example, with the hair ends distinguishable and some interior detail on the upper hair lines intact. The lavender-gray and blue-steel surfaces are free of large or distracting abrasions and the overall presentation is quite pleasing. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-101a Half Dollar, VF20
Cracked Reverse Die

- 3082** 1794 O-101a, T-7, High R.3, VF20 PCGS. The usual crack between the D and S is present, with an additional die crack from the border to the F in OF, and the leaf pair below that letter, turning sharply left to the upper single leaf and the final S in STATES. The O-101 is positioned seventh of 11 varieties in the 1794 half dollar emission sequence. All 1794 and 1795 half dollars were coined at the Philadelphia Mint between December 1, 1794 and June 5, 1795, with a total production of 323,144 coins. The *Guide Book* assigns a mintage of 23,464 half dollars in 1794, equal to the total of the December 1, 1794 delivery (5,300) and the February 4, 1795 delivery (18,164). We believe that there are about 500 existing 1794 half dollars and about 3,500 surviving 1795 half dollars. This pleasing piece has light gray at the centers, gradually morphing to steel and pale gold near the borders. A glass reveals faint hairlines and trivial handling marks that are unapparent without magnification. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 O-104 Half, Good 6
Scarce, Final Die Pairing for the Year

- 3083** 1794 O-104, T-11, R.5, Good 6 PCGS. Tompkins Die State 1/1. Struck from a reverse die that is unique in the Flowing Hair series, this relatively scarce variety has 10 berries along the right side of the wreath (six inside, four outside). The reverse legend is more evenly spaced than other 1794 working dies, although UNITED shows more space between its letters than do STATES OF AMERICA. Typical of the short die life for most 1794 varieties, the O-104 obverse soon cracked, and the reverse clashed heavily, then also broke. However, this example was struck from perfect dies. Smoothly worn with pleasing old-silver color that deepens at the margins, it shows grade-consistent wear and only a few light abrasions. NGC ID# 24E6, PCGS# 39204 Base PCGS# 6051

1795 Flowing Hair Half, XF45
O-105a, Two Leaves

- 3084** 1795 2 Leaves, O-105a, T-25, R.4, XF45 PCGS. A die crack from the obverse rim through the B in LIBERTY to the hair identifies the late die state variant of O-105, although on this piece the crack is mostly visible between the rim and the B. The coin is sharp and evenly struck with complete border dentils. Remnants of unobtrusive adjustment marks occur at 3 o'clock on the obverse. Some luster remains in the protected regions of the fields, and the surfaces are generally problem-free. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

BUST HALF DOLLARS

1812/1 Small 8 Half Dollar, MS62
Clashed O-102

- 3085** 1812/1 Small 8, O-102, R.2, MS62 NGC. Heavily clashed on the obverse but not yet cracked at the date. This Mint State overdate half dollar displays satiny luster and a good strike with only minor weakness, along the left-hand stars. Scattered light handling marks are not distracting for the grade. Deep olive-gray and lavender-russet toning blankets each side. NGC ID# 24EY, PCGS# 39443 Base PCGS# 6101

1815/2 Bust Half, AU50
O-101a, Key Overdate Issue

- 3086** 1815/2 O-101a, R.3, AU50 NGC. Triple die clashing and a network of strong die cracks on the reverse was ignored by the Mint, which was under pressure to produce any kind of coinage in 1815. Shortages of bullion as well as after effects from the War of 1812 limited the Mint to a meager mintage of 47,150 half dollars struck at the end of 1815 — all from a leftover die pair from 1812. Clear remnants of the underdigit 2 remain visible beneath the primary 5 despite the late die stage. Bluish-bronze toning covers both sides of this well-defined Bust half, a low-mintage overdate that is always of keen interest to prospective bidders. Census: 19 in 50, 81 finer (10/17). NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1823 Half Dollar, XF40
Scarce O-109 Variety

- 3087** 1823 O-109, High R.5, XF40 PCGS. Attributes for the 1823 O-109 half dollar include a reworked 3 in the date, several prominent obverse die cracks, and the first T in STATES positioned far right over the I in PLURIBUS. This is a pleasing XF example with iridescent colors beneath olive-gray and blue overtones. Minor surface marks are grade-consistent and strong definition remains throughout. A very scarce variety, seemingly more challenging than its high R.5 rating. NGC ID# 24FJ, PCGS# 39614 Base PCGS# 6131

1825 Half Dollar, O-102, MS65
Significant Early Die State Markers

- 3088** 1825 O-102, R.1, MS65 NGC. Early die state (we suggest O-102'). The 1825 O-102 is readily available, yet it is clearly much scarcer in the early die state represented by this Gem example. The stars are not drawn to the edge — rather, they are sharp and positioned away from the dentils; parallel die lines around the bust point are crisp and numerous on both sides of the bust tip; and the 8 in the date is sharply recut to resemble a smaller upper loop over the original 8. Stephen Herrman viewed images of the present coin, and replied:

"I can confirm that you definitely have a very early die state specimen of 1825 O-102. I have seen remnants of parallel die lines below the bust on this die marriage before, but they were not nearly as well defined and crisp. These parallel die lines disappear rather quickly ... it is clear that the 8 was repunched or more likely partially re-engraved. I had not noticed this previously..."

The fields are reflective and the motifs sharply struck, with strike doubling on the portrait. Peach-gold toning at the margins cedes to blue and silver-lilac at the centers. The Herrman Autumn, 2017 Census for O-102 recognizes the early die stage and suggests that this coin is tied for second-finest for the variety (regardless of die state). NGC ID# 24FL, PCGS# 39648 Base PCGS# 6142

1829 O-103 Half Dollar, MS65
Attractively Toned and Satiny

- 3089** 1829 Small Letters, O-103, R.1, MS65 NGC. Ex: Frank McCarthy Collection. The strike is even and well-executed such that the central devices are sharp and the peripheral stars are uniformly a little less than fully defined. Golden-toned interiors cede to lavender and sea-green borders, and neither side exhibits notable abrasions. As a date, the 1829 half dollar is rare in Gem condition, and this piece is the single finest O-103 coin attributed by NGC. Gems are high in the Condition Census for the variety. NGC ID# 24FS, PCGS# 39781 Base PCGS# 6154

1832 Half Dollar, MS65
O-103, Small Letters

- 3090** 1832 Small Letters, O-103, R.1, MS65 NGC. The upright of the 5 is repunched, the most significant identifier for the collectible Overton-103. Rich lavender and autumn-brown toning blankets this lustrous Gem type coin. The strike is crisp aside from minor blending on the high points of the major motifs. The fields are smooth, and the portrait shows only unobtrusive contact on the chin and neck.

Ex: FUN Signature (Heritage, 1/2015), lot 4885. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

1832 Small Letters Half, O-122
Multicolor Gem Example

- 3091** 1832 Small Letters, O-122, R.1, MS65 NGC. Vibrant, chromatic multicolor toning progresses from shades of gunmetal-blue and violet to reddish and amber-gold shades on both sides of this richly toned Gem Small Letters half. A vertical tine off the right shield corner and a protruding nub off the lower-right serif of the first T in STATES confirm the die pair. As always, the strike on O-122 is partially weak at the margins, with flatness on Liberty's cap and at the tops of 50 C. The scroll is slightly weak, but readable, at UR of PLURIBUS and at the A in STATES. All else is sharply rendered and the both the colorful toning and mint luster are terrific. This coin is tied for finest of the variety according to the Autumn, 2017 Stephen Herrman Condition Census as well as the Parsley reference (65,64,64,64,64). NGC ID# 24FW, PCGS# 39883 Base PCGS# 6160

1834 Bust Half, MS64+
O-109, Small Date, Small Letters

- 3092** 1834 Small Date, Small Letters, O-109, R.1, MS64+ PCGS. Star 10 is repunched, the primary identifier for Overton-109. Dynamic luster and an unmarked appearance confirm the quality of the present near-Gem. The medium steel-gray and golden-brown surfaces are nicely struck except for the stars. Not a rare variety, but desirable in the present exceptional condition. Population (all Small Date, Small Letters varieties combined): 75 in 64 (5 in 64+), 19 finer (10/17). NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

SEATED HALF DOLLARS

1865 WB-101 Half Dollar, MS67
The Sole Finest at NGC

- 3093** 1865 WB-101 MS67 NGC. CAC. When we first saw this lustrous and attractive half dollar, we were shipping it off to Gene Gardner, who was the successful buyer in our auction at the 2005 FUN show. We wrote then: "The finest 1865 we have ever offered and currently the finest certified by either major service." The statement remains virtually as true today as it was then, more than 12 years ago, although now PCGS lists a single numerically equal piece (10/17). Both sides exhibit needle-sharp definition over the major design elements and are endowed with shimmering silver luster beneath a sparse coating of mottled golden and lilac toning. A few wispy field marks — clustered between Liberty's arm and star 5 — are scarcely visible without the aid of magnification. An issue that shows up with very little frequency in Premium Gem condition, and almost never in this Superb Gem grade. Ex: FUN Signature (Heritage, 1/2005), lot 30218; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98481. NGC ID# 24JF, PCGS# 572164 Base PCGS# 6313

1879 Half Dollar, Toned MS67
Eye-Catching Luminescence

- 3094** 1879 Closed Bud, WB-102, MS67 NGC. The 1879 Seated half dollar is the first of the low-mintage Philadelphia issues from the tail-end of the series. Only 4,800 pieces were struck, although enough Mint State representatives were saved at the time of issue that the date is moderately collectible today. This outstanding MS67 coin is one of only a small number of pieces that are worthy of the Superb Gem grade level. Both sides display an attractive combination of vibrant luster and semiprooflike mirroring, with blended mint-gold, ocean-blue, and lavender-gold hues blanketing each side. The strike is sharp, and a few small marks on Liberty's legs are the only surface abrasions of note. Census: 12 in 67 (3 in 67★), 1 finer (10/17). NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

PROOF SEATED HALF DOLLARS

1873 Arrows Half Dollar, PR66 ★
Conditionally Rare, Colorfully Toned

- 3095** 1873 Arrows PR66 ★ NGC. In 1873, the Mint made two changes to the Seated Liberty half dollar. Arrows were added on either side of the date to signify an increase in silver weight from 12.44 gm (the standard since 1853) to 12.50 gm, and the date logotype was changed partway through the year to widen the 3 so it would not be mistaken for an 8. Proof 1873 half dollars struck in the early, lighter standard show the Closed 3 date type, and those struck in the heavier 12.50 gm standard show the modified Open 3 in the date. This With Arrows, Open 3 proof is among the finest non-Cameos at NGC, showing a full strike and mirrored fields. Warm, sun-gold toning appears over much of each side, although ribbons of blue and violet grace the right-hand peripheries, reminiscent of old "proof set" toning. A few stray lines in the right obverse field determine the grade. The obverse of this piece displays considerable cameo contrast, although the reverse shows less contrast amid the colorful toning. Census: 11 in 66 (3 in 66★), 0 finer (10/17). NGC ID# 27UU, PCGS# 6434

1874 Arrows Half Dollar, PR65
Undesignated Field-Device Contrast

- 3096 1874 Arrows PR65 NGC.** The weight of half dollars increased slightly under the Coinage Act of 1873, signified by arrows placed before and after the date on the 1873 and 1874 issues. A two-year type, just 700 proofs were struck in 1874 and only about 5% of those survive in Gem or finer grades. This brilliant PR65 coin displays subtle contrast between the frosted devices and mirrored fields. The strike is impressively sharp except at the left (facing) eagle's talon. Only a few random, delicate lines are visible under a loupe. Census: 14 in 65, 10 finer (10/17). NGC ID# 27UV, PCGS# 6435

BARBER HALF DOLLARS

1896-O Barber Half, MS66
Totally Original Surfaces

- 3097 1896-O MS66 NGC. CAC.** The 1896-O Barber half dollar claims a smallish mintage of 924,000 pieces and many numismatists consider it the most challenging issue of the series in high grade. Few examples were saved by contemporary collectors, making the 1896-O scarce, even in collectible circulated condition. The finest-certified example is the PCGS MS67 Eliasberg specimen, which sold for \$88,125 as lot 4075 of the ANA Signature (Heritage, 8/2015). At the MS66 level, only a few examples are known, including the Thaine B. Price and Duckor/Gardner specimens, which have both sold at auction several times in the last two decades, for prices up to \$51,750. This entirely original Premium Gem, along with another MS66 PCGS coin, round out the Condition Census. An additional MS66 coin listed on the NGC Census is a duplication, making the present offering the single-finest coin at that service (10/17).

The impeccably preserved original surfaces of this remarkable Premium Gem are blanketed in attractive shades of golden-brown and lavender-gray toning, with vibrant, satiny mint luster underneath. The design elements are especially well-detailed for a New Orleans issue, with just a touch of the usual softness on the eagle's claw. Overall eye appeal is terrific. Until appearing last year, this coin was off the market since at least 1932. CAC: 4 in 66, 1 finer (10/17). NGC ID# 24LW, PCGS# 6475

1897-S Barber Half, MS65
High-End, Conditionally Rare

- 3098** 1897-S MS65 PCGS. CAC. Sharp stars on the obverse complement well-defined talons on the eagle, leaving the only mentionable strike weakness on the upper-right shield corner. This Gem 1897-S half dollar is virtually brilliant, with satiny luster and no distracting abrasions. Few examples are known finer. Population: 31 in 65 (14 in 65+), 8 finer. CAC: 4 in 65, 8 finer (10/17). NGC ID# 24M2, PCGS# 6479

1902-O Barber Half Dollar, MS65
Exceptional Luster and Toning

- 3099** 1902-O MS65 NGC. The 1902-O Barber half dollar was a workhorse of commercial channels. Mint State survivors are generally scarce, and Gems are rare. This piece shows beautifully preserved, frosty luster cast in lovely orange-gold, lavender, and champagne-gray hues. Considerable strike weakness on the right shield corner and adjacent wing is typical of New Orleans issues in this series. Census: 7 in 65, 7 finer (10/17). NGC ID# 24MG, PCGS# 6493

1902-O Barber Half Dollar, MS67
Tied for Finest Certified
The NGC Coin Explorer Plate Coin

- 3100** 1902-O MS67 NGC. The 1902-O is usually found with substandard luster, but not on this piece. The surfaces are bright and semireflective with immediate eye appeal. As is characteristic of the issue, this piece is weakly defined on the head of the eagle, the top of the shield, the juncture of the shield and right wing, and the right claw. Yet, the obverse is weak only on star 11 and the highest points of the portrait. The technical quality is unsurpassed. The certified population for the 1902-O is scant in Mint State and pieces grading finer than MS65 are extremely rare. This example is tied with one other NGC coin as the finest known (10/17).
Ex: FUN Signature (Heritage, 1/1998), lot 6940; FUN Signature (Heritage, 1/2005), lot 4230; Long Beach Signature (Heritage, 6/2016), lot 4564. NGC ID# 24MG, PCGS# 6493

1904-O Barber Half, MS65
None Finer at NGC

- 3101** 1904-O MS65 NGC. Ex: Rev. Dr. James G.K. McClure. The 1904-O Barber half dollar is an elusive issue in any Mint State grade, almost unobtainable above the MS65 level. This spectacular Gem offers well-detailed design elements and lustrous, well-preserved original surfaces, under rich shades of magenta, sea-green, and amber toning. Ample mint luster shines through the patina. Census: 5 in 65, 0 finer (10/17).

Ex: Long Beach Signature (Heritage, 6/2016), lot 4565. NGC ID# 5EPG, PCGS# 6499

1895 Barber Half, PR67 Cameo
Lightly Toned

- 3104** 1895 PR67 Cameo PCGS. Cameo examples of the proof 1895 Barber half dollar are rare as fine as the Superb Gem grade level. This piece is toned on both sides in sun-gold and amber hues, but the field-device contrast persists. The strike is bold and close study with a loupe fails to reveal any noteworthy surface flaws. Population: 5 in 67 Cameo, 4 finer (7/15). NGC ID# 24NX, PCGS# 86542

PROOF BARBER HALF DOLLARS

1892 Barber Half, PR67 Cameo
Richly Toned and Contrasted

- 3102** 1892 PR67 Cameo NGC. The 1892 is both a well-produced date as well as one that was widely set aside as a first-year issue. This is a fabulous cameo coin whose thick mint frost is evident over the devices even beneath the toning. Both sides display pale mint-green centers with light rose accents around the margins. A magnificent cameo proof of this first year of the Barber design. Census: 25 in 67 Cameo (2 in 67 ★), 3 finer; 6 in 67 Ultra Cameo, 0 finer (10/17).

Ex: Long Beach Signature (Heritage, 9/2007), lot 1651. NGC ID# 24NU, PCGS# 86539

1892 Barber Half, PR65 Deep Cameo
Remarkable Contrast

- 3103** 1892 PR65 Deep Cameo PCGS. CAC. Although heavily saved due to the novelty of the new design, 1892 proof Barber half dollars seldom come with Deep Cameo surfaces. This Gem CAC coin displays dramatic contrast and full depth of mirroring. The frost-white devices complement a hint of golden toning at the borders. Eye appeal is outstanding and the preservation exceptional. Population: 4 in 65 (1 in 65+) Deep Cameo, 7 finer. CAC: 1 in 65, 1 finer (10/17). NGC ID# 3TG8, PCGS# 96539

WALKING LIBERTY HALF DOLLARS

1916 Half Dollar, MS66
Vibrantly Lustrous and Sharp

- 3105** 1916 MS66 PCGS. The 608,000-piece 1916 mintage entered circulation in early 1917 without much fanfare, and it was not until the 1940s that the Walking Liberty series became truly popular with collectors. High-grade Uncirculated first-year examples were scarce-to-rare then, as now. This frosted Premium Gem example is brilliantly lustrous and nearly snow-white with a sheer overlay of brownish-gray patina that is more prevalent on the reverse. The strike is pleasingly sharp throughout. Population: 113 in 66 (7 in 66+), 5 finer (10/17). NGC ID# 24PL, PCGS# 6566

1916 Walking Liberty Half, MS66
Rare CAC-Approved Coin

- 3106** 1916 MS66 PCGS. CAC. Although not particularly rare in an absolute sense, the 1916 Walker is conditionally elusive in Premium Gem condition and rare so fine with a CAC endorsement. This beautiful example blends frosty and mattelike characteristics into a picture of undiminished mint luster. Some light silver and gray iridescence has gathered over both sides in mottled fashion, undisturbed by abrasions. The strike is far sharper than that frequently encountered on Mint State examples of this period. Ex: Long Beach Signature (Heritage, 6/2001), lot 8439. NGC ID# 24PL, PCGS# 6566

**1916-D Walker, Exemplary MS66
Few Pieces Known Finer**

- 3107 1916-D MS66 PCGS. CAC.** The 1916-D is slightly scarcer than its Philadelphia counterpart in MS66 and finer grades. While we occasionally offer Premium Gems, the present example is one of the most appealing coins in this grade that we have seen. The surfaces are brilliant and original with the characteristic soft, mattelike luster of the issue. From a technical standpoint, the most important features are a virtual absence of abrasions and an above-average strike. Housed in a green label holder. Population: 71 in 66 (1 in 66+), 3 finer. CAC: 21 in 66, 1 finer (10/17).
Ex: *Philadelphia Signature* (Heritage, 8/2000), lot 6038. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1916-S Walking Liberty Half, MS65
Green Label Holder**

- 3108 1916-S MS65 PCGS.** Luminous mattelike luster joins warm golden toning on this well-preserved Gem first-year San Francisco coin. The design elements show a good strike, and no major abrasions are observed. The 1916-S Walker is scarce in this grade and rare finer. Housed in a green label holder. PCGS lists 14 numerically finer coins (10/17). NGC ID# 24PN, PCGS# 6568

**1917-D Obverse Mintmark Half
Frosty Gem**

- 3109 1917-D Obverse MS65 PCGS.** The obverse mintmark variant is scarce in Gem condition and rarely offered finer. This piece displays sharp head and hand detail and is only marginally weak on the eagle's central feathers and trailing leg. Essentially brilliant surfaces are frosty and devoid of serious abrasions. Population: 75 in 65 (2 in 65+), 6 finer (10/17). NGC ID# 24PR, PCGS# 6570

**1919-S Half Dollar, MS65
Second-Rarest Walking Liberty Issue**

- 3110 1919-S MS65 NGC.** The 1919-S Walking Liberty half dollar claims a smallish mintage of 1.5 million pieces and the issue circulated heavily over the years. In absolute terms, the 1919-S is the second-rarest Walking Liberty half dollar in today's market, behind the 1921-S. Fortunately, a number of high quality examples were saved by contemporary collectors, and the issue is not as elusive as one would expect in high grade.

This impressive Gem representative exhibits a better-than-average strike, with clear separation between Liberty's thumb and finger on the wreath hand. Just a touch of the usual softness is evident on the eagle's trailing leg. The well-preserved surfaces radiate satiny mint luster, with a few hints of jade and russet toning at the rims. Census: 19 in 65, 10 finer (10/17). NGC ID# 24R2, PCGS# 6579

1921 Half Dollar, AU Details Key Date Opportunity

- 3111 1921 — Questionable Color — PCGS Genuine. AU Details.** Pale, golden-gray patina looks to be of uncertain origin to PCGS, although there is nothing overtly unnatural about its appearance and nice luster remains beneath the toning. The strike is suitably sharp for a 1921 Walker, with good head definition and thumb separation. A bit of softness on the exposed high points of the eagle are from a combination of strike and light wear. This is a eminently collectible example of the key issue. Only 246,000 pieces were struck.

1936 Walking Liberty Half Dollar, MS68 Among the Finest Certified Examples

- 3114 1936 MS68 NGC.** This spectacular MS68 Walking Liberty half dollar is one of the finest survivors from a mintage of more than 12.6 million pieces. The design elements are sharply detailed, with clear separation between the thumb and finger on Liberty's wreath hand, and just a trace of the usual softness on the head. The impeccably preserved surfaces radiate vibrant mint luster, with just a slight suggestion of pale gold toning. Census: 13 in 68, 0 finer (10/17). NGC ID# BYGX, PCGS# 6598 Base PCGS# 6598

1927-S Half Dollar, MS65 Seldom Offered This Fine

- 3112 1927-S MS65 PCGS. CAC.** A satiny Gem, devoid of bothersome abrasions and yielding virtually untuned luster. A few splashes of amber color appear in the left obverse margin. Liberty's branch hand is typically weak, but the strike is otherwise pleasing. Die polishing lines in the fields are most prominent on the obverse. The 1927-S Walker is scarce in this grade and exceedingly rare finer. Population: 79 in 65 (6 in 65+), 8 finer. CAC: 21 in 65, 5 finer (10/17). NGC ID# 24RA, PCGS# 6587

1938-D Half Dollar, MS67 One of the Finest Known

- 3115 1938-D MS67 PCGS.** The 1938-D is a semikey date in all grades, coming from a mintage of only 491,600 coins. Examples are especially scarce in MS67, and none are known finer. This Superb Gem is frosty and brilliant, showing a bold strike and no distracting abrasions. A candidate for a high-end Registry Set. Population: 46 in 67 (3 in 67+), 0 finer (10/17). NGC ID# 24RV, PCGS# 6605

1934-S Half Dollar, Frosty MS66 Few Finer Pieces Known

- 3113 1934-S MS66 PCGS. CAC.** Traces of champagne toning grace softly frosted luster on this Premium Gem 1934-S half dollar. The strike is sharp on the branch hand and the eagle's trailing leg, and no distracting abrasions are seen. The 1934-S is scarce in this grade and genuinely rare finer, with only eight Superb Gems listed at PCGS (10/17). NGC ID# 24RH, PCGS# 6594

PROOF FRANKLIN HALF DOLLAR

1958 Half Dollar, PR68 Deep Cameo Nearly Flawless Surfaces

- 3116 1958 PR68 Deep Cameo PCGS. CAC.** An almost imperceptible speckling of purplish-gray toning at the edges soon yields to intensely brilliant-silver mirrors and frost-white devices of this Superb Gem Deep Cameo proof. Stringent grading by both PCGS and NGC limits the number of Deep Cameo Franklin halves at the highest levels. This one makes the grade with CAC endorsement and exceptional eye appeal. There are no detractors of note. Population: 31 in 68 (1 in 68+) Deep Cameo, 0 finer. CAC: 15 in 68, 0 finer (10/17). NGC ID# 27VH, PCGS# 96699

EARLY DOLLARS

1795 Draped Bust Dollar, XF45
B-15, BB-52, Centered Bust

- 3117** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF45 PCGS. Bowers Die State V. The die crack along the top of ICA in AMERICA is faded from wear but present. This Choice XF coin is well-centered and evenly struck with light wear. Deep gunmetal-gray patina blankets each side and the surfaces are problem-free. Planchet adjustment marks appear occasionally in faded fashion around the reverse border. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1799 Dollar, AU53
B-12, BB-160, 7x6 Stars

- 3118** 1799 7x6 Stars, B-12, BB-160, R.3, AU53 PCGS. Bowers Die State III, heavily cracked at the date but not yet cracked through the left-hand stars. Evenly struck with well-defined stars, this AU BB-160 dollar is also free of visible adjustment marks. Both sides display light golden toning and hints of luster remain in the protected regions of the fields. The only imperfection is an old, hair-thin line that stretches up from the reverse rim right of the eagle's tailfeathers toward the O in OF. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

1799 7x6 Stars Dollar, AU53
B-8, BB-165, Sharp Detail

- 3119** 1799 7x6 Stars, B-8, BB-165, R.3, AU53 PCGS. Bowers Die State II, cracked through the LIB in LIBERTY but without the later crack that travels through the TY. This sharply detailed Draped Bust type coin has complete border dentils and sharp interiors without adjustment marks. Olive-green and golden-gray toning on each side is deepest at the rims, leaving the interiors with a very light patina. A few faint marks are undistracting. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

1799 Dollar, B-21, BB-169, AU50
7x6 Stars, Partial Luster Remains

- 3120** 1799 7x6 Stars, B-21, BB-169, R.3, AU50 PCGS. Bowers Die State IV, the latest confirmed die state, showing cracks at the date and the reverse periphery. This AU coin is free of adjustment marks and displays sharp detail from an even strike. Mottled olive, russet, and golden-gray toning blanket each side, and hints of luster that emerge from the protected portions of the fields are original. Housed in a green label holder. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

Mint Director Elias Boudinot

1803 Small 3 Dollar, MS61
B-4, BB-254, Attractively Toned

- 3121** 1803 Small 3, B-4, BB-254, R.3, MS61 NGC. The top of the Small 3 in the date is thin, the 1 firmly touches the curl, stars 7 and 8 are distant from the L and Y of LIBERTY, stars 4 and 5 and 5 and 6 are closer together than any of the others, and stars 10 and 11 and 12 and 13 are wider apart than any others. On the reverse, the first A in AMERICA touches the third feather, and a leaf points more toward the left corner of the base of I in AMERICA.

Light- to medium-intensity, bluish-gray toning displays coppery gold undertones on this attractive MS61 dollar. A sharp strike attends design features that are nicely centered on the planchet. The reverse dentilation is strong, while that along the lower left obverse border shows slight rim crumble. Both sides are quite clear of marks, except for a noticeable scrape on Liberty's cheek and a few small marks beneath that one.

Ex: *Central States Signature* (Heritage, 4/2008), lot 2084; *Long Beach Signature* (Heritage, 2/2009), lot 1582. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

SEATED DOLLARS

1854 Seated Liberty Dollar, AU55
Sharply Detailed and Lightly Worn

- 3122** 1854 AU55 PCGS. OC-1, High R.3. Dick Osburn and Brian Cushing explain in their online reference: "This is a key date in the Liberty Seated Dollar series. Most would consider 1854 dollars as rare, though by Liberty Seated Dollar standards they're only scarce. Although the date is overshadowed by its near neighbors, the 1851 and 1852, it would be a key in almost any other series." They estimate 300 circulation strikes survive from a low mintage of 33,140 coins. A dusky overlay of antique-gold patina covers reflective, strongly detailed surfaces. A few stray contact marks are noted. Population: 13 in 55, 40 finer (10/17). NGC ID# 24YT, PCGS# 6942

1857 Silver Dollar, MS63
Elusive in Mint State

- 3123** 1857 MS63 PCGS. OC-2, R.3. The Mint struck 94,000 silver dollars in 1857, although only a few dozen coins survive in Mint State. This Select representative is slightly weak at the upper edge of the eagle's left (facing) wing but well-defined elsewhere. Virtually brilliant interiors cede to warm orange-gold border toning. A few scattered light marks do not detract. Population: 10 in 63, 10 finer (10/17). NGC ID# 24YW, PCGS# 6945

1866 Motto Seated Liberty Dollar, MS64
Undesignated Prooflike Fields, Rainbow Iridescence

- 3124 1866 Motto MS64 PCGS. CAC. OC-1, R.2.** Osburn-Cushing Die State b/c. The 1866 OC-1 Seated dollar is ranked number 15 in Osburn-Cushing's Top 30 Variety listing, based on its repunched date and doubled die reverse. The date is noticeably repunched on the 1 and slightly repunched on the 8. Sharp die doubling on the motto is most visible at WE and present throughout IN GOD WE TRUST. Although the 1866 is generally more available than its Civil War-era predecessors, it is scarce at the near-Gem grade level and rare any finer.

This is a colorfully toned Choice Uncirculated example with iridescent rainbow shades throughout both sides. The fields are decidedly prooflike beneath the attractive toning, while faint die cracks on the obverse and reverse indicate a late die stage. Only a few minor ticks and abrasions exist on the coin when viewed under magnification. We note a tiny reeding mark near Liberty's shin and a small mark near star 9, both of which are shallow, small, and of little concern. The strike is quite sharp throughout, including the upper obverse at Liberty's head and the surrounding stars. CAC endorsed, with surfaces suggestive of an even finer numeric grade. Population: 23 in 64 (2 in 64+), 8 finer (10/17). NGC ID# 2429, PCGS# 6959

PROOF SEATED DOLLARS

1858 Seated Liberty Dollar, PR20
Scarce Proof-Only Issue
Only About 300 Pieces Struck

- 3125 1858 PR20 PCGS. OC-P1, Low R.4.** Osburn-Cushing Die State a/a. As a proof-only date in the Seated dollar series, the 1858 is unquestionably a series key both by mintage and by demand. It is only occasionally available to collectors at auction. This is a well-circulated proof example, which retains its wide rims but only glimpses of its original proof finish within protected areas. Tan toning on the high points contrasts with the silver-gray fields, and some iridescence remains beneath the patina. Light abrasions are visible with a glass. This is the sole PR20 example at either PCGS or NGC. Housed in an old green label holder. PCGS Population: 1 in 20, 103 finer (10/17). NGC ID# 252C, PCGS# 7001

1867 Seated Dollar, PR65
Sharp and Toned

- 3126 1867 PR65 PCGS. OC-P1, R.3.** The razor-sharp design elements and glimmering fields confirm the proof origins of this Gem 1867 Seated dollar. Deep mint-gold, gunmetal-blue, and lavender toning blankets each side, masking any insignificant contact marks. A rarity so well-preserved. Population: 16 in 65, 9 finer (the finer coins including Gem and better Cameos and Deep Cameos) (10/17). NGC ID# 252N, PCGS# 7015

- 3127 No Lot.**

1875-S/CC Trade Dollar, MS64
A Conditionally Rare, Important Variety

- 3128 1875-S/CC FS-501 MS64 PCGS. EX:** Linda Collection. Large S, Type One Reverse. The late die state, showing a crack plotting in irregular path through the top of AMERICA; lesser peripheral cracks appear elsewhere. The left C in the mintmark is mostly absent, but the right C is weakly visible in the field next to the primary S mintmark. The S/CC major variety is rare in Mint State, particularly at the MS64 level where PCGS lists only eight coins; a single Gem is finer at that service (10/17). This piece displays frosty golden-toned luster with warm russet accents at the borders. A single ebony spot in the central obverse serves as a pedigree marker. Slight strike weakness occurs on Liberty's head and foot, and on the eagle's right (facing) talons. NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

1876-CC Trade Dollar, MS61
Doubled Die Reverse

- 3129 1876-CC Doubled Die Reverse, FS-801 (formerly FS-014), MS61 NGC.** Type One Obverse and Reverse, Tall CC. The Cherrypickers' reference states that "this variety is one of the highlights of the trade dollar varieties and is thought to be extremely rare in grades above AU." Dramatic die doubling is most visible on the olive branch, the eagle, and E PLURIBUS UNUM. This Mint State example is sharply struck and satiny with a hint of champagne toning. Scattered light handling marks are all that limit the grade. NGC ID# 253A, PCGS# 145815 Base PCGS# 7042

1876-S Trade Dollar, MS65
Conditionally Rare Type Coin

- 3130 1876-S Type One Obverse, Type Two Reverse, MS65 NGC.** In the Trade dollar series, even the most plentiful dates become conditionally rare in MS65. This Gem 1876-S dollar displays a bold strike and satiny luster. Brilliant interiors cede to lovely gold and blue border toning, which is strongest along the lower reverse. It has been more than five years since we last handled a Gem 1876-S Trade dollar, and more than 10 since we handled a finer example. Census: 19 in 65, 3 finer (10/17). NGC ID# 253B, PCGS# 40115 Base PCGS# 7043

1877-CC Trade Dollar, MS62
Scarce Nevada Issue

- 3131 1877-CC MS62 PCGS.** Tall CC mintmark. Used only to a small degree in Old West commerce, most of the 534,000-piece mintage fulfilled its purpose as coins for foreign trade. A small number of Trade dollars entered domestic circulation, but they were neither popular nor necessary. This Uncirculated example was somehow put aside and well-preserved. Light chatter in the fields suggests occasional bagmarks from transport or storage. The strike is sharp across lightly toned and lustrous, silver-gray surfaces. Population: 33 in 62 (1 in 62+), 48 finer (10/17). NGC ID# 253D, PCGS# 7045

PROOF TRADE DOLLARS

1874 Trade Dollar, PR65 Cameo
Rare So Fine

- 3132** 1874 PR65 Cameo NGC. The 1874 proof is scarce with cameo contrast, and Gems are rare. This PR65 Cameo displays a full strike and considerable field-device contrast. Both sides have delicate champagne toning and are free of contact marks. We only occasionally offer Cameo examples of this issue, and almost all seen grade PR63 or PR64. Census: 10 in 65 Cameo, 2 finer (10/17). NGC ID# 27YK, PCGS# 87054

1876 Trade Dollar, PR65 Cameo
Toned and Contrasted

- 3133** 1876 PR65 Cameo PCGS. Lavender-gray and champagne hues encompass much of this Gem proof, although moderate cameo contrast prevails. The strike is sharp and no distracting marks are seen. Cameos are rarely offered this fine, and the present piece is a full grade point finer than the best Deep Cameo at that service. Population: 10 in 65 (1 in 65+) Cameo, 4 finer (10/17). NGC ID# 27YM, PCGS# 87056

1876 Trade Dollar, PR65 Cameo
Beautiful Border Toning

- 3134** 1876 PR65 Cameo NGC. Light golden toning across the interiors of this Gem Cameo allows for excellent field-device contrast, while deep ocean-blue and lavender border hues satisfy the desires of concentric toning enthusiasts. This Gem proof is a trifle weak on the eagle's right (facing) talons but sharp elsewhere with exceptional visual appeal. Census: 9 in 65 Cameo (1 in 65 ★), 12 finer (including three PR65 Ultra Cameos) (10/17). NGC ID# 27YM, PCGS# 87056

MORGAN DOLLARS

1878 7TF Morgan, MS65 Deep Prooflike
Cameo Contrast, Excellent Preservation

- 3135** 1878 7TF Reverse of 1878 MS65 Deep Prooflike NGC. VAM-190. VAM-190 is frequently seen with deeply reflective fields, as a diagnostic of this variety is excessive die polishing such that Liberty's nostril and the eagle's inner wing feathers are partially effaced. This Gem Deep Prooflike example is high-end for the grade, devoid of obvious abrasions even in the delicate fields. Cameo contrast is apparent on each side amid light lavender-gold toning. The strike is razor-sharp, even on the eagle's talons. NGC ID# 253K, PCGS# 97075

1878-CC Morgan Dollar, MS66 Prooflike
Undeniably Clean for the Grade

- 3136** 1878-CC MS66 Prooflike PCGS. CAC. First-year examples can be found with cameo contrast, but seldom are they offered so fine with CAC approval. This Premium Gem is undeniably clean for the grade. All-brilliant surfaces showcase reflective fields surrounding thickly frosted and fully struck relief elements. An excellent Carson City dollar. Population: 9 in 66 Prooflike, 0 finer in this category. CAC: 3 in 66, 0 finer (10/17). NGC ID# 253M, PCGS# 7081

1879-CC Silver Dollar, MS62
Semireflective Fields

- 3137** 1879-CC MS62 PCGS. A dazzling cartwheel effect and original surfaces give this Mint State 1879-CC dollar excellent visual appeal despite scattered abrasions that limit the grade. The devices are frosty, creating modest cameo contrast with the semiprooflike fields. Neither side exhibits mentionable toning. The 1879-CC is a semikey date in the Carson City short set. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, Brilliant MS63

- 3138** 1879-CC MS63 PCGS. Normal mintmark. Low on bullion, the Carson City Mint could only strike 756,000 silver dollars in 1879. This is a visually compelling example with a razor-sharp strike and vibrant, frosted surfaces. A cluster of small abrasions on Liberty's jawline and in the field beneath accounts for the Select Uncirculated technical grade, although the eye appeal easily exceeds that designation. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS64+
Low GSA Representation

- 3139** 1879-CC MS64+ PCGS. CAC. The availability of Carson City Morgan dollar issues is closely linked to the quantities of each date that were distributed in the GSA sales of the 1970s. In the case of the 1879-CC, only 4,123 GSA coins were counted, and this is now the second-scarcest Carson City issue in the series in Mint State. Series specialists often consider it "the other Carson City key," relating its popularity and the difficulty of its acquisition to the more famous 1889-CC. Collectors can generally acquire coins in the MS62 to MS64 grade range for a price, but finer than this the 1879-CC is a notable challenge. The combination of the Plus designation and the CAC green label award this piece a surplus of appeal that complements its vibrant, frosty luster and sharp strike. A few faint grazes in the obverse field are all that prevent full Gem classification. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, MS64+
Frosty, Pale Gold Accents
Normal Mintmark

- 3140** 1879-CC MS64+ PCGS. CAC. Normal Mintmark. This is the first really challenging issue in the Morgan dollar series and the second most-elusive Carson City emission after the famous 1889-CC. While 756,000 coins were struck — more than in other years at the Nevada Mint — fewer were held back in storage. The average 1879-CC is apt to grade just shy of XF45. Mint State coins are available but expensive, that is through MS64. In MS65, they are extremely scarce and only appear at auction from time to time, putting added stress on MS64+ dollars with CAC approval, as here. Each side is frosty and brilliant with a pale almond-gold sheen. Thin marks in the left obverse field are unobtrusive. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS63 Prooflike
Normal Mintmark

- 3141** 1879-CC MS63 Prooflike PCGS. Normal Mintmark. Both sides of this Select Mint State 1879-CC Morgan dollar key exhibit satiny silver luster on the sharply defined devices, with fully mirrored prooflike fields that exhibit myriad die polishing lines. The obverse hosts delicate champagne toning while the reverse is brilliant and only faintly toned. An outstanding example searching for a home in an advanced collection. NGC ID# 253T, PCGS# 7087

1879-S Morgan Dollar, MS68
Exceptional Type Coin

- 3142** 1879-S MS68 PCGS. The availability of the 1879-S Morgan makes it ideal for type representation, although it is conditionally scarce in MS68 and unknown numerically finer (10/17). Save for a brush of amber-gold toning along the left-hand peripheries, this coin is brilliant. Fully struck design elements yield incredibly luminous luster and are devoid of abrasions. An exceptional type coin. NGC ID# 253X, PCGS# 7092

1881-CC Dollar, MS65 Deep Mirror Prooflike
Contrasted GSA Condition Rarity

- 3143** 1881-CC GSA MS65 Deep Mirror Prooflike PCGS. This frost-white Gem GSA dollar displays deeply reflective fields with outstanding two-sided cameo contrast. The strike is sharp, and only a few light grazes on Liberty's cheek limit the grade. Although the GSA hoard populated the market with thousands of 1881-CC dollars, few Deep Mirror Prooflike coins remain in their original GSA plastic holders. PCGS has seen only a handful of GSA-encapsulated Gems with Deep Mirror Prooflike fields. Population: 8 in 65 (1 in 65+) Deep Mirror Prooflike, 1 finer (10/17). NGC ID# 2547, PCGS# 518865 Base PCGS# 97127

1883-CC GSA Dollar, MS67
VAM-5B, Virtually Pristine

- 3144** 1883-CC GSA MS67 PCGS. CAC. VAM-5B. The 1883-CC saw only about a third of its 1.2 million-piece mintage released into circulation, some at the time of mintage, and others as late as the 20th century. The rest went into storage, where the 1883-CC was the second most-abundant Carson City issue in the GSA sales that dispersed the federal government's holdings. Very few certified Superb Gem coins remain in their original GSA holders.

For variety collectors, this example represents VAM-5B, with a die gouge at the eagle's beak, a die scratch in the right (facing) wing, as well as doubling at the date and mintmark. No dash is visible beneath the second 8 in the date. Creamy, brilliant-white surfaces are lustrous and sharply struck with a clean cheek on Liberty and smooth, nearly mark-free fields. A small contact in the right reverse field beneath the wing is the sole abrasion of note. This CAC-endorsed example is one of just two pieces certified by PCGS at the MS67 level while still in its hard black GSA holder. The coin and its native holder are encased by PCGS "as issued." Population: 2 in 67 (1 in 67+), 0 finer (10/17). NGC ID# 254S, PCGS# 518869 Base PCGS# 7144

1884-O Morgan Dollar, MS64
Struck 15% Off-Center
Date and Mintmark are Clear

- 3145 1884-O Dollar — Struck 15% Off-Center — MS64 PCGS.** A triad of condition, percentage struck off-center, and direction of the off-center strike make this 1884-O Morgan dollar uniquely indelible. Most off-center Morgans show light to moderate wear from circulation, and a significant number of the Mint State pieces seen are only slightly off-center, in the 5-10% range. This is a near-Gem that is widely off-center 15% toward 10 o'clock. The other hallmark of this coin — one that separates it from most other far-off-center Morgans — is that both the date *and* mintmark are fully on the planchet. Most of E PLURIBUS and, on the reverse, portions of ONE and UNITED, are off the flan. Satiny cartwheel luster illuminates the struck portion of the planchet, while lavender-gold toning warms the entire piece. A few faint grazes on Liberty's cheek are all that limit the grade.

1887/6 Silver Dollar, MS66
VAM-2, A Top 100 Variety

- 3146 1887/6 VAM-2, Top 100, MS66 PCGS.** A Top 100 Variety. The curve of the base of the underdigit 6 is visible on *both* sides of the bottom of the 7. The reverse is immaculate aside from a trace of a fingerprint near 6 o'clock, and the obverse has only inconsequential contact. A delicate trace of gold toning denies full brilliance. Uncirculated examples of this popular overdate are generally available, but Gems are very scarce and Premium Gems are exceptionally rare. None have been certified in MS67 or higher grades by PCGS. Population: 14 in 66, 0 finer (10/17). NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

1888-O 'Hot Lips' Dollar, AU58
Much Luster Remains

- 3147 1888-O Hot Lips, Doubled Die Obverse, VAM-4, Top 100, AU58 PCGS. CAC.** A Top 100 Variety. Strong die doubling on Liberty's lips, nose, and chin gives this popular variety its whimsical name. Only seven pieces have been certified in mint condition by PCGS. This piece retains generous amounts of mint luster and each side shows original gray-brilliant surfaces. NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

1889-CC Morgan Dollar, AU53
Attractive for the Grade

- 3148 1889-CC AU53 NGC.** This AU 1889-CC Morgan was prooflike before its brief stint in circulation, still showing remnants of mirroring in the protected regions of the fields. The devices are well-struck and only light high-point wear is present. Pleasing light golden toning graces each side. About Uncirculated 1889-CC dollars are elusive and highly sought-after due to the scarcity and cost associated with Mint State coins. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Lustrous MS61
Well-Preserved Carson City Key Issue

3149 1889-CC MS61 NGC. It is somewhat amazing that any 1889 silver dollars were struck at the Carson City Mint at all. Coinage operations had been suspended for the prior three years, and when the Nevada Mint was reactivated in July, 1889, not only was the equipment inoperable, the Mint lacked staffing and trained technicians to bring operations back online. Eventually, 350,000 silver dollars and 31,000 double eagles were struck late in the year — a tiny output for the facility, especially for the dollars.

This Mint State example is brightly lustrous and untuned, with silver-white surfaces that show little evidence of the challenges to its very existence. Abrasions are few for a CC-Mint dollar — which are usually bagmarked regardless of the date — especially at the assigned grade level. The strike is quite sharp for an 1889-CC, with excellent eye appeal. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, MS62
Carson City Favorite

3150 1889-CC MS62 PCGS. Slight reflectivity in the fields boosts the eye appeal of this lightly abraded Mint State coin. The strike is sharp, and both sides show small gold and olive overtones across champagne-tinted surfaces. Remarkably, only a few light marks on Liberty's cheek limit the grade.

Among Carson City Morgans, the 1889-CC is the undisputed key, and it is among the most difficult dates in the entire series regardless of mint. Production of the 1889-CC Morgan took place entirely during the last quarter of the year, explaining the limited 350,000-coin mintage at a branch mint that had not struck silver dollars since early 1885. Anti-silver man President Grover Cleveland suspended coinage operations at the Nevada branch mint in March 1885, but the facility was restored to branch mint status in mid-1889 after the pro-silver Benjamin Harrison administration came into office. NGC ID# 2559, PCGS# 7190

**1890-O Dollar, MS65 Deep Mirror Prooflike
Very Rare With This Depth of Mirrors**

- 3151 1890-O MS65 Deep Mirror Prooflike PCGS.** Even though the 1890-O had a large mintage of 1.7 million pieces, a very small percentage were struck on polished or heavily polished planchets. Such pieces are worth significant premiums when encountered. This is an all-brilliant Gem with deeply reflective fields and noticeably frosted devices. The central strike details are somewhat stronger than the typical 1890-O dollar. Population: 22 in 65 (2 in 65+) Deep Mirror Prooflike, 1 finer (10/17). NGC ID# 255E, PCGS# 97201

**1892-CC Silver Dollar, MS65
Scarce Lightly Toned, Frosted Gem Example**

- 3152 1892-CC MS65 PCGS. CAC.** Dappled reddish-gold accents congregate near the margins of this lightly toned, lilac-silver 1892-CC dollar. Bright cartwheel luster easily penetrates the scant patina that gives this Carson City Gem its outstanding eye appeal. A sharp strike adds to the exceptional appeal, which is recognized by CAC endorsement. While scarce at the MS65 grade, the 1892-CC is a major condition rarity any finer. PCGS reports just 35 numerically finer coins (11/1). NGC ID# 255M, PCGS# 7214

**1893-CC Morgan Dollar, MS61
Original Golden-Gray Patina**

- 3153 1893-CC MS61 NGC.** Golden-gray patina allows soft mint luster to shine through on the obverse. The reverse is mostly untuned with only a few pale golden accents. Good strike detail remains on the unworn devices. Morgan dollar production was limited to 677,000 coins at the Carson City Mint in 1893. All issues from this year are challenging, especially in Uncirculated condition. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS62
Vibrant Mint Luster**

- 3154 1893-CC MS62 PCGS. CAC.** This radiantly lustrous, frost-white example is incredibly sharp in the centers and displays outstanding eye appeal for the grade. A smattering of light abrasions on Liberty's cheek determines the grade, as the reverse is several points finer by itself. The final-year Carson City Morgan is available in this condition for a price, but CAC-approved coins are infrequently encountered. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63
Uncommonly Well-Struck**

- 3155 1893-CC MS63 PCGS.** This brilliant, frosty 1893-CC dollar is far sharper in the centers than usual for the final Carson City Morgan, and the surfaces are generally well-preserved save for a diagonal graze on Liberty's cheek. A radiant cartwheel effect is a familiar CC-mint characteristic. The 1893-CC is a challenging issue above MS63 and highly sought-after in all Mint State grades. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS63
Semiprooflike Fields**

- 3156 1893-CC MS63 PCGS.** Brilliant, frosty surfaces are original, and this Select 1893-CC Morgan displays minimal abrasions for the grade. The fields are semiprooflike. Examination of the central devices shows the usual strike weakness on the eagle's breast and the hair above Liberty's ear. The 1893-CC is a slightly better date in high grade among Carson City Morgans, as almost no examples were distributed through the GSA sales of the early 1970s. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS63
Above-Average Strike

- 3157** 1893-CC MS63 PCGS. The mintmark is tilted sharply clockwise. This Select final-year Carson City Morgan displays a remarkably bold strike for the issue, along with frosty luster and minimal abrasions for the grade. Most of the coin is entirely untuned, although if one is to be overly studious they will notice slight yellow-gold color at the extreme outer periphery. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS63
Uncommonly Sharp Eye Appeal

- 3158** 1893-CC MS63 PCGS. In true 1893-CC fashion, a few roller marks over the ear indicate an incomplete strike in that area, and the eagle's lower extremities show a bit of weakness as well. Grade-limiting marks are confined to the reverse, where a group of small marks on the eagle's breast and a scrape on the right (facing) wing are noted. The rest of this brilliant, blaze-white coin is remarkably clear of abrasions and the fields are smoothly reflective to earn the well-deserved Select Uncirculated grade. The eye appeal is exceptional for the grade. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS64
Last of the Carson City Morgans

- 3159** 1893-CC MS64 PCGS. The reelection of anti-silver man Grover Cleveland to the presidency in 1892, along with decreased production from the Comstock Lode, led to the suspension of coinage at the Carson City Mint in mid-1893. The 1893-CC became the final silver dollar to bear the CC mintmark. Today, examples are moderately available through MS64, but in Gem or better condition this issue is a major rarity with only 16 such pieces reported at PCGS (10/17). This near-Gem is among the finer collectible examples seen. Satiny, brilliant mint luster cartwheels freely around largely unabraded surfaces, illuminating sharp design elements. Only some faint grazes on the cheek and in the adjacent field limit the grade. NGC ID# 255S, PCGS# 7222

1893-S Morgan Dollar, VF35
Excellent Detail

- 3160** 1893-S VF35 NGC. Strong detail remains for the grade on this circulated 1893-S dollar. Both sides display deep olive-gray and russet toning and have a scattering of grade-consistent abrasions. A rim bump is noted at 2 o'clock on the reverse rim. This is a well-detailed collector-grade example of the undisputed Morgan dollar key date. Only 100,000 examples of this issue were struck, and survivors are sought-after in all grades. NGC ID# 255U, PCGS# 7226

1893-S Dollar, AU Details

- 3161** 1893-S — Improperly Cleaned — NGC Details. AU. Some astute collector will recognize what a good value this piece represents. The strike definition over Liberty's ear is razor-sharp, although it is not as well brought up in the center of the reverse. The surfaces are correctly labeled by NGC as Cleaned ... BUT, there is just a bit of unnatural brightness present. The obverse shows even gray-golden toning, while the reverse retains much brightness. Like many 1893-S dollars, this one is also not perfect, but it may prove to be the perfect coin for the collector who is looking for a well-defined, minimally worn example. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU53
Hint of Field Reflectivity

- 3162** 1893-S AU53 NGC. The 1893-S is one of the most desirable issues in the Morgan dollar series. It is also the single rarest circulation strike in Mint State, and even AU coins are elusive. Q. David Bowers, in *A Guide Book of Morgan Silver Dollars*, fifth edition, writes: "The majority of known pieces, into the thousands, are in the single grade category of Very Fine. Not G or VG, not EF or AU, but VF. Most such pieces circulated in the American West, and for an appropriate but apparently restricted time, to bring them to this grade. ... among the great Treasury release coins of 1962 through 1964, no bag or even small group was found, although many stray pieces were identified, nearly all in the aforementioned VF grade."

The collector who desires to acquire a high-grade 1893-S for his/her collection will want to give serious consideration to the AU53 example in this lot. A fair amount of luster remains in the recessed areas, and the coin is essentially untoned. The design elements are sharp, though light wear is visible in portions of Liberty's hair and on the eagle's breast. When tilted beneath a light, slight reflectivity emerges from the protected portions of the fields. A few wispy circulation marks on each side do not detract.

Ex: *Central States Signature* (Heritage, 5/2007), lot 2180. NGC ID# 255U, PCGS# 7226

1894-O Morgan, Luminous MS64
High-End for the Issue

- 3163** 1894-O MS64 NGC. This amber-tinted near-Gem displays glistening mint luster and uncommonly strong visual appeal. The usual strike weakness is seen at the centers, a characteristic of the mid-1890s New Orleans issues that is extremely difficult to avoid. A small mark on Liberty's nose and a few others on the eagle's breast likely prevent a Gem designation. NGC has seen only nine finer representatives (10/17). NGC ID# 255W, PCGS# 7230

1894-O Dollar, Colorful MS64+
Southern Branch Mint Rarity

- 3164** 1894-O MS64+ PCGS. The 1894-O is a better date that carries a slight premium in well-circulated grades and becomes progressively more challenging in AU condition (the average survivor grades AU50). However, a collector should be able to find an acceptable example in lower Mint State grades with a bit of patience and a decent budget. This New Orleans issue is truly scarce at the Choice grade level, and Gems are rare. The 1894-O is notorious for its poor production quality and usually unimpressive appearance, but this high-end near-Gem is fully swathed in attractive gold, violet, cobalt-blue, and teal toning that occurs in a concentric fashion on the reverse. Strike definition is expectedly soft, and the only singular mark is a horizontal depression under Liberty's eye. There are 13 finer grading events at PCGS (10/17). NGC ID# 255W, PCGS# 7230

1894-O Morgan Dollar, MS64+
Vivid Color, Vibrant Luster

- 3165** 1894-O MS64+ PCGS. CAC. The 1894-O Morgan dollar claims a mintage of 1.7 million pieces, but the issue was not well-produced. Most examples seen are weakly struck, with insipid luster characteristics, and heavily abraded surfaces. This Plus-graded Choice example is a happy exception to the rule, with a better-than-average strike that shows just the slightest blending on the hair strands above Liberty's ear. Iridescent shades of golden-brown and lavender toning enhance the well-preserved surfaces, with vibrant mint luster underneath. Overall eye appeal is terrific. PCGS has graded 13 numerically finer examples (10/17). NGC ID# 255W, PCGS# 7230

1894-S Dollar, Frosty MS65
Conditionally Scarce

- 3166** 1894-S MS65 PCGS. The availability of this semikey San Francisco issue declines sharply in MS65, and finer pieces are genuinely rare. This Gem displays original, frosty mint luster with no toning or obvious abrasions. The strike is good and eye appeal is outstanding. PCGS lists only 17 numerically finer representatives (10/17). NGC ID# 255X, PCGS# 7232

1895-O Silver Dollar, AU58+
Radiant Luster

- 3167 1895-O AU58+ PCGS.** The New Orleans issue of 1895 comes from a limited 450,000-coin mintage and was widely circulated at the time of its commercial release. Uncirculated examples are scarce, pricey, and often unsightly with heavy abrasions. This highly lustrous near-Mint example is brilliant, minimally abraded, and only a faint brush of high-point friction away from Mint State. Strike weakness on the hair above Liberty's ear is typical of O-mint Morgans from this period. NGC ID# 255Y, PCGS# 7236

1895-S Morgan, Lightly Toned MS62
Better San Francisco Issue

- 3168 1895-S MS62 PCGS.** Dusky golden-gray toning blankets the lightly abraded surfaces of this well-struck 1895-S dollar. The reverse fields are slightly reflective, while the obverse is more satiny. The centers are well-struck, which is significant considering how many 1895-S dollars that we see with weak impressions. With a mintage of only 400,000 pieces, this San Francisco issue is a semikey date in all grades. NGC ID# 255Z, PCGS# 7238

1895-S Morgan, Lustrous MS62
Appealing for the Grade

- 3169 1895-S MS62 PCGS.** Although about 1,000 1895-S dollars were a part of the Redfield Hoard, this semikey San Francisco issue remains elusive in Mint State, particularly with good eye appeal. For the MS62 level, this piece is remarkably attractive. On the obverse, scattered abrasions limit the grade but are light and uniformly dispersed with limited visual impact; the reverse is largely pristine, as is often the case for this type. Brilliant, frosty luster yields golden peripheral hues and illuminates surprisingly well-struck design elements. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS63
Lustrous and Lightly Toned

- 3170 1895-S MS63 PCGS. CAC.** Known as a heavily bagmarked issue, surviving 1895-S Morgan dollars are often relegated to the lower Mint State grades, with coins in MS63 and finer considered appealing. A Select example, this specimen displays flashy lustrous surfaces, with areas of light golden-brown toning at the peripheries. A small spot appears near the second S in STATES. NGC ID# 255Z, PCGS# 7238

1895-S Morgan Dollar, MS63
Semiprooflike Fields

- 3171 1895-S MS63 PCGS. CAC.** This Select 1895-S displays traditional satin luster and brilliant surfaces. Semiprooflike fields are a hallmark attribute, seldom seen on this better San Francisco issue. Only minimal abrasions are present and the strike is above-average. Although often available through MS63, the 1895-S Morgan dollar is seldom offered with a CAC endorsement in Mint State. NGC ID# 255Z, PCGS# 7238

1895-S Morgan, Satiny MS64
Older NGC Holder

- 3172 1895-S MS64 NGC.** This near-Gem is about as fine as the 1895-S Morgan dollar is typically offered, as NGC has seen only 14 numerically finer coins (10/17). A couple of light marks on Liberty's jaw are all that limit the grade. The coin is brilliant and satiny with a hint of reflectivity in the fields. Central sharpness is above-average for the issue. Housed in a scarce late-2000 vintage NGC holder. NGC ID# 255Z, PCGS# 7238

1896 Dollar, MS66 Deep Mirror Prooflike
Few Peers at This Impressive Level

- 3173 1896 MS66 Deep Mirror Prooflike PCGS.** A plentiful date in the absolute sense, the 1896 Morgan dollar is conditionally rare in the upper Deep Mirror Prooflike grades. This Premium Gem has few peers. Brilliant surfaces show excellent preservation and bold design elements. The fields are deeply reflective and appealing. Population: 22 in 66 Deep Mirror Prooflike, 1 finer (10/17). NGC ID# 2562, PCGS# 97241

1896-S Dollar, Brilliant MS64
Elusive in Finer Grades

- 3174 1896-S MS64 PCGS.** This brilliant near-Gem offers radiant cartwheel luster and above-average strike sharpness. A few light, scattered ticks determine the grade but pose little distraction. The 1896-S is a better date in high grade. Choice coins are usually available for a price, but Gem or better examples are rare in comparison to the demand for them. NGC ID# 2564, PCGS# 7244

1900-O Morgan Dollar, MS67 ★
Tied for Finest Certified

- 3175 1900-O MS67 ★ NGC.** The 1900-O is a plentiful date in the absolute sense, but it is scarce in both Superb Gem condition and with reflective fields. Prooflike coins are rarely seen above MS65. This Star-designated MS67 example is noticeably reflective on each side, although the depth of the mirroring is shy of a full Prooflike designation. The NGC Star is sufficient to denote the heightened eye appeal. The coin is sharply struck and devoid of major abrasions. No toning is present on either side. This piece is among the finest 1900-O dollars certified. Census: 76 in 67 (2 in 67+, 2 in 67★), 0 finer (10/17). NGC ID# 256F, PCGS# 7266

1901 Silver Dollar, MS62
Appealing for the Grade

- 3176 1901 MS62 PCGS.** Hints of golden border toning warm the satiny silver surfaces of this Mint State 1901 Morgan dollar. The strike is above-average for the issue, and grade-limiting abrasions are light and uniformly scattered across each side. Occasionally seen in this grade, the 1901 becomes elusive just one point finer. NGC ID# 256J, PCGS# 7272

1901 Dollar, Brilliant MS62+
Scarce This Well-Preserved

- 3177 1901 MS62+ NGC. CAC.** This CAC-endorsed 1901 also displays the NGC Plus designation, two important indicators of its high-end quality for the MS62 grade. Although tiny abrasions are present, this brilliant and frosted example shows no heavy marks and lively mint luster radiates from both sides. The strike, while sharp in most areas, shows minor weakness at the centers typical of the new C4 reverse. Eye appeal is far above average for the issue. Census: 6 in 62+, 121 finer. CAC: 24 in 62, 32 finer (10/17). NGC ID# 256J, PCGS# 7272

1903-S Dollar, CAC-Approved MS64
Radiant Cartwheel Luster

- 3178 1903-S MS64 PCGS. CAC.** This satiny near-Gem is brilliant across the interiors with lovely rose-gold border toning. Light marks under Liberty's eye are all that deny a finer grade. Slight weakness on the eagle's breast and the hair above Liberty's ear is typical of the issue. The 1903-S is a better date in all grades but is genuinely scarce finer than MS64, and CAC-approved coins are rare even at this level. NGC ID# 256T, PCGS# 7288

1904-S Morgan Dollar, MS64
Better 20th Century Date

- 3179** 1904-S MS64 PCGS. Among 20th century issues, the 1904-S is challenging in high grade. Choice coins are occasionally seen, but higher-grade examples are scarce. This piece is brilliant and vibrantly lustrous. A few marks in the field near Liberty's nose limit the grade but are not particularly distracting without a loupe. NGC ID# 256W, PCGS# 7294

1921 Morgan Dollar, MS67
An Exemplary Strike
Conditionally Rare

- 3180** 1921 MS67 NGC. NGC and PCGS combined report only 26 Superb Gem examples of the 1921 Morgan dollar, making the finest-known examples of this date immensely rare and important, especially for Registry Set collectors. The strike on this piece is almost unbelievably sharp, particularly on the wreath and the eagle's talons. Frosty, pristine luster exhibits light champagne tinting on each side, and the overall eye appeal is exceptional. Census: 12 in 67 (1 in 67 ★), 0 finer (10/17). NGC ID# 256X, PCGS# 7296

1921 Morgan Dollar, MS67
A Top-Grade Registry Coin

- 3181** 1921 MS67 NGC. The 1921 Morgan dollar may be the most common date in the series overall, but it is a major condition rarity in MS67 and is unknown finer. When located, the visual appeal generated by the pristine surfaces serves to counter this issue's reputation for being poorly struck and abraded. The present coin exhibits localized weakness on the right wreath branch but is well-struck elsewhere with vibrant, frosty luster. A hint of light golden toning warms each side. Census: 12 in 67 (1 in 67 ★), 0 finer (10/17). NGC ID# 256X, PCGS# 7296

1921-D Morgan Dollar, MS67
Original Multicolor Toning
A Conditional Rarity

- 3182** 1921-D MS67 NGC. This high-mintage issue is plentiful in Mint State, although it usually shows numerous abrasions. This piece is exceptionally clean with bright mint frost that has taken on a somewhat mottled coating of turquoise-blue and antique-golden color over each side. The devices are generally bold with only slight weakness seen on a couple of the leaves on the wreath. The 1921-D is a major rarity this fine and an important acquisition for Registry Set collectors. Census: 11 in 67 (3 in 67 ★), 1 finer (10/17). Ex: Long Beach Signature (Heritage, 1/2004), lot 8273. NGC ID# 256Y, PCGS# 7298

PROOF MORGAN DOLLARS

1891 Dollar, Golden PR65
Undesignated Contrast

- 3183** 1891 PR65 NGC. This champagne-tinted Gem proof exhibits deeper orange-gold toning around the outer peripheries, framing well-contrasted devices. The older NGC holder lacks a Cameo designation, although the white-on-black effect is considerable on both sides. A localized area of weakness occurs on the hair above Liberty's ear, and only a few faint lines on the cheek limit the grade. NGC ID# 27ZL, PCGS# 7326

1898 Morgan Dollar, PR64 Deep Cameo
Exceptionally Well-Preserved

- 3184 1898 PR64 Deep Cameo PCGS. CAC.** The intensity of mint frost that clings to every raised element on this Choice Deep Cameo proof is amazing. White-on-black contrast exists from every viewing angle, obverse or reverse. The cheek and neck are essentially flawless while the full strike is seemingly unimprovable. A few wayward, delicate lines in the left obverse field are the only obstacles to an even finer grade. CAC endorsed, the eye appeal far exceeds the near-Gem numeric grade. Population: 17 in 64 (1 in 64+) Deep Cameo, 38 finer. CAC: 10 in 64, 13 finer (10/17). NGC ID# 27ZW, PCGS# 97333

1924-S Peace Dollar, MS65
Only One Coin Finer at NGC

- 3187 1924-S MS65 NGC.** The 1924-S is one of a few San Francisco issues in the series that are plentiful through MS64 but scarce in Gem condition. This MS65 coin is well-struck and frosty with golden toning that shows occasional daubs of olive and russet. A single mark below Liberty's eye prevents a finer grade. Census: 77 in 65 (1 in 65+), 1 finer (10/17). NGC ID# 257K, PCGS# 7364

PEACE DOLLARS

1924 Peace Dollar, MS67
Remarkable Type Coin Quality

- 3185 1924 MS67 PCGS. CAC.** Only a handful of Peace dollar issues are generally available in Superb Gem condition, among them the 1924. However, most of the MS67 population for this issue is graded by NGC. This rare PCGS coin boasts the coveted CAC green label. Sharply struck and frosty, the surfaces are mostly pristine, yielding lovely pastel hints of color. Population: 34 in 67, 1 finer. CAC: 25 in 67, 1 finer (10/17). NGC ID# 257J, PCGS# 7363

1927-S Peace Dollar, MS65
Attractive Original Luster

- 3188 1927-S MS65 PCGS.** The 1927-S Peace dollar is a better date in high grade and genuinely scarce at the Gem level. This piece is frosty with original luster and only a few insignificant marks. Russet-gold border toning fades toward the centers, where each side is silvery-white. The 1927-S comes from a mintage of 866,000 pieces, the third-lowest mintage in the 24-coin series. NGC ID# 26J6, PCGS# 7372

1924-S Peace Dollar, MS65
Scarce in This Grade, Rare Finer

- 3186 1924-S MS65 PCGS.** This satisfying Gem has alternating ice-blue and straw-gold toning. It is a lustrous and attentively struck example whose shimmering surfaces lack conspicuous contact. The San Francisco Mint struck nearly 60 million silver dollars between 1921 and 1923, but in 1924, their output dwindled to little more than 1.7 million pieces. This date is elusive in Gem condition and rare finer. PCGS lists five higher-grade examples (10/17).
Ex: ANA Signature (Heritage, 8/2007), lot 2566. NGC ID# 257K, PCGS# 7364

1927-S Peace Dollar, MS65+
Within the Condition Census

3189 1927-S MS65+ PCGS. CAC. The low mintage of the 1927-S (866,000 pieces) promotes increased demand for scarce Gem examples of the date. Plus-graded Gems are rare, and only a few finer coins are known. This piece is tied for the finest endorsed by CAC. Hints of lavender and gold create iridescent luster, and the sharp design elements complement well-preserved surfaces.

We have never before offered a Plus-graded Gem, and the only finer piece we have handled was an MS66 PCGS coin in our April 2011 Central States Signature sale, which realized \$48,875 in a green label holder. The present coin is nearly as important. Population: 87 in 65 (5 in 65+), 2 finer. CAC: 22 in 65, 0 finer (10/17). NGC ID# 26J6, PCGS# 7372

1934-S Peace Dollar, MS63
High-End for the Grade

3190 1934-S MS63 NGC. Easily the most visually appealing MS63 coin that we have seen of this date, as no singular abrasions are present and the luster is vibrant. Both sides are toned in olive-gold hues. NGC would have awarded a finer grade were it not for faint horizontal lines on the obverse that show up under a loupe at certain angles. The design elements are sharp, completing the visual attributes. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, MS65
Blazing Brilliant Luster

3191 1934-S MS65 NGC. The 1934-S Peace dollar's mintage barely surpasses 1 million coins. This issue is the scarcest in Mint State, even though not heralded as a key like the 1928. Gems are occasionally seen, but finer pieces are rare. This brilliant, frosty MS65 coin displays an excellent strike and largely unabraded fields and devices. Peace dollars of any date are seldom seen this appealing. Census: 79 in 65 (4 in 65+), 14 finer (10/17). NGC ID# 257Z, PCGS# 7377

1935 Peace Dollar, MS66+
None Finer at PCGS

3192 1935 MS66+ PCGS. CAC. Light to medium wheat-gold toning graces this high-grade final-year Peace dollar. The coruscating surfaces have a mattelike appearance, as made, and are uncommonly free from marks. Likely to command a significant premium with the dual PCGS Plus and CAC endorsements. Population: 41 in 66+, 0 finer. CAC: 87 in 66, 0 finer (10/17). NGC ID# 2582, PCGS# 7378

1935-S Peace Dollar, MS66
Blazing Mint Luster

- 3193 1935-S MS66 PCGS. CAC.** This well-struck Premium Gem displays frosty, brilliant mint luster and impeccable preservation. Although occasionally seen in this grade, the 1935-S Peace dollar is extremely rare any finer with only three Superb Gems reported at each leading certification service. This piece is among the finest at CAC and a worthy Registry Set consideration. CAC: 47 in 66, 0 finer (10/17). NGC ID# 2583, PCGS# 7379

SACAGAWEA DOLLAR

2000-P 'Cheerios' Dollar, MS68
Sought-After Prototype Reverse

- 3194 2000-P "Cheerios," FS-902, MS68 PCGS.** Distributed as a promotion in boxes of cereal, the "Cheerios" variety of the 2000-P Sacagawea dollar is distinguished by the ribbed tailfeathers on the eagle, which are otherwise indistinctly detailed. Struck with a prototype reverse die, these coins are rare in high grade with the finest pieces designated MS68. PCGS has certified only 39 representatives in this grade (10/17). This piece is fully struck and semiprooflike, showing bright brass-gold color and no distracting abrasions. NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

GOLD DOLLARS

1849-D Gold Dollar, MS62
Fully Struck Obverse

- 3195 1849-D MS62 PCGS. Variety 1-A.** Mintmark positioned left under the ribbon. This first-year Dahlonega gold dollar is fully struck on the obverse, the reverse showing a touch of softness on the date and denomination but is otherwise sharp. The dentils are mostly indistinct on each side. A hint of reflectivity is apparent despite the grade-defining abrasions. Probably 40 to 60 Uncirculated examples survive. Population: 30 in 62 (1 in 62+), 16 finer (10/17). NGC ID# 25BD, PCGS# 7507

1849-D Gold Dollar, MS62
Variety 1-A, Mintmark Left of Center

- 3196 1849-D MS62 NGC. Variety 1-A.** A single obverse die was paired with two reverse dies for the mintage of 21,588 gold dollars at Dahlonega in 1849. This reverse has the mintmark left of center, and the other reverse has a centered mintmark. An impressive piece, this lovely Mint State gold dollar has brilliant greenish-gold surfaces with reflective satin luster. Insignificant marks on each side limit the grade. Census: 32 in 62 (1 in 62+), 26 finer (10/17). NGC ID# 25BD, PCGS# 7507

1849-O Gold Dollar, MS64
Open Wreath, Rare So Fine

- 3197 1849-O Open Wreath MS64 NGC. Variety 3.** Lapped reverse. The first-year cachet of the 1849-O gold dollar explains its popularity, and a decent number of coins survive in lower Uncirculated grades for those who demand a Mint State representative. Choice pieces are harder to come by. The obverse is fully struck, while the reverse details are softened by die lapping. Vibrant luster flows over luminous lemon-gold surfaces. Census: 27 in 64 (3 in 64+), 16 finer (10/17). NGC ID# 25BE, PCGS# 7508

1850-C Gold Dollar, MS61
Low Mintage of Only 6,966 Pieces

- 3198 1850-C MS61 PCGS. Variety 1.** The 1850-C has an impressively low mintage of only 6,966 coins and is tied with the 1859-C as second-rarest issue from Charlotte. Specialist Doug Winter estimates that fewer than 250 pieces survive in all grades. The fields of this Mint State example show striations that produce a bright semiprooflike sheen. The strike is strong throughout, and the fields display reddish-coppery patina. Population: 14 in 61, 10 finer (5/17). NGC ID# 25BG, PCGS# 7510

1852-D Gold Dollar, MS62
Rare Appearance at This Mint State Grade

- 3199 1852-D MS62 PCGS. Variety 4-F.** A coin that is rare in all grades, the 1852-D is exceptionally challenging in full Mint State. Just 6,360 pieces were struck and estimates vary on the number of Uncirculated examples that exist. Doug Winter suggests up to 10 "true" Mint State coins, while the David Bowers estimate is more liberal, with as many as 35 Uncirculated coins possible. Either way, the 1852-D ranks among the rarest Dahlonega Mint gold dollars, nearly equal to the 1850-D and 1854-D.

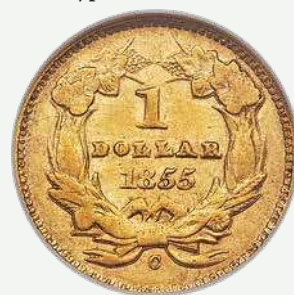

Almost all 1852-D survivors show die clashing to one extent to another, and die lapping has effectively eliminated the bridge of Liberty's nose. This lustrous and frosted example is perhaps less affected by die clashing than most, and it is sharply struck on both sides. A few radial die cracks are seen — one on the obverse, and at least three on the reverse. Bright mint luster rolls across the greenish-gold surfaces, which display a grained texture typical of the issue. Tiny marks and light, wispy lines contribute to the assigned grade. Population: 4 in 62, 1 finer (10/17). NGC ID# 25BS, PCGS# 7519

1853 Gold Dollar, MS66+
Exceptional Luster and Sharpness

- 3200 1853 MS66+ PCGS. CAC.** Frosty wheat-gold luster offers outstanding eye appeal alongside sharp design elements and unabraded fields. The 1853 gold dollar is a plentiful issue, ideal for type collectors. However, Premium Gems are scarce and finer examples are rarely offered at any price. Only a few other Type One gold dollars are generally considered collectible in this lofty grade. Population: 63 in 66 (8 in 66+), 12 finer. CAC: 26 in 66, 5 finer (10/17). NGC ID# 25BU, PCGS# 7521

1855-C Gold Dollar, AU50
Type Two Charlotte Type Coin

- 3201 1855-C AU50 NGC. Variety 2.** The 1855-C is the only Type Two gold dollar from the Charlotte Mint, making it one of the most highly sought-after C-mint gold dollars in the series. The issue is scarce in AU condition and rare in Mint State. This piece shows bold clashing on the obverse behind the portrait, with attractive deep orange-gold patina and no consequential marks. Ex: ANA Signature (Heritage, 3/2008), lot 1347; ANA Signature (Heritage, 7-8/2008), lot 2777; Central States Signature (Heritage, 4/2017), lot 5152. NGC ID# 25C5, PCGS# 7533

1859 Gold Dollar, Shimmering MS66+
Full Strike Detail

- 3202 1859 MS66+ PCGS. CAC.** The 1859 ranks among the more available gold dollars of the period. However, the average certified grade is only 60.4. Coins at this esteemed level are very rare and finer pieces are extremely so. This piece also boasts a sought-after green label sticker for quality within the grade — rightfully so. Shimmering rose-gold surface are nearly pristine with full strike detail on the motifs. Clashed lightly on each side. Population: 10 in 66 (3 in 66+), 5 finer. CAC: 7 in 66, 3 finer (10/17). NGC ID# 25CL, PCGS# 7551

3203 No Lot.

PROOF GOLD DOLLARS

1882 Gold Dollar, PR66+ Ultra Cameo
Amazing Contrast and Visual Appeal

- 3204** 1882 PR66+ Ultra Cameo NGC. Merely 5,000 business-strike gold dollars and 125 proofs were minted in 1882. The coins were issued more for numismatic purposes than for circulation, as gold dollars were unused in general commerce after 1879. Walter Breen asserts in his *Proof Encyclopedia* that none of the proofs were melted, and the population data at PCGS and NGC bear that out. CoinFacts estimates that 80 1882 gold dollar proofs survive, while Bowers provides a range of 60 to 80 proofs extant. To be sure, survivors are rare in any grade, but especially at the Premium Gem level with Ultra Cameo contrast. This amazing PR66+ Ultra Cameo gold dollar features jet-black fields against frosted, fully struck motifs. Rich yellow-gold surfaces are exceptionally preserved, and the visual appeal is outstanding. Census: 11 in 66 Ultra Cameo (3 in 66+), 4 finer (10/17). NGC ID# 25ES, PCGS# 97632

1888 Gold Dollar, PR65 Cameo
Sharply Detailed and Nicely Contrasted

- 3205** 1888 PR65 Cameo NGC. A fairly generous mintage of 1,079 proof gold dollars was accomplished in 1888, making this one of the more available proofs of this popular denomination. The present coin is a delightful Gem, with sharply detailed design elements and deeply mirrored fields that contrast boldly with the frosty devices. The well-preserved lemon-yellow surfaces show the slight orange-peel texture of the best 19th century proofs. NGC ID# 25EY, PCGS# 87638

1888 Gold Dollar, PR66 Cameo
Conditionally Rare

- 3206** 1888 PR66 Cameo NGC. No non-Cameo proof 1888 gold dollars are certified finer than PR65 at NGC, heightening demand for the few Cameos known in this lofty condition. The present Premium Gem displays razor-sharp detail and modest contrast. The bright yellow-gold surfaces show no distractions. Although Mint records indicate a coinage 1,079 proof gold dollars in 1888, most have not survived. Including possible resubmissions, NGC and PCGS combined have certified only 242 examples of this elusive and well-made issue. In the past, the availability of the 1888 proofs was skewed by prooflike circulation strikes that were frequently offered as proofs. Our Permanent Auction Archives show that we have handled proofs on only 77 different occasions. Census: 12 in 66 Cameo (1 in 66+), 8 finer; 2 in 66 Ultra Cameo, 3 finer (10/17). NGC ID# 25EY, PCGS# 87638

EARLY QUARTER EAGLE

1833 BD-1 Two and a Half
AU Sharpness, Low Mintage

- 3207** 1833 BD-1, R.5 — Rim Filing — NGC Details. AU. Bass-Dannreuther Die State a/c. The only die marriage for this rare date. The obverse rim is filed, but this lemon-gold representative displays noticeable luster, and the only mentionable abrasions are a cluster of small marks above the eagle's head. The strike is good aside from some characteristic softness on the shield. Just 4,160 pieces were struck, and approximately only 60 to 80 pieces are known according to the Bass-Dannreuther reference.
Ex: Long Beach Signature (Heritage, 9/2013), lot 6714; San Francisco Signature (Heritage, 3/2014), lot 10536.

CLASSIC QUARTER EAGLES

1838-C Quarter Eagle, AU58
First C-Mint Issue in the Classic Series

- 3208** 1838-C AU58 NGC. Breen-6147, Variety 20, R.3 The 1838-C quarter eagle is an extremely popular coin among early gold enthusiasts. It is a first-year-of-issue and one of just two Charlotte quarter eagles that use the Classic Head, obverse mintmark design. All known examples exhibit a repunched mintmark, that was initially entered too low.

Writing in his *Charlotte Mint gold coins reference* (2008), Doug Winter says the 1838-C quarter eagle "Usually seen in VF and EF grades, it becomes very scarce in properly graded AU55 to AU58 and rare in Uncirculated." The population reports bear this out, even though the NGC/PCGS population distribution peaks in the better grades of About Uncirculated (AU55 and AU58). This skewing of the population data undoubtedly results from repeated resubmissions in an attempt to attain Mint State grades.

This near-Mint example displays excellent definition on the design features. Liberty's hair is particularly sharp, as is the eagle's plumage, save for the upper parts of the left (right facing) wing. The surfaces are bright yellow-gold, and retain traces of luster in the recesses. A few marks are noted on the obverse, but all in all, the coin fares better than most examples of the issue, of which Winter contends: "Nearly all 1838-C quarter eagles have very scruffy surfaces. The fields often show numerous digs and scratches."

Ex: *FUN Signature* (Heritage, 1/2008), lot 3079. NGC ID# 25FZ, PCGS# 7697

1839-C Two and a Half, AU55

- 3209** 1839-C AU55 NGC. Breen-6150, Winter-2, Variety 22, R.4. The 1839-C is the more plentiful of the two Classic Head quarter eagles from this mint, ideal for type representation. This variety has heavy die cracks on each side and a boldly repunched 3 in the date. Bright straw-gold surfaces show only light high-point wear and light surface chatter. The strike is a trifle weak immediately above Liberty's ear and on the left shield corner. NGC ID# 25G4, PCGS# 7699

1839-D Classic Quarter Eagle, MS60
Among the Finest of This Scarc Issue

- 3210** 1839-D MS60 NGC. Winter 1-A, Variety 26, R.3. The Weak Stem variety with much of the branch stem and other details at the lower reverse lapped from the die. The other variety, from a different reverse die, shows a bold stem. The obverse has a recut 9 in the date, and in many older references it is called a 9 over 8 overdate.

The 1839-D is the first quarter eagle struck in Dahlonega, Georgia, and it is also the only Classic Head gold piece struck at that Mint. For those reasons, it is an extremely popular variety with collectors. The present piece has excellent design elements and full luster, with moderately abraded surfaces that prevent a higher grade. However, this issue is elusive in any high grade. Census: 1 in 60, 11 finer (10/17).

Ex: *Houston Signature* (Heritage, 12/2008), lot 1834. NGC ID# 4UKS, PCGS# 7700

LIBERTY QUARTER EAGLES

1843-O Quarter Eagle, MS60
Large Date, Plain 4

- 3211 1843-O Large Date, Plain 4 MS60 NGC. CAC. Variety 1.** The 1843-O Large Date quarter eagles all have the Plain 4 style that continued into the later 1840s, rather than the Small Date, Crosslet 4 style of the 1840 through early-1843 issues (produced only in Charlotte, Dahlonega, and New Orleans). The 1843-O Large Date is much rarer than the Small Date variant, the converse of the situation for the Charlotte pieces of the same variety. This is a bright, well-struck example that shows semireflective fields on each side. Seldom located in Mint condition. Census: 2 in 60, 15 finer. CAC: 1 in 60, 12 finer (10/17).
Ex: Long Beach Signature (Heritage, 2/2009), lot 2461. NGC ID# 25GS, PCGS# 7732

1846-C Quarter Eagle, AU53
Very Scarce in Upper Grades

- 3212 1846-C AU53 PCGS. Variety 1.** Coppery-gold toning at the margins surrounds bright, greenish-gold centers for distinctive eye appeal. The low-mintage 1846 Charlotte issue is scarce in any grade finer than AU50 according to Doug Winter, who estimates just 100 to 125 pieces survive in all grades. Only 4,808 pieces were produced. This sharply struck example shows minor abrasions throughout both sides, visible with a loupe. NGC ID# 25H2, PCGS# 7741

1849-C Quarter Eagle, AU55
Only 10,220 Coins Struck

- 3213 1849-C AU55 PCGS. Variety 1.** The only known dies for the 1849-C quarter eagles with the mintmark centered above the small 1 in the fraction, and heavily merged with a claw and arrow feather. The Charlotte Mint accomplished a small production of only 10,220 quarter eagles in 1849, and few of those survive in high grades. This Choice AU example has light greenish-gold surfaces with nearly full luster and minimal surface marks. Population: 13 in 55 (1 in 55+), 10 finer (10/17). NGC ID# 7HRT, PCGS# 7753

1850-D Liberty Quarter Eagle, AU55
Popular Branch Mint Issue

- 3214 1850-D AU55 PCGS. Variety 13-N.** The 1850-D Liberty quarter eagle claims a mintage of 12,148 pieces, and few examples were saved by contemporary collectors, making the issue extremely elusive in high grade. This impressive Choice AU specimen shows just a touch of wear on the well-detailed design elements, which show a touch of softness on the eagle's legs. The lightly abraded orange-gold surfaces retain much original mint luster. Population: 19 in 55, 28 finer (10/17). NGC ID# 25HJ, PCGS# 7757

1853 Quarter Eagle, Rare MS65
Only One Finer NGC Example

- 3215 1853 MS65 NGC.** Frosty and attractive, this 1853 quarter eagle has just a hint of pale olive-gold iridescence. The design is sharp save for the IB in LIBERTY and the eagle's right thigh (viewer's left) and left claw, which show a touch of strike softness. The 1853 is readily available in the MS60 to MS63 range due to the existence of a hoard, but as with so many other issues in the 19th-century U.S. gold series, only a coterie of Uncirculated survivors can claim membership in the Gem category. Census: 21 in 65 (3 in 65 ★), 1 finer (10/17).
Ex: Long Beach Signature (Heritage, 6/2005), lot 7559; FUN Signature (Heritage, 1/2013), lot 6900. NGC ID# 25HV, PCGS# 7767

1858-C Quarter Eagle, MS62
Ideal Charlotte Type Coin

3216 1858-C MS62 PCGS. Variety 1. The 1858-C quarter eagle was struck to the meager extent of 9,056 coins, and yet it is the most collectible C-mint issue for the decade and one of the most available overall, including in high grades. Doug Winter suggests this may reflect the dispersal of a small hoard in the 1980s and accounts for the estimated 15 to 25 Mint State survivors.

This impressive MS62 two and a half dollar gold piece has the vibrant, frosty luster and rich orange-gold color specialists expect for the issue. Strike detail is razor-sharp for the North Carolina mint. A phenomenal type coin. Population: 11 in 62 (2 in 62+), 5 finer (10/17). NGC ID# 25JH, PCGS# 7787

1859 Quarter Eagle, MS63
Old Reverse Hub

3217 1859 Old Reverse, Type One, MS63 PCGS. This is the first transitional year in the Liberty quarter eagle series, with Type One and Type Two reverse dies utilized in 1859, 1860, and 1861. The Old Reverse style, known as Type One, is scarcer in each of those years. An outstanding Select Mint State example, this variety is extremely rare in higher Mint State grades. This piece has bold design motifs with delicate rose toning on its satiny yellow-gold surfaces, exhibiting considerable field reflectivity. Population: 7 in 63, 3 finer (10/17). NGC ID# 25JK, PCGS# 97788

1889 Quarter Eagle, MS65
Only Two Coins Finer

3218 1889 MS65 NGC. The 1889 Liberty quarter eagle claims a modest mintage of 17,648 pieces, and the issue is extremely rare above the MS65 level. This spectacular Gem exhibits well-detailed design elements with a touch of the usual softness on the hair above the brow and the eagle's leg. Well-preserved peach-gold surfaces are awash in softly frosted mint luster. Census: 12 in 65, 2 finer (10/17). NGC ID# 7JTT, PCGS# 7841

PROOF LIBERTY QUARTER EAGLE

1884 Quarter Eagle, PR63 Deep Cameo
One of Just Two at PCGS

- 3219 1884 PR63 Deep Cameo PCGS.** The 1884 quarter eagle is a rare coin in any format. Only 1,950 circulation strikes were made, and just 723 proofs were struck. Among the proofs, perhaps as few as 30 to 40 pieces survive. Most of those have Cameo contrast, although the population figures are inflated by many resubmissions and crossovers. PCGS reports only two 1884 Deep Cameo proofs — this coin, plus another in PR66 Deep Cameo.

The present example displays glittering rich-gold color and a pinpoint-sharp strike. A scattering of light marks determines the assigned grade. Deep reflectivity in the fields contrasts boldly with the sharp and frosted raised devices. Population: 1 in 63 Deep Cameo, 1 finer (11/17). NGC ID# 2887, PCGS# 97910

INDIAN QUARTER EAGLES

1910 Two and a Half, MS65+
Satin-Smooth, High-End Appeal

- 3220 1910 MS65+ PCGS.** The Plus designation from PCGS adds much to the stature of this high-end Gem 1910 quarter eagle. The khaki-gold surfaces are exceptionally attractive, with a sharp strike and outstanding eye appeal. Marks are limited to only three or four tiny, microscopic abrasions, while the satin-smooth surfaces gracefully glow with understated allure. The 1910 is elusive this fine, as confirmed by the certified population. Population: 6 in 65+, 11 finer (10/17). NGC ID# 2892, PCGS# 7941

1911-D Quarter Eagle, AU58
Unrivalled Key to the Set

- 3221 1911-D AU58 NGC.** No other issue in this quarter eagle series challenges the 1911-D (55,680 coins struck) in terms of overall scarcity or demand. It is the unmistakable key among Pratt two and a half dollar gold pieces. This is a nearly Uncirculated representative, strongly defined with a clear mintmark. Orange-gold with slight reddish accents. Tiny abrasions on each side. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, AU58+
Incredibly High-End for the Grade

- 3222 1911-D AU58+ NGC. CAC.** If held at a careful angle under a lamp, and viewed with a loupe, one can just make out a trace of friction across the eagle's wing feathers and the Indian's cheek bone. However, upon just casual inspection, the satiny straw-gold surfaces of this Plus-graded, CAC-endorsed near-Mint coin show eye appeal reminiscent of an Uncirculated grade. The strike is sharp and the mintmark bold. There was little demand for quarter eagles in 1911, and the denomination hardly circulated at all. This is reflected in the small 55,680-coin mintage of the 1911-D. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS62
Sharp Wire Rim, Well-Defined Mintmark

- 3223 1911-D MS62 NGC.** In 1911, quarter eagle coinage at the Denver Mint amounted to only 55,680 pieces. Commercial demand for the denomination was virtually nonexistent except for a spike in interest toward the end of the year when new coins were sought as Christmas gifts. This Uncirculated survivor is well-struck and displays the usual straw-gold color and satin luster. A loupe reveals a few faint lines in the fields that limit the grade. NGC ID# 7KR7, PCGS# 7943

1861 Gold Three Dollar, AU55
Smooth and Attractive

- 3226 1861 AU55 PCGS.** The 1861 three dollar gold piece was not heavily saved for numismatic purposes, so its small mintage 5,959 coins contributes to genuine scarcity in Mint State. This Choice AU representative has many of the attributes of a Mint State coin — satiny luster, sharp detail, and good eye appeal — but at a more readily collectible grade and price level. The problem-free honey-gold surfaces retain hints of reflectivity in the smooth, unabraded fields. NGC ID# 7K5N, PCGS# 7982

THREE DOLLAR GOLD PIECES

1855-S Three Dollar, AU50
Among the Scarcest Issues in the Series

- 3224 1855-S AU50 PCGS.** The average grade awarded to the 400 estimated survivors is XF40, cementing this early San Francisco issue's status as one of the scarcest entries in the set despite a moderate mintage of 6,600 coins. Bright yellow-gold color reveals elements of reddish patina. Well-defined motifs show slight merging over the highest points. Population: 15 in 50, 34 finer (10/17). NGC ID# 7K5D, PCGS# 7973

1864 Three Dollar Gold, MS61
Elusive Issue in All Grades

- 3227 1864 MS61 PCGS.** The 1864 three dollar gold piece claims a meager business-strike mintage of 2,630 pieces and its Civil War era date adds to the constant demand for this issue. This attractive Mint State specimen offers well-detailed design elements and lightly marked orange-gold surfaces with slightly dimmed satiny mint luster. Population: 4 in 61, 36 finer (10/17). NGC ID# 7HSK, PCGS# 7985

1855-S Gold Three Dollar, AU53
Limited High-Grade Population

- 3225 1855-S AU53 PCGS.** The small quantities of three dollar gold pieces struck in San Francisco between 1855 and 1860, were produced for commercial circulation. All of these issues are scarce or rare in Mint State today, and the 1855-S is extremely rare in that condition. At the AU level, the present coin is much more collectible but still exhibits luster in the protected regions of the fields. Attractive orange-gold surfaces are lightly worn and marked but mainly problem-free. Population: 12 in 53, 22 finer (10/17). NGC ID# 7K5D, PCGS# 7973

1878 Three Dollar Gold, MS64+
Excellent Type Coin

- 3228 1878 MS64+ PCGS.** The 1878 three dollar gold piece claims a business-strike mintage of 82,304 pieces, not large in absolute terms, but the second-highest production total of the series. Accordingly, the 1878 is a relatively available issue and a popular choice of type collectors. This Plus-graded Choice specimen offers well-detailed design elements and lightly marked orange-gold surfaces, with vibrant satiny mint luster. NGC ID# 25MZ, PCGS# 8000

1878 Three Dollar Gold, MS67+ Extraordinary Type Coin

3229 1878 MS67+ PCGS. The cataloger recalls, as a young numismatist, a fascination with three dollar gold pieces, and how great it would be to see one in person. The opportunity occurred on a summer day in 1971 during a visit to the late Leon Hendrickson at SilverTowne in Winchester, Indiana. Mr. Hendrickson was happy to share his knowledge, and let a young teenager hold the coin and study it in person, knowing full well that a sale was not going to happen. The memory of that long ago day is still as vivid as if it happened yesterday, with thanks to Leon for his kindness. Today, these coins are just as fascinating as they were nearly half a century ago, despite handling hundreds of pieces over the years.

The present Superb Gem ranks among the finest surviving examples, regardless of the issue. For all issues from 1854 to 1889, PCGS has only graded six examples in MS67+, with just four finer pieces. This impressive piece exhibits pristine, virtually perfect surfaces with brilliant and highly lustrous mint frost. The lovely yellow-gold luster displays a blend of delicate rose and blue toning, with a solitary dark toning spot outside the upper right branch of the wreath. This is an extraordinary example for the advanced Set Registry collector who seeks the three dollar series, and having the highest population among all three dollar pieces, the 1878 is a great choice for a gold type set featuring all of the different designs. Population: 8 in 67 (3 in 67+), 0 finer (10/17). NGC ID# 25MZ, PCGS# 8000

1879 Gold Three Dollar, MS64
Semiprooflike and Appealing

- 3230 1879 MS64 PCGS.** The appeal of this issue stems from its low mintage of 3,000 pieces, although it is collectible through MS64. Pieces finer than this near-Gem are scarce. Original orange-gold luster complements semiprooflike fields and sharp design elements. A few stray surface lines limit the grade. PCGS lists 49 higher-grade examples (11/17), although many collectors will find this coin's eye appeal fully satisfying. NGC ID# 25N2, PCGS# 8001

1882 Three Dollar Gold, MS63
Repunched Date

- 3231 1882 Repunched Date, FS-301, MS63 PCGS.** The repunched 2 in the date is present on all circulation strike 1882 three dollar gold pieces, a quick way to distinguish these from proof examples. This piece has light yellow-gold surfaces with hints of mirroring in the fields. The surfaces are lightly marked as expected for the grade. Trivial copper toning spots are noted on each side. Population: 45 in 63, 34 finer (10/17). NGC ID# 4DXC, PCGS# 145710 Base PCGS# 8004

1889 Three Dollar Gold, MS66+
Final Year of Denomination

- 3232 1889 MS66+ PCGS.** The three dollar gold denomination was discontinued after 1889, when a token business-strike mintage of 2,300 pieces was accomplished. Many of the coins were never released into circulation and were melted in the 1893-1894 time period. Super collector Virgil Brand ordered fifty specimens of the 1889 three dollar gold piece directly from the mint at the time of issue. Those coins would have been dispersed in later years, possibly providing many of the high-grade examples known to collectors today.

The present coin is a delightful Plus-graded Premium Gem, with sharply detailed design elements and vibrant, satiny mint luster on both sides. The pleasing orange-gold surfaces show only minimal signs of contact and overall eye appeal is terrific. Population: 13 in 66 (2 in 66+), 2 finer (10/17). NGC ID# 7KDU, PCGS# 8011

PROOF THREE DOLLAR GOLD PIECE

1887 Three Dollar Gold, PR66 Ultra Cameo
Perfect, Non-Doubled Obverse Die

- 3233** 1887 PR66 Ultra Cameo NGC. Struck from a perfect obverse die that identifies proofs of this issue, as all circulation strikes are from a different obverse die that has doubling on RICA of AMERICA. This gorgeous Premium Ultra Cameo proof has fully lustrous light yellow-gold devices that seem to float across the deeply mirrored fields, exhibiting a prominent orange-peel effect that is typical of 19th century proof coins. A glass reveals two trivial, grade-limiting marks below ME of AMERICA, and a microscopic lintmark at Liberty's throat. Census: 4 in 66 Ultra Cameo (1 in 66+, 1 in 66★), 3 finer (10/17). NGC ID# 38LZ, PCGS# 98051

EARLY HALF EAGLES

1798 Large Eagle Five Dollar, AU53
Large 8, 13 Stars, BD-2

- 3234** 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-2, R.5, AU53 NGC. Struck from the same obverse die as the 1798 Small Eagle rarity, this variety is rare and important as well. A heavy die crack through the base of the date identifies the obverse die. Additional cracks are evident in various locations on the shattered obverse and on the reverse. This attractive half eagle has lustrous green-gold color with faint reflectivity in the fields. Both sides have the usual quota of circulation marks that are consistent with the grade. Census: 6 in 53, 42 finer (10/17).
Ex: West Palm Beach Signature (Heritage, 6/2008), lot 1961. NGC ID# BFX6, PCGS# 507322 Base PCGS# 8078

1802/1 BD-8 Half Eagle, AU53
Some Luster Remains

3235 1802/1 BD-8, R.4, AU53 NGC. Bass-Dannreuther Die State c/b. BD-8 is the most plentiful 1802/1 half eagle variety, ideal for date representation. As many as 200 pieces survive in all grades, although quality varies widely. This About Uncirculated example displays some luster in the fields and sharp, evenly struck design elements. A few minor adjustment marks are visible on the cloud beneath the O in OF. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

1806 Knob 6 Half Eagle, BD-6, XF45
Capped Bust Right Type Coin

3237 1806 Knob 6, 7x6 Stars, BD-6, R.2, XF45 NGC. Bass-Dannreuther Die State d/f, clashed and cracked, the latest die state recorded for this plentiful Knob 6 variety. BD-6 is frequently encountered at auction, but attractive, high-end pieces are in constant demand for type purposes. This Choice XF coin displays excellent detail with hints of luster in the reverse fields. Pleasing olive-gold and peach hues adorn the surfaces. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1803/2 Half Eagle, MS61
Rare BD-2 Variety
Semiprooflike Fields

3236 1803/2 BD-2, R.5, MS61 NGC. Bass-Dannreuther Die State d/c. This late die state shows a bisecting crack on the reverse from the U in UNITED, through the eagle's beak, to the E in STATES. Light field chatter slightly subdues semiprooflike mirroring, but no major abrasions are noticed. The left side of the shield and the eagle's left (facing) talons exhibit strike weakness. On the obverse, bold strike doubling is visible on all relief elements. BD-2 is the rarest of the 1803 half eagle die varieties, with only 40 to 50 pieces believed known. Uncirculated examples, such as this eye-appealing piece, are in demand. PCGS# 504949 Base PCGS# 8084

1807 BD-2 Half Eagle, AU58
Final Draped Bust Issue

3238 1807 Bust Right, BD-2, R.5, AU58 PCGS. Bass-Dannreuther Die State e/b, showing delicate cracks at the tops of ERT in LIBERTY on this Small Stars obverse die. A light crack connects the tops of UNITE on this Large Stars reverse die. This is the last year of issue for Robert Scot's Draped Bust Right design, and a transitional year marking the introduction of the new John Reich design. This lovely near-Mint representative has satin luster on its light gold surfaces. Slight weakness is evident where the left side of the shield joins the wing. Wisps of subtle rose toning appear at the borders. NGC ID# CKLF, PCGS# 519899 Base PCGS# 8092

1807 Bust Right Five Dollar, AU50
Rare BD-3 Variety

- 3239 1807 Bust Right, BD-3, High R.5, AU50 NGC.** Bass-Dannreuther Die State b/c. The letters LIB from LIBERTY are clashed on the reverse near the fletchings, and a vertical crack passes through the left shield corner. A butter-gold early five with luster across the legends, eagle, stars, and curls. Liberty's shoulder and cap display light wear. A thin line is noted on Liberty's forehead, but no other marks are remotely worthy of mention. An opportunity to obtain a lightly circulated example of this scarce die marriage. NGC ID# CKLF, PCGS# 519900 Base PCGS# 8092

1807 BD-8 Half Eagle, MS61
John Reich's New Design

- 3240 1807 Bust Left, BD-8, R.2, MS61 PCGS.** Bass-Dannreuther Die State d/b. Two varieties of the Capped Bust half eagles dated 1807 are known. The BD-8 offered here is one of the most plentiful of all early half eagle varieties, while the BD-7 variety is an important rarity.

The handiwork of Johann (John) Reich, who began his Mint employment on April 1, 1807, this issue and the Capped Bust half dollars of the same date are the first John Reich designs to reach the production stage. The new half dollars and half eagles made their first public appearance in September 1807, drawing almost immediate criticism according to some reports, including contemporary newspaper accounts that spoke of Reich's "fat mistress."

This lovely specimen has brilliant green-gold luster with full mint frost on both sides. The strike is bold and the centering is good. The few scattered surface marks on each side are minimal, certainly far fewer than the MS61 grade suggests. NGC ID# CKLH, PCGS# 507607 Base PCGS# 8101

1812 Half Eagle, Bright MS61
BD-1, Wide 5D, Final Year of Type

1813 Half Eagle, MS61
BD-1, A First-Year Type Issue

3241 1812 BD-1, R.3, MS61 NGC. Bass-Dannreuther Die State a/a. This was the final year for the Capped Bust Left design. The series is known for a host of varieties, including overdates, Small and Large dates, Small and Large denominations, Small and Large 5s, and in this case Wide and Narrow 5 D. Uniformity of design elements was still a couple of decades away, and these early Mint products provide collectors with a wider variety of coins to pursue than might at first appear to be the case. In any event, this BD-1 half eagle features wide spacing between the 5 and D. Examples are slightly more available than the scarcer BD-2 variant.

This piece has bright lemon-gold surfaces. Sharply defined on the obverse with slight softness over the central reverse. Both sides are generally free from abrasions, and the only marks worthy of mention are a number of parallel adjustment marks on Liberty's cheek.

Ex: Houston Signature (Heritage, 11/2007), lot 61623. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

3242 1813 BD-1, R.2, MS61 NGC. Lightly marked for the MS61 level, this attractive half eagle features straw-gold color and has ample bright luster. The strike is very sharp, since only the claws and the forehead curls lack intricate definition. The first issue of the Capped Head Left design, which continues the reverse of John Reich's 1807 design but modifies Liberty's portrait. The most obvious change is that the bust is truncated just beneath the neck on the 1813 version. Although the 1813 BD-1 is common by the standards of the type, BD-2 is several times scarcer and is rarely encountered. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

CLASSIC HALF EAGLES

1834 Plain 4 Half Eagle, MS63
First Head, McCloskey 1-A

- 3243** 1834 Plain 4 MS63 PCGS. First Head, Breen-6501, McCloskey 1-A, R.3. Delicate die cracks are noted at stars 4 and 5 on the obverse of this Classic Head half eagle variety. Well struck as usual for this variety, exhibiting brilliant light yellow surfaces and full satin luster with slight field reflectivity. Scattered, grade-consistent marks on each side are inconsequential. NGC ID# 25RR, PCGS# 8171

1838 Five Dollar, MS61
Final-Year Classic Head Issue

- 3244** 1838 MS61 NGC. Breen-6515, McCloskey 2-B, R.1. The 1838 Classic Head five is scarce in all Mint State grades. Two varieties exist for the Philadelphia issue. The present McCloskey 2-B coin displays the Small Arrows reverse, and a Large 5 in the denomination. This example is lustrous and attractive, with medium-gold surfaces and orange accents near the rims. Light field abrasions are grade-consistent, and the strike is sharp with only minor loss of detail on the centers of stars 5 and 6. Census: 34 in 61, 50 finer (10/17). NGC ID# 25S4, PCGS# 8176

1838-C Half Eagle, XF40
Scarce One-Year Charlotte Type

- 3245** 1838-C XF40 PCGS. Breen-6516, Variety 2, R.5. Repunched 5. This late die state shows the reverse heavily lapped, with a bisecting die crack from 8 to 2 o'clock. Light wear appears over the olive-gold surfaces. Eye appeal is pleasing. The 1838-C is a one-year type in the Charlotte half eagle series. Only 17,179 pieces were struck, and survivors are in high demand in all grades today. Specialist Doug Winter estimates that most of the extant population is in the VF to XF grade range, and heavily weighted toward the lower end. NGC ID# 25S5, PCGS# 8177

LIBERTY HALF EAGLES

1842-C Liberty Half Eagle, VF30
Rare Small Date Variety

- 3246** 1842-C Small Date VF30 PCGS. CAC. Variety 1. This is the rarest Charlotte Mint half eagle with an estimated 60-80 pieces known in all grades. Examples are typically seen in lower grades with various problems that prevent numeric assessments. This coin saw extensive circulation but is problem-free and certainly attractive for the grade — attractive enough, in fact, to gain approval from CAC. Somewhat mushy detail reflects both wear and a strike that is soft at the borders, especially on the obverse. Rich yellow-gold centers contrast with splashes of reddish-gold towards the rims. None of the numerous abrasions are especially deep or detracting. This is a pleasing example of the rarest collectible Charlotte five dollar gold issue and a great option for the ambitious specialists without the significant budget required to purchase one of the few high-grade survivors. Population: 7 in 30, 36 finer. CAC: 2 in 30, 10 finer (10/17). NGC ID# 25SV, PCGS# 8208

1842-C Small Date Half Eagle, AU58
The NGC Coin Explorer Plate Coin
A Rare Issue in High Grade

- 3247 1842-C Small Date AU58 NGC. Variety 1.** “The 1842-C Small Date is the rarest half eagle from this mint and the rarest collectible coin from Charlotte,” — Thus Doug Winter writes of this issue in *Gold Coins of the Charlotte Mint*, third edition. The Southern gold specialist goes on to estimate that only 60 to 80 pieces are known in all grades, with high-end AU coins being extremely rare. Winter’s survival estimate is likely accurate; even though PCGS suggests that as many as 100 pieces may exist, the certified population of PCGS and NGC combined is only 74 coins, including likely resubmissions (10/17).

This near-Mint example is in the late die state, showing a heavy rim cud at 12 o’clock on the obverse. The satiny surfaces show light field chatter but no obvious wear. Other than the eagle’s neck, both devices are sharply struck. Rich orange-gold overtones accent yellow-gold surfaces, and eye appeal is excellent. Census: 8 in 58 (1 in 58+), 5 finer (10/17). NGC ID# 25SV, PCGS# 8208

1843 Half Eagle, MS63
Ex: S.S. New York

- 3248 1843 MS63 NGC.** Ex: S.S. New York. An upper-end Mint State coin from the S.S. New York, which sank in the Gulf of Mexico in 1846. The strike is razor-sharp, and the surfaces are bright yellow-gold with the satiny appearance typical of sea-salvaged gold coins. Scattered small abrasions determine the grade. The 1843 is scarce in Mint State but is still one of the ideal type coins from this period. Census: 13 in 63 (1 in 63+, 1 in 63 ★), 9 finer (10/17). NGC ID# 94FD, PCGS# 8213

1857-O Half Eagle, AU58
A Rarity in This Grade

- 3249 1857-O AU58 NGC. Variety 1.** With a mintage of only 13,000 pieces, the 1857-O half eagle is scarce in all grades. High-end AU coins are rare, and Mint State pieces are exceedingly so. We rarely offer a coin finer than XF. This near-Mint example displays original olive-gold patina with remnants of prooflike mirroring in the fields. Light surface chatter on each side contributes to the grade. The only discernible strike weakness is on the fletchings. Census: 8 in 58, 3 finer (10/17). NGC ID# 25V5, PCGS# 8274

1857-S Half Eagle, MS62
Conditionally Rare, Ex: H.W. Bass, Jr.

3250 1857-S MS62 PCGS. Ex: H.W. Bass Jr. Collection. Of the six 1857-S half eagles offered in the three Harry Bass gold sales, this piece was the finest. At the time, it was the finest-certified example at PCGS. The 1857-S remains rare in Mint State with only 17 such coins reported at both services combined in all grades (11/17). This Bass Collection coin displays sharp design elements and frosty original luster. Most of each side is yellow-gold in color, although deeper orange-gold hues appear at the central reverse. Light marks in the fields limit the grade but are not distracting. Population: 2 in 62, 7 finer (10/17).

Ex: *Northern California Estate; Rare Coin Auction, Part I (Superior, 2/1973)*, lot 444; *Harry W. Bass, Jr. Collection, Part II (Bowers and Merena, 10/1999)*, lot 1101. NGC ID# CBE7, PCGS# 8275

1871-CC Liberty Five, Orange-Gold VF35

3251 1871-CC VF35 NGC. Variety 1-A. This slightly more attainable Carson City five displays Choice surfaces for the VF level. Smoothly worn with a hint of orange luster at the margins, any remaining marks are subdued by wear while the definition on the devices is pleasing for the grade. Deep orange-gold coloration adds to the appeal. Census: 5 in 35, 55 finer (10/17). NGC ID# 26AB, PCGS# 8323

1871-CC Half Eagle, AU55
Ex: Harry W. Bass, Jr.

3252 1871-CC AU55 PCGS. Variety 1-A. CAC. Ex: H.W. Bass Jr. Collection. Harry Bass had two 1871-CC half eagles in this grade: the present coin and the Eliasberg example. At the time, the coins were tied for second-finest at PCGS. This piece remains conditionally rare despite the discovery of additional AU coins in the last couple of decades. Partially lustrous fields show only light chatter, and the wheat-gold color is pleasing. Slight strike weakness is seen on the hair curls around Liberty's face and the center of the horizontal shield lines. Two linear marks below LIBERTY are seen under a loupe. Population: 11 in 55, 9 finer (10/17).

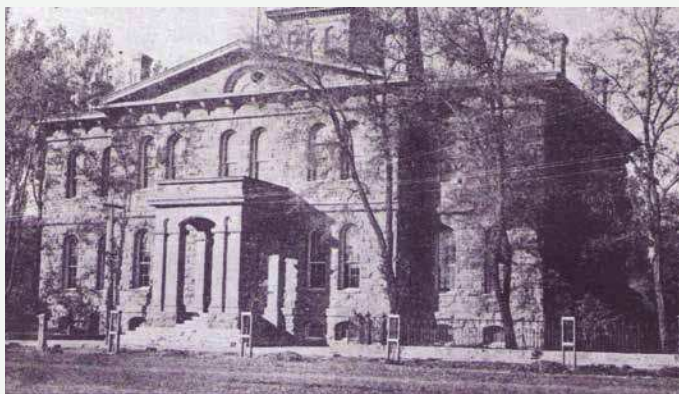

Ex: *Purchased from World Wide Coin Investments (8/20/1972)*; *Harry W. Bass, Jr. Collection, Part IV (Bowers and Merena, 11/2000)*, lot 510. NGC ID# 26AB, PCGS# 8323

3253 No Lot.

1881-CC Liberty Half Eagle, AU55
Challenging Carson City Issue

- 3254** 1881-CC AU55 PCGS. Variety 1-A. From a mintage of 13,886 pieces, the 1881-CC is the most elusive Liberty half eagle of the decade from the Carson City Mint. This impressive Choice AU specimen shows only a touch of wear on the well-detailed design elements, which are more strongly impressed than usual for this issue. The lightly abraded orange-gold surfaces retain much of their original mint luster and eye appeal. Population: 11 in 55, 16 finer (10/17). NGC ID# 25XE, PCGS# 8356

The Carson City Mint circa 1890.

1882-CC Liberty Half Eagle, MS61
Popular Carson City Type Issue

- 3255** 1882-CC MS61 PCGS. CAC. Variety 1-A. The 1882-CC Liberty half eagle claims a mintage of 82,817 pieces, a substantial production total in the context of the series. As might be expected, the 1882-CC is a relatively available issue, though Mint State specimens are still quite elusive in absolute terms. The issue is in demand from series specialists and branch mint type collectors alike.

The present coin is an attractive MS61 example, with sharply detailed design elements in most areas, and just a slight touch of softness on the arrow fletchings. The lustrous orange-gold surfaces show the minimum number of minor contact marks for the grade. Population: 13 in 61, 8 finer. CAC: 3 in 61, 1 finer (10/17). NGC ID# 25XH, PCGS# 8359

1898-S Half Eagle, MS65
Fully Struck Condition Rarity

- 3256** 1898-S MS65 PCGS. The mintage for the 1898-S half eagle is more than twice that of its Philadelphia counterpart, but examples are just as rare at this grade level, if not slightly more so. The strike is fully impressed on each side. Frosty luster issues from clean yellow-gold surfaces with minimal signs of contact. A great condition rarity that would prove challenging to upgrade. Population: 9 in 65 (1 in 65+), 5 finer (10/17). NGC ID# 25YR, PCGS# 8397

PROOF LIBERTY HALF EAGLE

1903 Half Eagle, PR55
CAC Endorsed, Classic Proof Gold

- 3257** 1903 PR55 PCGS. CAC. Even though this vibrant, orange-gold proof saw brief circulation, it retains about 50% of its original mirroring and nearly all of the sharpness of its strike. One of just 154 pieces issued, gold proofs were a luxury at the turn of the century and we suspect the original owner spent this coin in a time of need. It has not lost its eye appeal and the coloration is spectacular. Population: 6 in 55, 47 finer. CAC: 2 in 55, 8 finer (10/17). NGC ID# 28D9, PCGS# 8498

INDIAN HALF EAGLES

1908 Indian Head Five, MS65+
Nearly Unimprovable First-Year Type

- 3258** 1908 MS65+ NGC. CAC. A greenish hue glimmers across the high-end Gem surfaces of this exceptionally attractive 1908 half eagle. While the issue almost always shows abrasions even at the MS65 level, this coin shows virtually no marks — certainly, none of any consequence. Frosted surfaces add life to a strong strike, and this high-end coin borders on an even finer grade. Census: 2 in 65+, 20 finer. CAC: 46 in 65, 11 finer (10/17). NGC ID# 28DE, PCGS# 8510

1908 Indian Head Five, MS66
Superb Mint Luster
A Magnificent Type Coin

- 3259** 1908 MS66 NGC. Arguably the most difficult U.S. coin type to repeatedly find in high grade is Bela Lyon Pratt's Indian Head half and quarter eagles. The design is in relief but is sunken into the fields, leaving the delicate surfaces exposed to abrasion without the protective rims seen on other circulation designs. In the half eagle series, only a few issues are available at the Gem grade level, and in MS66, Indian five issues are almost exclusively unknown or prohibitively rare. There are only three true exceptions, where the 1908, 1908-S, and 1909 are rare but at least collectible for a price in this lofty grade.

As a first-year issue, this 1908 Premium Gem is not only appealing for its remarkable condition but also as a popular type coin. Glowing, softly frosted surfaces are fully deserving of the grade, yielding undisturbed rose-gold and peach hues throughout. The devices are sharp and unmarked. The eye appeal seems to increase the longer one studies the exceptional surfaces. Census: 15 in 66 (2 in 66+), 5 finer (10/17). NGC ID# 28DE, PCGS# 8510

**1911-D Five Dollar, AU58
Semikey With Original Surfaces**

- 3260 1911-D AU58 PCGS. CAC.** A mintage of 72,500 coins makes this one of the keys to the series, a scarce issue in all grades that becomes especially elusive in mint condition. This is an attractive near-Mint alternative with original orange-gold color and olive accents. The reverse is stronger than the obverse, though the mintmark is somewhat soft. Minor blending barely limits the grade. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, MS60
Very Scarce in Mint Condition**

- 3261 1911-D MS60 NGC.** The 1911-D is a very scarce issue in any Mint State grade. Satiny mint luster, light orange-gold color, and strong strike characteristics are distinctive. Small marks appear over each side, but there is no trace of friction present. Like quarter eagles bearing the same date-mintmark combination, this issue is one of the low-mintage keys to its series. NGC ID# 28DR, PCGS# 8521

**1914-S Five Dollar, MS63
Seldom Offered This Fine**

- 3262 1914-S MS63 NGC.** The 1914-S Indian half eagle is scarce in Mint State, and most such pieces are no finer than MS62, showing heavy abrasions. This Select representative is scarce, and finer coins are decidedly rare. Satiny honey-gold surfaces show only light abrasions along with daubs of olive and russet patina. Some strike weakness is seen only on the lower headdress feathers. Census: 18 in 63, 7 finer (10/17). NGC ID# 28DW, PCGS# 8529

**1916-S Half Eagle, MS64+
Pleasing Original Color
CAC Approval**

- 3263 1916-S MS64+ PCGS. CAC.** Decades ago, a small hoard of about 200 1916-S half eagles (240,000 pieces struck) surfaced in El Salvador, explaining the more recent availability of coins in MS64 or lower grades. However, high-end Choice Uncirculated examples with Plus designations and CAC approval stickers, approaching some of the finest known representatives, remain important condition rarities. This San Francisco issue usually comes strongly struck, as evidenced by the bold headdress, shoulder tip, leg, and arrows. Warm peach and green-gold color blends with shimmering frost, attesting to the blatant originality of this offering. PCGS has seen 15 higher grading events. CAC: 21 in 64, 9 finer (11/17). NGC ID# 28DY, PCGS# 8532

EARLY EAGLES

1797 Large Eagle Ten, XF45
BD-4, Rare Early Die State

3264 1797 Large Eagle, BD-4, High R.4, XF45 PCGS. Bass-Dannreuther Die State d/a. This is the rare early die state that shows the reverse uncracked at the R and C in AMERICA. Other examples of this die state appeared in the Bass Collection and are housed in the ANS. This is the final die marriage of the 1797-dated coins and is the forth reverse type used with the common obverse. The eagle's neck is tall and wide, with a star positioned under the beak. Only about 90 to 110 examples of this variety are believed extant.

The present example is remarkably sharp for the grade, showing light wear mainly on the central hair curls of Liberty's portrait. The eagle is well-detailed. Original straw-gold surfaces are satiny and lightly marked on the obverse but distinctly prooflike on the reverse. Housed in a green label holder. NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

1800 BD-1 Eagle, Semiprooflike MS62
Very Late Die State

3265 1800 BD-1, High R.3, MS62 PCGS. Bass-Dannreuther Die State c/e. A single die variety is known for this issue, of which as many as 300 examples are extant. Some of the 1801 eagle production was of this variety, as the die state of the reverse indicated that this piece was struck after the 1801 BD-1 issue, which shares the tail die. On this marriage, the reverse is clashed above STATES and lapped; a thin crack stretches from the R in AMERICA through the olive leaves and tailfeathers, and another is seen through the UNI in UNITED and the fletchings. The obverse is heavily cracked at LIBERTY.

Both sides of this Mint State type coin display semiprooflike fields and bold design elements. Scattered light handling marks on the obverse limit the grade, and a few small planchet voids appear in the right field, below Liberty's throat and within the stars. Population: 22 in 62, 15 finer (10/17). NGC ID# BFYT, PCGS# 45732 Base PCGS# 8563

LIBERTY EAGLES

1842-O Eagle, AU53
Appealing Original Surfaces

- 3266 1842-O AU53 NGC. Variety 2**, showing the mintmark distinctively lower than on the other die marriages. The 1842-O eagle is scarce in AU grades and genuinely rare in Mint State. Only 27,400 pieces were struck, and these were heavily circulated in the South prior to the Civil War. This example displays uniform olive-gold patina and well-detailed design elements. Scattered abrasions accompany light wear, but the eye appeal is pleasing for the issue. Census: 41 in 53, 60 finer (10/17). NGC ID# 262N, PCGS# 8587

1853-O Ten Dollar, AU58
High-End CAC-Approved Example

- 3267 1853-O AU58 PCGS. CAC. Variety 6**. Deposits of California gold at the New Orleans Mint in 1851 prompted a coinage of 263,000 eagles that year, although coinage of the denomination declined in the following years. The 1853-O ten mintage was only 51,000 pieces. This issue is scarce in AU grades and extremely rare in Mint State. The present coin, a near-Mint example, is tied for the finest endorsed by CAC. The strike is bold, and almost no discernible wear is seen on the devices; light rub in the fields prevents a Mint State grade, although the bright yellow-gold surfaces are somewhat lustrous. The die variety is previously unlisted, sharing the common 1853 obverse with a reverse that shows the mintmark almost perfectly centered between the fletching tip and the top of the N in TEN, directly over the left serif of the N. Population: 14 in 58 (1 in 58+), 3 finer. CAC: 9 in 58, 0 finer (10/17). NGC ID# 263F, PCGS# 8612

1861 Ten Dollar, MS60
Rare in Mint State

- 3268 1861 MS60 NGC. Ex: First Year Civil War Hoard**. Sharp design elements and frosty wheat-gold luster confirm the Mint State designation of this 1861 eagle, although moderate abrasions limit the grade. Although the double eagle of this date and mint is plentiful, the ten dollar issue is much rarer in Mint State. However, among No Motto eagles, options are limited for affordable type coins in Mint State, and the 1861 is one of the best despite its conditional rarity. NGC ID# 2647, PCGS# 8633

1861 Eagle, Sharp MS60
Ex: S.S. Republic

- 3269 1861 MS60 NGC. Ex: S.S. Republic**. The *S.S. Republic*, a sidewheel steamship loaded with ten and twenty dollar gold pieces, sank in a hurricane off the coast of Georgia in 1865. Salvaged coins from this shipwreck make up a goodly number of the Mint State 1861 eagles known today. This piece is sharp with characteristically bright yellow-gold luster. Moderate abrasions determine the grade. NGC ID# 2647, PCGS# 8633

1862-S Ten Dollar, XF40
Fewer Than 80 Pieces Believed Known

- 3270 1862-S XF40 NGC**. The recent PCGS survival estimate of the 1862-S eagle is only 60 to 80 coins, a figure with which auction data generally agrees. The issue is almost unknown in Mint State and seldom found in any other grade. This piece displays pleasing detail for the grade and faintly luminous olive-gold patina. Census: 6 in 40, 33 finer (10/17). NGC ID# 55H4, PCGS# 8636

1875-CC Liberty Eagle, AU53
Low-Mintage Branch Mint Issue

3271 1875-CC AU53 PCGS. CAC. Variety 1-A. The 1875-CC Liberty eagle claims a meager mintage of 7,715 pieces, and few examples were saved by contemporary collectors who had little interest in branch mint issues. Unfortunately, the 1875-CC was not a well-produced issue, and most examples seen are softly struck, with lackluster surfaces that became heavily abraded after being released into circulation. As might be expected, the 1875-CC is one of the most challenging issues in the series in high grade.

The present coin exhibits a better-than-average strike for the issue, with just a touch of the usual softness on the central reverse. The lightly abraded orange-gold surfaces show only light wear and much original mint luster remains intact. Population: 11 in 53, 11 finer. CAC: 3 in 53, 1 finer (10/17). NGC ID# 2688, PCGS# 8673

1879 Ten Dollar, Peach-Gold MS64
Surprisingly Rare at This Grade Level

3272 1879 MS64 PCGS. In 1879, ten dollar gold production at the Philadelphia Mint reached a high unseen since the start of the California Gold Rush. A total of 384,780 coins were struck, yet examples are surprisingly rare at this near-Gem level. Frosty peach-gold surfaces are boldly detailed with just minor softness on the forecurls. Trivial ticks on each side. Population: 13 in 64 (1 in 64+), 3 finer (10/17). NGC ID# 265M, PCGS# 8683

1880-O Eagle, Bright AU58
A Rarity in High Grade

3273 1880-O AU58 PCGS. Variety 1. PCGS has graded only six Mint State 1880-O eagles, and high-end AU coins are nearly as rare. Only 9,200 examples of this issue were struck, a sharp spike over the 1,500 New Orleans gold eagles struck in 1879, but not enough to ensure a supply of high-grade coins today. This near-Mint example displays sharp detail and bright yellow-gold surfaces. Moderate abrasions are as expected for the issue and grade. Some prooflike reflectivity remains in the fields. Population: 15 in 58, 6 finer (10/17). NGC ID# 265U, PCGS# 8689

1882-CC Ten Dollar, AU55
Highly Lustrous Fields

3274 1882-CC AU55 NGC. Variety 2-A. The fields of this Choice AU Carson City eagle are highly lustrous, and only slight friction appears over the relief elements. Despite the light high-point friction, there is no blending of the details. Mild field chatter on each side is consistent with the grade and Carson City issues from this period. Uncirculated examples of the 1882-CC are extremely rare, and this is among the more appealing AU coins that we have seen. Census: 41 in 55, 39 finer (10/17). NGC ID# 2663, PCGS# 8696

1882-CC Eagle, AU55
Low Mintage of 6,764 Coins

3275 1882-CC AU55 NGC. Variety 2-A. A continued focus on half eagle production at the expense of higher denomination gold coins resulted in a mintage of only 6,764 1882-CC eagles. About 300 examples are estimated to survive. This olive and orange-gold piece has strong stars, feathers, talons, and fletchings with minor blending on the curls. Partial luster emerges from the design recesses. NGC reports 39 finer grading events (11/17). NGC ID# 2663, PCGS# 8696

1901-S Liberty Eagle MS66
Exceptional Type Coin

3276 1901-S MS66 PCGS. From a substantial mintage of 2.8 million pieces, the 1901-S Liberty eagle can be located in MS66 condition with a little patience, but finer coins are condition rarities. This sharply detailed Premium Gem offers well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is terrific. PCGS has graded two numerically finer examples (10/17). NGC ID# 267S, PCGS# 8749

1903-S Eagle, MS66
Swirling Cartwheel Mint Frost

3277 1903-S MS66 PCGS. The 1903-S eagle, widely available through MS64, sees a sharp population decline in Gem condition. Examples are rarely offered in MS66. This boldly struck ten dollar gold piece exhibits swirling cartwheel mint luster and rich yellow-gold coloration with a pedigree-identifying copper alloy spot just right of star 8. Predictably clean. Population: 32 in 66 (5 in 66+), 3 finer (10/17). NGC ID# 267X, PCGS# 8754

1906-D Eagle, MS65
Only Three Finer at PCGS

3278 1906-D MS65 PCGS. The Denver Mint began production in 1906, and a complete set of coinage from that opening year is a reachable goal, starting with this lovely Gem ten dollar gold piece. The rest of the six-coin set includes a dime, quarter, half dollar, half eagle, and double eagle. This sharply struck example has frosty yellow luster with a small mark at Liberty's throat, and a few other trivial marks of no consequence. Population: 31 in 65 (1 in 65+), 3 finer (10/17). NGC ID# 7JHG, PCGS# 8760

The Denver Mint in the early 1900s.

INDIAN EAGLES

1908-D Indian Eagle, MS64
Final No Motto Issue

3279 1908-D No Motto MS64 PCGS. CAC. The design of the eagle was modified to include the motto IN GOD WE TRUST part way through the year in 1908, but not before 210,000 examples of the old No Motto design were struck at the Denver Mint. The 1908-D is an underrated issue in the Indian series and high-grade specimens are quite elusive. The issue is very scarce at the MS64 grade level, and finer coins are condition rarities.

The coin offered here is an impressive Choice example, with well-detailed design elements that show a touch of the always seen softness on the central obverse. The well-preserved orange-gold surfaces radiate vibrant mint luster and overall eye appeal is outstanding. Population: 63 in 64 (6 in 64+), 9 finer. CAC: 11 in 64, 4 finer (10/17). NGC ID# 28GH, PCGS# 8854

1912 Indian Eagle, MS66
Eye-Catching Mint Luster
A Major Condition Rarity

3280 1912 MS66 NGC. The generally plentiful 1912 Indian eagle is conditionally scarce in MS65 and rare finer. This Premium Gem delivers a blast of original, blazing mint luster through means of a frosty cartwheel effect. The design elements are fully struck, and the eye appeal is beyond what we normally expect from a high-grade 1912. A few tiny ticks are isolated to Liberty's cheek and prevent an even higher grade. The NGC Census for this grade speaks for itself about the importance of this rare offering. Census: 12 in 66 (1 in 66+★), 1 finer (10/17). NGC ID# 28GW, PCGS# 8871

1915 Indian Ten, Lovely MS67
A Condition Census Rarity

- 3281 1915 MS67 PCGS.** The 1915 was the last Indian eagle produced at the Philadelphia Mint until 1926. The issue is more available than many entries in the series, ideal for type purposes, and it is notable for good production values that are amply on display here: The fabulous original color showcases orange-gold hues with pronounced lilac accents interspersed over each side. Both sides display thick, frosted mint luster, and metal flowlines coupled with a mattelike finish in the fields give the coin luminous appeal. The strike is uniformly sharp, and only under a loupe do a few tiny, unimportant marks appear in the centers. This remarkable coin is one of just six 1915 eagles in this finest-achieved numeric grade, and it resides with an MS67+ coin at the top of the PCGS *Population Report* (11/17). No PCGS-graded Superb Gem has appeared at auction in nearly 14 years. NGC ID# 28H5, PCGS# 8878

1915-S Indian Eagle, AU58
Popular Low-Mintage Issue

- 3282 1915-S AU58 PCGS.** The 1915-S Indian eagle claims a small mintage of just 59,000 pieces, making it an elusive issue in high grade. This impressive near-Mint representative shows just a trace of wear over well-detailed design elements, and the lustrous orange-gold surfaces are lightly abraded. This coin should find a home in a fine collection of Indian eagles. NGC ID# 28H6, PCGS# 8879

1915-S Indian Eagle, AU58
Elusive Issue in High Grade

- 3283 1915-S AU58 PCGS. CAC.** The 1915-S Indian eagle is a low-mintage issue (59,000 pieces) that has a relatively low survival rate, especially in high grade. This impressive near-Mint example exhibits just a touch of high-point wear on the well-detailed design elements, and the lustrous orange-gold surfaces are lightly abraded. NGC ID# 28H6, PCGS# 8879

1932 Indian Head Eagle, MS66
Only One Finer Coin at PCGS

- 3284 1932 MS66 PCGS.** Coruscating mint frost shimmers over boldly rendered design features and impeccably preserved fields. There are a handful of minute marks on the portrait that prevent an even higher grade for this yellow-gold Premium Gem with attractive rose accents. The 1932 is famous for its high-grade availability, but there is only one finer example at PCGS (10/17). NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Liberty Double Eagle, AU53
Impressive First-Year Type Coin

- 3285 1850 AU53 PCGS.** The 1850 Liberty double eagle represents the first year of the denomination and claims a substantial mintage of more than 1.1 million pieces. The issue is always in demand from series specialists and type collectors alike. This attractive AU53 specimen shows only light wear on the design elements and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 268F, PCGS# 8902

1850-O Double Eagle, XF40
In an Old Green Label Holder

- 3286 1850-O XF40 PCGS. Variety 2.** The first batch of double eagles out of the New Orleans Mint went straight into circulation. Of the 141,000 1850-O double eagles struck, only seven are certified today in Mint State, and all of these in low grade. Circulated coins are more collectible, usually seen in the XF grade level. This piece is sharp for the grade and retains small areas of field reflectivity. The rich orange-gold color is outstanding. Housed in an old green label holder. NGC ID# 268G, PCGS# 8903

1851 Double Eagle, MS60
Recounts the Gold Rush History

- 3287 1851 MS60 PCGS.** The quantity of gold being mined in California during the third year of the great Gold Rush insured a steady supply of the precious yellow metal at all of the Mints, including the Philadelphia Mint, despite its distant physical location, farther from the gold fields than any other mint. Although both sides of this brilliant yellow double eagle exhibit myriad marks that limit the grade, there are no distracting marks that draw the viewer's attention. This is a lovely example for the double eagle aficionado or type collector. NGC ID# 268H, PCGS# 8904

1851-O Twenty Dollar, AU55
Scarce in AU, Rare Any Finer

- 3288 1851-O AU55 NGC. Variety 1.** The mintmark is slightly to left of the center over the N, a die chip is seen in front of Liberty's eye, and a die crack connects the tops of TED of UNITED confirming the variety. The ample mintage of 315,000 pieces ensures the ready availability of the 1851-O through XF. AU examples are scarce and Mint State specimens are rare. This Choice AU coin displays apricot-gold color and traces of luster in the recessed areas. Some light striking is noted on Liberty's hair and the obverse stars, which is typical for the issue. Distributed light marks are not detracting. NGC ID# 268J, PCGS# 8905

1852 Liberty Double Eagle, AU58
Excellent No Motto Type Coin

- 3289 1852 AU58 PCGS.** According to Doug Winter's online resource doubleeaglebook.com, "The 1852 is among the better produced Type One double eagles from any mint. The obverse is usually well detailed with sharp, individually defined hair, strong stars and completely separated denticles. The reverse is also well struck." Such is the case with this nearly Uncirculated 1852 twenty. Friction is hardly apparent, while red and green-gold hues color moderately lustrous, remarkably smooth surfaces. This is a great No Motto type representative. NGC ID# 268K, PCGS# 8906

1852 Twenty Dollar, MS60
Lustrous, Appealing for the Grade

- 3290 1852 MS60 NGC.** Early Type One double eagles from the Philadelphia Mint are usually available, but Uncirculated examples are scarce. This 1852 displays sharp detail and frosty yellow-gold mint luster with grade-appropriate abrasions. The dies are lightly clashed, showing shield lines near Liberty's ear and a partial silhouette of the Liberty portrait around the eagle. NGC ID# 268K, PCGS# 8906

1852-O Double Eagle, AU53
Historic New Orleans Issue

- 3291** 1852-O AU53 NGC. **Variety 1.** New Orleans gold, especially double eagles, is challenging and rewarding to collect. The New Orleans Mint only struck large quantities of double eagles in the first four years of the denomination's existence as a consumer for California gold until the San Francisco Mint was established and built. The 1852-O is among these collectible O-mint twenties in AU grades. This piece is bright yellow-gold and well-detailed. Heavy abrasions, as seen here, are a characteristic of Type One New Orleans double eagles that complements the history of these circulating Gold Rush-era issues. NGC ID# 268L, PCGS# 8907

1852-O Double Eagle, Choice AU
Well-Detailed O-Mint Type Coin

- 3292** 1852-O AU55 NGC. **Variety 1.** This is a better-struck example of one of the few obtainable New Orleans double eagles. Only the lower obverse and reverse display moderate softness. Myriad wispy marks cover light yellow-gold surfaces. Glints of luster shine from the hidden areas of the design. The 1852-O is exceedingly scarce in Choice AU condition and very rare in Mint State. Of the 190,000 pieces struck, many were shipped overseas and melted. NGC ID# 268L, PCGS# 8907

1852-O Twenty Dollar, AU55
Collectible New Orleans Issue

- 3293** 1852-O AU55 PCGS. **Variety 1.** In the early 1850s, the primary origin of gold bullion deposits at the United States Mint and its branches was California, with smaller domestic quantities coming from Oregon and the Atlantic states. Double eagles were the principle recipient of freshly mined gold out of all of the circulating federal denominations, resulting in fairly substantial mintages at both Philadelphia and New Orleans. Production of double eagles at New Orleans amounted to 190,000 pieces in 1852, a number dwarfed by the Philadelphia mintage of more than 2 million pieces but still rating as one of the highest production totals of the series from that facility. Double eagle coinage at this branch mint rapidly declined in 1854, after the San Francisco Mint became operational and California gold was no longer shipped in large quantities to Eastern mints.

Today, the 1852-O is one of the only New Orleans double eagles that is moderately collectible, although it is conditionally scarce. This Choice AU coin displays sharp detail and partially lustrous yellow-gold surfaces. There is a small planchet lamination left of the mintmark, and small abrasions are noted on Liberty's cheek. Uncirculated examples of this date are rare. NGC ID# 268L, PCGS# 8907

1853/'2' Double Eagle, Lustrous AU55
Popular *Guide Book* Variety

- 3294** 1853/'2' FS-301, Breen-7162, AU55 PCGS. The few Uncirculated examples of this variety known appear at auction with great infrequency, and when offered command fierce bidding. Much more collectible are the upper-end AU coins, which are still conditionally scarce and offer much of the luster and eye appeal of low-end Uncirculated pieces. On this coin, the so-called overdate feature is plain, and the repunching on the 1 in the date is readily discernible. The die lump beneath the R in LIBERTY is a ready identifier of the variety. Luster remains in the fields, and each side shows generally smooth patina with only minor friction from a brief stint in circulation. The strike is sharp. PCGS has certified only 120 examples of the variety in all grades, mostly clustered in XF and the AU55-AU58 range. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1853/'2' Double Eagle, AU55
Scarce in This Grade

- 3295** 1853/'2' FS-301, Breen-7162, AU55 NGC. Walter Breen claimed to have discovered this variety in 1959, calling it an 1853/2 overdate. Modern photographic overlays suggest that it is not a true overdate, although there is debate on this issue. The 1 is recut at its base, which likely led Breen and others to conclude that this was an overdate. Regardless, the variety is highly publicized, scarce, and listed in the *Guide Book*, which generates a collector market that treats this variety as a separate issue necessary for a complete collection. Both the NGC Registry and the PCGS Major Varieties Registry Set include this variety.

NGC has certified slightly more than 200 examples of this variety, including several pieces from the S.S. *Republic* shipwreck. However, Uncirculated pieces are very rare. This collectible Choice AU coin displays sharp detail and moderately frosted luster, where that luster is not subdued by slight field rub consistent with the grade. There are a few marks, but the eye appeal is generally strong. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**1854 Double Eagle, Bold AU53
Rare Large Date Variant**

- 3296 1854 Large Date AU53 NGC.** Per the *Encyclopedia of U.S. Gold Coins*: "The Large Date variety of the 1854 double eagle is much rarer than the Small Date. The date size difference is not hugely dramatic, and the coin brings a large premium in any grade." The date logotype was used on silver dollars for that year, and Winter estimates 10% of the original mintage consisted of this variety. This is a bright yellow-gold double eagle with remaining luster around the peripheries. The strike is extremely sharp for a Type One twenty despite a trace of friction. NGC ID# 268S, PCGS# 98911

**1856 No Motto Twenty Dollar, AU55
Scarce Philadelphia Issue**

- 3297 1856 AU55 NGC.** Winter describes the conditional rarity of the 1856 in his online series reference: "It is not often seen in properly graded About Uncirculated-55 to About Uncirculated-58, and it remains an excellent value in this range. In Uncirculated, this is a genuinely rare coin and I have seen very few which I graded higher than MS61." Strike detail is good. Partial luster shines from the recesses of this red-gold Choice AU No Motto twenty. NGC ID# 268Y, PCGS# 8917

1857-S Twenty Dollar, Reflective MS61

- 3298 1857-S MS61 NGC.** This is a partially semiprooflike 1857-S double eagle with pinpoint detail on the stars, curls, and feathers. Flashy luster emanates from expectedly abraded surfaces, though scattered marks minimally affect the eye appeal. The 1857-S was famously recovered en masse from the S.S. *Central America*. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, MS64
Spiked Shield, Wonderful Eye Appeal**

- 3299 1857-S Spiked Shield, Variety 20A, MS64 PCGS.** This Choice Uncirculated 1857-S double eagle certainly derives from the S.S. *Central America* shipwreck recovery, although no mention of its origin is made on the PCGS insert. The Spike Shield variety was the most prevalent among coins from that hoard. Exceptionally clean surfaces feature lively mint frost that combines with mixed shades of peach and sun-gold color. Wonderful eye appeal for this No Motto type coin. NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

**1858-S Twenty Dollar, AU58
Partially Lustrous, Original Surfaces**

- 3300 1858-S AU58 PCGS.** Abundant original mint luster remains on both sides of this orange-gold survivor. The surfaces are uncommonly well-preserved with little evidence of wear and bold overall definition. Each side is lightly scuffed but no more than one should expect for a minimally circulated double eagle from the early years of production at the San Francisco Mint. Population: 53 in 58 (2 in 58+), 19 finer (10/17). NGC ID# 2699, PCGS# 8925

**1871 Liberty Double Eagle, AU58
Low-Mintage Philadelphia Issue**

- 3301 1871 AU58 NGC.** The 1871 Liberty double eagle is an elusive Philadelphia Mint issue, from a small mintage of 80,120 pieces. This attractive near-Mint specimen shows just a trace of high-point wear on the strongly impressed design elements. The bright yellow-gold surfaces retain almost all of their original mint luster, despite a peppering of minor contact marks on both sides. Census: 84 in 58, 13 finer (10/17). NGC ID# 26AA, PCGS# 8960

1872 Double Eagle, MS61
Frosty Original Luster

- 3302 1872 MS61 PCGS. 30th Anniversary Green Label Holder. The 1872 is a scarce Type Two issue in Mint State. This representative displays frosty original luster in rich straw-gold hues. Scattered abrasions limit the grade, but none are individually bothersome. The design elements are sharp and show no wear. Population: 54 in 61, 13 finer (10/17). NGC ID# 26AD, PCGS# 8963

1872 Double Eagle, MS61
Elusive in Mint State

- 3303 1872 MS61 PCGS. This Type Two Philadelphia issue is scarce in Mint State, but is collectible in the current MS61 grade. Finer pieces are rare and out of reach for most enthusiasts. This piece displays well-struck design elements and original yellow-gold luster with deep olive overtones on the high points of the relief elements. Scattered abrasions account for the grade. Population: 54 in 61, 13 finer (10/17). NGC ID# 26AD, PCGS# 8963

1872 Twenty Dollar, MS62
Remarkable Luster and Color

- 3304 1872 MS62 PCGS. Among Uncirculated 1872 double eagles, this MS62 coin is high-end, and it is rare as such. Fewer than two dozen coins are reported in this grade at PCGS and NGC combined, and the two services list just six finer representatives (10/17). The surfaces are vibrantly lustrous and show bold design elements with no die lapping. Frosty yellow-gold margins surround vivid orange-gold interiors, and abrasions are at a minimum. Considering the conditional rarity of this piece, coupled with its remarkable eye appeal, bidders should come prepared for competition when this high-end 1872 double eagle crosses the auction block. We have previously offered a piece in this grade on only 12 occasions, more than half of which were over a decade ago. Population: 10 in 62, 3 finer (10/17). NGC ID# 26AD, PCGS# 8963

1875-CC Double Eagle, MS61
Attractive Mint Luster

- 3305 1875-CC MS61 PCGS. Variety 8-B.** The 1875-CC is the most plentiful Carson City double eagle in high grade, ideal for the collector seeking a single coin from this mint. However, if cherrypicked for quality, a nice Uncirculated example can be a stand-out highlight in a complete CC-mint date set. Only one other Type Two Carson City twenty, the 1876-CC, is similarly available in Mint State. This MS61 coin is much more appealing than its grade suggests. Frosty, luminous yellow-gold luster rolls around each side, and Liberty's cheek is free of all but a few light handling marks. Semicircular abrasions in the left obverse field limit the grade. An unusual characteristic on this piece is moderate strike weakness on Liberty's hair curls and the eagle's right (facing) wing. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, MS61
Lustrous Type Two Example

- 3306 1875-CC MS61 PCGS. CAC. Variety 5-A.** With a generous mintage of 111,151 pieces, the 1875-CC twenty is among the more available CC twenties. It can occasionally be found in mint condition, making it an appropriate Type Two representative. This issue is even more appealing when one considers the thick mint luster usually encountered, even on AU coins. This piece exhibits the luster for which this issue is well-known. Much original brightness remains, and the devices are well-defined overall. The grade suggests numerous abrasions, most of which are located on the obverse. On the upper and lower reverse there is a grease stain that was struck into the surface of the coin at the time of manufacture. NGC ID# 26AT, PCGS# 8974

1876-CC Variety 1-A Twenty, AU55

- 3307 1876-CC AU55 NGC. Variety 1-A.** The Carson City Mint produced more double eagles in 1876 than in any other year with a production of 138,441 coins with a face value of more than \$2.7 million. Those coins would be conservatively valued at \$500 million today. A die scratch curves down over the L in LIBERTY and extends through IBE, characteristic of this obverse die. Faint bluish-green patina appears over the still lustrous yellow surfaces that exhibit minimal handling marks. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU58
Variety 1-A

- 3308 1876-CC AU58 NGC. Variety 1-A.** The reverse die was paired with six different obverse dies in 1876. The obverse has a die line over L and through IBE while the reverse is cracked through the denomination. This lovely near-Mint example has mildly prooflike surfaces with trivial grade-consistent marks. Sharply struck and highly appealing. NGC ID# 26AW, PCGS# 8977

1876-CC Liberty Twenty, AU58
Type Two Carson City Issue

- 3309 1876-CC AU58 PCGS. CAC. Variety 2-C,** The 1876-CC Liberty double eagle claims a substantial mintage of 138,441 pieces, making it a relatively available issue from the famous Carson City Mint. This impressive Near-Mint specimen is lightly worn and lightly abraded, with lustrous orange-gold surfaces that show a few traces of prooflike reflectivity in sheltered areas. The Type Two design was abandoned after 1876, an important consideration for type purposes. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, MS60
Scarce in Mint Condition

- 3310 1876-CC MS60 PCGS. Variety 3-A.** In *The Mint on Carson Street*, Rusty Goe puts forth a survival estimate of 325 to 375 Uncirculated 1876-CC double eagles and adds: "From a technical standpoint, the quality of workmanship on 1876-CC double eagles receives high marks... ." This is a well-struck, peach-gold twenty with luminous frost. Each side displays numerous small abrasions from rough handling. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, MS60
Sought-After Mint State Example

- 3311 1876-CC MS60 NGC. Variety 1-A.** The 1876-CC is a fairly plentiful issue in the context of Carson City double eagles, although Mint State examples remain elusive and highly sought-after. This piece is moderately abraded. Original red-gold color yields shades of peach and lavender throughout, delivering good eye appeal in combination with frosty mint luster. The strike is bold, and the protected portions of the reverse fields show slight reflectivity. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, MS61
Final Type Two Carson City Issue

- 3312 1876-CC MS61 PCGS. Variety 2-A.** Collectors seeking a Mint State Type Two Carson City double eagle tend to gravitate to the available 1875-CC. The 1876-CC is much scarcer in high grade, although this issue has a decades-long reputation for being scarce but not *too* scarce in Mint State. The present coin represents the average grade of an Uncirculated survivor, although eye appeal surpasses expectations. Sharp design elements complement frosty orange-gold mint luster and a radiant cartwheel effect. Field chatter and light marks on Liberty's cheek limit the grade, but no individually significant abrasions are seen. The availability of this issue declines in MS62, and no finer pieces are reported at PCGS (10/17). NGC ID# 26AW, PCGS# 8977

1877-CC Variety 1-A Double Eagle, AU55
Type Three Debut Issue

- 3313 1877-CC AU55 NGC. Variety 1-A.** Three obverse dies and four reverse dies were combined to form five varieties for the 42,565 double eagles minted at Carson City in 1877, the first year of the Type Three design. Considerable luster remains visible under dusky patina on this Choice AU representative that exhibits handling marks consistent with the grade. NGC ID# 26AZ, PCGS# 8983

1878-CC Liberty Twenty, AU55
Low-Mintage Carson City Issue

- 3314 1878-CC AU55 PCGS. Variety 1-A.** Double eagle production at the Carson City Mint declined drastically in 1878, when a meager mintage of 13,180 pieces was accomplished. The coins were released into circulation and fulfilled their intended purpose admirably in the hard-money economy of the western United States. The 1878-CC is the fourth-rarest issue of the Carson City series today, both in terms of total number of coins known and high-grade rarity.

The present coin is an impressive Choice AU specimen that shows just a trace of wear on the high points of the strongly impressed design elements. A long, thin die line on Liberty's neck identifies the more available Variety 1-A. The pleasing orange-gold surfaces are lightly abraded and retain much of their original mint luster. The overall presentation is most attractive. Population: 25 in 55, 23 finer (10/17). NGC ID# 26B4, PCGS# 8986

1878-S Liberty Twenty, MS62
Pleasing Rose-Gold Coloration

- 3315 1878-S MS62 PCGS. Mike Fuljenz, writing in *Type Three Double Eagles 1877-1907*, notes: "Today, the 1878-S is often available in MS60 to MS61 and scarce in MS62. In properly graded MS63, this remains a rare issue with probably fewer than twenty known." This sharply detailed S-mint double eagle has a semiprooflike yellow-gold obverse, while the reverse is lustrous with rose-gold coloration. Abrasions are peppered over each side. There are 12 numerically finer submissions at PCGS (11/17). NGC ID# 338K, PCGS# 8987

1878-S Liberty Double Eagle, MS62
Conditionally Rare Any Finer

- 3316 1878-S MS62 PCGS. The 1878-S Liberty double eagle claims a substantial mintage of 1.7 million pieces, but the issue is surprisingly difficult to locate in grades above the MS62 level. This impressive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces with the expected number of grade-consistent contact marks. PCGS has graded twelve numerically finer examples (10/17). NGC ID# 338K, PCGS# 8987

1878-S Liberty Double Eagle, MS62
Partially Prooflike Surfaces

- 3317 1878-S MS62 PCGS. Like most San Francisco Mint double eagles of this era, the 1878-S was produced in large numbers (1.7 million pieces), but the coins circulated heavily and many were used to settle large accounts in foreign trade. Some of those coins have been repatriated in recent years, but rough handling during shipping and storage has taken a toll on those pieces. The 1878-S is an available issue in lower grades, but it is a condition rarity above the MS62 level. This well-detailed MS62 specimen exhibits vivid orange-gold surfaces, with much prooflike reflectivity in sheltered areas and the expected number of contact marks for the grade. PCGS has graded 12 numerically finer examples (10/17). NGC ID# 338K, PCGS# 8987

1879-CC Double Eagle, AU50
Low-Mintage Carson City Issue

- 3318 1879-CC AU50 PCGS. Variety 1-A. The early die state, neither side of this AU 1879-CC twenty shows discernible die lapping, which effaces tailfeathers in a later stage. This is the only die pairing known for 1879-CC double eagles, and this issue has a small mintage of only 10,708 coins. Deposits of gold at the Carson City Mint declined in 1879, and in October coinage operations were temporarily suspended due to a lack of sufficient bullion to keep the facility operating for even another month. The Carson City Mint remained open as a bullion depository, and in April 1880, coinage of various denominations was resumed. But the mintage of the 1879-CC double eagle was forever stunted.

The 1879-CC is a scarce issue in all grades today and very rare in Mint State. This collectible About Uncirculated example displays warm orange-gold color and partially lustrous fields. Friction in the fields and slight blending of Liberty's hair curls defines the grade. NGC ID# 338L, PCGS# 8989

1879-CC Liberty Twenty, AU55
Elusive Branch Mint Issue

3319 1879-CC AU55 PCGS. Variety 1-A. The 1879-CC Liberty double eagle claims an impressively low mintage of 10,708 pieces, making it a challenging issue in all grades today. The 1879-CC was even more elusive before a group of XF-AU specimens surfaced in the early 1990s to augment the small supply available to collectors. Examples in AU55 condition are still very scarce today.

The present coin is an impressive Choice AU specimen, with a bold strike and just a touch of high-point wear on the design elements. The lightly abraded orange-gold surfaces retain much of their original mint luster and overall eye appeal is quite strong. Population: 23 in 55, 27 finer (10/17). NGC ID# 338L, PCGS# 8989

1879-O Liberty Twenty, AU53
Low-Mintage, Type Three Issue

3320 1879-O AU53 PCGS. Variety 1. The New Orleans Mint reopened for coinage operations in 1879, mostly to coin large numbers of Morgan silver dollars. A token mintage of 2,325 Liberty double eagles was also accomplished that year, but no twenty dollar coins were ever struck at the Southern facility after 1879. Accordingly, the 1879-O is the only Type Three double eagle from the New Orleans Mint. As might be expected, the 1879-O is a scarce-to-rare in all grades today and the issue is always in demand.

The present coin is an attractive AU53 example, with only light wear on the well-detailed design elements. The lightly abraded orange-gold surfaces display a few hints of rose and lilac, and considerable amounts of original mint luster remain intact. Population: 6 in 53, 14 finer (10/17). NGC ID# 26B8, PCGS# 8990

1879-S Double Eagle, MS62
Among the Finest CAC-Approved Examples

- 3321 1879-S MS62 NGC. CAC.** The general availability of the 1879-S double eagle in Mint State has increased since the advent of third party grading, although the vast majority of these coins grade no finer than MS61. MS62 examples are scarce, and none are finer at NGC. The finest CAC-endorsed coins are seven MS62s, one of which is offered here. Sharp design elements complement softly frosted yellow-gold luster, and grade-limiting abrasions are uniformly unimportant save for a vertical mark on Liberty's neck near the hair curls.

We have offered an MS62 coin on only 16 previous occasions, and we have not offered a finer piece since 2009, when an MS63 PCGS coin garnered \$32,200 in our April Central States Signature sale. This is only the second CAC-endorsed MS62 coin that we have handled. Census: 49 in 62, 0 finer. CAC: 7 in 62, 0 finer (10/17). NGC ID# 26B9, PCGS# 8991

1881 Double Eagle, AU Details
Important Key-Date Twenty

- 3322 1881 — Reverse Scratched — NGC Details. AU.** Among all the Liberty double eagles coined from 1850 through 1907, only four issues had lower mintages than the 2,199 pieces struck in 1881. Those issues were all struck at the Philadelphia Mint: 1882, 1885, 1886, and 1891. This issue is extremely rare in circulation strike format, as most old collections contained proofs, if they had one at all. In fact, the Smithsonian Institution lacks a circulation strike 1881 double eagle. This pleasing AU representative has a reverse scratch that may lessen the value, but hardly dampens collector enthusiasm for the popular rarity.

1882-CC Twenty Dollar, AU53
Bright Luster Remains

- 3323 1882-CC AU53 PCGS. Variety 1-B.** This bright CC twenty with luminous pale yellow-gold color presents pinpoint detail on the devices. Superficial rub and scattered wispy marks come as no surprise for the AU53 assessment. Fewer than 40,000 1882-CC double eagles were manufactured, and the issue is known for its rarity in Mint State. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, AU58
Still-Lustrous Nevada Mint Twenty

- 3324** 1882-CC AU58 NGC. **Variety 1-B.** Tantalizingly close to full Mint State, this near-Mint 1882-CC fits well among higher-graded pieces at a much friendlier price. Brilliant yellow-gold surfaces show the expected tiny marks from coin-to-coin abrasion, but no hard hits. The mint luster is nearly full throughout both sides. Liberty's hair strands and bun are sharply defined. NGC reports just 63 numerically finer pieces (10/17). NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, AU58
Prooflike Reverse

- 3325** 1882-CC AU58 PCGS. **Variety 1-A.** In Mint State, the 1882-CC double eagle is scarce and exists primarily in MS62 and lower grades, where eye appeal is often lacking due to heavy abrasions and bagmarks. A smooth, attractive AU58 coin is a more affordable and arguably more appealing option. Here is a partially lustrous yellow-gold near-Mint example with limited surface marks and sharp detail. The obverse displays frosty patina, while the reverse has deeply prooflike fields, produced by a freshly polished die. The originality of the color is unquestioned. Carson City gold is seldom seen with the "two-faced" appearance of this 1882-CC double eagle. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Double Eagle, AU58
Colorful Branch Mint Type Coin

- 3326** 1882-CC AU58 PCGS. **CAC. Variety 1-B.** From a relatively modest mintage of 39,140 pieces, the 1882-CC is still one of the more available Liberty double eagles from the Carson City Mint, and a popular choice of branch mint type collectors. This attractive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the vivid orange-gold surfaces are lightly abraded, aside from a shallow scrape in the lower left obverse field. This coin retains much of its original mint luster. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, MS60
Elusive in Mint State

- 3327** 1882-CC MS60 NGC. **Variety 1-B.** In 1882, coining and refining operations at the Carson City Mint increased over previous years. Double eagles, not struck at the Nevada branch mint since 1879, were struck to the extent of 39,140 pieces. The Carson City Mint was of advantage to miners and mine owners as a convenient place to deposit their gold in exchange for coins or bars. Double eagles that did not circulate locally were eventually exported, and many of the pieces known today were repatriated from foreign trade caches. Uncirculated coins are scarce and in high demand.

This piece is sharply struck from dies that do not show the lapping seen on many Carson City double eagles at the eagle's tailfeathers and Liberty's neck truncation. Satiny peach-gold surfaces exhibit olive patina amid the scattered abrasions. The vast majority of Uncirculated 1882-CC twenties are heavily abraded, thus the markers of quality more often than not are a sharp strike and unworn devices, as this piece possesses. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, MS60
Low Mintage, Rare in Mint Condition

3328 1882-CC MS60 PCGS. Variety 1-A. The downward-sloping CC mintmark and die line above LAR in DOLLAR confirm the scarcer of two known die pairs for the 1882-CC. Officials at the Carson City Mint limited double eagle output to 39,140 coins in 1882, when the facility ended a two-year hiatus on the production of these large gold pieces. It appears the coins circulated stateside — most survive in XF to AU grades — though the estimated 100 or so Uncirculated examples (all in MS63 or lower) may have avoided circulation in overseas vaults.

The surfaces are relatively smooth considering the coin's size and grade. Still, small abrasions are peppered throughout. The devices are bold without evidence of friction, and frosted mint luster merges with light yellow-gold color. A pleasing CC condition rarity. NGC ID# 26BF, PCGS# 8997

1882-CC Double Eagle, MS61
Strongly Struck, Bright Mint Frost

3329 1882-CC MS61 NGC. Variety 1-A. The second C in the mintmark is positioned lower than the first, distinguishing this variety from the other die marriage used to strike 39,140 double eagles in 1882. Both variants share a common obverse with a diagnostic vertical die gouge in front of Liberty's eye. The 1882-CC is a very scarce issue across all Uncirculated grade levels and becomes rare in MS62. Only a couple of coins are known to survive in MS63, about 15 grade points higher than the average example at NGC and PCGS.

Bright mint frost emanates from this light orange-gold representative. A uniformly strong strike appears on the obverse stars, Liberty's curls, and the eagle's feathers. Numerous small abrasions are peppered over each side and explain the grade, but none merit individual attention. NGC ID# 26BF, PCGS# 8997

1883-CC Twenty Dollar, Choice AU
Popular for Type Representation

- 3330** 1883-CC AU55 PCGS. Variety 2-A. About 3% of the nearly 60,000 coins struck are estimated to survive, ranking the 1883-CC double eagle among the best Carson City issues for type representation. This piece saw minimal circulation and shows only the slightest bit of rub over well-struck motifs. Orange-gold with khaki accents and a small number of trivial abrasions. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, AU55
Lustrous and Appealing

- 3331** 1883-CC AU55 PCGS. Variety 2-A. Bullion deposits at the Carson City Mint grew from 1882 to 1884, and the double eagle mintages during this period were substantial compared to many earlier issues. This Choice AU 1883-CC is an outstanding CC-mint type coin, showing good sharpness and partial field luster. The straw-gold surfaces show light chatter, but no singular abrasions distract from the pleasing eye appeal. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, MS61
Sharp Original Surfaces

- 3332** 1883-CC MS61 PCGS. Variety 2-A. The 1883-CC is elusive in Mint State, and its availability seems even more limited in the face of strong collector demand. Equally popular with series collectors, Carson City specialists, and type enthusiasts, the issue also draws attention for its above-average sharpness and eye appeal.

This original example displays a medium green-gold hue and deep-gray overtones that confirm the natural surfaces. The frosted fields and devices show bright cartwheel luster and lightly abraded exposed areas. The strike is sharp on the star centers, Liberty's hair bun and curls, and throughout the reverse motifs. PCGS reports just 27 finer coins (10/17). NGC ID# 26BH, PCGS# 8999

1883-S Liberty Double Eagle, MS64
Registry Grade Example

3333 1883-S MS64 PCGS. From a substantial mintage of 1.1 million pieces, the 1883-S Liberty double eagle is surprisingly difficult to locate in high grade. The coins were released into circulation and many were used to settle accounts in foreign trade. Rough handling during shipping and storage contributed to the attrition of high-grade specimens. The 1883-S is available in lower grades today, but the issue is a condition rarity at the MS64 grade level.

The present coin is an attractive Choice specimen, with sharply detailed design elements and lightly marked peach-gold surfaces. Vibrant mint luster adds to the outstanding visual appeal. Population: 15 in 64 (1 in 64+), 0 finer (10/17). NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, AU58
Struck From Locally Mined Gold

3334 1884-CC AU58 NGC. Variety 1-A. The Carson City Mint accepted slightly more than \$1.45 million in gold deposits during the fiscal year 1884, entirely from domestic mining sources. Philadelphia, San Francisco, and New Orleans routinely received deposits of foreign bullion or coin, but the Carson City Mint, like the Denver Assay Office, was established to service the local mining community. Much of the gold received at Carson City was coined into double eagles, with a mintage of 81,139 pieces for the 1884 calendar year. This date remains plentiful in the context of Carson City gold and is ideal for type collectors seeking a single coin from this mint. The present near-Mint example displays a sharp strike and frosty orange-gold luster. Light friction on Liberty's cheek is all that prevents a Mint State grade. NGC ID# 26BK, PCGS# 9001

**1884-CC Liberty Double Eagle, MS61
Popular Type Three Issue**

3335 1884-CC MS61 PCGS. Variety 1-A. From a mintage of 81,139 pieces, the 1884-CC Liberty double eagle is one of the more available dates of the Carson City series. The 1884-CC was a well-produced issue and a number of lower Mint State pieces were discovered in European holdings in the early 1990s. Its relative availability in high grade makes the 1881-CC a popular choice with branch mint type collectors, but the 1889-CC is still quite elusive in higher Mint State grades. The 1884-CC was seldom offered publicly before the mid-1930s, when examples began appearing in Thomas Elder sales, Like the Wendell C. Foster Collection (6/1935) and the Lenz, Sloane and Others Collections (1/1936). The issue has appeared at auction regularly in recent years, with the prices realized record belonging to the MS63 PCGS specimen in lot 5730 of the Chicago Signature (Heritage, 8/2014), which realized \$70,500.

The present coin is an impressive MS61 specimen, with sharply detailed design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Both sides radiate vibrant mint luster and the overall presentation is most appealing. PCGS has graded 85 numerically finer examples (10/17). NGC ID# 26BK, PCGS# 9001

**1889 Double Eagle, MS62+
Rarely Seen Finer**

3336 1889 MS62+ NGC. Although NGC has certified 175 of these 1889 double eagles in MS62, only two have earned the Plus designation, and they have only examined 10 coins with higher numerical grades (10/17). This boldly defined representative has exquisite surfaces for the grade, and in our opinion deserves the next higher numerical grade. The surfaces have minimal marks and brilliant yellow gold luster with a trivial line of dark patina at the lower reverse. NGC ID# 2695, PCGS# 9010

**1889-CC Liberty Twenty, AU53
Low Mintage, Red-Gold Color**

3337 1889-CC AU53 PCGS. Variety 1-A. Only 30,945 Liberty double eagles were struck at the Carson City Mint in 1889, but the issue has a high survival rate due to some hoards that surfaced in the 1990s. This impressive AU53 example exhibits a touch of wear on the strongly impressed design elements. Lightly abraded red-gold surfaces are lustrous and attractive. NGC ID# 26BV, PCGS# 9011

1889-CC Liberty Double Eagle, MS61
Popular Branch Mint Type Coin

3338 1889-CC MS61 NGC. Variety 1-A. The Carson City Mint reopened for coinage operations in 1889, after a hiatus of several years. Despite a small mintage of 30,945 pieces, the 1889-CC is one of the more available Liberty double eagles from the Carson City facility. The 1889-CC surfaced in a significant hoard in the mid-1990s, accounting for much of its availability today. Of course, even though it is relatively easy to locate in lower grades, the 1889-CC is still a scarce issue in Mint State condition.

This impressive Choice AU example exhibits sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show the expected number of minor contact marks for the grade. Overall eye appeal is quite strong. Census: 28 in 61, 15 finer (10/17). NGC ID# 26BV, PCGS# 9011

1890-CC Double Eagle, AU58
Appealing, Lustrous Surfaces

3339 1890-CC AU58 NGC. Variety 1-A. Late die state, lapped reverse. The eagle's tailfeathers are partially effaced, but the obverse is unlapped. Moderate original mint luster remains in the protected portions of the fields. Frosty yellow-gold surfaces show light, scattered abrasions but only a touch of high-point friction. An appealing coin that will fit in well with an otherwise Mint State Carson City collection. NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, AU58
Variety 1-A

3340 1890-CC AU58 PCGS. Variety 1-A. Two die varieties are known, 1-A and 2-B, featuring pairings of unique dies used nowhere else in the series. This example shows evidence of lapping at the right side of the eagle's tail, but not to the extent seen on some later die state pieces. Hints of rose toning appear on the brilliant and frosty light yellow surfaces with dark patina defining the light high-point wear. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, MS61
Popular Branch Mint Type Issue

- 3341 1890-CC MS61 PCGS. Variety 1-A.** The 1890-CC Liberty double eagle claims a mintage of 91,209 pieces, a substantial production total in the context of the series. Many of the coins were used to settle accounts in foreign trade and a significant number of pieces have been repatriated from European holdings over the years. As a result, the 1890-CC is a relatively available issue in today's market and a favorite choice of branch mint type collectors.

This impressive MS61 displays well-detailed design elements with a touch of softness on several star centers. The tail feathers have lost some detail due to lapping, and a long die crack extends through the tops of the letters in UNITED STATES OF AMERICA. Orange-gold surfaces retain much original mint luster and show the expected number of minor contact marks for the grade. NGC ID# 26BY, PCGS# 9014

1891-S Liberty Twenty, MS64
Extremely Rare in Higher Grades

- 3342 1891-S MS64 PCGS.** The 1891-S Liberty double eagle was produced in large numbers (over 1,2 million pieces struck), but the issue circulated heavily in both domestic and foreign trade, and few high-quality examples were saved by contemporary collectors. As a result, the issue is scarce in MS64 condition, and finer examples are virtually unobtainable. This sharply detailed Choice specimen offers lustrous orange-gold surfaces that show only minor signs of contact. PCGS has graded one numerically finer example (10/17). NGC ID# 26C4, PCGS# 9018

1891-S Liberty Double Eagle, MS64
Well-Preserved and Lustrous

- 3343 1891-S MS64 PCGS.** From a substantial mintage of 1.2 million pieces, the 1891-S Liberty double eagle becomes scarce in grades above the MS63 level. This impressive Choice specimen offers sharply detailed design elements and lustrous orange-gold surfaces with some widely scattered minor contact marks. PCGS has graded only one numerically finer example (10/17). NGC ID# 26C4, PCGS# 9018

1891-S Double Eagle, MS64
Far Finer Than Usual

- 3344 1891-S MS64 PCGS. CAC.** San Francisco Mint officials coined more than 1.2 million twenty dollar gold pieces in 1891. Examples are typically seen in MS61 to MS63 with signs of rough handling from international shipments. This lovely Choice representative is much cleaner than usual despite trivial flecks and grazes. Frosty luster characteristic of the facility rolls over warm rose-gold surfaces. A single example resides in a higher-graded PCGS holder. CAC: 15 in 64, 0 finer (10/17). NGC ID# 26C4, PCGS# 9018

1891-S Double Eagle, MS64
Only One Numerically Finer at PCGS

- 3345 1891-S MS64 PCGS. CAC.** Medium S Mintmark. The mintmark is called "medium" and is larger than the so-called "Minute S." There are doubtless several varieties, although we are unaware of a detailed die variety examination of these coins. This Choice Mint State piece has many peers, but is rarely exceeded, as PCGS has only graded three MS64+ pieces and one finer example (10/17). This beauty has a sharp strike and wispy rose toning on its brilliant yellow surfaces. NGC ID# 26C4, PCGS# 9018

1892-CC Twenty Dollar, Choice AU
Original Khaki and Red-Gold Surfaces

- 3346 1892-CC AU55 NGC. Variety 1-A.** Mintmark collecting was still in its infancy when these double eagles were issued by the Carson City Mint in 1892. Perhaps some pieces were set aside for numismatic purposes around that time, but virtually all known survivors are the result of repatriations from overseas vaults or happenstance. Blended khaki and reddish-gold coloration graces well-preserved, original surfaces with minimal friction. Minor abrasions are evenly scattered over each side. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Twenty, AU55
Low Mintage of 27,265 Coins

- 3347 1892-CC AU55 PCGS. Variety 1-A.** This is the second-scarcest of the four Carson City double eagle issues from the 1890s. Only 27,265 representatives were coined. Glowing mint luster remains over attractive orange-gold surfaces. Glints of khaki-gold color are also seen over the high points, where slight blending occurs. Strongly detailed on the stars, curls, and eagle. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Double Eagle, AU55
Attractive CC-Mint Type Coin

- 3348 1892-CC AU55 PCGS. CAC. Variety 1-A.** The 1892-CC Liberty double eagle is more available than its mintage of 27,265 pieces would suggest, due to some hoards that surfaced in the late 1990s. This impressive Choice AU specimen shows a touch of wear on the well-detailed design elements, and the lightly abraded orange-gold surfaces retain much original mint luster. NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, AU58
Reflective Fields

- 3349 1892-CC AU58 PCGS. Variety 1-A.** This is an early die state example, showing semiprooflike fields on both sides. No die lapping is visible at the eagle's tailfeathers or the base of the Liberty's neck truncation, and the diagnostic die line through the top of the 2 in the date is still visible. Sharp design elements and bright yellow-gold luster produce pleasing visual appeal despite scattered abrasions. NGC ID# 26C6, PCGS# 9020

1892-CC Twenty Dollar, Near-Mint
Scarce Date With CAC Approval

- 3350 1892-CC AU58 NGC. CAC. Variety 1-A.** This eye-appealing 1892-CC double eagle boasts seldom-seen recognition from CAC for its quality and originality. Strike detail is generally strong with only a couple star centers missing. A hint of blending on the curls prevents a full Mint State assessment. Significant remaining luster radiates over rich orange-gold surfaces that show a normal number of abrasions. Worth a premium bid. CAC: 26 in 58, 8 finer (10/17). NGC ID# 26C6, PCGS# 9020

1893-CC Liberty Double Eagle, AU58+
Final Year Branch Mint Type Coin

- 3351 1893-CC AU58+ PCGS. Variety 1-A.** The fact that the 1893-CC is almost never seen in grades under AU50 suggests that few coins were released into circulation by the Mint. Those coins that were not melted show varying degrees of friction and bagmarks from transport and handling. In fact, one can argue that the 1893-CC is every bit as rare as the legendary 1870-CC double eagle in VF condition.

The present coin is just a whisper away from fully Uncirculated. Vivid orange-gold color is enhanced by cartwheel luster, and the strike remains razor-sharp. A trace of rub merges a few of the topmost hair strands. Struck from the scarcer of two die pairs, the coin shows the numerals in the date slightly closer together than seen on coins from the more-available die pair. NGC ID# 26C9, PCGS# 9023

1893-CC Liberty Double Eagle, MS60
Pleasing Final-Year Type Coin

- 3352 1893-CC MS60 NGC. Variety 2-A.** The 1893-CC was not particularly well-saved domestically despite being the final-year issue for the venerable Nevada Mint. Rather, many pieces were exported and have, in recent decades, found their way back into the hands of U.S. collectors. This Mint State example is finer than most 1893-CC twenties. Smooth fields show a scattering of tiny abrasions and shallow lines, while a few additional marks are seen on the portrait. Copper spotting is a common characteristic among 1893-CC double eagles, but it is absent on this coin. NGC ID# 26C9, PCGS# 9023

1895 Double Eagle, MS65
A Great Condition Rarity

- 3353 1895 MS65 NGC.** Uncirculated 1895 double eagles are plentiful through MS64, but at the Gem level this Philadelphia issue is suddenly very rare. The entire NGC and PCGS population is only 15 coins in MS65, with none finer (10/17). In his 1982 *Analysis of Auction Records, Volume VI*, David Akers considered the 1895 “rather scarce” in true Gem condition. Since the advent of third party grading and a few more decades of auction data, Akers’ estimate has been proven to be an understatement, likely due to many coins that were previously considered to be Gems not making the cut by modern standards. We have previously handled a Gem 1895 double eagle only on six occasions, just three of which were in the last decade. This piece is sharply struck and satiny with radiant cartwheel luster. An unobtrusive scuff on the Liberty’s cheek is all that prevents this coin from being the finest known. NGC ID# 26CD, PCGS# 9027

1896 Double Eagle, MS64+
Repunched Date, FS-301

- 3354 1896 Repunched Date, FS-301, MS64+ PCGS. CAC. Remnants of the initial date punch are seen north of the primary digits on this *Cherrypickers' Guide* variety. A strong impression is evident on the stars, curls, and feathers. This impressive near-Gem radiates frosty mint luster from eye-appealing peach-gold surfaces. The added accolades from PCGS and CAC are well-deserved. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

1898-S Twenty Dollar, MS65
High-End for the Issue

- 3355 1898-S MS65 PCGS. Rich peach-orange and yellow-gold hues intermingle across the Gem, vibrantly lustrous surfaces of this 1898-S double eagle. The strike is sharp and no die lapping is observed. A few faint luster grazes on the cheek and in the field prevent a finer grade. The '98-S double eagle is occasionally seen in MS65, but PCGS lists only a single MS67 coin finer (10/17). NGC ID# 26CL, PCGS# 9034

1900-S Liberty Twenty, MS64
Condition Rarity in Finer Grades

- 3356 1900-S MS64 PCGS. From a mintage of 2.4 million pieces, the 1900-S Liberty double eagle is a relatively available issue in lower Mint State grades, thanks to the repatriation of coins from European sources in recent years. The issue becomes scarce in MS64 condition, however, and finer examples are condition rarities. This sharply detailed Choice example displays lightly marked orange-gold surfaces, with a mix of satiny mint luster and prooflike reflectivity in the fields. PCGS has graded four numerically finer examples (10/17). NGC ID# 26CR, PCGS# 9038

1901-S Liberty Twenty, MS64
Colorful, Lustrous Surfaces

- 3357 1901-S MS64 PCGS. The 1901-S Liberty double eagle claims a large mintage of more than 1.5 million pieces, but few examples were saved for numismatic purposes, and the issue is a prime condition rarity in grades above MS64. This attractive Choice specimen exhibits well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. PCGS has graded two numerically finer examples (10/17). NGC ID# 26CT, PCGS# 9040

1905 Liberty Double Eagle, MS62
Low-Mintage Type Three Issue

- 3358 1905 MS62 PCGS. Double eagle production at the Philadelphia Mint was drastically reduced in 1905, probably because a truly large mintage the year before met the needs of the national economy for several years to come. Only 58,919 double eagles were struck in 1905, making the issue one of the most elusive in the Type Three series. This attractive MS62 specimen offers well-detailed design elements and the lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26D2, PCGS# 9047

1906-D Double Eagle, MS64+
First Denver Twenty, Rare Any Finer

- 3359 1906-D MS64+ PCGS. One of just two Liberty Head double eagle dates from the Denver Mint, this borderline Gem 1906-D is vibrantly lustrous and well-struck for the first-year D-Mint issue. Sun-gold cartwheel luster radiates from richly frosted surfaces. Only a few shallow abrasions preclude a full Gem grade, which is seldom granted as witnessed by only 15 numerically finer pieces seen by PCGS (11/17). NGC ID# 26D5, PCGS# 9050

**1906-D Liberty Double Eagle, MS64+
First Denver Mint Issue**

- 3360 1906-D MS64+ PCGS. CAC.** The 1906-D Liberty double eagle claims a mintage of 620,250 pieces, and the issue is moderately available in MS64 condition, but examples in finer grades are very rare. This Plus-graded Choice example exhibits well-detailed design elements and vivid orange-gold surfaces, with only minor signs of contact. Vibrant mint luster enhances the outstanding eye appeal. PCGS has graded 15 finer examples (11/17). NGC ID# 26D5, PCGS# 9050

**1907-D Liberty Double Eagle, MS65
Final Year of Design**

- 3361 1907-D MS65 NGC.** The 1907-D is the last Liberty double eagle from the Denver Mint, an important consideration for branch mint type collectors. A number of high-grade specimens were saved for their novelty value, but the 1907-D becomes rare above the MS65 grade level. This sharply detailed Gem exhibits well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC has graded 38 numerically finer examples (10/17). NGC ID# 26D8, PCGS# 9053

**1907-D Double Eagle, MS66
Two-Year Denver Mint Type Issue**

- 3362 1907-D MS66 PCGS.** Although authorized as a U.S. branch mint in the 1860s, the Denver Mint operated as an assay office for its first four decades until coins were finally minted there in 1906. Liberty double eagles were only produced at the Colorado facility in 1906 and 1907, with a total production for both years of less than 1.5 million pieces. These coins are elusive in top grades. This lovely Premium Gem easily ranks among the two dozen finest surviving examples, and represents an important opportunity for a Denver Mint type collector. Population: 20 in 66 (1 in 66+), 1 finer (10/17). NGC ID# 26D8, PCGS# 9053

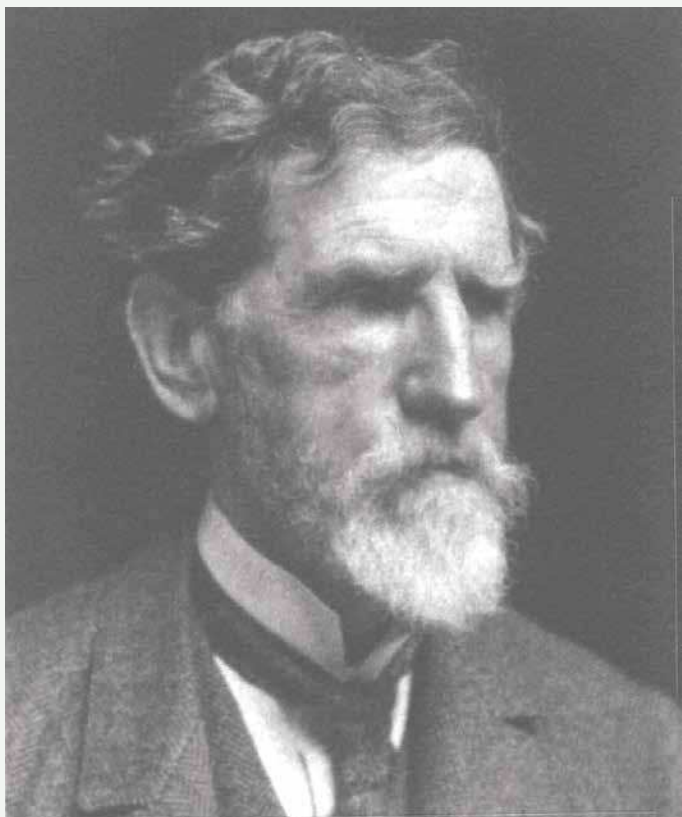

HIGH RELIEF DOUBLE EAGLES

1907 Wire Rim High Relief Twenty
Unc Details

- 3363** 1907 High Relief, Wire Rim — Rim Filing, Cleaned — NGC Details. Unc. An assumption has to be made here that the coin actually was struck with a wire rim. It cannot be stated with certainty since the rims have been filed, so it has to be assumed there was something (like a wire rim) present to file down. The surfaces are unusually bright from cleaning with luminous yellow-gold color. A number of small, but individually insignificant contact marks are peppered across each side. The three-dimensional design of Saint-Gaudens's concept is still fully in evidence on each side. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS61
Wire Rim, Exemplary for the Grade

- 3364** 1907 High Relief, Wire Rim MS61 NGC. The goal of recruiting Augustus Saint-Gaudens to redesign the United States coinage, beginning in 1907, was to eradicate more than a century of what President Roosevelt and many others deemed to be inferior artistry in the U.S. coin design. Previous attempts to incorporate outside artists in the Mint's designing process had mostly failed due to bureaucracy and disagreements between the artists and the Mint's engraving department staff. President Roosevelt attempted to circumvent this obstacle by insisting on a single sculptor for the work and giving him free reign of the design's imagery within the bounds of the coinage laws. The result was a magnificent Ultra High Relief pattern double eagle struck in 1907 under multiple die impressions from a medal press. The artistry was magnificent but the practicality was lacking for mass production. Saint-Gaudens' designs underwent several stages of modifications before arriving at a low-relief alternative that would strike up fully with a single die impression. One of these stages was the High Relief 1907 coin, which was struck to the extent of 12,367 pieces. These coins embody the closest thing to Saint-Gaudens' original designs that most collectors can hope to acquire. Here offered is a Mint State example with full design definition and satiny yellow-gold luster. Although graded MS61, there are no individually distracting abrasions. NGC ID# 26F2, PCGS# 9135

**MCMVII High Relief Twenty, MS62
Wire Rim**

- 3365 1907 High Relief, Wire Rim MS62 NGC.** The August-September 1907 issue of *The Elder Monthly* magazine included this forward-thinking editorial:

"The 'Order of Independent Americans' and other trouble hunters, protest against the placing of Mary Cunningham's profile on our coins because the lady was born in Ireland. Saffron and sensational journals will doubtless make capital out of this but the protest is absurd. Even the bluest-blooded Americans have only to go back a few generations to trace their ancestors to English, Irish, French, or German soil. Anyhow, we shall have to take Miss Cunningham if we are to have the designs of Mr. St Gaudens."

In August, Saint-Gaudens died just after publication of these remarks. The eagles and double eagles that bear his designs were released later in the year, and the figure of Liberty for which Cunningham modeled remains one of the iconic images in American coinage. This is a lovely MS62 example of the coin that is undoubtedly the most closely linked with the "American Century." The surfaces are bright and there are only the slightest contact marks apparent when closely viewed with a loupe. NGC ID# 26F2, PCGS# 9135

1907 Flat Rim High Relief Twenty, Unc Details

- 3366 1907 High Relief, Flat Rim — Reverse Spot Removed — NGC Details. Unc.** For a coin that will be viewed face-up, this piece would present very well. Few contact marks can be seen, but close examination does show hair-thin scratches between the B and E and from the middle of the E to the rim above the T in LIBERTY. The reverse spot removal is curious. It appears that there is a small series of planchet voids on the lower left of that side. That area was spot polished in the mistaken assumption it could be removed. Otherwise, the surfaces are bright and satiny with just the slightest tinge of reddish patina. NGC ID# 26F2, PCGS# 9136

1907 Flat Rim High Relief Twenty, MS64

- 3367 1907 High Relief, Flat Rim, MS64 NGC.** The "wire rim" seen around the margins of many High Relief twenties was considered a manufacturing flaw by Mint personnel. It was caused by too much distance between the die faces and collar, which resulted in a thin bit of extruded metal around the margins. In December 1907, this "problem" was finally addressed and the distance between the die faces and collar was reduced. This resulted in coins that more-or-less lacked a wire rim (known in Mint parlance as a fin rim). The wire rim was never fully eliminated, but this piece shows almost no extruded metal. The surfaces are bright and satiny with glowing yellow-gold color. Only the slightest contact marks prevent an even higher grade. NGC ID# 26F2, PCGS# 9136

SAINT-GAUDENS DOUBLE EAGLES

1908-D No Motto Twenty, MS66
Among the Finest Certified

- 3368** 1908-D No Motto MS66 PCGS. Type Two, Long Rays. In early 1908, the Mint slightly modified the obverse design of the double eagle, making the rays a trifle longer. This Long Rays subtype comprises the majority of the No Motto D-mint double eagles known. According to research by Roger Burdette, these pieces were likely struck during a short period between the second week of April and May 12th, 1908, when the final No Motto coins were delivered by the coiner at Denver.

As a date, the 1908-D No Motto double eagle is plentiful through MS64, scarce in MS65, and rare finer. This Premium Gem is among the finest examples known. The strike is sharp, and vibrant satin luster displays warm orange-gold patina. The few small abrasions that determine the grade are restricted to the high points of the devices. On this piece, the mintmark is tilted sharply counterclockwise. Population: 14 in 66 (2 in 66+), 0 finer (10/17). NGC ID# 26F7, PCGS# 9143

1908-S Saint-Gaudens Twenty, AU53
Low-Mintage, Early Series Issue

- 3369** 1908-S AU53 PCGS. From a low mintage of just 22,000 pieces, the 1908-S Saint-Gaudens double eagle is an elusive issue that represents the first year of the With Motto design. This attractive AU53 specimen is lightly worn and lightly abraded, with lustrous yellow-gold surfaces that show a few amber alloy spots on the obverse. NGC ID# 26FA, PCGS# 9149

1908-S Saint-Gaudens Twenty, AU53
Attractive Orange-Gold Color, Low Mintage

- 3370** 1908-S AU53 NGC. With a mintage of just 22,000 pieces, the 1908-S twenty is a high-demand double eagle in all grades. This attractive orange-gold example retains much of its original mint luster and shows only light abrasions combined with minimal wear. A shallow rim bump at 8 o'clock on the obverse is the sole mark of note. All 1908 San Francisco Mint twenties were struck with the motto IN GOD WE TRUST. NGC ID# 26FA, PCGS# 9149

1908-S Double Eagle, MS62
Lowest-Mintage With Motto Saint

3371 1908-S MS62 PCGS. San Francisco struck Liberty Head double eagles through 1907, and was the last mint in 1908 to receive dies for Saint-Gaudens coinage. All 1908-S twenties are of the With Motto type and were not delivered until August of that year. The considerable delay in production of the new issue occurred because of difficulties that branch mint encountered with the new segmented collar, which required more clearance to open than the San Francisco presses had. Double eagle production for the year amounted to only 22,000 coins with the S mintmark.

The 1908-S is an elusive issue in all Mint State grades. Most of the mintage was placed into temporary storage after coinage and later dispersed into commercial channels. Roger Burdette estimates that only about 1,500 coins survive, most of which are circulated or heavily abraded. This MS62 coin is about in the middle of the Mint State population. The strike is bold and the satiny luster is deep orange-gold. Scattered abrasions account for the grade. NGC ID# 26FA, PCGS# 9149

1910-D Twenty Dollar, MS66
Exceptional Color and Preservation

3372 1910-D MS66 PCGS. The 1910-D is the most plentiful of the Saint-Gaudens double eagles from this year in high grade, being "only" scarce in Premium Gem condition while the Philadelphia and San Francisco issues are rare so fine. Higher-grade Denver coins are also great rarities. This MS66 coin displays sharp detail and impressive original luster that includes shades of rose and lavender throughout otherwise fire-orange and golden coloration. PCGS and NGC each list two Superb Gems finer (10/17). NGC ID# 26FG, PCGS# 9155

1913-S Double Eagle, MS64
Seldom Seen With CAC Approval

3373 1913-S MS64 PCGS. CAC. Softly frosted and well-struck with original wheat-gold luster. Only a few light grazes in the fields prevent a full Gem designation. The 1913-S comes from a small 34,000-coin mintage, the second-lowest production total of the With Motto type. Choice examples are available, but finer coins are rare with only 24 reported at PCGS. CAC: 57 in 64, 5 finer (10/17). NGC ID# 26FR, PCGS# 9163

**1916-S Double Eagle, MS66+
Tied for Fourth Finest Known**

- 3374 1916-S MS66+ NGC. CAC.** Thousands of Mint State 1916-S twenties have come to light in the past few decades. Consequently, this issue is available in all grades through MS65. However, Premium Gems are scarce and only a small handful — two at NGC and three at PCGS — are Plus-graded. The only finer coins are three MS67s at NGC, none of which have appeared at auction in nearly a decade. We have previously handled only on MS66+ coin, a PCGS piece in lot 7511 of our January 2011 FUN Signature sale that realized nearly \$19,000. This piece, tied for the finest CAC-endorsed example of this date, displays eye-appealing sun-gold and lavender hues with sharp motifs. While many high-grade Saint-Gaudens double eagles show light contact marks along Liberty's figure, this piece is close to pristine. CAC: 27 in 66, 0 finer (11/17). NGC ID# 34NJ, PCGS# 9169

**1924-D Twenty, MS62
Elusive in Mint State**

- 3375 1924-D MS62 PCGS.** High mintages, exportations, subsequent meltings, repatriations, and ultimate scarcity is a familiar refrain among key-date Saint-Gaudens issues, including the 1924-D. Although more than 3 million pieces were minted, Uncirculated examples are scarce today. The present example offers pleasing olive-gold luster, and a bold strike save for some typical weakness near the obverse rim.

Ex: *Dallas Signature* (Heritage, 10/2006), lot 3635. NGC ID# 34VF, PCGS# 9178

**1924-S Saint-Gaudens Twenty, MS62
Scarce, Heavily Melted Issue**

- 3376 1924-S MS62 PCGS.** The 1924-S Saint-Gaudens double eagle is a heavily melted issue that was thought to be a great rarity until a number of specimens surfaced in overseas holdings, beginning in the 1950s. Today, the 1924-S remains a scarce issue, especially in high grade. This impressive MS62 example exhibits well-detailed design elements that show the effects of die wear on some peripheral devices. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 26G9, PCGS# 9179

**1924-S Double Eagle, MS62
Better Date in High Grade**

- 3377 1924-S MS62 PCGS.** Nearly 3 million double eagles were minted in San Francisco in 1924, but the issue is elusive today in the context of Saint-Gaudens double eagles. Most of the mintage was stored in Mint and Treasury vaults until melted in the mid-1930s. The obverse of this example has a few small scrapes, with frosty yellow luster and wispy orange overtones. Additional scattered marks on each side are mostly hidden in the design elements.

Ex: *Pittsburgh Signature* (Heritage, 10/2011), lot 5273. NGC ID# 26G9, PCGS# 9179

**1925-D Saint-Gaudens Double Eagle, MS61
A Heavily Melted Issue**

- 3378 1925-D MS61 PCGS. CAC.** More than 2.9 million 1925-D twenties were minted, but most were melted a decade later. Large denomination gold experienced almost no circulation during this period and was mainly coined for foreign trade and federal reserves. This piece, with brilliant and frosty yellow-gold luster, shows a few scattered marks on each side, mostly hidden in the design motifs.
Ex: Pittsburgh Signature (Heritage, 10/2011), lot 5276. NGC ID# 26GB, PCGS# 9181

**1925-S Twenty Dollar, MS62
Limited Mint State Availability**

- 3379 1925-S MS62 PCGS.** Although more than 3.7 million double eagles were struck in San Francisco in 1925, only about 1,500 coins are thought to survive, mostly in heavily abraded condition. Most of the known examples likely originated from foreign trade repatriations. Although only graded MS62, this Uncirculated coin is remarkably clean, with handling marks on the high points of the devices being the chief hindrance to a high grade. The devices are well-struck. Each side offers satiny lemon-gold luster and good eye appeal.
Ex: Long Beach Signature (Heritage, 5/2012), lot 5387. NGC ID# 26GC, PCGS# 9182

**1925-S Double Eagle, MS63
A High-Mintage Rarity**

- 3380 1925-S MS63 PCGS.** *Ex: Hesselgesser.* Although the San Francisco Mint struck more than 3.7 million double eagles in 1925, few of those pieces were distributed to banks, and surviving examples are primarily those that contemporary collectors acquired at the time of issue. A large number of these coins were melted at the Mint during the following decade. One of the survivors is the present Select Mint State representative that features rich peripheral orange toning on its satiny and highly lustrous yellow-gold surfaces with minimal marks for the grade. PCGS has certified a mere 29 examples in finer grades (11/17). NGC ID# 26GC, PCGS# 9182

1926-D Saint-Gaudens Twenty, MS62
Sought-After Denver Semikey

- 3381 1926-D MS62 PCGS.** The 1926-D Saint-Gaudens double eagle, despite repatriations of some pieces, remains today a semikey issue in the series, particularly in higher Mint State grades. Much of the issue was apparently melted in the 1930s, save for the few pieces that had previously escaped the Mint or were exported. Out of a mintage of 481,000 coins, only about 600 pieces are believed to survive.

MS62 is about the average grade for Uncirculated survivors, with Gems and even near-Gems seldom seen. This representative exhibits lovely reddish-gold hues, interspersed with lilac, over satiny surfaces. The abrasions that account for the grade are mostly on the central devices. This is a prize that will fit in well with higher-grade coins in a quality double eagle collection.

Ex: *FUN Signature* (Heritage, 1/2011), lot 5317; *Beverly Hills Signature* (Heritage, 11/2011), lot 4536. NGC ID# 26GE, PCGS# 9184

1926-S Saint-Gaudens Double Eagle, MS63
Nice Luster and Color

- 3382 1926-S MS63 NGC.** The 1926-S Saint-Gaudens double eagle claims a substantial mintage of more than 2 million pieces, but most of that large production total was melted after the Gold Recall of 1933. A number of specimens have been repatriated from foreign holdings since the 1950s, but the 1926-S remains an elusive issue in high grade. This well-detailed Select specimen exhibits lightly marked orange-gold surfaces with minimal signs of contact. NGC ID# 26GF, PCGS# 9185

1926-S Double Eagle, MS63
Scarce CAC-Approved Coin

- 3383 1926-S MS63 PCGS. CAC.** MS63 is a collectible middle grade for this challenging branch mint issue. Most of the more than 2 million pieces struck were melted in the 1930s, leaving approximately only 2,000 pieces known in all grades today. CAC-approved coins, regardless of grade, are scarce. This Select CAC example displays sharp delineation of the fingers on Liberty's torch hand. The frosty orange-gold margins surround semireflective, peach-colored interiors. A uniquely appealing and well-preserved 1926-S double eagle. NGC ID# 26GF, PCGS# 9185

COMMEMORATIVE SILVER

1922 Grant With Star Half Dollar
Lightly Toned Premium Gem

- 3384 1922 Grant With Star MS66 PCGS.** A small incuse star above the AN in GRANT identifies the scarcer Grant Memorial half dollar type, of which only 4,256 examples were distributed. This piece is remarkably well-struck on Grant's hair and shows fully defined border legends. Lavender and gold toning accents satiny luster, while die polishing lines appear in the fields. Population: 46 in 66 (7 in 66+), 5 finer (10/17). NGC ID# BYPP, PCGS# 9307

1928 Hawaiian Half Dollar, MS66
Excellent Luster, Delicate Toning

- 3385** 1928 Hawaiian MS66 PCGS. Faint lavender and champagne hues grace the satiny surfaces of this Premium Gem, while deep crimson and gold appear along the upper obverse border. The strike is sharp, and neither side displays obtrusive abrasions. The Hawaiian half dollar is scarce but collectible in this lofty grade, but PCGS lists only four finer representatives (10/17). NGC ID# BYGR, PCGS# 9309

1926-S Oregon Half Dollar, MS68
Tied for Finest at Both Services

- 3386** 1926-S Oregon MS68 PCGS. CAC. A distribution of more than 83,000 pieces for this San Francisco issue was by far the largest of the Oregon Trail series. Accordingly, this marvelous MS68 coin would be a stellar addition to a fine type collection or Registry Set. Vivid rainbow colors around the borders surround gleaming silvery centers. Impeccably preserved with coruscating mint frost. Tied for the finest at both services. Population: 8 in 68 (1 in 68+), 0 finer. CAC: 8 in 68, 0 finer (10/17).
Ex: ANA Signature (Heritage, 8/2015), lot 4541. NGC ID# BYH7, PCGS# 9341

COMMEMORATIVE GOLD

1903-1926 Gold Dollars and Quarter Eagles
All Certified MS65 by NGC
11-Piece Commemorative Set

3387 11-Piece Set of Gold Commemorative Dollars and Quarter Eagles, MS65 NGC. This remarkable 11-piece set includes one example of each gold dollar and quarter eagle in the classic gold commemorative series.

1903 Louisiana Purchase / Jefferson Gold Dollar MS65 NGC. Issued to commemorate the Louisiana Purchase, this impressive Gem is sharply detailed, with lustrous orange-gold surfaces that show few signs of contact.

1903 Louisiana Purchase / McKinley Gold Dollar MS65 NGC. Also issued to commemorate the Louisiana Purchase, this well-detailed Gem radiates vibrant mint luster, with outstanding eye appeal.

1904 Lewis and Clark Gold Dollar MS65 NGC. This attractive Gem offers well-preserved orange-gold surfaces, with sharply detailed design elements and vibrant mint luster throughout.

1905 Lewis and Clark Gold Dollar MS65 NGC. The 1905 issue is more elusive than its 1904 counterpart. This piece is well-detailed, with a touch of the usual softness on the portraits. The well-preserved surfaces are lustrous and attractive.

1915-S Panama-Pacific Gold Dollar MS65 NGC. This sharply detailed Gem displays lustrous orange-gold surfaces with no mentionable distractions. Issued as part of a five-piece program of commemorative coins to commemorate the opening of the Panama Canal.

1916 McKinley Gold Dollar MS65 NGC. A well-detailed Gem that shows just a touch of the usual softness on the hair, this coin offers lustrous yellow and rose-gold surfaces with only minor signs of contact.

1917 McKinley Gold Dollar MS65 NGC. This attractive Gem exhibits well-detailed design elements and vibrant mint luster throughout. The pleasing lemon-yellow surfaces show no mentionable distractions.

1922 Grant No Star Gold Dollar MS65 NGC. A well-detailed Gem example of this popular gold commemorative, with a touch of the usual softness on the centers. The well-preserved orange-gold surfaces are lustrous and appealing.

1922 Grant With Star Gold Dollar MS65 NGC. The well-preserved orange-gold surfaces of this delightful Gem radiate vibrant mint luster throughout and the well-detailed design elements show just a trace of softness on Grant's hair.

1915-S Panama-Pacific Quarter Eagle MS65 NGC. A remarkable Gem representative of this popular gold commemorative, issued to commemorate the opening of the Panama Canal. The design elements are well-detailed and the satiny orange-gold surfaces show only the most insignificant signs of contact.

1926 Sesquicentennial Quarter Eagle MS65 NGC. An attractive Gem, with satiny mint luster and well-detailed design elements. The pleasing orange-gold surfaces are free of mentionable contact marks and luster grazes. (Total: 11 coins)

1903 Louisiana Purchase, McKinley Gold Dollar, MS67+
Just Two Coins Finer at PCGS

- 3388** 1903 Louisiana Purchase, McKinley Gold Dollar MS67+ PCGS. CAC. Both sides display frosty mint luster with rose-gold accents across gleaming, sharply struck surfaces. A tiny rim nick at 9 o'clock is the sole mark seen under a loupe. Minor blending of the reverse dentils — normal for the issue — is noted, along with an interesting die crack from the edge between S and T of ST. LOUIS that branches north and west with a small retained cud. A dot of red toning at OF from the copper alloy pedigrees this attractive, high-end Superb Gem. Only two finer coins at PCGS. CAC: 63 in 67, 0 finer (10/17). NGC ID# BYLE, PCGS# 7444

1917 McKinley Gold Dollar, MS67+
CAC-Approved, None Graded Higher

- 3389** 1917 McKinley Gold Dollar MS67+ PCGS. CAC. This issue was well-saved and survives to a considerable extent in MS67. The number of comparable coins with Plus designations and CAC approval stickers is whittled down significantly, representing the finest certified 1917 McKinley gold dollars. Coruscating mint frost rolls over each side of this rich orange-gold Superb Gem. A small planchet flake occurs under the first O in OHIO. Amazing quality. Population: 83 in 67 (12 in 67+), 0 finer. CAC: 17 in 67, 0 finer (10/17). NGC ID# BYLL, PCGS# 7455

1917 McKinley Gold Dollar, Colorful MS67+
None Certified Finer at PCGS or NGC

- 3390** 1917 McKinley Gold Dollar MS67+ PCGS. CAC. Struck in 1916 and 1917, the McKinley Memorial gold dollars are much more challenging from the 1917 issue. This example displays exceptional multicolor toning. Frosted straw-gold base color sparkles with yellow, lilac, and reddish-rose accents. The strike is needle-sharp throughout. No 1917 McKinley is numerically finer than this Plus-graded Superb Gem with CAC endorsement. Population: 12 in 67+, 0 finer. CAC: 16 in 67, 0 finer (10/17). NGC ID# BYLL, PCGS# 7455

MODERN BULLION COIN

2009 One-Ounce Ultra High Relief Twenty
MS70 Prooflike

- 3391** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Saint-Gaudens Signature, MS70 Prooflike PCGS. At the time that the 2009 one-ounce Ultra High Relief twenty was issued, a household order limit of one coin did not stop feverish demand from stacking up more than \$33 million worth of sales in the first day. Nearly a decade later, this Saint-Gaudens-designed modern bullion issue remains one of the most sought-after modern Mint products in existence. This example is fully prooflike and sharply struck, showing perfect surfaces and comparably strong eye appeal. NGC ID# 26S4, PCGS# 528564

TERRITORIAL GOLD

1852/1 Humbert Twenty, AU58
K-9, First Assay Office Twenty

- 3392** 1852/1 Humbert Twenty Dollar AU58 NGC. K-9, R.6. In late 1851, Moffat & Co., operating the U.S. Assay Office in San Francisco under contract, petitioned for permission to strike denominations below the current \$50 octagonal ingots. Dies were prepared in anticipation of rapid approval, but authorization was not finalized until February 1852. The first \$20 gold piece was only struck to the extent of 7,500 coins. That same month, Curtis, Perry, & Ward inherited the government Assay Office contract from John L. Moffat, and new dies were prepared for the small denominations, with a new reverse inscription that read: UNITED STATES ASSAY / OFFICE OF GOLD / SAN FRANCISCO / CALIFORNIA 1852.

This near-Mint Humbert twenty is bright yellow-gold and well-detailed with expected minor abrasions and slight high-point friction. The usual fine die cracks are seen around the border legends under a loupe. Listed on page 397 of the 2018 *Guide Book*. NGC ID# ANGH, PCGS# 10193

1852 Assay Office Fifty, VF25
K-13, 887 Thous.

- 3393** 1852 Assay Office Fifty Dollar, 887 Thous., VF25 NGC. K-13, Low R.5. The United States Assay Office in San Francisco began operations in 1851, under contract with the private local firm Moffat & Co. Issuance of gold ingots in denominations of \$50 through \$1,000 was successful and the gold readily accepted in commerce, largely because of the good reputation of John L. Moffat's firm. However, in December 1851, Moffat sold his interests in the firm to Curtis, Perry, and Ward to pursue mining. The government coining contract for the Assay Office was officially granted to the new owners of Moffat's firm in February 1852.

The fifty dollar "slugs" produced under Curtis, Perry, and Ward differed from Moffat's pieces in their peripheral inscription, which now read: UNITED STATES ASSAY OFFICE OF GOLD SAN FRANCISCO CALIFORNIA. This issue was mass-produced, but many pieces were later converted to regular federal coinage at the San Francisco Mint in 1854. This midgrade survivor displays uniform olive-gold patina and good central detail. The peripheral legend is weak but portions are visible, and the date is clear. Listed on page 398 of the 2018 *Guide Book*. NGC ID# ANHG, PCGS# 10016

1853 Assay Office Twenty, Unc Details
K-18, 900 Thous

- 3394** 1853 Assay Office Twenty Dollar, 900 Thous. — Repaired — NGC Details. Unc. K-18, R.2. An important twenty dollar issue from late in the production run of the San Francisco Assay Office, when it was operated by Curtis, Perry & Ward. The federal branch mint opened the following year, and Liberty Head double eagles replaced these temporary Assay Office pieces. The present coin is sharply struck and has bright yellow-gold color. The obverse fields are carefully brushed to remove contact marks, leaving behind a false luster that is not entirely unattractive to the naked eye. Listed on page 399 of the 2018 *Guide Book*.

1852 Wass Molitor Ten, Small Head, K-3, AU50
One of the Finer Examples Known of This Rare Type

- 3395** 1852 Wass Molitor Ten Dollar, Small Head AU50 NGC. K-3, R.6. The “plugged obverse” die variety. According to Kagin (1981): (“presumably an 1851 date was on the die and the numeral 1 was drilled out and replaced with a 2.”) The *Guide Book* refers to this variety as a “Small Head” type, which Kagin dislikes, preferring to refer to it as “Long Neck/RE/Large Close Date”. It is similar to the K-2 variety, but the bust is larger and the tip is rounded and over the 1 in the date.

This piece is typically soft over the central design elements (from die lapping or polishing), with high-point wear from circulation that further reduces the available detail. All of the major motifs remain evident, however, even if the higher points of the design are somewhat faint. There are a number of trivial nicks and abrasions on each side, indicating that this coin actually served, however briefly, in the channels of commerce — probably in the San Francisco area. A rare and highly desirable item that should be of great interest to the Territorial Gold specialist. Listed on page 404 of the 2018 *Guide Book*. Census: 2 in 50, 2 finer (10/17). NGC ID# ANJM, PCGS# 10345

1854 Kellogg Twenty, AU58
K-2, Outstanding Original Color

3396 1854 Kellogg & Co. Twenty Dollar AU58 NGC. CAC. K-2, R.4. In December 1853, the United States Assay Office in San Francisco ceased operations in order to convert the facility into what would eventually house the newly authorized federal branch mint. At the time, the Assay Office was the only active issuer of gold coinage in the region, so its closure in December created an immediate need for a temporary private assayer to accept deposits of steadily arriving gold ore while the San Francisco Mint was being readied. John G. Kellogg, an employee of the Curtis, Perry, and Ward at the U.S. Assay Office in 1853, opened his own assaying firm and began issuing twenty dollar gold pieces in February 1854. Endorsed by his former employers, Kellogg's gold pieces were readily accepted in commerce.

This example displays original olive-gold patina with coppery overtones in the fields. Only slight high-point wear is discernible, and none of the scattered abrasions are individually bothersome. A highly appealing, CAC-approved near-Mint Kellogg twenty. Listed on page 406 of the 2018 *Guide Book*. NGC ID# ANHY, PCGS# 10222

1860 Clark, Gruber & Co. Quarter Eagle
Variety K-1, AU58

3397 1860 Clark, Gruber & Co. Quarter Eagle AU58 PCGS. K-1, R.4. The Clark brothers, grocers in Kansas, entered into a banking partnership with Emanuel Henry Gruber in March 1859 to capitalize on the economic boom that resulted from the Colorado Gold Rush of 1858. Within a few years, Clark, Gruber & Co. had established itself as not only the preeminent financial institution in Denver, but also a private coiner of excellent repute. The border elements of this bright yellow-gold quarter eagle are strongly detailed, while the centers are soft mostly due to strike but partly because of trivial blending. Listed on page 409 of the 2018 *Guide Book*. Population: 13 in 58, 29 finer (10/17). NGC ID# ANJX, PCGS# 10135

PATTERNS

1869 Quarter Dollar Pattern, Judd-726
Struck in Aluminum, PR65 Cameo

- 3398** 1869 Standard Silver Quarter Dollar, Judd-726, Pollock-807, High R.7, PR65 Cameo NGC. The obverse features a bust right of Liberty wearing a cap ornamented with three stars. A scroll bearing IN GOD WE TRUST is below. The reverse depicts 25 CENTS centered in a small wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in aluminum with a plain edge. This variant of the usually seen silver quarter dollar pattern is extremely rare with only six examples believed extant. Reflective fields and cameo devices are the distinctive features of this well-struck piece. Unsurprisingly, considering the metal, the surfaces are essentially untoned, although we note a shallow planchet flake below the O in OF. Possibly the finest known example. Population: 1 in 65 Cameo, 0 finer (10/17). Ex: *Estates of Philip M. Mann, Jr. and Glenn B. Smedley (Bowers and Merena, 9/1988), lot 593; Lemus Collection, Queller Family Collection, Part II / FUN Signature (Heritage, 1/2009), lot 1701.* PCGS# 535102

1881 Three Cent Pattern in Nickel
Judd-1668, PR66 Cameo

- 3399** 1881 Liberty Head Three Cents, Judd-1668, Pollock-1869, High R.6, PR66 Cameo NGC. The Charles Barber Liberty Head obverse. Head facing left, similar to the adopted Liberty Head nickel design, but UNITED STATES OF AMERICA rings the obverse in thick, widely spaced letters, with date 1881 below. On the reverse a Roman numeral III is flanked by an agricultural wreath, again similar to the 1883 regular-issue nickel design. Struck in nickel with a plain edge. Examples in nickel, such as this one, are relatively common. The copper and aluminum strikes are much scarcer. The fields are nicely reflective — especially so for a nickel product — with light rose toning across each side. PCGS# 534935

1883 Liberty Nickel Variant Struck in Nickel
Judd-1714, PR65+ Deep Cameo

- 3400** 1883 Liberty Head Five Cents, Judd-1714, Pollock-1919, Low R.6, PR65+ Deep Cameo PCGS. CAC. The design is similar to the issued Liberty nickel, but LIBERTY is moved from the coronet to the upper obverse border, and the stars are smaller and arranged 6 x 7. The reverse is from the same die used to strike Judd-1690, identified by the widely repunched S in PLURIBUS. Struck in nickel with a plain edge. Struck in both nickel and copper. Only two dozen or so pieces are believed known in nickel. For a nickel product, the fields display remarkable depth of mirroring on each side, which when set as a background for the thickly frosted devices provides this piece's Deep Cameo status. Very pale iridescence is seen over each side. PCGS# 414466

End of Session One

SESSION TWO

COLONIALS

1787 N. 13-X Fugio Cent, MS64 Brown Pointed Rays, STATES Left

- 3401** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS64 Brown PCGS. N. 13-X, W-6855, R.2. This Bank of New York Hoard Fugio cent exhibits a bold strike and prominent clash marks on the obverse. Scattered surface marks are entirely inconsequential on this important piece. Careful examination reveals peripheral planchet defects on the obverse. Dark toning lines are evident at the upper reverse. Listed on page 89 of the 2018 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3402** 1795 Talbot, Allum, & Lee Cent MS64 Red and Brown PCGS. PCGS 30th Anniversary holder. This piece has the usual edge, WE PROMISE TO PAY THE BEARER ONE CENT. A lovely Choice Mint State example, this TAL cent exhibits light bluish-brown toning that accompanies considerable orange mint luster. Listed on page 78 of the 2018 *Guide Book*. Population: 6 in 64 Red and Brown, 11 finer (10/17). NGC ID# 2B64, PCGS# 641

- 3403** 1795 Talbot, Allum, & Lee Cent MS65 Red and Brown PCGS. Fire-red and dusky olive-green alternate across this satiny and alertly struck Gem. The reverse is magnificently preserved, and the obverse has only unimportant contact and carbon. Listed on page 78 of the 2018 *Guide Book*. NGC ID# 2B64, PCGS# 641

HALF CENTS

- 3404** 1808/7 C-2, B-2, R.3, VF30 PCGS. Manley Die State 1. A faint crack above TY of LIBERTY exists, the precursor to a cud that develops at the next die stage. A spine from the branch stem to the final A in AMERICA confirms the Cohen-2 die marriage. This is an attractive, deep chocolate-brown example with lightly abraded surfaces and much remaining definition on the devices. A small rim nick exists to the right of the overpunched 8. Our EAC grade Fine 15. NGC ID# 222L, PCGS# 35212 Base PCGS# 1110

- 3405** 1853 C-1, B-1, R.1, MS65 Brown PCGS. A needle-sharp Gem with virtually undisturbed surfaces. Lavender-brown patina dominates, although wisps of tan and russet color make occasional visits to both sides. Encapsulated in a previous generation PCGS holder. Our EAC grade AU55. Population: 62 in 65 Brown, 12 finer (10/17).
Ex: *Central States Signature* (Heritage, 5/2003), lot 5056; *Long Beach Signature* (Heritage, 6/2004), lot 5039. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

LARGE CENTS

- 3406** 1800 S-212, B-20, R.3, VF30 PCGS. Breen Die State II, an early die state before the dies were lapped to remove clash marks. A lovely example with mottled olive and steel-brown patina on both sides. Although trivial, grade-consistent marks are evident, this is a lovely example for the grade. Our EAC grade VF20. NGC ID# 2248, PCGS# 36224 Base PCGS# 1449

1802 Large Cent, S-237, AU58

- 3407** 1802 S-237, B-10, R.2, AU58 NGC. A die crack connecting the N in UNITED with the I in AMERICA attributes this collectible Sheldon variety. The devices are boldly defined and the medium brown toning is uniform throughout. Both sides appear relatively unabraded save for delicate slide marks on the cheek. Our EAC grade XF45.
Ex: *Central States Signature* (Heritage, 4/2013), lot 1102. NGC ID# 224E, PCGS# 36320 Base PCGS# 1470

- 3408** 1804 S-266, B-1, R.2, AG3 PCGS. Breen Die State IV, with obverse and reverse rim breaks, also known as S-266c. Relatively smooth olive-brown surfaces with splashes of steel and maroon patina. The date and LIBERTY are full, and about half of the reverse design and lettering is visible. A small reverse rim bruise at 7 o'clock is hidden under the holder tab. Our EAC grade AG3.
Ex: *Rossi Collection* (Bowers and Merena, 5/1997), lot 138. NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

- 3409** 1812 Small Date, S-290, B-2, R.1, VF30 PCGS. Breen Die State IV. Heavy flowlines are in the reverse margins, and STATES OF AM is joined with the border. This is a well-detailed coin with deep burgundy-brown surfaces. Under a loupe, faint granularity is seen in the recesses of the wreath and portrait, but otherwise the fields are smooth with only a few light marks. Our EAC grade VF20. NGC ID# 224W, PCGS# 36499 Base PCGS# 1561

- 3410** 1818 N-10, R.1, MS64 Red and Brown PCGS. CAC. A series of die cracks connect the date and all 13 stars on the obverse of this variety, and all known examples have that die crack, providing instant identification for this Randall Hoard variety that exhibits lovely orange mint luster and delicate blue overtones with a few darker toning spots. Our EAC grade MS63. NGC ID# 2253, PCGS# 36629 Base PCGS# 1601

- 3411** 1820 Large Date, N-13, R.1, MS65 Brown PCGS. CAC. An exceptional example of this popular Randall Hoard variety that is often chosen for type sets due to its typically sharp struck and usual high degree of luster as seen on this chocolate-brown example that has delicate blue overtones and splashes of original red mint color on the reverse. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

- 3412** 1823 Restrike, N-3, R.2, MS62 Brown PCGS. Thought to be a product of the 1860s, this private production combines the 1823 Normal Date obverse, N-2, with a reverse die that appeared on 1813 S-293. The obverse exhibits the prominent rim break at upper left, with a bisecting crack from 10 o'clock to 4 o'clock. There is no evidence of the branch crack down to the rim. The rusted reverse die appears here in an early die state. This lovely chestnut-brown example exhibits slight weakness on the high points. Our EAC grade AU55. NGC ID# 225C, PCGS# 81627

- 3413** 1837 N-11, Head of 1838 MS66 Red and Brown NGC. This is a late die state with two bold reverse die cracks. A satiny Premium Gem, this cent exhibits about one-third of its original orange mint color that is interspersed with light brown toning. Our EAC grade MS62. PCGS# 37139 Base PCGS# 1730

3414 1844 N-1, R.1, MS64 Brown PCGS. Well-struck on the Liberty portrait but slightly weak on the upper wreath leaves and several peripheral stars. The satiny surfaces are chocolate-brown on the obverse with tiny tinges of red in the protected regions of the reverse. No distracting marks are seen. Our EAC grade MS60. NGC ID# 226A, PCGS# 397719 Base PCGS# 1856

3415 1845 N-6 MS64 Red and Brown PCGS. Grellman Die State b. Clash marks include a small one behind the curls and another near the E in ONE. This is a well-struck example with bluish-brown overtones across bright and lustrous Mint orange surfaces. Scattered carbons exist — the most obvious one to the right of 5 in the date — but otherwise, the coin shows only two or three tiny marks of minor significance. Relatively few N-6 examples are finer. Our EAC grade MS62. PCGS# 397756 Base PCGS# 1863

3416 1849 N-12, R.1, MS65 Brown PCGS. CAC. Grellman Die State b, the usual die state for this variety. This Gem has a few trivial field marks on its lustrous chocolate-brown surfaces that exhibit hints of bluish overtones. Sharply struck and highly attractive. Our EAC grade MS60. NGC ID# 226F, PCGS# 405664 Base PCGS# 1886

3417 1851 N-10, R.1, MS67 Brown NGC. Grellman Die State b. Elegant blue overtones invigorate the light, reddish brown surfaces of this lustrous Superb Gem coin. Deeply impressed on the obverse, rim crumbling limits detail on sloping, blurry dentils and gives the visual impression of ultra-high rims. Aside from rounding on the lower-most star centers, the late die stage from lapped dies shows little effect on the overall eye appeal, and the sharply struck portrait is virtually pristine. Our EAC grade MS63. Census: 16 in 67 Brown (2 in MS67 ★), 0 finer (10/17). NGC ID# 226H, PCGS# 406677 Base PCGS# 1892

FLYING EAGLE CENT

3418 1857 MS64 PCGS. CAC. Satiny tan-gold luster softly illuminates well-struck design elements on this problem-free near-Gem. In MS64, 1857 Flying Eagle cents seldom exhibit any imperfections that are visible to the unaided eye, and this CAC-approved coin is particularly pleasing for the grade. NGC ID# 226P, PCGS# 2016

INDIAN CENTS

3419 1859 MS64+ PCGS. CAC. Sweeping luster, a sharp strike, and a virtual absence of carbon attest to the quality of this first-year near-Gem. Unimportant contact is all that precludes an even finer grade. NGC ID# 227E, PCGS# 2052

3420 1859 MS65 NGC. Fatigued dies produce metal flowlines near the borders, but the central devices of this Gem 1859 Indian cent are nonetheless sharp. Satiny tan-gold interiors cede to warmer orange-gold peripheries. No major abrasions are seen. NGC reports just 11 numerically finer representatives (11/17). NGC ID# 227E, PCGS# 2052

3421 1861 MS65 PCGS. This Gem copper-nickel type coin is boldly struck, with satiny olive-gold luster that yields rich undertones of peach and bronze. A couple microscopic ticks on Liberty's cheek are all that preclude an even loftier grade. NGC ID# 227G, PCGS# 2061

1861 Indian Cent, Sharp MS66 Seldom Seen This Fine, CAC Endorsed

3422 1861 MS66 PCGS. CAC. The 1861 is one of the more plentiful copper-nickel Indian cent issues, but it becomes conditionally scarce at the Premium Gem grade level. This piece is boldly struck, with satiny bronze-gold luster. There are no obvious carbon spots or other distractions. Population: 102 in 66 (13 in 66+), 13 finer. CAC: 21 in 66, 3 finer (10/17).
Ex: Long Beach Signature (Heritage, 9/2015), lot 3095. NGC ID# 227G, PCGS# 2061

3423 1864 Bronze No L MS65 Red PCGS. The Bronze No L 1864 Indian cent becomes quite scarce in MS65 condition, with original red surfaces, and finer coins are rare. This impressive Gem exhibits well-detailed design elements and well-preserved copper-red surfaces, with vibrant mint luster on both sides. NGC ID# 227L, PCGS# 2078

1864 L On Ribbon Bronze Cent, MS65 Red Undeniably Original Luster and Color

3424 1864 L On Ribbon MS65 Red NGC. Peach-red centers are bounded by orange-gold margins. A thoroughly lustrous Gem that boasts a full strike and essentially mark-free surfaces. Carbon is also virtually absent, and the eye appeal is impressive. The 1864 is a high-mintage date due to the Civil War, but most pieces were either copper-nickel or the No L variety. Census: 14 in 65 Red, 5 finer (10/17).
Ex: Chicago Signature (Heritage, 8/2011), lot 3098. NGC ID# 227M, PCGS# 2081

3425 1867 MS65 Red and Brown PCGS. From a mintage of 9.8 million coins, the 1867 Indian Head cent is a slightly better date in the series. Examples can still be found through this high grade with some searching. Far more red than brown colors this bright Gem. The feathertips, diamonds, and shield are crisp. Minimally abraded. NGC ID# 227R, PCGS# 2089

3426 1871 MS64 Red and Brown NGC. Bold N in ONE. This is a boldly struck near-Gem cent from a fairly low production of 3.9 million coins. The outer areas are mostly copper-orange, while the interiors feature reddish-brown hues. A few specks of aqua residue appear on each side. NGC ID# 227V, PCGS# 2101

3427 1871 MS64 Red and Brown PCGS. This is a fully struck Choice example, showing orange-tinted golden luster with a few dustings of unimportant auburn-brown. Eye appeal is generous. Under a loupe, die cracks are visible within the wreath leaves and across the bowknot and stems. Finer Red and Brown coins are elusive. NGC ID# 227V, PCGS# 2101

3428 1872 MS65 Red and Brown NGC. Copper-orange, plum, and steel-blue hues decorate the Gem satin surfaces of this Red and Brown 1872 cent. The coin is moderately well-struck and shows no obvious abrasions. The 1872 cent is scarce in this grade and rare finer. Census: 75 in 65 Red and Brown, 8 finer (10/17). NGC ID# 227W, PCGS# 2104

3429 1873 Open 3, Repunched Date, Snow-1, FS-1301, MS64 Red PCGS. PCGS has only certified two Mint State examples of this variety, and the other one is designated as Red and Brown, so this piece is the only FS-1301 that carries the Red designation, regardless of the grade. This lovely piece features a strong strike with brilliant light orange luster and no visible spots on either side. PCGS# 37500 Base PCGS# 2108

3430 1877 VF30 NGC. Faint bluish tones accent attractive deep-brown coloration. LIBERTY remains partly visible, and the date and legends are bold despite obvious friction from circulation. A pleasing key date representative. NGC ID# 2284, PCGS# 2127

3431 1877 VF30 PCGS. The shallow N in ONE identifies this piece as a genuine circulation strike, a representative of the most sought-after of all Indian cents in circulated condition. Liberty is readable, and wear is even across both sides. Medium chocolate-brown patina is visually pleasing. NGC ID# 2284, PCGS# 2127

3432 1877 XF40 PCGS. CAC. Only light high-point wear is discernible on this CAC-approved key, and the surfaces display attractive walnut-brown coloration. Easily one of the most sharp and appealing 1877 Indian cents that we have seen in this grade. Only 15 XF40 coins have received CAC green labels (10/17). NGC ID# 2284, PCGS# 2127

1877 Indian Head Cent, MS62 Brown Pleasing for the Grade

3433 1877 MS62 Brown PCGS. Traces of Mint red remain at the margins on the obverse and peek out from protected areas on the reverse of this key Indian Head cent date. Rich, reddish-chocolate color blankets both sides, with a bit of high point weakness on the reverse wreath as well as a few of the feather tips, the lower curls, and diamonds. Virtually no marks are visible anywhere on the coin. NGC ID# 2284, PCGS# 2127

3434 1878 MS65 Red ANACS. This boldly struck Gem exhibits reflective fields and very slight mellowing of the brilliant orange mint surfaces. The exceptional surfaces show a few trivial marks and minimal spots on each side. NGC ID# 2285, PCGS# 2132

3435 1903 MS66 Red PCGS. 30th Anniversary Green Label Holder. The exposed fields and portrait on this spectacular Premium Gem cent are smooth and unabraded with glowing luster over each side. Eye-catching pumpkin-gold color. Population: 82 in 66 (6 in 66+) Red, 10 finer (10/17). NGC ID# 228Y, PCGS# 2216

3436 1908-S MS65 Red PCGS. Sharply detailed in most areas, this delightful Gem shows just a touch of the usual softness on the feather tips. The original red surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded 60 finer Red examples (10/17). NGC ID# 2296, PCGS# 2234

1908-S Cent, MS66 Red First Issue of Branch Mint Minor Coinage

3437 1908-S MS66 Red NGC. Premium Gems with Red coloration are just about the finest obtainable survivors of the famed 1908-S cent, the first branch mint issue of minor coinage in this country. A single finer example is certified by PCGS. This light pumpkin-gold example shows areas of tan color, while frosty luster rolls over each side. The diamonds are bold, but the feather tips are moderately soft. No matter, for this piece is essentially impossible to improve upon. Census: 25 in 66 (1 in 66+) Red, 0 finer (10/17). NGC ID# 2296, PCGS# 2234

3438 1909-S MS64 Red and Brown PCGS. CAC. This Choice Red and Brown example has some mint-made planchet striations on the obverse but is generally well-struck. Subtle chestnut-brown toning deepens coppery-orange luster. There are no distracting specks, and the reverse is particularly luminous. NGC ID# 2298, PCGS# 2239

PROOF INDIAN CENTS

1861 Indian Cent, PR64 Outstanding Copper-Nickel Proof

3439 1861 PR64 PCGS. A generous mintage of 1,000 proof Indian cents was accomplished in 1861, before the effects of the Civil War were fully realized in numismatic circles. The design elements of this impressive Choice specimen are sharply detailed, and the well-preserved surfaces show a mix of copper-orange and lilac patina. The fields are moderately reflective and eye appeal is outstanding. Population: 71 in 64 (1 in 64+), 35 finer (10/17). NGC ID# 229B, PCGS# 2256

3440 1863 PR65 Cameo NGC. A beautifully preserved Gem proof, this Cameo representative displays ample reflectivity in the fields and full definition on all design elements. Faint lavender-gray and sun-gold hues intermingle over each side. Census: 10 in 65 Cameo, 9 finer (10/17). NGC ID# 26SX, PCGS# 82262

3441 1872 PR65 Red and Brown PCGS. CAC. Bold N in ONE. Like other Indian Head cent issues from the period, the 1872 is elusive in Mint State. Collectors often opt for more available proofs instead. A well-preserved Gem with rich amber-brown and copper-gold coloration. Only 950 proofs struck. NGC ID# 229R, PCGS# 2304

3442 1881 PR66 Red and Brown PCGS. CAC. The 1881 is a popular proof type coin from this decade. This particular coin shows considerable remaining mint red, whose presence is even more evident when the coin is angled and the proof mirrors flash through the mellowed red, making the original mint luster brightly evident. NGC ID# 22A2, PCGS# 2331

3443 1887 PR66+ Red and Brown PCGS. CAC. The “Red and Brown” surfaces of this high-end Premium Gem display shades of copper-orange, violet, sea-green, and blue. The strike is razor-sharp and no contact marks are seen. The proof 1887 Indian cent is rare this fine. Population: 12 in 66 (1 in 66+) Red and Brown, 2 finer; 4 in 66 Red, 0 finer. CAC: 6 in 66, 1 finer (10/17). NGC ID# 22A9, PCGS# 2349

**1888 Cent, PR66 Red and Brown
Attractive Color**

3444 1888 PR66 Red and Brown PCGS. CAC. This glimmering Premium Gem proof displays carbon-free surfaces and uniform amber-orange color that leans toward the Red color category. Localized strike weakness is seen on the top three headdress feathers and the lower-right edge of the shield. A rarity in this grade. Population: 6 in 66 (1 in 66+) Red and Brown, 5 Red and Red Cameos finer. CAC: 4 in 66, 0 finer (10/17). NGC ID# 22AA, PCGS# 2352

**1906 Indian Cent, PR65 Red Cameo
Lower-Mintage Proof Issue**

3445 1906 PR65 Red Cameo PCGS. CAC. The 1906 proof Indian cent claims a low mintage of 1,725 pieces and examples are difficult to locate in full Red Gem Cameo, as can be seen from the population figures below. Deeply mirrored reddish-gold fields highlight the sharply struck copper-gold motifs. Both sides exhibit well-preserved surfaces, with outstanding eye appeal. Population: 3 in 65 Cameo, 6 finer. CAC: 3 in 65, 1 finer (10/17). NGC ID# 22AV, PCGS# 82407

LINCOLN CENTS

3446 1909-S VDB AU58 PCGS. A few final glimpses of Mint red remain, although deep-brown toning occupies much of the territory on this 1909-S VDB cent. Sharp definition remains as expected for the AU58 grade, and there are no serious marks visible beneath the toning. A short, shallow mark on Lincoln's cheek is the sole abrasion of note. This is an obviously original, key date cent with strong, natural appeal. NGC ID# BYKW, PCGS# 2426

3447 1909-S VDB MS63 Red and Brown PCGS. The outer regions maintain considerable red coloration, while the interiors display warm honey-brown and gunmetal-blue tones. A couple of carbon spots occur over the right reverse. Uniformly sharp with small, inconsequential marks. Lovely key date representative. NGC ID# 22B2, PCGS# 2427

3448 1909-S VDB MS63 Red and Brown PCGS. CAC. Although a few trivial imperfections prevent a higher numeric grade, this lovely example has exceptional eye appeal with essentially full red mint luster. The reverse is slightly subdued, generating the PCGS Red and Brown designation. Ex: *Summer FUN Signature (Heritage, 7/2011)*, lot 3139. NGC ID# 22B2, PCGS# 2427

3449 1909-S VDB MS64 Red and Brown PCGS. One of the most popular and widely recognized varieties in all of American numismatics, the 1909-S VDB cent enjoys great demand in all grades. This lovely near-Gem has slight brown toning on its mostly brilliant mint red surfaces. NGC ID# 22B2, PCGS# 2427

3450 1909-S VDB MS65 Red and Brown NGC. A sharp strike complements rich, mattelike luster on this lightly toned Gem. Orange, copper-red, umber, and olive hues make up the uniform patina, and no distractions are observed. The 1909-S VDB is popular in the Red and Brown color category when Gems as appealing this piece are encountered. NGC ID# 22B2, PCGS# 2427

3451 1909-S VDB MS65 Red and Brown PCGS. Centered mintmark. This lustrous and glossy 1909-S VDB is coruscated with blue overtones that allow brick-red color to share territory throughout both sides. The strike is razor-sharp while the fields and devices are nearly free of marks, save for a shallow, well-hidden abrasion on the upper cheekbone. A solitary, pinpoint carbon exists above Y of LIBERTY. PCGS reports a mere 66 numerically finer pieces in Red and Brown. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Lincoln Cent, MS65 Red
First-Year, Low-Mintage Key**

3452 1909-S VDB MS65 Red PCGS. The Lincoln cent was introduced in 1909, and early strikings included the designer's initials on the reverse (VDB for Victor D. Brenner). The 1909-S VDB claims a series-low mintage of 484,000 pieces and the issue has been a sought-after key since the time of issue. This impressive Gem exhibits sharply detailed design elements and well-preserved original red surfaces, with a few microscopic specks of carbon on the reverse. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Lincoln Cent, MS65 Red
Lustrous, Appealing Surfaces**

3453 1909-S VDB MS65 Red NGC. A lustrous, peach-red example of this all-time, collector-favorite cent. While the 1909-S VDB is relatively available in terms of sheer numbers, its unceasing demand among all aspects of the collecting community keep it high on most “want” lists. This is a blazing-red representative, with smooth and sharply struck surfaces. A few minute carbons are microscopic on the reverse, none on the obverse. NGC shows just 40 finer pieces in Red format (10/17). NGC ID# 22B2, PCGS# 2428

3454 1909-S MS65 Red PCGS. The 1909-S is actually scarcer than the famous 1909-S VDB in Gem Red condition or finer. Well-detailed surfaces showcase copper-gold hues and soft, frosted mint luster. A couple of ticks on the portrait and below AM are minimal. NGC ID# 22B4, PCGS# 2434

3455 1912-D MS65 Red PCGS. This Gem Red 1912-D cent is impressively sharp and free of major carbon spotting. Original copper-orange and gold hues are much more appealing than seen on other comparably graded coins. A single small mark in the field near Lincoln's nose limits the grade. Gem 1912-D cents are scarce with full Red color, and PCGS lists only 29 finer examples (10/17). NGC ID# 22BB, PCGS# 2455

3456 1912-S MS65 Red NGC. Attractive Gem Red examples of the 1912-S Lincoln cent are rare. This piece displays bold definition despite die erosion in the obverse fields. Delicate copper-pink and golden hues grace satiny surfaces that are devoid of bothersome carbon spotting. Census: 23 in 65 Red, 1 finer (10/17). NGC ID# 22BC, PCGS# 2458

1917 FS-101 Lincoln Cent, AU58 Guide Book Doubled Die Variety, CAC

3457 1917 Doubled Die Obverse, FS-101, AU58 PCGS. CAC. While a few dramatic doubled die varieties come later in the Lincoln cent series, this early date doubled die obverse is the subject of great demand by specialists in the series. Doubling on GOD WE TRUST gets wider at UST. Doubling on the date is strongest at the 9 and 7. This near-Mint example is glossy with light, chocolate-brown color and a mere touch of rub. A few tiny marks attest to brief circulation. Population: 6 in 58, 12 finer. CAC: 3 in 58, 2 finer (10/17). NGC ID# 22BS, PCGS# 37673 Base PCGS# 92495

3458 1919 MS67 Red PCGS. A razor-sharp impression and a lack of carbon spotting are appreciable qualities of the 1919 in general and this Superb Gem cent in particular. Clean copper-orange surfaces display a few microscopic ticks on Lincoln's head and neck. There are only 18 finer submissions at PCGS (10/17). NGC ID# 22BY, PCGS# 2515

3459 1920-S MS65 Red and Brown PCGS. Red and Brown 1920-S cents are seldom offered this finer and are prohibitively rare any finer. This Gem is well-struck and satiny with orange-tinged chestnut toning and luminous fields. The reverse and parts of the obverse exhibit microscopic die rust lumps. Population: 35 in 65 (1 in 65+) Red and Brown, 1 finer (10/17). NGC ID# 2547, PCGS# 2529

3460 1923-S MS64 Red PCGS. This attractive Choice Lincoln cent offers well-detailed design elements, with just a touch of softness on the portrait, and lustrous, well-preserved original red surfaces that show a few microscopic specks of carbon. Population: 69 in 64 (2 in 64+) Red, 16 finer (10/17). NGC ID# 22CB, PCGS# 2548

3461 1924 MS66 Red PCGS. CAC. A high-end Red example of this conditionally elusive Philadelphia issue. Metal flowlines in the fields betray a late die state, although the sharpness of the strike is unaffected. Lovely copper-red and gold hues decorate each side, and we observe no abrasions or spotting. Population: 88 in 66 (10 in 66+) Red, 11 finer. CAC: 21 in 66, 1 finer (10/17). NGC ID# 22CC, PCGS# 2551

1925-D Cent, MS65 Red Scarce in Gem and With Attractive Color

3462 1925-D MS65 Red PCGS. The year 1925 produced two of the most strike-challenged branch mint issues in the entire Lincoln cent series — the 1925-D and the 1925-S. It is a close contest which is the most poorly made issue. The arm's length appeal of this Gem 1925-D is indeed an anomaly, with attractive, copper-orange surfaces and bright mint luster. A glass reveals a reasonably sharp strike and only minor die erosion. Tiny marks come from the original planchet, which was (as usual) not fully struck up. Housed in a previous generation green label holder, this 1925-D is virtually unimprovable. Population: 70 in 65 (3 in 65+) Red, 2 finer (10/17). NGC ID# 22CG, PCGS# 2563

3463 1927-D MS65 Red PCGS. A satiny Gem that displays original copper-gold luster with faint overtones of rose and green visible under a loupe. A lone fleck is seen at the D in UNITED. Red Gem examples of this issue are scarce, and finer pieces are rare. This coin is housed in a green label holder. Population: 61 in 65 (2 in 65+) Red, 2 finer (10/17). NGC ID# 22CN, PCGS# 2581

3464 1930-S MS66+ Red PCGS. CAC. Cents were produced with greater care at the San Francisco Mint in 1930 than they had been throughout the previous decade. This Premium Gem is well-struck, though softness occurs on the beard and right wheat stalk. Each side is impeccably preserved with only minor chatter near the denomination. Six finer examples at PCGS. CAC: 19 in 66, 1 finer (10/17). NGC ID# 22CZ, PCGS# 2611

3465 1933-D MS67 Red PCGS. A conditionally scarce Superb Gem and among the finest 1933-D cents known as such. This is piece is fully struck and displays unabraded, carbon-free luster with right fire-orange coloration. An excellent Registry Set opportunity. Population: 36 in 67 (1 in 67+) Red, 0 finer (10/17). NGC ID# 22D8, PCGS# 2632

3466 1937-D MS67+ Red PCGS. CAC. The original orange-red surfaces of this Plus-graded Superb Gem are impeccably preserved, with especially vibrant mint luster on both sides. The design elements are well-detailed and eye appeal is outstanding. PCGS has graded three numerically finer Red examples (10/17). NGC ID# 22DJ, PCGS# 2662

3467 1955 Doubled Die Obverse, FS-101, AU55 PCGS. The wide obverse doubling of this variety is unmistakable, even without magnification, and that is the reason that the 1955 Doubled Die Obverse cent is one of the few such varieties listed in the *Guide Book*. This piece has a trace of high-point wear with rich chestnut-brown surfaces. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

3468 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS. Arguably the most famous doubled die variety in all of U.S. numismatics and a perennial collector-favorite as such. Broad doubling occurs on the obverse legends. Smooth medium-brown surfaces house well-struck motifs and minor grade-limiting ticks, but none that are significant. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Doubled Die Obverse, MS63 Red and Brown
FS-101, Sharply Struck and Attractive**

- 3469 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. CAC.** The spectacular doubling on LIBERTY, IN GOD WE TRUST, and the date are on full display, set against fire-orange color with some deep-brown speckles and pale-brown overtones on the high points. Scattered pinpoint brown specks pale in comparison to the lustrous, frosted orange color that remains throughout the sharply struck reverse. CAC endorsement adds to the already strong appeal of this Select Red and Brown 1955 Doubled Die cent. CAC: 28 in 63, 56 finer (10/17). NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1955 Doubled Die Cent, MS64 Red and Brown
Highly Popular Guide Book Variety**

- 3470 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS.** The obverse doubling is clearly visible without magnification, making this one of the most popular varieties in American numismatics. Considerable red mint luster is visible on the obverse, blended with attractive light brown toning and lovely blue overtones. The reverse is similar, although shows less mint red color. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

- 3471 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS.** This spectacular Superb Gem shows strong doubling on the date, LIBERTY and IN GOD WE TRUST, identifying the popular FS-101 variety. The design elements are sharply detailed and the well-preserved original red surfaces radiate vibrant mint luster. Eye appeal is terrific. Population: 49 in 67 (1 in 67+) Red, 1 finer (10/17). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

PROOF LINCOLN CENTS

**1910 Lincoln Cent, PR66 Red
Spectacular Visual Appeal**

- 3472 1910 PR66 Red PCGS. CAC.** Ex: 1994 Collection. One of 4,118 matte proof Lincoln cents struck in 1910, this Premium Gem presents original blue and cherry-red hues around the left obverse margin, ceding to fire-orange color elsewhere. Pristine surfaces and fully struck devices correspond to the high-end assessment. The visual appeal is outstanding. Population: 26 in 66 (2 in 66+) Red, 4 finer. CAC: 4 in 66, 3 finer (10/17). Ex: Regency Auction XXII (Legend Rare Coin Auctions, 7/17), lot 45. NGC ID# 22KT, PCGS# 3308

- 3473 1911 PR66 Brown PCGS.** A panoply of neon colors vie for attention across the crisply struck and nearly unmarked surfaces of this spectacular Premium Gem 1911 cent. Lime-green shades cover the obverse with cherry-red and cyan accents. The green shades are relegated to the borders on the reverse, where vivid-blue and deep-red shades prevail. The 1911 is very scarce at the MS66 Brown level and virtually unknown any finer. We can safely say this coin is unique with its remarkable coloration. NGC ID# 22KU, PCGS# 3309

**1913 Lincoln Cent, PR66 Red
Elusive Matte Proof Issue**

- 3474 1913 PR66 Red PCGS. CAC.** Ex: 1994 Collection. The original lightly textured red surfaces of this delightful Premium Gem exhibit vibrant matte luster, with no mentionable distractions. The design elements display intricate, razor-sharp definition throughout, and overall eye appeal is terrific. From a mintage of 2,983 pieces. Population: 40 in 66 (2 in 66+) Red, 7 finer. CAC: 10 in 66, 3 finer (10/17). NGC ID# 22KW, PCGS# 3317

- 3475 1914 PR66 Brown PCGS.** A stunning Brown cent, with cobalt-blue toning that dominates both sides of this sharply struck 1914. Violet and forest-green accents add to the over-the-top visual impact. PCGS reports just four numerically finer examples, and surely none of those can match the memorable patina of this splendid, virtually unmarked Premium Gem. Population: 28 in 66 (2 in 66+) Brown, 4 finer (10/17). NGC ID# 22KX, PCGS# 3318

- 3476 1938 PR67 Red PCGS. CAC.** This CAC-endorsed Superb Gem is among the finest 1938 proof cents known in Red condition. Liquidlike mirroring in the fields illuminates fiery orange-gold coloration and carbon-free surfaces. Eye appeal is outstanding. Population: 45 in 67 (2 in 67+) Red, 0 finer. CAC: 17 in 67, 0 finer (10/17). NGC ID# 22L5, PCGS# 3341

**1942 Cent, PR67 Red Cameo
The Sole Finest at CAC**

3477 1942 PR67 Red Cameo NGC. CAC. Cameo proof 1942 cents are scarce overall but become genuinely rare in Superb Gem condition. This example is one of only three PR67 Red Cameos at NGC, and PCGS shows just four others; none are finer at either service. The CAC endorsement is something this coin alone has been awarded in this grade (10/17). The strike is sharp, and the rich red-orange surfaces yield appreciable contrast and exceptional visual appeal. NGC ID# 22L9, PCGS# 83353

3478 1950 PR67 Cameo PCGS. A lovely, starkly contrasted Cameo with pristine copper-orange surfaces and sharp design elements. Only a few 1950 proof cents are certified this fine at PCGS. Population: 17 in 67 Cameo, 8 finer (including 7 in 67 Deep Cameo) (11/17). NGC ID# 22LA, PCGS# 83359

3479 1960 Small Date PR69 Ultra Cameo NGC. NGC has certified only 49 Small Date proof cents in the Red Ultra Cameo category, and this PR69 coin is tied with just two others as the finest (11/17). A Registry Set essential, this piece displays a flawless strike and near-flawless preservation with carbon-free copper-orange surfaces. NGC ID# 22LL, PCGS# 93392

TWO CENT PIECES

3480 1864 Small Motto, FS-401, MS62 Brown PCGS. Both sides show considerable brick-red, although gunmetal-blue fills a majority of this sharply struck example. Study beneath a lens reveals occasional unimportant marks. A scarce and ephemeral introductory subtype. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

3481 1864 Small Motto, FS-401, MS64 Red and Brown PCGS. CAC. A lovely example of this scarce and highly sought-after key issue. An unknown, but small, number of coins were struck of this variety. This piece is free from any blemishes and has retained more than half of its original mint red color. Seldom offered with CAC endorsement. PCGS# 38233 Base PCGS# 3580

3482 1865 MS66 Red and Brown NGC. Remaining mint red color enlivens rich amber-brown surfaces with added steel-blue accents. The olive leaves, motto, shield, and central reverse motifs are all well-detailed. Lustrous and unabraded. More than 13.6 million examples were struck in the series' second year. Few survive this fine. NGC ID# 22NA, PCGS# 3583

3483 1871 MS65+ Brown PCGS. CAC. An impressive Gem, this 1871 two-cent piece is an important component of a complete collection, and is rarely encountered with this degree of original mint red. Population: 16 in 65 (2 in 65+) Brown, 2 finer. CAC: 12 in 65, 4 finer (10/17). NGC ID# 22NE, PCGS# 3609

PROOF TWO CENT PIECES

3484 1867 PR66 Brown NGC. CAC. From a small mintage of 625 pieces, this impressive Premium Gem proof exhibits sharply detailed design elements and well-preserved surfaces, under a mix of copper-red and magenta toning. Census: 9 in 66 Brown, 1 finer. CAC: 1 in 66, 0 finer (10/17). NGC ID# 274W, PCGS# 3633

3485 1872 PR65 Brown PCGS. CAC. Although designated Brown, many would describe this lovely Gem as Red and Brown since it retains generous portions of original mint color. The surfaces are pristine with no distracting marks or spots. NGC ID# 2752, PCGS# 3648

THREE CENT SILVER

3486 1865 MS63 NGC. More than 11 million three cent nickels made their debut in 1865, leaving little reason to strike three cent silver coins, which would immediately disappear from circulation or be destined for the melting pot. Just 8,000 silver pieces were struck. This Select Uncirculated example is one of the few survivors. Mostly brilliant and prooflike with a touch of almond-gold at the margins, the sharply struck surfaces show only minor distractions and tiny marks. Census: 22 in 63, 50 finer (10/17). NGC ID# 22ZF, PCGS# 3685

3487 1871 MS64 PCGS. This 1871 three cent silver was one of the fortunate circulation strikes to escape the melting pot in 1873. Just 3,400 pieces were struck — a small mintage, and survivors are often somewhat prooflike such as the present coin. Die polish lines are visible in the fields along with some wispy, light abrasions across the silver-gray surfaces of this near-Gem example. The strike is reasonably strong except at the bow and arrow fletchings, which are less-sharp. Population: 25 in 64 (1 in 64+), 62 finer (10/17). NGC ID# 22ZM, PCGS# 3692

PROOF THREE CENT SILVER

**1866 Three Cent Silver, Colorful PR66 Cameo
Exquisite Mirrors, Strong Contrast**

3488 1866 PR66 Cameo PCGS. This delightful Premium Gem proof hails from a production of 725 pieces. Despite the moderate coloration in lovely ice-blue, blue-gray, silver, and pinkish-gold hues, the contrast suffices for the coveted Cameo designation, and the eye appeal is superlative. Population: 14 in 66 (5 in 66+) Cameo, 4 finer; 3 in 66 (1 in 66+) Deep Cameo (10/17). Ex: Long Beach Signature (Heritage, 9/2010), lot 5091. NGC ID# 27CC, PCGS# 83716

3489 1869 PR66 PCGS. CAC. From a small proof mintage of 600 pieces, this spectacular Premium Gem exhibits sharply detailed design elements and deeply reflective fields, under rich shades of emerald-green, lavender-gray, and cobalt-blue toning. Population: 37 in 66 (1 in 66+), 2 finer. CAC: 9 in 66, 4 finer (10/17). NGC ID# 22ZR, PCGS# 3719

3490 1870 PR66 Cameo PCGS. Exquisite, deep-silver mirrors frame the frosted devices on each side of this jewel-like Premium Gem. The obverse shows faint hints of vivid color at the margins, while the reverse delivers a knockout blaze of fuchsia-pink, royal-blue, teal, and yellow-gold emanating from the deepest reaches of the central elements. A technically and visually outstanding cameo proof. Population: 12 in 66 (1 in 66+) Cameo, 3 finer (10/17). NGC ID# 27CF, PCGS# 83721

3491 1873 PR63 PCGS. CAC. Concentric multicolor toning and mirrored fields give this Select proof stronger eye appeal than expected for the grade. The strike is needle-sharp from fresh dies, and we observe no distracting marks. Subtle contrast is visible on the obverse despite the toning. The 1873 is a proof-only issue and the final date in the series; only 600 pieces were struck. NGC ID# 27CJ, PCGS# 3724

3492 1873 PR64 PCGS. CAC. Only 600 proof, and no business-strike, silver three cent pieces were struck in 1873, the final year the odd denomination was produced. All the coins were struck early in the year and have a Closed 3 in the date. This well-detailed Choice specimen displays reflective surfaces under shades of sea-green and greenish-gray toning. NGC ID# 27CJ, PCGS# 3724

3493 1873 PR65 PCGS. The 1873 is important as the final date in the series and a proof-only issue with a small 600-coin mintage. This Gem example displays a razor-sharp strike from fresh dies with reflective fields. Gold, olive, and gunmetal-blue toning appears on each side in concentric hues. NGC ID# 27CJ, PCGS# 3724

**1873 Three Cent Silver, PR66
A Proof-Only Issue, Climactic Key Date**

3494 1873 PR66 PCGS. CAC. The final proof-only mintage of 600 1873 three cent silvers celebrated the end of the diminutive small coin in silver format. In retrospect, the three cent silver was too small to be practical in circulation and contained too little silver to be hoarded. This beautiful, final-year proof captivates the eye with steel-blue borders set against shades of pink and pale-violet at the centers. The central motifs are toned yet heavily frosted for discernible contrast. Watery mirrored fields surround the pinpoint-sharp devices. Population: 19 in 66, 3 finer. CAC: 18 in 66, 8 finer (10/17). NGC ID# 27CJ, PCGS# 3724

THREE CENT NICKEL

3495 1876 MS66 PCGS. CAC. Pale-blue and lilac toning add eye appeal to the lustrous and frosty surfaces of this Premium Gem three cent nickel. Just 162,000 pieces were struck — a steep decline from the previous year, yet just the beginning of a long fade in production until the end of the denomination. As always, the first numeral in the denomination is weak in the center (as are Liberty's curls), but the strike is crisp elsewhere. Any marks are microscopic. Tied for numeric finest at either service. Population: 13 in 66 (1 in 66+), 0 finer. CAC: 7 in 66, 0 finer (10/17). NGC ID# 275A, PCGS# 3744

PROOF THREE CENT NICKELS

**1865 Three Cent Nickel, PR65
Widely Recut Date, West and North**

3496 1865 PR65 PCGS. CAC. Flynn RPD-001. Fully struck and modestly contrasted, this Gem proof 1865 three cent nickel displays champagne toning and a hint of field-device contrast. At least two recuttings of the date are visible on this intriguing proof issue. Finer proofs are rarely offered. Population: 49 in 65 (2 in 65+), 16 finer. CAC: 14 in 65, 4 finer (10/17). NGC ID# 275K, PCGS# 3761

3497 1868 PR66 Ultra Cameo NGC. Relatively few proof 1868 three cent nickels have been designated as Ultra or Deep Cameos. This Premium is a conditionally rare example, and only three finer coins are reported by NGC and PCGS combined. The strike is sharp, and the brilliant surfaces offer stark cameo contrast. Census: 5 in 66 Ultra Cameo, 3 finer (10/17). NGC ID# 3L2N, PCGS# 93764

3498 1869 PR66 Ultra Cameo NGC. This Premium Gem Ultra Cameo showcases a full strike and frosted, starkly contrasted devices. The surfaces are untuned and unblemished. Finer Ultra Cameos are extremely rare. Census: 13 in 66 Ultra Cameo (1 in 66★), 5 finer (10/17). NGC ID# 275P, PCGS# 93765

3499 1871 PR66 Cameo PCGS. from a limited mintage of 960 pieces, this delightful Premium Gem proof exhibits sharply detailed design elements and deeply reflective fields that contrast boldly with the frosty devices. The impeccably preserved surfaces show just the slightest hint of pale gold toning. Population: 7 in 66 Cameo, 1 finer (10/17). NGC ID# 275S, PCGS# 83767

**1875 Three Cent Nickel, PR66 Cameo
None Finer at PCGS**

3500 1875 PR66 Cameo NGC. Among the finest Cameos certified, this Premium Gem proof 1875 three cent nickel displays a bold strike and reflective fields that still show die polishing lines. The obverse portrait has several small planchet marks (as-made), including a "shiny" area on Liberty's jaw and mouth. The coin is untuned. Census: 6 in 66 Cameo (1 in 66+, 1 in 66★), 0 finer (10/17). NGC ID# 22NV, PCGS# 83771

3501 1879 PR67+ Cameo PCGS. CAC. A delightful Plus-graded Superb Gem proof, from a mintage of 3,200 pieces, this coin exhibits sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The surfaces are impeccably preserved and eye appeal is terrific. Population: 47 in 67 (3 in 67+) Cameo, 1 finer. CAC: 28 in 67, 0 finer (10/17). NGC ID# 275Z, PCGS# 83775

3502 1880 PR67 Cameo NGC. Superb Gem proof 1880 three cent nickels are scarce, and Cameo examples in this grade are genuinely rare. No Ultra/Deep Cameos are known. This well-contrasted example is brilliant and sharp with almost perfect surface preservation. Census: 6 in 67 Cameo, 1 finer (10/17). NGC ID# 5E5S, PCGS# 83776

3503 1887/6 FS-302 PR66 Cameo PCGS. CAC. A later die state of the FS-302 1887/6 variety that shows no remaining traces of a 6 underdigit. A brilliant, pristine, and prominently mirrored specimen with a frosty portrait and wreath. Portions of the wreath are lapped away. Population: 11 in 66 Cameo, 3 finer. CAC: 4 in 66, 0 finer (10/17). NGC ID# 276A, PCGS# 416357 Base PCGS# 83784

SHIELD NICKEL

3504 1873 Open 3 MS65 PCGS. CAC. The 1873 Shield nickel with the Open 3 in the date is more available than its Closed 3 counterpart. This impressive Gem offers well-detailed design elements and well-preserved, lustrous surfaces, under shades of champagne and lavender toning. Population: 57 in 65 (8 in 65+), 12 finer. CAC: 16 in 65, 8 finer (10/17). NGC ID# 22P8, PCGS# 3800

PROOF SHIELD NICKELS

1866 Rays Shield Nickel, PR66 Two-Year Proof Type Coin

3505 1866 Rays PR66 PCGS. A translucent sheen of pale-gold covers both sides of this well-preserved Premium Gem proof. Gleaming, sharply struck surfaces show only minimal shallowness of the horizontal stripes, and the reflective fields are free of distracting lines or spots. The 1866 Rays proofs represent a two-year type in proof format, although the 1867 Rays proofs are much scarcer. PCGS has seen only a few finer 1866 Rays proofs. Population: 42 in 66 (2 in 66+), 1 finer; 37 in 66 (1 in 66+) Cameo, 3 finer; 3 in 66 (1 in 66+) Deep Cameo, 1 finer (10/17). NGC ID# 276G, PCGS# 3817

3506 1867 No Rays PR66 PCGS. This No Rays 1867 proof Shield nickel is boldly struck and displays appreciable field-device contrast on the obverse. A hint of light champagne toning emerges from the peripheries. Examples are seldom offered this fine, and no non-Cameos are finer. Population: 11 in 66 (1 in 66+), 0 finer; 18 in 66 Cameo (1 in 66+), 1 finer; 4 in 66 Deep Cameo (1 in 66+), 0 finer (11/17). NGC ID# 4T4L, PCGS# 3821

3507 1869 PR66 PCGS. CAC. This brilliant proof is sharply struck and free of contact marks. Modest contrast is seen on the obverse but is not strong enough for a Cameo designation. Still, the 1869 proof Shield nickel is scarce this well-preserved. Population: 26 in 66 (1 in 66+), 2 finer; 18 in 66 (4 in 66+) Cameo, 1 finer. CAC: 12 in 66, 0 finer (10/17). NGC ID# 276K, PCGS# 3823

3508 1870 PR66 Cameo PCGS. CAC. This delightful Premium Gem proof exhibits strongly impressed design elements, but some letters in the reverse legend are incomplete, due to lapping. The deeply reflective fields contrast boldly with the frosty devices and no mentionable distractions are evident. Population: 26 in 66 (3 in 66+) Cameo, 2 finer. CAC: 13 in 66, 0 finer (10/17). NGC ID# 276L, PCGS# 83824

3509 1876 PR67 Cameo NGC. CAC. A delightful Superb Gem proof with startling cameo contrast between the sharply detailed, frosty design elements and the reflective fields. The brilliant surfaces are impeccably preserved and overall eye appeal is outstanding. Census: 6 in 67 Cameo, 1 finer. CAC: 9 in 67, 0 finer (10/17). NGC ID# 276T, PCGS# 83830

1876 Nickel, PR66 Deep Cameo One of the Finest Deep Cameos at PCGS

3510 1876 PR66 Deep Cameo PCGS. Few Deep or Ultra Cameo 1876 proof nickels are known from the surviving numbers of proofs. Indeed, of the 450 1876 proof nickels certified by PCGS a scant five (1%) are Deep Cameos. The deeply mirrored fields of the present Premium Gem strongly highlight the frosted motifs, all of which exhibit sharp design detail. Both sides have been very well cared for. PCGS has seen just one finer example. Population: 4 in 66 Deep Cameo, 1 finer (10/17).
Ex: Houston Money Show Signature (Heritage, 12/2014), lot 3475.
NGC ID# 276T, PCGS# 93830

1877 Shield Nickel, PR66 Cameo Proof-Only Key

3511 1877 PR66 Cameo PCGS. Shield nickels were only struck in proof format in 1877, when a small total of 900 proof examples was produced. As might be expected, the issue is an elusive key to the series and high-grade specimens are rare. This impressive Premium Gem is among the finest survivors, with sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. PCGS has graded only nine numerically finer examples (10/17) NGC ID# 276U, PCGS# 83831

LIBERTY NICKELS

3512 1883 With Cents MS66 NGC. The strike is remarkably sharp on this frosted and lustrous first-year Liberty nickel. The With Cents variant defies its large mintage (more than 16 million pieces struck) in high Uncirculated grades, where it is scarcer than the more-famous No Cents variety. Severe die cracks encircle both sides of this Premium Gem coin, with little effect on the sharp strike that provides nearly full details on Liberty's hair and the wreath including the troublesome ear of corn. Faint iridescent colors are especially evident at the central reverse. Census: 43 in 66, 4 finer (10/17). NGC ID# 22PH, PCGS# 3844

3513 1884 MS65 PCGS. CAC. This satiny Gem displays lovely olive-gold toning and no abrasions of note. The corn ear to the left of the wreath bow is slightly soft, but the stars are well-struck. Fine peripheral die cracks appear on each side as usual. Finer 1884 Liberty nickels are seldom offered. NGC ID# 22PJ, PCGS# 3845

- 3514 1885 AU58 PCGS.** The 1885 Liberty nickel is a low-mintage key in the series. This impressive near-Mint representative shows just a trace of wear on the well-detailed design elements and the pleasing lavender-gray surfaces are lightly abraded, with traces of original mint luster. NGC ID# 2773, PCGS# 3846

1885 Nickel, Satiny MS63

- 3515 1885 MS63 PCGS.** A satiny, champagne-tinted Select example of this key Liberty nickel, showing only a few light lines on each side that limit the grade without heavy abrasions. Several left-hand stars are weakly struck, although the lower-left wreath does exhibit slight definition on the corn ear. A collector-grade Mint State coin. NGC ID# 2773, PCGS# 3846

- 3516 1886 MS64 PCGS.** The 1886 Liberty nickel is a low-mintage business-strike key and examples in MS64 condition are definitely scarce. This attractive Choice example exhibits well-detailed design elements that show just a touch of softness on the stars and lower wreath. The well-preserved lustrous surfaces show few hints of greenish-gold toning. NGC ID# 277U, PCGS# 3847

1886 Nickel, MS65 Low-Mintage Issue

- 3517 1886 MS65 PCGS.** A satiny, well-preserved Gem example of this key Liberty nickel issue, showing a blush of light golden toning over each side. Several stars and the lower-left portion of the wreath exhibit strike softness. The 1886 is scarce in this grade and rare finer. Population: 72 in 65 (7 in 65+), 12 finer (10/17). NGC ID# 277U, PCGS# 3847

1912-S Nickel, Satiny MS66 Among the Finest Certified

- 3518 1912-S MS66 PCGS.** A small mintage of 238,000 Liberty Head nickels was struck over the course of four days in late December, 1912. Touted as "the last of the Lady's Head design" (five then-unknown 1913 Liberty Head nickels notwithstanding), the 1912-S was in great demand from day one of its existence as the sole San Francisco Mint representative of the series, and for its small mintage. This colorfully toned Premium Gem example is among the finest known of the issue. Rainbow shades iridescently cover both sides. The strike is quite sharp, especially on the reverse, with nearly full definition on the bow and the left-side ear of corn. Liberty's curls show only slight blending with a pair of light marks, one at the forehead and another hidden in the forecurls. Population: 38 in 66 (2 in 66+), 0 finer (10/17). NGC ID# 277R, PCGS# 3875

PROOF LIBERTY NICKELS

1884 Nickel, PR67 Cameo None Finer in This Category

- 3519 1884 PR67 Cameo PCGS. CAC.** Of the 3,942 proof nickels struck in 1884, this PR67 ranks among the finest at PCGS in the Cameo category. There are only nine other examples across all grades in the Deep Cameo category. This contrasted Superb Gem has considerable depth of mirrors. Each side remains essentially untoned, aside for a few wisps of gold. Population: 17 in 67 (6 in 67+) Cameo, 0 finer. CAC: 12 in 67, 0 finer (10/17). NGC ID# 22PV, PCGS# 83882

- 3520 1885 PR67 PCGS. CAC.** The 1885 represents the key date among circulation-strike Liberty nickels, placing added demand on more accessible high-grade proofs like this Superb Gem. Black-and-white surfaces are razor-sharp without a single point of contact worth noting. Population: 24 in 67 (3 in 67+), 2 finer in non-Cameo. CAC: 17 in 67, 1 finer (10/17). NGC ID# 277T, PCGS# 3883

- 3521 1888 PR67 PCGS.** This Superb Gem proof displays equal parts reflectivity and cartwheel luster in the fields, accented by sharp, satiny design elements. Both sides are brilliant, and a small mark between stars 9 and 10 is the only visible imperfection. Population: 8 in 67 (1 in 67+), 0 finer (10/17). NGC ID# 277W, PCGS# 3886

- 3522 1888 PR65 Cameo PCGS. CAC.** Cameo 1888 Liberty nickel proofs are scarce, and no Deep Cameos are reported at PCGS. This Gem CAC coin displays stark contrast, warmed by golden toning and accentuated by clean fields and frosty devices. The corn ear left of the wreath bow is predictably weak. Population: 5 in 65 Cameo, 9 finer. CAC: 3 in 65, 4 finer (10/17). NGC ID# 277W, PCGS# 83886

- 3523 1898 PR67 NGC. CAC.** Thin daubs of dusky gold patina confirm the originality of this mostly nickel-gray Superb Gem. A full strike should come as no surprise for a proof of this vintage. Exceptionally clean and eye-appealing. Census: 7 in 67, 1 finer in this category. CAC: 2 in 67, 0 finer (10/17). NGC ID# 2788, PCGS# 3896
- 3524 1898 PR66 Cameo NGC. CAC.** The hair definition and the wreath elements are ultra-sharp on this deeply mirrored and Cameo proof. A glint of golden toning enhances the ice-blue toning that gleams from both sides. Wispy raised lines from die polishing are Mint-related and invisible to the unaided eye. A CAC-endorsed example. Census: 25 in 66 Cameo (2 in 66+, 3 in 66★, 1 in 66+★), 2 finer. CAC: 19 in 66, 8 finer (10/17). NGC ID# 2788, PCGS# 83896
- 3525 1898 PR66 Cameo PCGS. CAC.** This sharp, well-contrasted Premium Gem displays considerable eye appeal. The obverse is brilliant, while the reverse shows light golden toning. Cameos are scarce this fine and rarely offered finer. Population: 30 in 66 (2 in 66+) Cameo, 15 finer (including 4 Premium Gem Deep Cameos). CAC: 19 in 66, 8 finer (10/17). NGC ID# 2788, PCGS# 83896
- 3526 1903 PR67 Cameo PCGS.** Gleaming nickel-white surfaces overall with a prominent patch of orange at the bottom left reverse margin and a faint echo on the left stroke of the V within the wreath. Intricately detailed and carefully preserved with just a hint of orange-peel texture in the mirrored fields that carry the coin's contrast. NGC ID# 278D, PCGS# 83901
- 3527 1907 PR67 PCGS. CAC.** This CAC-approved Superb Gem is closer to a Cameo designation than most 1907 proof nickels, showing mirrored fields and smooth, satiny motifs. A blend of champagne and ice-blue toning adds color to each side. None are finer at either service. Population: 34 in 67 (8 in 67+), 0 finer. CAC: 17 in 67, 0 finer (10/17). NGC ID# 278H, PCGS# 3905
- 3528 1909 PR67 NGC.** Shades of champagne-gold and lavender toning enhance the impeccably preserved surfaces of this delightful Superb Gem proof, with sharply detailed design elements and reflective fields underneath. Census: 90 in 67 (6 in 67★), 9 finer (10/17). NGC ID# 278K, PCGS# 3907
- 3529 1909 PR67 PCGS. CAC.** An elusive Superb Gem example of this popular proof type coin. Full design definition and a hint of cameo contrast characterize the untuned, pristine surfaces. CAC-endorsements are rarely seen on proofs of this lofty grade level. CAC: 28 in 67, 1 finer (10/17). NGC ID# 278K, PCGS# 3907
- 3530 1910 PR67 Cameo PCGS. CAC.** A gorgeous Superb Gem Cameo proof, this piece exhibits brilliant gray surfaces with deeply mirrored fields that frame the highly lustrous devices. Delicate gold toning splashed on the obverse and evenly distributed across the reverse adds to the eye appeal. Population: 26 in 67 (7 in 67+) Cameo, 9 finer in all designations. CAC: 13 in 67, 2 finer (10/17). NGC ID# 278L, PCGS# 83908

BUFFALO NICKELS

1913-S Buffalo Nickel, MS65 Appealing Type Two Example

- 3531 1913-S Type Two MS65 PCGS.** Colorful iridescence melds into an attractive, golden-gray hue over the sharply struck surfaces of this Type Two San Francisco nickel. The issue seldom shows a full strike, and although this Gem example is sharper than most, it is a bit weak on the braid knot and the bison's shoulder. Other areas are well-defined. Aside from a shallow nick on the lip (visible with a glass) the surfaces are essentially undisturbed. The eye appeal is first-rate. Population: 126 in 65 (3 in 65+), 48 finer (10/17). NGC ID# 22R3, PCGS# 3923

1913-S Buffalo Nickel, MS65 Challenging Type Two Issue

- 3532 1913-S Type Two MS65 PCGS.** Scarcer than the Type One design by a considerable margin and among the lowest mintages of the series at just 1.2 million pieces struck, the 1913-S Type Two nickel is a series semikey. The San Francisco Mint struggled with quality when striking the Type Two design, with weakness of the peripheral elements and die clashing. This Gem example offers terrific eye appeal with iridescent toning and sharply struck central elements. The strike is less sharp at the obverse border where LIBERTY is blurry and the bottom-most portion of the first 1 in the date is soft. NGC ID# 22R3, PCGS# 3923
- 3533 1914-S MS65 PCGS.** A remarkably well-preserved example, even for the Gem grade level. Satiny surfaces deliver lovely lavender and champagne hues without distracting abrasions. The strike is bold but slightly uneven, with the right-hand rim on both sides incompletely defined. A pair of short die cracks enter the bison's head from the rim at 9 o'clock. The Indian's profile is strike doubled. Finer 1914-S Buffalo nickels are elusive and priced accordingly. NGC ID# 22R6, PCGS# 3926
- 3534 1914-S MS65 PCGS. CAC.** An impressive Gem, this San Francisco Mint nickel exhibits a bold strike and brilliant gray luster with hints of light gold toning. CAC: 30 in 65, 19 finer (11/17). NGC ID# 22R6, PCGS# 3926
- 3535 1915-S MS63 PCGS. CAC.** The 1915-S is generally seen with a soft strike and in circulated condition. Pleasing Mint State representatives can prove to be a real challenge. LIBERTY is typically defined, but the remaining design elements are well-struck. Nickel-gray patina includes accents of iridescent peach-orange and olive-gold. NGC ID# 22R9, PCGS# 3929

**1917-S Nickel, Razor-Sharp MS65
Strong Eye Appeal**

3536 1917-S MS65 PCGS. CAC. The lustrous, well-preserved surfaces of this attractive Gem example display subtle hints of golden-tan and lavender-gray toning on both sides. The design elements are sharply detailed and eye appeal is quite strong. While nearly 4.2 million pieces were struck, sharply struck coins represent no more than 30% of the total mintage and few examples — even in Gem condition — are the equal for this exceptionally well-defined piece. Population: 92 in 65 (4 in 65+), 24 finer. CAC: 10 in 65, 5 finer (10/17). NGC ID# 22RE, PCGS# 3936

3537 1918 MS66 PCGS. Vivid shades of ice-blue, champagne-gold, and violet-gray toning visit the well-preserved surfaces of this attractive Premium Gem, with well-detailed design elements and vibrant mint luster underneath. Population: 82 in 66 (9 in 66+), 9 finer (10/17). NGC ID# 22RG, PCGS# 3937

3538 1918/7-D FS-101 — Polished — PCGS Genuine. VF Details. The dies are heavily eroded on this piece, showing metal flowlines in the margins and radial die cracks. The bright nickel-gray surfaces exhibit polishing but no other problems. The overdate feature and mintmark are clear.

**1918/7-D Nickel, VF30
FS-101, Sharp Example of the Overdate**

3539 1918/7-D FS-101 VF30 NGC. This is a splendid collector-grade example of one of the most famous varieties in the Buffalo nickel series. While many examples of the 1918/7-D are struck from worn dies, this example is sharp beneath streaky old gunmetal-gray toning. The bison's horn is not quite full, although the remaining definition on the motifs suggests an even finer grade. The overdate is crystal-clear, struck from an early state of the dies. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1920-D Nickel, Satiny MS65
Rarely Offered Finer**

3540 1920-D MS65 PCGS. Satiny mint luster rolls across both sides of this attractive Gem nickel. Subtle hints of pale-gold intermix with brilliant, nickel-gray patina. The tip of the top feather is weak, as is the front of the bison's head — the two main areas of incompleteness on most 1920-D nickels — yet the balance of the strike is exceptionally sharp for the issue. A challenging Denver issue in Gem and finer conditions. Population: 116 in 65 (17 in 65+), 5 finer (10/17). NGC ID# 22RR, PCGS# 3945

**1920-S Nickel, MS64
Strike and Condition Rarity**

3541 1920-S MS64 PCGS. The obverse is exceptionally strong, while the reverse displays a hint of softness on the bison's head, though it too is far above-average for this conditionally elusive strike rarity. Glints of gold accent each side, blending with softly frosted luster. Ticks are fewer in number and severity than the grade suggests. Only 27 finer submissions at PCGS (11/17). NGC ID# 22RS, PCGS# 3946

3542 1925-D MS64 PCGS. The well-preserved surfaces of this attractive Choice Buffalo nickel are visited by shades of sea-green and lavender-gray toning, with satiny mint luster underneath. The design elements are well-detailed and eye appeal is outstanding. NGC ID# 22S3, PCGS# 3955

3543 1925-D MS64 PCGS. This Choice 1925-D nickel displays a hint of light golden toning over satiny, largely unabraded surfaces. The definition of hair curls immediately above the Indian's braid indicates a sharp strike, and the general softness on each side is a result of die wear. Finer examples of this Denver issue are scarce. NGC ID# 22S3, PCGS# 3955

3544 1925-S MS63 PCGS. This appealing Select Uncirculated example displays well-detailed design elements for a '23-S, although the inevitable softness exists on the hair above the braid and at the bison's shoulder. Some colorful iridescence at the borders adds a splash of color to the attractive bluish-gray toning that covers both sides of this smooth, unabraded nickel. NGC ID# 22S4, PCGS# 3956

3545 1926-S AU55 NGC. The '26-S is a challenging issue in About Uncirculated and above. This Choice AU specimen exhibits soft golden-gray patina on partially lustrous surfaces that are devoid of significant marks or spots. The design elements are well brought up, including those on the reverse, which was struck from worn dies. Some weakness is noted on the bison's head, but the horn is sharp. NGC ID# 22S7, PCGS# 3959

- 3546 1929-D MS66 PCGS. CAC.** LIBERTY is fully struck, but typical softness occurs on the hair braid, bison's head, and the 1 in the date. Brilliant and awash in satiny luster, this Premium Gem nickel shows minimal ticks on the Indian's portrait and the bison's front left leg. Very scarce in this grade despite the generous mintage. Population: 66 in 66 (5 in 66+), 2 finer. CAC: 15 in 66, 0 finer (10/17). NGC ID# 22SE, PCGS# 3967

**1934 Buffalo Nickel, MS67
None Numerically Finer at PCGS or NGC**

- 3547 1934 MS67 PCGS.** The 1934 issue represents a return to nickel production at the Philadelphia Mint after a four-year hiatus. Wisps of pumpkin-orange color appear within the obverse fields, with the remaining surfaces are almost entirely brilliant. Blanketed with vibrant mint luster over each side, the devices reveal a remarkably sharp strike. No examples are numerically finer at PCGS or NGC. PCGS Population: 32 in 67 (2 in 67+), 0 finer (10/17). Ex: ANA Signature (Heritage, 8/2014), lot 3382. NGC ID# 22SL, PCGS# 3972

- 3548 1935 MS67 PCGS. CAC.** An incredible Superb Gem that is exceeded by a single finer PCGS example (10/17), this 1935 features intense luster with brilliant gray surfaces and a bold strike, all enhanced by subtle champagne toning. NGC ID# 22SN, PCGS# 3974

- 3549 1937-D Three-Legged, FS-901, MS62 PCGS.** The diagnostic raised dots are present under the bison on this famous 20th century Guide Book variety. The front left leg has been completely effaced. Satiny luster issues from golden-gray surfaces with splendid iridescent accents. The braid, feathers, and bison's head are full struck up. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3550 1937-D Three-Legged, FS-901, MS62 PCGS.** Well struck and free of all but a couple of minuscule nicks on each side, this iron-gray Mint State nickel with just a touch of rose toning is a highly satisfying example of this famous variety. All of the relevant diagnostics are clear, from the missing leg itself (a victim of overzealous lapping) to the trail of dots leading from the bison's belly to the ground. Ex: Dallas Signature (Heritage, 11/2006), lot 414. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3551 1937-D Three-Legged, FS-901, MS62 NGC.** A classic "demand rarity," so-named because there are simply more collectors wanting the Three-Legged variety than there are examples available, despite a relatively large surviving population. Hints of lilac appear over the primarily nickel-gray surfaces of this well-struck representative. The missing leg is truly gone, with just a ghost of the foot remaining beneath the legless haunch. Diagnostic die rust and other signs of die fatigue common to all genuine examples are present and confirm the authenticity of the variety. Ex: Chicago Signature (Heritage, 8/2014), lot 3384. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Three-Legged Nickel, MS63
In an Old Holder**

- 3552 1937-D Three-Legged, FS-901, MS63 NGC.** This satiny Select example displays deep olive-gold toning with mint-green and rose highlights. There is minor strike softness on the bison's shoulder and horn, as normal for the variety. No major abrasions are seen. A linear planchet lamination appears beneath the bison's belly. Housed in a prior generation holder. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

**1914 Nickel, PR67
Finely Textured Satin Surfaces**

- 3553 1914 PR67 PCGS. CAC.** Ex: Forsythe II. The 1914 proof nickels were extremely well-made. The Mint had clearly improved its production technique and consistency over the previous year. Survivors are often found in high grades, although Superb Gems are very scarce. Pale woodgrain toning over finely textured satin surfaces delivers terrific eye appeal. Nearly contact-free. PCGS reports 11 finer grading events. CAC: 49 in 67, 3 finer (11/17). NGC ID# 278T, PCGS# 3991

**1914 Buffalo Nickel, PR67
Beautifully Toned, Fully Struck**

- 3554 1914 PR67 PCGS. CAC.** Iridescent colors play across the textured, pristine surfaces of this impressive Superb Gem proof. Shades of lavender, ice-blue, and wheat-gold vary in intensity depending on the viewing angle. The strike is full, or essentially so, on both sides of this exceptionally well-produced proof. PCGS reports just 11 numerically finer examples. CAC: 49 in 67, 3 finer (11/17). NGC ID# 278T, PCGS# 3991

- 3555** 1937 PR66 PCGS. CAC. A gleaming specimen with pale golden toning over intense mirrors and a wealth of detail on the sharp devices. Although the Denver Mint continued to strike Buffalo nickels in 1938, no proofs were struck after 1937. Housed in a green label holder.
Ex: *Denver Signature (Heritage, 8/2006)*, lot 733. NGC ID# 278Z, PCGS# 3996

JEFFERSON NICKELS

1952-D Nickel, MS67 Tied for Finest With Five Full Steps

- 3556** 1952-D MS67 Five Full Steps NGC. Perhaps as few as 1 in 20 1952-D nickels show Five Full Steps, and only a tiny fraction of those qualify for the Superb Gem grade by either service. This lustrous and frosted example is sharply struck at the centers with a mark-free obverse and only a few tiny ticks on Monticello. Gleaming iridescence combines shades of ice-blue and champagne-gold for terrific eye appeal. Census: 4 in 67 Full Steps, 0 finer (10/17). NGC ID# 22UL, PCGS# 84047

1952-S Nickel, MS66+ Full Steps Top-Grade Registry Coin

- 3557** 1952-S MS66+ Full Steps PCGS. The 1952-S Jefferson nickel is a rarity in MS66 Full Steps, and four Plus-graded coins in this grade are the finest at PCGS (10/17). This example is satiny and brilliant in addition to being sharply struck and devoid of bothersome abrasions. An important Registry Set acquisition with few peers. Population: 17 in 66 (4 in 66+) Full Steps, 0 finer (10/17). NGC ID# 22UM, PCGS# 84048

- 3558** 1963-D MS65 Full Steps NGC. A frosted Gem example with the Five Full Steps designation on the holder, this sharply struck 1963-D is one of the few to qualify at the MS65 level for a Denver issue that is seldom well-made. Faint gold toning visits the lightly marked surfaces. This is the only Gem Full Steps 1963-D nickel certified by NGC, and bettered by none. It is tied with three pieces at PCGS (10/17). NGC ID# 22VF, PCGS# 84074

PROOF JEFFERSON NICKELS

1939 Jefferson Nickel, PR68 ★ Reverse of 1938

- 3559** 1939 Reverse of 1938 PR68 ★ NGC. CAC. The original hub for Jefferson nickels in 1938 exhibited wavy or uneven steps to the porch of Monticello, as seen on this Superb Gem proof. A new hub was created in 1939, exhibiting precisely defined porch steps. However, some dies remained from the old hub. This impressive piece is brilliant with light gray surfaces, deeply mirrored fields, and sharply detailed devices, exhibiting slight cameo contrast on the obverse. Census: 9 in 68 (2 in 68★), 0 finer. CAC: 2 in 68, 0 finer (10/17). NGC ID# 279X, PCGS# 4176

- 3560** 1939 Reverse of 1940, FS-901, PR67 PCGS. CAC. The steps of Monticello are sharp and straight on the scarcer Reverse of 1940 type. This coin is razor-sharp and deeply reflective with warm champagne-gold toning. Finer examples are extremely rare. Population: 69 in 67 (3 in 67+), 3 finer (including 2 PR67 Cameos). CAC: 19 in 67, 1 finer (10/17). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176

- 3561** 1951 PR67 Deep Cameo PCGS. Deep Cameo contrast make up just a minuscule minority of 1951 proofs, and sharply struck Superb Gems are quite rare. This deeply mirrored example contrasts boldly between the frosted motifs and mirrored-finish fields. Six full steps are clearly visible. A trace of attractive gold toning mellows the overall brilliance. Population: 13 in 67 (1 in 67+) Deep Cameo, 5 finer (10/17). NGC ID# BBUZ, PCGS# 94183

1953 Nickel, PR67+ Deep Cameo Perfect Registry Candidate

- 3562** 1953 PR67+ Deep Cameo PCGS. A few specks of golden patina adorn this otherwise brilliant Superb Gem, one of the few ultra high-grade survivors from a mintage of 128,000 proofs. The fields are virtually pristine, contrasting boldly against frosted devices. A perfect Registry candidate. Population: 7 in 67 (1 in 67+) Deep Cameo, 7 finer (10/17). NGC ID# BBV3, PCGS# 94185

- 3563** 1971 No S PR69 Cameo PCGS. Demand for Registry Set coins remains strong. This 1971 No S proof nickel is among the finest Cameos certified and is conditionally rare as such. The design elements are needle-sharp and show stark field-motif contrast. Neither side displays toning. Population: 21 in 69 Cameo, 0 finer (10/17). NGC ID# 56PC, PCGS# 84204

**1971 No S Nickel, PR69 Deep Cameo
Among the Finest Known**

- 3564** 1971 No S, FS-501, PR69 Deep Cameo PCGS. This popular *Guide Book* variety was struck without the customary San Francisco mintmark. PCGS has certified only 49 Deep Cameo examples in all grades, and this piece is tied for the finest (10/17). Brilliant surfaces yield razor-sharp devices and stark cameo contrast. The coin is virtually flawless. Population: 18 in 69 Deep Cameo, 0 finer (10/17). NGC ID# 22YN, PCGS# 94204

**1971 No S Nickel, PR69 Deep Cameo
None Finer, Major Modern Rarity**

- 3565** 1971 No S PR69 Deep Cameo PCGS. Ranked 30th among the *100 Greatest U.S. Modern Coins* (2011), only 1,655 Jefferson nickel proofs were reportedly struck without the S mintmark. About 400 examples are known, including fewer than 50 pieces with Deep or Ultra Cameo contrast. This pristine black-and-white specimen is fully struck, as expected, without a lick of color. A monumental modern rarity in this top grade. Population: 18 in 69 Deep Cameo, 0 finer (10/17). NGC ID# 22YN, PCGS# 94204

EARLY HALF DIME

**1795 V-4, LM-10 Half Dime, XF40
Mint Adjusted Obverse, Late Die State**

- 3566** 1795 V-4, LM-10, R.3, XF40 NGC. Prominent vertical and diagonal file marks on the obverse remain from the hand of a Mint adjuster, who found that the planchet weight exceeded Mint standards. This nicely detailed Flowing Hair half dime displays pleasing silver-gray surfaces with ancient gold and gunmetal-blue patina. Struck from a late die state, with a rim cud over TY of LIBERTY and star 9. Census: 2 in 40, 11 finer (10/17). NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

BUST HALF DIMES

- 3567** 1831 V-1, LM-6, R.1, MS65 NGC. Star 3 is repunched on this variety. As a Gem, this Capped Bust half dime would serve well as a type coin, showing satiny luster and original golden-russet toning. The eagle's left wing shows minute softness, while the obverse is sharp. NGC ID# 232D, PCGS# 38661 Base PCGS# 4278
- 3568** 1835 Large Date, Large 5C, V-11, LM-4, R.3, MS65 NGC. A beautifully preserved half dime with lovely antique toning in deep shades of pewter-gray, rose-gray and sea-green. The design elements are crisply struck, and the coin's surfaces reveal outstanding preservation, in the absence of any noticeable surface marks on either side. NGC ID# 232H, PCGS# 38710 Base PCGS# 4282

SEATED HALF DIMES

- 3569** 1837 No Stars, Large Date (Curl Top 1) MS65 NGC. The first issue in the Seated half dime series, one of only two without obverse stars, can be found with a Large Date and Small Date. Both are collectible in high grades. This incredible Gem half dime is covered in rich, antique patina on both sides with blushes of golden color. Softly frosted and well-defined on the head and wreath. NGC ID# 232M, PCGS# 4311
- 3570** 1837 No Stars, Small Date (Flat Top 1) MS65 NGC. A satiny Gem No Stars type coin, well-struck save for a localized area of weakness on the wreath leaves to the left of the H in HALF. Essentially untoned and without distracting abrasions. Census: 11 in 65, 8 finer (10/17). NGC ID# 232M, PCGS# 4312
- 3571** 1838 Large Stars, No Drapery, MS66 NGC. The large mintage of 2.2 million 1838 dimes occasioned at least 15 die varieties listed in Valentine. This piece shows repunching most prominent on stars 1, 3, and 8. The satiny surfaces are silver-gray in the centers with iridescent rim toning. A small luster graze in the lower reverse field is the only mentionable contact. A super and well-struck example of the issue. Census: 44 in 66 (1 in 66+, 1 in 66★), 30 finer (10/17). Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 3327. NGC ID# 2TXX, PCGS# 4317

**1843 Seated Half Dime, MS67
Late-State Reverse
Finest Certified at NGC**

- 3572** 1843 MS67 NGC. V-4. A large mintage of more than 1.1 million Seated Liberty half dimes was accomplished at the Philadelphia Mint in 1843, but the issue is conditionally very rare at the MS67 level, and numerically finer examples are unknown. This sharply detailed Superb Gem offers vibrant mint luster under shades of golden-brown, violet, and amber toning. This piece was struck from a fascinating late state of the reverse die, showing wedge-shaped pieces apparently ready to fall out. NGC shows this piece to be the sole finest certified at that service (10/17). Purchased from Jason Carter (1/2010). NGC ID# 2334, PCGS# 4332
- 3573** 1846 VG10 PCGS. The 1846 half dime comes from a mintage of only 27,000 pieces and is scarce in all grades. This collectible VG10 coin displays outstanding battleship-gray surfaces with deep olive-russet patina in the protected portions of the fields. LIBERTY is almost entirely readable, and eye appeal is excellent for the grade. Population: 16 in 10, 69 finer (10/17). NGC ID# 2338, PCGS# 4336

1848-O Half Dime, MS66

V-4, Rare Small O Mintmark Example

- 3574 1848-O MS66 PCGS. V-4.** As a date, this New Orleans issue is readily available thanks to the large mintage of 600,000 pieces. Three mintmark sizes exist for the 1848-O. Of these, according to the 2016 *Bowers Guide Book of Liberty Seated Silver Coins*, the Small O variant is rare. Al Blythe calls it R.7 in his reference. On this example, the O mintmark is round in shape on the outside, oval at the center opening, and appreciably smaller than both the Medium O and Large O mintmark varieties. It is also considerably rarer. A lustrous, frosted Premium Gem, the coin is sharply struck and brilliant except for central splashes of almond-gold patina. Population (all varieties): 9 in 66 (1 in 66+), 7 finer (10/17). NGC ID# 233C, PCGS# 4340

- 3575 1853-O No Arrows — Cleaned — PCGS Genuine. XF Details.** The No Arrows 1853-O half dime is elusive in all grades. This piece displays sharp XF detail — borderline AU. The bright silvery surfaces are moderately abraded and show light cleaning, but the worthiness of this coin to represent the scarce No Arrows issue in a quality Seated half dime collection remains intact due to the excellent detail.

- 3576 1857 MS66 PCGS. CAC.** Sharp design elements and frosty, unabraded luster gives this Premium Gem 1857 half dime extraordinary appeal. Delicate champagne and sea-green hues blend across each side. The 1857 is scarce in this grade and rare finer. Population: 44 in 66 (9 in 66+), 14 finer (10/17). NGC ID# 233S, PCGS# 4365

- 3577 1857 MS67 NGC.** Attractive shades of sea-green and lavender-gray toning visit the well-preserved surfaces of this impressive Superb Gem. The design elements show just a touch of softness on the star centers and upper wreath, and the reverse shows some die crumbling at the border at 9 o'clock. Census: 16 in 67 (5 in 67+), 1 finer (10/17). NGC ID# 233S, PCGS# 4365

- 3578 1860 MS67 PCGS.** First year of the Legend Obverse design, and this Superb Gem is an outstanding representative for an advanced type collection. Boldly defined, the obverse is fully brilliant, save for a thin crescent of steel and iridescent toning along the left border. The reverse is almost fully toned, with a crescent of silver brilliance. Population: 52 in 67 (8 in 67+), 4 finer (10/17). NGC ID# 2347, PCGS# 4377

- 3579 1862 MS67 PCGS. CAC.** One of the most collectible Seated Liberty half dimes in high grades. This Superb Gem is softly frosted with attractive and overtly original violet, gold, and blue patina that is considerably deeper on the reverse. Fully struck with razor-sharp rims. Population: 57 in 67 (10 in 67+), 4 finer. CAC: 32 in 67, 3 finer (10/17). NGC ID# 234B, PCGS# 4381

- 3580 1871-S MS65 PCGS. CAC.** From a mintage of 161,000 pieces, the 1871-S half dime is rare in high grade. This sharply detailed Gem shows light clash marks, but no mentionable distractions on either side. The surfaces are lustrous and lightly toned. Population: 6 in 65, 6 finer. CAC: 4 in 65, 4 finer (10/17). NGC ID# 234W, PCGS# 4399

PROOF SEATED HALF DIME

1868 Half Dime, PR66 Deep Cameo

Few Known With This Much Contrast

- 3581 1868 PR66 Deep Cameo PCGS. CAC.** Deep Cameo examples of the 1868 proof are rare in all grades. This CAC-endorsed Premium Gem displays stark field-device contrast and a hint of light champagne toning. The upper-left portion of the wreath shows the only mentionable strike weakness. Only a single finer Deep Cameo is known. Population: 3 in 66 (1 in 66+) Deep Cameo, 1 finer. CAC: 3 in 66, 0 finer (10/17). NGC ID# 2365, PCGS# 94451

EARLY DIMES

- 3582 1798/97 16 Stars Reverse, JR-1, R.3 — Improperly Cleaned — NGC Details. VF.** The only 1798 dime variety with the 16 Stars reverse, essential for a complete *Guide Book* collection. This VF-level coin displays an even strike and deep russet toning over lightly cleaned surfaces. Minor strike weakness at the centers blends with mild wear from circulation. A collectible type coin.

1798 Small 8 Dime, VG10

Rare JR-3 Die Pair

- 3583 1798 Small 8, JR-3, R.5, VG10 PCGS.** This is a rare die pair with a small, left-leaning 8 in the date. Zack, Scuderi, and Sherrill write "at least 30 examples known, about six of which are in MS." The date and other legends are readable, while Liberty and the eagle retain distinct outlines. This is a well-circulated and problem-free example that should appeal to advanced specialists. Population: 5 in 10, 16 finer (10/17). NGC ID# 236E, PCGS# 38752 Base PCGS# 4467

BUST DIME

1834 Bust Dime, MS64 JR-7, Small Date, Plain 4

- 3584** 1834 Small 4, JR-7, R.2, MS64 NGC. Census: 46 in 64, 25 finer (10/17). JR-7 is the sole Small Date (Small 4) variety for the 1834 dimes, although the smallness of the date is not readily recognizable to the eye. The starting position of the scroll in relation to D in UNITED and the alignment of I in PLURIBUS to the second T in STATES are better pick-up points for the variety. The final A in AMERICA is further from the arrowhead than any other 1834 variety. This is a Choice Uncirculated example, with prooflike fields beneath areas of brown and bluish-gray toning. The obverse strike is sharp, although the reverse is less-crisp, especially at the eagle's head and neck. Census: 46 in 64, 25 finer (10/17). PCGS# 38872 Base PCGS# 4525

SEATED DIMES

1837 Seated Liberty Dime, MS64+ No Stars, Small Date

- 3585** 1837 No Stars, Small Date, F-104, R.3, MS64+ PCGS. CAC. Unlike the 1837 No Stars half dime, the Small and Large Date logotypes for the dime are easily distinguished by their size alone. In addition, the Small Date 3 has a curved top and the Large Date 3 is flat across the top. This well-struck near-Gem displays light caramel-gold toning over frostlike silver-gray surfaces. Smooth surfaces show minor contact near the O in OF and a subtle reverse spot at 3 o'clock, plus a small deep toning area near Liberty's left (facing) elbow. Die clashing near the E in DIME and slight counterclockwise rotation of the reverse help confirm the Fortin variety. Population (all Small Date varieties): 18 in 64 (1 in 64+), 12 finer. CAC: 4 in 64, 9 finer (10/17). PCGS# 537642 Base PCGS# 4562

- 3586** 1842 F-107, R.4, MS65 NGC. Golden-brown and steel-blue toning encompasses this shimmering and lightly abraded Seated dime. The strike is intricate except on the dentils near the field. Tiny die chips around the stars help attribute the Fortin variety. For all 1842 varieties, Census: 6 in 65, 5 finer (10/17). NGC ID# 2386, PCGS# 537791 Base PCGS# 4581

- 3587** 1854 Arrows, F-102, High R.4, MS65 NGC. Ex: Highland Collection. A vertical die defect in Liberty's lap is diagnostic of the variety. This Gem example is frosted and lustrous over lightly iridescent silver surfaces. The strike is sharp with minimal die erosion that typifies the issue. We note some deeper toning and build-up on the reverse legend, although abrasions are nearly absent throughout both sides. Census: 21 in 65, 23 finer (10/17). PCGS# 538011 Base PCGS# 4605

1857 Dime, Boldly Struck MS66 An Important Condition Rarity

- 3588** 1857 F-108, R.2, MS66 PCGS. Available in lower grades, the 1857 Seated dime becomes rare at the Premium Gem level and anything finer is almost unobtainable. This piece is boldly struck, with satiny luster that is devoid of distracting abrasions. Both sides show splashes of aquamarine, amber, violet, and champagne toning. Die chips are visible around stars 2 through 6 and 12 and 13, a diagnostic of the variety. Population: 7 in 66 (2 in 66+), 1 finer (10/17). PCGS# 538098 Base PCGS# 4614

1859 Dime, Beautifully Toned MS67 Only One Finer at Each Service

- 3589** 1859 F-107, R.3, MS67 NGC. This variety shows tiny die chips near stars 2 through 8, 12, and 13. Obverse 7 is the only die with this date placement relative to the shield point. The reverse is perfect. There had been a severe oversupply of subsidiary silver coins in the East since the passage of the Mint Act of 1853, which reduced the silver weight of the half dime, dime, quarter, and half dollar. The law explicitly prohibited the free coinage of silver, yet Mint Director James Ross Snowden continued to accept all silver bullion deposits throughout the 1850s, striking subsidiary coins without consideration for their commercial demand. The overabundance of small-denomination silver coins in Atlantic cities helps to explain the relative availability of high-grade P-mint dimes from the mid-to-late 1850s, including the 1859 (429,200 pieces produced). This Superb Gem 1859 dime features a richly toned obverse with central pale-orange color that gradually progresses to lilac, mint-green, and blue hues at the borders. The reverse is absolutely free of toning. Softly frosted luster radiates over each side. Typical strike incompleteness is confined to the right obverse stars, Liberty's head, and right (facing) hand. Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 6206; *Gardner Collection, Part IV* (Heritage, 10/2015), lot 98259. NGC ID# 2394, PCGS# 538139 Base PCGS# 4619

- 3590** 1862 F-107, R.2, MS66 PCGS. The left ribbon end touches the wreath. Bright mint frost and complete brilliance are the defining features of this wonderful Premium Gem. Nearly all 1862 dimes are well-struck, as here. The reverse is particularly strong. Population (all varieties): 19 in 66 (2 in 66+), 2 finer (10/17). PCGS# 538193 Base PCGS# 4635

- 3591** 1875-S Mintmark Below Bow MS66 PCGS. Fortin-Unlisted. The reverse is the rusted and worn die from F-116 (Reverse P), but the obverse shows the date a trifle further right than F-116's Obverse 11 has. This Premium Gem 1875-S dime displays a bold strike where die wear does not affect the sharpness, and both sides have attractive olive and light golden toning. This piece is among the finest examples of the date at PCGS, regardless of variety. Population: 4 in 66, 0 finer (11/17). NGC ID# 23AG, PCGS# 4676

- 3592 1877-CC Type Two Reverse, F-117, R.3, MS65 PCGS. CAC.** The dies are worn on this variety, with heavy metal flowlines in the margins. This Gem 1877-CC dime displays sea-green and russet-gold toning with no distracting abrasions. Liberty's head is short of fully struck, but the remainder of the design is surprisingly well-executed for the die state. PCGS# 538604 Base PCGS# 4683

**1877-S F-109 Dime, MS65
Old First-Generation 'Rattler' Holder**

- 3593 1877-S F-109, R.4, MS65 PCGS.** The Fortin-109 variety is primarily attributed by the position of the date, its downslope, and by the Block S mintmark slightly high and to the right. There are no die cracks or other diagnostic anomalies for the variety. This frosted and lustrous example is sharply struck throughout. A band of gunmetal-blue and russet-brown toning occupies the left obverse margin, while those shades are more pervasive on the reverse. The coin is virtually free of any marks or abrasions. Population (all 1877-S varieties): 9 in 65, 7 finer (10/17). PCGS# 538618 Base PCGS# 4684

- 3594 1887 F-108, R.2, MS67 NGC.** The date is high with a slight downward slope. This colorfully toned Superb Gem example displays strong cartwheel luster and rainbow iridescence throughout both sides. The strike is surprisingly weak at the peripheries, but sharp at the centers — diagnostic of the F-108 die marriage. Weakness at Liberty's head and at the obverse legend (where the first A in AMERICA is filled) carries over to the top of the wreath at its outer elements. Census: 6 in 67, 2 finer (10/17). PCGS# 538728 Base PCGS# 4698

PROOF SEATED DIMES

- 3595 1859 PR65 PCGS.** Original blue, violet, and olive-gold toning appears on each side of this Gem proof, accenting mirrored fields and well-preserved surfaces. Slight weakness on star 7 is the only such strike softness noted on either side. Population: 30 in 65, 17 finer (10/17). NGC ID# 23CD, PCGS# 4748

- 3596 1870 PR65 Cameo NGC. F-101, R.3.** No Ultra/Deep Cameo examples of the 1870 Seated dime are certified. This Gem Cameo is sharply struck and modestly contrasted with warm golden toning. Thin blue and lavender rings surround the borders. A conditionally rare proof. Census: 6 in 65 Cameo (1 in 65 ★), 8 finer (10/17). NGC ID# 59UM, PCGS# 84763

- 3597 1872 F-103, R.3, PR66 PCGS.** A riotous display of color covers both sides of this resplendent 1872 Premium Gem proof. Multicolor iridescence emanates from the mirrored fields and frosted devices in lively shades of electric-blue, sea-green, sunset-orange, and fuchsia-pink, while the equally reflective reverse shimmers in amber-orange, violet, and steel-blue hues. No photo can capture the nuances of color that are ever-changing according to the light and viewing angle. A spectacular, fully struck proof, with none finer at PCGS. Population: 8 in 66, 0 finer (10/17). PCGS# 539030 Base PCGS# 4765

- 3598 1879 F-102, R.3, PR67 NGC.** Lovely mint-gold, sea-green, blue, and lavender hues appear on each side of this Superb Gem proof. The strike is bold, but the rock base is weakened by die polishing. On the reverse, strike doubling is seen on the right-side wreath and on ONE. Elusive in this lofty grade. Census: 11 in 67 (1 in 67+), 16 finer (including 12 in 67 Cameo and Ultra Cameo) (10/17). PCGS# 539043 Base PCGS# 4776

- 3599 1889 F-102, R.4, PR66+ NGC. CAC.** From a limited mintage of 711 pieces, the 1889 proof Seated Liberty dime is very scarce in PR66 condition, and finer coins are rare. This Plus-graded Premium Gem displays sharply detailed design elements and deeply mirrored fields, under delicate shades of pale gold and cerulean-blue toning. Census: 37 in 66 (1 in 66+, 1 in 66★), 10 finer. CAC: 8 in 66, 2 finer (10/17). NGC ID# 23DE, PCGS# 539065 Base PCGS# 4786

BARBER DIMES

- 3600 1893-O MS65 NGC.** A satiny and well-struck cream-gray and straw-gold Gem with remarkably smooth surfaces. Early New Orleans issues are scarcer in Mint State than their mintages might imply, and the 1893-O is no exception. Census: 8 in 65 (1 in 65+), 6 finer (10/17). NGC ID# 23DR, PCGS# 4801

**1895 Dime, Reflective MS66
Low-Mintage Key Issue**

- 3601 1895 MS66 PCGS.** A hint of pale-gold exists at the margins, although the majority of this Premium Gem 1895 is brilliant. Frosted central motifs contrast boldly with reflective fields, where the obverse is clearly prooflike and the reverse fields nearly so. A full strike adds to the appeal, with marks limited to a few planchet pinpricks at DIME on the reverse. Housed in a PCGS Secure holder, this high-quality 1895 represents the key date among Philadelphia Mint Barber dimes. Population: 36 in 66 (23 in 66+), 5 finer (10/17). NGC ID# 23DV, PCGS# 4806

1911-S Dime, Brilliant MS67

- 3602 1911-S MS67 NGC.** Thick mint luster is the chief attribute of this remarkable Superb Gem coin. The silver-white surfaces are remarkably attractive, and even a loupe reveals only a couple of hair-thin, undistracting marks in the left obverse field that fail to detract. Nearly the finest certified at both services, save for a single NGC piece finer (10/17).

Ex: Long Beach Signature (Heritage, 9/2008), lot 1720. NGC ID# 23FL, PCGS# 4859

- 3603 1916 Barber MS67 PCGS.** The final-year issue for the Barber dime overlaps with Weinman's new "Mercury" design. This is a highly lustrous example with mostly brilliant surfaces, augmented by slight evidence of golden-tan toning on each side. A fully struck and frosty Superb Gem. None are finer at either service. Population: 9 in 67 (2 in 67+), 0 finer (10/17). NGC ID# 23FY, PCGS# 4870

PROOF BARBER DIMES

- 3604 1892 PR65 NGC. CAC.** The first-year mintage of proof Barber dimes far exceeds the number of proofs struck for any other year of the series, yet the certified population at Gem or finer levels does not reflect the robust mintage. This is an exceptional example, with a thin dappling of golden-gray patina over brilliant-silver mirrors and frosted central devices. A pair of tiny marks on D of DIME seem to be the only deterrent to an even finer grade. CAC endorsed. Census: 49 in 65, 69 finer. CAC: 10 in 65, 21 finer (10/17). NGC ID# 23G3, PCGS# 4875
- 3605 1895 PR66 PCGS. CAC.** Deep orange-gold and green toning visit the impeccably preserved surfaces of this Premium Gem proof Barber dime. The design features are sharply struck throughout. Population: 36 in 66, 13 finer. CAC: 11 in 66, 12 finer (10/17). NGC ID# 23G8, PCGS# 4879

1896 Barber Dime, PR67
None Finer at Either Service

- 3606 1896 PR67 NGC.** The frosted raised devices offer a fair amount of contrast with the lightly toned, iridescent mirrors that surround them, although not enough to garner a Cameo grade from NGC. Still, this is an outstanding Superb Gem example, with a razor-sharp strike and pale lavender shades that preempt other colors, which add subtle depth to the toning. Neither service reports a numerically finer example. Census: 15 in 67 (1 in 67★), 0 finer (10/17). NGC ID# 23G9, PCGS# 4880

- 3607 1906 PR67 NGC.** The 1906 proof is available in most grades but scarce at the Superb Gem level, even without a Cameo designation. This piece displays full detail and deeply mirrored fields. Rich orange-gold toning blankets most of each side. Census: 18 in 67 (4 in 67 ★), 8 finer (including 4 in 67 Cameo) (10/17). NGC ID# 23GK, PCGS# 4890

1910 Barber Dime, PR67
Beautifully Toned, Few Are Finer

- 3608 1910 PR67 PCGS. CAC.** This CAC-approved Superb Gem proof displays beautiful concentric rainbow toning on the obverse, with blended gold, sea-green, and lavender on the reverse. The strike is sharp and the fields are deeply reflective. Eye appeal abounds. The 1910 proof dime is rare in this condition. Population: 14 in 67, 4 finer. CAC: 11 in 67, 2 finer (10/17). NGC ID# 23GR, PCGS# 4894

MERCURY DIMES

- 3609 1916 MS67 Full Bands PCGS. CAC.** A beautiful, pristine Superb Gem type coin from the first year of the Mercury dime series. Delicate iridescent toning graces each side, and the strike is sharp. Finer Full Bands representatives are rare, and CAC-endorsed coins are scarce even in this grade. CAC: 88 in 67, 2 finer (10/17). NGC ID# 23GX, PCGS# 4905
- 3610 1916-S MS66 Full Bands PCGS.** This Premium Gem is well-struck and mark-free with light-gray color near the centers. Beautiful russet, crimson, orange, green, and cobalt-blue iridescence occurs in the fields and near the peripheries. An exquisitely preserved and original 1916-S Full Bands example.
Ex: New York Signature (Heritage, 7/2004), lot 5849; Long Beach Signature (Heritage, 9/2004), lot 6217; FUN Signature (Heritage, 1/2006), lot 2127. NGC ID# 23GZ, PCGS# 4909
- 3611 1917 MS67 Full Bands PCGS.** Flecks of pale golden patina appear over largely brilliant, exquisitely preserved surfaces. The central bands are fully split, and the portrait is well-defined. Practically devoid of post-Mint imperfections. Population: 32 in 67 (5 in 67+) Full Bands, 0 finer (10/17). NGC ID# 23H2, PCGS# 4911
- 3612 1918 MS66 Full Bands PCGS. CAC.** A beautiful Premium Gem with sharp central definition and frosty, untuned luster. Portions of the periphery are weak due in part to die wear, as metal flowlines are apparent in the margins. It is rare to find a Full Bands coin so fine with CAC endorsement. Population: 51 in 66 (3 in 66+) Full Bands, 4 finer. CAC: 15 in 66, 1 finer (11/17). NGC ID# 23H5, PCGS# 4917

1918-D Dime, MS64 Full Bands
Colorfully Toned, Choice Surfaces

- 3613 1918-D MS64 Full Bands NGC.** The 1918-D is scarce with Full Bands regardless of the grade, and the strike on this near-Gem example is indeed sharp throughout both sides. The intense, multicolor toning may divert some of the attention to its underlying surface quality, but the Choice surfaces are undeniable beneath variegated shades of blue, bronze, red, and forest-green. Census: 58 in 64 Full Bands, 10 finer (10/17). NGC ID# 23H6, PCGS# 4919

- 3614 1919 MS66 Full Bands PCGS. CAC.** Blazing, frosty mint luster illuminates delicate champagne tinting on this Premium Gem Full Bands example. Although the outer edges of the peripheral legends are occasionally weak, the centers are sharp. Full Bands examples of the 1919 Mercury dime are rarely offered finer. NGC ID# 23H8, PCGS# 4923

- 3615 1919-D MS66 PCGS.** PCGS lists only a dozen Premium Gem 1919-D Mercury dimes, include seven non-Full Bands examples and five with Full Bands. None are finer in either category at that service (11/17). This piece is weakly struck in the center of the reverse but sharp around the borders. Russet-gold toning is on both sides but is deeper across the reverse. The satiny surfaces are devoid of abrasions. NGC ID# 23H9, PCGS# 4924

- 3616 1919-D MS63 Full Bands PCGS Secure.** The 1919-D is a better date with Full Bands, and this Select example is indeed sharp at the centers and nearly full around the peripheral legends as well. Brilliant, satiny surfaces show only light handling marks. NGC ID# 23H9, PCGS# 4925

1920-D Dime, MS65 Full Bands
Elegant Multicolor Toning

3617 1920-D MS65 Full Bands PCGS. Gem examples of the 1920-D Mercury dime with Full Bands are very scarce. Finer examples are sometimes offered in MS66 Full Bands but almost never encountered in Superb Gem condition despite the 19.1 million coin-mintage. Strongly struck with clear horizontal band separation and original blue, violet, and gold tones over each side. A few small ticks are seen. NGC ID# 23HC, PCGS# 4931

3618 1921 MS62 Full Bands PCGS. Flecks of charcoal-gray patina run over both sides of this better-date Mercury dime. The design elements are sharply struck throughout, including the all-important middle bands. From a small mintage of 1.2 million coins. NGC ID# 23HE, PCGS# 4935

1921-D Dime, MS64 Full Bands
Great Eye Appeal for This Bold Semikey

3619 1921-D MS64 Full Bands PCGS. CAC. The Mercury dime series has its share of key dates and famous varieties. This low-mintage Denver issue is one of the key issues in the series. It is especially challenging at this level with the approval of CAC. Fully struck at the centers and around the rims. Brilliant, minimally marked surfaces aglow in satiny mint luster will appeal to specialists. NGC ID# 23HF, PCGS# 4937

3620 1924 MS67 PCGS. CAC. A conditional rarity and among the finest non-Full Bands examples known of this date. Frosty surfaces display light golden and lavender hues, and the fasces bands are almost entirely separated. PCGS lists a quantity of Full Bands coins in this grade. Population: 7 in 67 (4 in 67+), 0 finer. CAC: 3 in 67, 0 finer (10/17). NGC ID# 23HJ, PCGS# 4942

3621 1928-S MS65 Full Bands PCGS. Frosty luster displays a cartwheel effect that is amplified by metal flowlines in the fields from a late die state. The strike is nonetheless sharp at the centers, and neither side exhibits distracting abrasions. Light champagne toning graces each side. NGC ID# 23HZ, PCGS# 4971

3622 1929 MS67 Full Bands PCGS. The vibrant, lustrous surfaces of this boldly struck Superb Gem are bright and virtually untoned, save for a few brief splashes of gold at the lower obverse and reverse. Numerically finer pieces are exceedingly rare, making this frosted MS67 an important opportunity for the advanced collector and a viable Registry Set candidate. Population: 90 in 67 (6 in 67+) Full Bands, 1 finer (10/17).
Ex: ANA National Money Show (Heritage, 3/2007), lot 547. NGC ID# 23J2, PCGS# 4973

3623 1929 MS67 Full Bands PCGS. This spectacular Superb Gem exhibits sharply detailed design elements and vibrant mint luster throughout, with Full Bands definition on the fasces. The surfaces are impeccably preserved, with some areas of sparkling die polish on the lower obverse. Population: 90 in 67 (6 in 67+) Full Bands, 1 finer (10/17). NGC ID# 23J2, PCGS# 4973

3624 1930 MS66 Full Bands PCGS. CAC. A faint tint of sky-blue graces that satiny, mint-fresh luster of this Premium Gem. Sharp central definition and a lack of abrasions promotes strong eye appeal. The 1930 is available to a certain degree in this grade but is rarely seen finer. NGC ID# 23J5, PCGS# 4979

3625 1930-S MS66+ Full Bands PCGS. Delicate golden hues provide a trace of color to this frosty Premium Gem dime. Both sides exhibit pinpoint design definition, including fully split bands. Exceptionally well-preserved and rarely seen finer. Sure to make a great addition to any carefully assembled set. NGC ID# 84NT, PCGS# 4981

3626 1931 MS66+ Full Bands PCGS. CAC. Brilliant surfaces awash in coruscating mint luster draw the eye of the viewer. Closer inspection reveals seemingly pristine fields and pinpoint definition with fully rounded and separated bands. Population: 87 in 66 (4 in 66+) Full Bands, 21 finer. CAC: 24 in 66, 5 finer (10/17). NGC ID# 5BZ2, PCGS# 4983

3627 1935-D MS67 Full Bands PCGS. The population of the 1935-D dime in Full Bands tops out at the MS67 numeric level, with a few examples awarded Plus designations. This scarce Registry coin displays a bold strike and softly frosted frosted luster with daubs of olive-gold toning on each side. Population: 53 in 67 (8 in 67+) Full Bands, 0 finer (10/17). NGC ID# 23JD, PCGS# 4995

3628 1944 MS67+ Full Bands PCGS. CAC. A Plus-graded Superb Gem specimen, with sharply detailed design elements throughout, including Full Bands definition on the fasces. The virtually pristine surfaces radiate vibrant mint luster, with terrific eye appeal. PCGS has graded four numerically finer Full Bands examples (10/17). NGC ID# 23KB, PCGS# 5051

3629 1945-S Micro S, FS-512, MS68 NGC. Blazing mint luster on this virtually perfect Micro S dime shows a few splashes of lavender-russet toning in the centers but is frost-white elsewhere. The central fasces bands lack fullness, but the strike is otherwise pleasing; some fuzziness around the peripheral legends is consistent with die wear. The Micro S is extremely rare in this lofty grade. Census: 7 in 68 (1 in 68 ★), 2 finer (10/17). PCGS# 145414 Base PCGS# 5062

PROOF MERCURY DIMES

1936 Dime, Super-Smooth PR67
Few Known Finer

3630 1936 PR67 PCGS. CAC. This first-year proof Mercury dime is an impressive Superb Gem featuring crisp design definition over brilliant silver surfaces. A faint hint of golden-gray confirms the natural state of the mirrored fields and satiny devices. The green CAC seal is an important endorsement at this level. Population: 85 in 67 (5 in 67+), 3 finer. CAC: 37 in 67, 0 finer (10/17). NGC ID# 27DG, PCGS# 5071

3631 1937 PR68 PCGS. Glimpses of olive-gold toning appear throughout the glimmering fields of this high-end proof Mercury dime. The strike is full, and no surface imperfections are discernible. This is among the finest 1937 proofs certified. Population: 34 in 68 (1 in 68+), 0 finer (10/17). NGC ID# 27DH, PCGS# 5072

3632 1939 PR68 ★ NGC. The interiors of this remarkably high-grade proof are brilliant, although yellow-gold toning graces the borders with some lesser rose hues. Essentially flawless with considerable glimmer from the fields. None are known numerically finer. Census: 81 in 68 (1 in 68+, 11 in 68 ★), 0 finer (10/17).
Ex: *FUN Signature (Heritage, 1/2005)*, lot 6310. NGC ID# 5AMD, PCGS# 5074

ROOSEVELT DIME

3633 1948-S MS68 PCGS. This incredibly frosty and lustrous Superb Gem Registry coin is among the finest 1948-S dimes at PCGS. It just misses a Full Bands designation. Frost-white interiors cede to lovely multicolor border toning on each side. The preservation is virtually flawless. Population: 4 in 68, 0 finer; 3 in 68 Full Bands, 0 finer (11/17). NGC ID# 23KT, PCGS# 5090

PROOF ROOSEVELT DIMES

3634 1954 Doubled Die Obverse, FS-101, PR69 Cameo NGC. This is a minor doubled die, showing mainly extra thickness on the motto IN GOD WE TRUST and the date. A die chip under the base of the 4 readily identifies the variety. This nearly flawless Cameo is brilliant and well-contrasted with sharp design elements. This is the single finest FS-101 coin attributed by NGC (10/17). NGC ID# 27EN, PCGS# 85243 Base PCGS# 85229

3635 1970 No S PR69 Cameo PCGS. This proof dime variety was mistakenly issued without a San Francisco mintmark. The present coin is conditionally rare and among the finest known. The strike is full, and both sides display stark white-on-black contrast without any hindering toning. Population: 13 in 69 Cameo, 0 finer (10/17). NGC ID# 59SD, PCGS# 85248

TWENTY CENT PIECES

1875-CC Twenty Cent Piece, MS63
Original Surfaces

3636 1875-CC MS63 PCGS. BF-2. This die pairing is the most frequently located of the five known for this issue. The obverse is gray and moss-green, while the reverse displays much central brilliance with a russet-toned margin. Minimally abraded for the grade, the strike is typical for the issue with the usually seen softness on the eagle's left (facing) wingtip. NGC ID# 23R6, PCGS# 5297

3637 1875-S MS63 PCGS. BF-15R. The top of a 5 appears in the dentils below the 7. A die crack near stars 9 and 10 confirm the remarriage. The mintmark is slightly repunched. Minor grazes appear throughout this frosted Select example with faint blushes of gold. Well-struck type coin. NGC ID# 23R7, PCGS# 5298

3638 1875-S MS65 NGC. BF-14, R.1. Satiny and lustrous with a good strike save for minor weakness on the right-hand stars. Flecks of russet border toning accent champagne-tinted surfaces. No distracting abrasions are seen, and higher-grade 1875-S twenty cent pieces are scarce. NGC ID# 23R7, PCGS# 5298

3639 1876 MS63 NGC. CAC. BF-2, R.2. A die line in the drapery above the 6 identifies the most available die marriage for both proofs and circulation strikes. This needle-sharp Select Uncirculated example presents glimmering mint luster over attractive, brilliant surfaces. Only 14,750 pieces struck. NGC ID# 23R8, PCGS# 5299

PROOF TWENTY CENT PIECES

3640 1875 PR63 NGC. BF-1, R.1. The right side of the 1 is right of the shield point. This die was used to strike the majority of both proofs and circulation strikes during the denomination's first year. The Mint produced 38,500 examples for commercial use and 1,200 specimens for collectors. This is a lightly toned Select proof with small, undistracting contact marks. Both sides are needle-sharp, as expected. NGC ID# 27GZ, PCGS# 5303

3641 1876 PR62 PCGS. CAC. BF-3, R.4. The diamond-shaped gouge left of the L in LIBERTY confirms the die pair for this proof twenty cent piece. A pale dusky overlay covers the obverse, while the reverse remains brilliant. A few wispy lines in the right obverse field limit the grade. Only 1,150 proofs were struck in 1876. NGC ID# 27H3, PCGS# 5304

BUST QUARTERS

3642 1828 B-1, R.1, AU53 PCGS. Tompkins Die State 1/1. The 2 in the denomination has a curled base, and E in STATES is positioned over the B. This is the most often seen die marriage for 1828 (102,000 coins struck in all). Deep antique patina on the obverse lightens to gold and pale blue on the reverse. A sharply detailed Capped Bust quarter despite brief circulation. Population (all 1828 varieties combined): 13 in 53, 65 finer (10/17). NGC ID# 23RV, PCGS# 38976 Base PCGS# 5342

3643 1834 O Over F in OF, B-1, FS-901, R.1, MS61 NGC. OF is obviously repunched, as is the first A in AMERICA and the eagle's left (facing) claw. This nicely struck and moderately abraded example has golden-brown and navy-blue peripheral patina.
Ex: *Houston Money Show (Heritage, 12/2014)*, lot 3969. NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

3644 1836 B-2, R.2, MS62 PCGS. Tompkins Die State 7/4, terminal. Both dies are shattered, and heavy clash marks appear at Liberty's ear. The strike is sharp in the centers but incomplete on several peripheral stars. Lovely lavender-gold, mint-green, and blue-gray hues adorn the satiny surfaces. Population (all varieties included): 9 in 62, 17 finer (11/17). NGC ID# 23S3, PCGS# 39006 Base PCGS# 5355

SEATED QUARTERS

1838 Seated Liberty Quarter, MS63
First-Year No Drapery Example

3645 1838 No Drapery MS63 NGC. Briggs 1-A. Open Claws Reverse, the usually seen variety among first-year 1838 No Drapery quarters. Thin antique patina graces each side of this Select representative. Frosty luster percolates through the thin overlay, a common trait among Uncirculated survivors. The central motifs are sharp, while the border elements are incomplete. That includes OF AMERICA, where striations from the draw bench are visible. Census: 23 in 63 (2 in 63+, 1 in 63★), 33 finer (10/17). NGC ID# 23SE, PCGS# 5391

3646 1853 Arrows and Rays MS62 NGC. A nice Mint State type coin with sharp design elements and satiny, gold-tinted mint luster. No major abrasions are seen. Both sides have prominent die cracks, the strongest being a forked crack that stretches from a rim cud below the 53 in the date, through the arrowhead, to the rim in two places, near star 13 and the foot support. NGC ID# 23U4, PCGS# 5426

3647 1854-O Arrows Huge O Fine 12 PCGS. This attractive circulated example shows smooth medium-gray surfaces with deeper accents in the protected regions of the fields. The rims are complete. An appealing collector-grade example of this famous No Motto variety. Population: 13 in 12, 56 finer (10/17). NGC ID# 23U7, PCGS# 5434

**1857 Seated Quarter, Rim-Toned MS66
Ex: Gene Gardner**

3648 1857 MS66 PCGS. CAC. The large mintage of 1857 Seated quarters may be partially explainable by the withdrawal of the “old copper” cents and large cents beginning in February-March 1857, via legislation that also introduced nickel as a coinage material; but every Seated silver denomination, save the silver dollar, saw large mintages in this year. This lovely Premium Gem boasts untuned silver-white centers bounded by rose-cinnamon and blue-green rim toning over surfaces that are well-struck and nicely preserved for the grade. A great type-coin representative of this relatively available date. Population: 41 in 66 (6 in 66+), 10 finer. CAC: 13 in 66, 10 finer (10/17).

Ex: Bowers and Merena (3/2002), lot 2246; Gene Gardner; Gardner Collection, Part IV (Heritage, 10/2015), lot 98435, as MS66 NGC; Central States Signature (Heritage, 4/2016), lot 3339, as MS66 PCGS. NGC ID# 23TE, PCGS# 5442

**1859 Seated Quarter, Sharp MS65
Struck From the Proof Dies**

3649 1859 MS65 NGC. Briggs 1-A, the proof dies, showing the ball of 5 centered between dentils and various unfinished details in the shield lines on the reverse. This is a luminous example of one of the few No Motto quarter issues to be available in Gem condition, albeit as a rarity. The surfaces are well-defined all around, even on the obverse stars that are typically found weak. A few old marks are covered over in charming silver-blue, slate, and rose-gray patina. Census: 7 in 65, 1 finer (10/17). NGC ID# 23TL, PCGS# 5448

3650 1876-S MS66 NGC. Ex: Pittman. Type Two Reverse. The warm rose-gold tints that drape the lustrous obverse show considerable blue intermixed on the reverse. Excellent design definition and preservation with eye appeal to match both. Tied for numerically finest in the combined certified population (10/17). Ex: John Jay Pittman Collection, Part Two (Akers, 5/1998), lot 1357 NGC ID# 23V4, PCGS# 5503

**1882 Seated Liberty Quarter, MS67 ★
Vivid, Multicolor Toning**

3651 1882 MS67 ★ NGC. Both sides of this impeccably preserved Superb Gem are blanketed in vivid shades of sea-green, russet, and violet toning, with deeply mirrored fields underneath. The design elements are sharply detailed in most areas, but some of the star centers are a little flat. Overall eye appeal is tremendous. Census: 10 in 67 (1 in 67★), 5 finer (10/17). NGC ID# 23VE, PCGS# 5514

PROOF SEATED QUARTERS

**1865 Quarter Dollar, PR65
Final No Motto Issue**

3652 1865 PR65 PCGS. Both sides of this Gem proof exhibit dappled gold and iridescent toning, with splashes of cobalt-blue on the reverse. A mere 500 proofs were coined in 1865, the final year of issue for the No Motto design in the Seated Liberty quarter series. Obvious cameo contrast is clearly evident, although masked by the original toning that does not permit a Cameo designation. Population: 8 in 65, 31 finer, including Cameo and Deep Cameo examples (10/17). NGC ID# 23WT, PCGS# 5561

3653 1866 Motto PR64+ Cameo PCGS. Briggs 2-B. The 1866 Seated Liberty quarter with the motto IN GOD WE TRUST claims a mintage of 725 pieces, all struck from a single pair of dies. This Plus-graded Choice example is sharply detailed throughout, with reflective fields and well-preserved surfaces that are enhanced by vivid shades of burnt-orange toning. Strong cameo contrast is evident. Population: 10 in 64 (1 in 64+) Cameo, 12 finer (10/17). NGC ID# 23WX, PCGS# 85565

3654 1866 Motto PR65 Cameo PCGS. Briggs 2-B. The motto IN GOD WE TRUST was added to the design of the Seated Liberty quarter in 1866 and a modest proof mintage of 725 pieces was accomplished. This spectacular Gem exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. The surfaces are well-preserved, with hints of sea-green toning at the peripheries. Population: 6 in 65 Cameo, 6 finer (10/17). NGC ID# 23WX, PCGS# 85565

3655 1869 PR64 PCGS. Briggs 2-B. A wide stripe of golden-tan patina horizontally bisects the obverse and confirms the originality of this nicely mirrored example. The surfaces do not reveal any mentionable hairlines. The Philadelphia Mint struck only 16,600 Seated quarters in 1869, and the 600 proofs are often used to represent this issue in date sets. Ex: FUN Bullet Sale (Heritage, 1/2004), lot 337. NGC ID# 29SH, PCGS# 5568

- 3656 1875 PR64 Cameo PCGS. CAC. Briggs 5-F.** The 1875 proof Seated Liberty quarter claims a mintage of 630 pieces and some of them may have been melted as unsold. Larry Briggs believes the 1875 is the most elusive proof quarter of the 1870s and 1880s. This delightful Choice specimen offers sharply detailed design elements and deeply reflective fields with outstanding cameo contrast. The surfaces are well-preserved and brilliant. Population: 19 in 64 Cameo, 11 finer. CAC: 4 in 64, 5 finer (10/17). NGC ID# 23X7, PCGS# 85576
- 3657 1876 PR66 NGC.** Type Two Reverse. This impressive Premium Gem exhibits razor-sharp definition on all design elements. The fields are flashy and the surfaces are unblemished by contact. Caramel-gold toning enriches the borders. Census: 16 in 66, 5 finer (10/17). NGC ID# 3TWJ, PCGS# 5577
- 3658 1883 PR66 PCGS. Briggs 1-A, Flynn-MPD-001.** Attractive, deeply mirrored steel-blue and peach-gold shades emerge when this Premium Gem proof is viewed at an angle. The reverse is equally mirrored while toned in an even slate-blue that reveals ivory-gold hues in light. The sharply struck, frosted motifs are consistent with the overall high quality. As always, an errant 8 is tucked low in the dentils beneath the primary date. NGC ID# 23XF, PCGS# 5584
- 3659 1884 PR66 PCGS.** Pumpkin-gold centers cede to ocean-blue margins. The strike is full, and the mirrored fields exude eye appeal. The eagle and Liberty's shield are frosty, though no Cameo designation is assigned. One of only 875 proofs produced. Population: 27 in 66 (1 in 66+), 9 finer (10/17). NGC ID# 3TWH, PCGS# 5585
- 3660 1890 PR64 Cameo PCGS.** Frosted devices appear to glide over the deep watery fields of this near-Gem Cameo quarter. Barely discernible milky-tan patina resides in the fields of both sides, helping to further accentuate the stone-white motifs, and a sharp strike brings out excellent design detail. A few unobtrusive handling marks in the obverse fields define the grade. Population: 12 in 64 (1 in 64+) Cameo, 14 finer (10/17).
Ex: Long Beach Signature (Heritage, 5/2007), lot 904. NGC ID# 27US, PCGS# 85591
- 3665 1908-S MS64 PCGS. CAC.** This flashy and brilliant near-Gem offers spectacular eye appeal. The strike is nearly full with excellent definition on Liberty's hair, the reverse shield, and the arrow fletchings. High-end for the MS64 designation, only a minute graze on Liberty's cheek precludes an even finer grade.
Ex: ANA Signature (Heritage, 8/2014), lot 3614. NGC ID# 23ZF, PCGS# 5652
- 3666 1912 MS66 PCGS.** This generally available Philadelphia issue is conditionally rare in MS66 and prohibitively so any finer. The present example is frosty and well-preserved with russet and olive-gold toning. Several obverse stars and the right shield corner on the reverse show strike weakness, although the eagle's talons are well-defined. Population: 32 in 66 (4 in 66+), 2 finer (10/17). NGC ID# 23ZS, PCGS# 5662
- 3667 1913-S Good 6 PCGS.** A pleasing collector-grade example of this key Barber quarter issue, showing smooth golden-gray patina and a clear mintmark. The L and Y in LIBERTY are discernible. The obverse rim is bold, while the reverse rim is a trifle weak from 2 to 5 o'clock. Only 40,000 1913-S quarters were struck. NGC ID# 23ZW, PCGS# 5666
- 3668 1913-S VG10 PCGS.** The LI and Y in LIBERTY are clear, and portions of the B and T are visible. This circulated collector-grade example displays sharp borders and modest interior detail. A hint of olive-gold tinting appears on otherwise battleship-gray surfaces. Eye appeal is pleasing. NGC ID# 23ZW, PCGS# 5666
- 3669 1916-D MS67 NGC.** A spectacular Superb Gem from the final year of the design, with well-detailed design elements and vibrant mint luster, under vivid shades of champagne-gold, violet, and amber toning. Census: 15 in 67 (2 in 67+, 2 in 67★), 1 finer (10/17). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

- 3670 1901 PR66 NGC.** A boldly struck proof with mirrored fields and distinctive toning. The obverse displays amber and olive splashes amid champagne surfaces, while the reverse has deeper lavender and plum color. The 1901 is a popular 20th century type coin. Census: 37 in 66 (2 in 66+), 33 finer (10/17).
From The Rev. Dr. James G. K. McClure Collection. NGC ID# 242G, PCGS# 5687

1910 Quarter, PR67+ Cameo Bold Toning

- 3661 1892 MS67 NGC.** Type Two Reverse. Few issues in the Barber quarter series are as popular for type purposes as the 1892, struck to the extent of 8.2 million coins with a virtually unparalleled survivorship in Gem condition and higher. This fantastic Superb Gem quarter shows dusky gray patina over the obverse with daubs of multicolor toning. Brilliant centers on the reverse turn to wonderful rainbow shades around the edges. Razor-sharp definition, especially on the talons, fletchings, and the shield lines, is a further draw. Census: 24 in 67 (2 in 67+, 2 in 67★), 6 finer (10/17). NGC ID# 23XT, PCGS# 5601
- 3662 1897-O MS64 PCGS.** This near-Gem is remarkably sharp for a New Orleans issue of this period, showing no mentionable weakness. The obverse is notably prooflike, while the reverse displays satiny luster. Both sides are brilliant and free of major abrasions. Population: 15 in 64, 38 finer (10/17). NGC ID# 23YB, PCGS# 5617
- 3663 1899-O MS65 NGC.** Blatant eye appeal is the hallmark of this lovely Gem 1899-O Barber quarter, an issue that is far more elusive in this grade than generally realized. Rose, wine, violet, and lilac shades intermingle to delightful effect on surfaces that show no mentionable abrasions other than a couple of ticks on the shield. Even the problematic right shield corner is close to a full strike. Census: 10 in 65, 1 finer (10/17). NGC ID# 23YH, PCGS# 5623
- 3664 1901-S — Scratch — PCGS Genuine. AG Details.** Light gray surfaces are generally smooth and appealing for the AG grade level, save for a few old, vertical scratches on the reverse eagle that prevent a numeric grade from PCGS. The obverse rims are complete, and the reverse border only slightly blends with the peripheral legends. A still-pleasing collectible example of this key Barber quarter issue.
- 3671 1910 PR67+ Cameo NGC.** A high-end Cameo example, this Superb Gem proof 1910 quarter displays creamy-gold toning over much of each side, but with deeper violet, amber, and aquamarine hues in the fields which aid in the cameo contrast. The eagle's right (facing) talons show a touch of the usual weakness, but the remaining design elements are sharp. Census: 21 in 67 Cameo (2 in 67+, 2 in 67★), 12 finer (10/17). NGC ID# 254Y, PCGS# 85696
- 3672 1911 PR65 Cameo PCGS. CAC.** Strong Cameo contrast is unexpected for a 1911 proof quarter, but this Gem example has it. Smooth, glassy-mirrored surfaces turn jet-black at certain angles, while the frosted devices appear frost-white and elevated against the fields. Just 543 pieces were struck as proofs, and relatively few of those have earned Cameo designation — fewer still with CAC endorsement. NGC ID# 242T, PCGS# 85697

- 3673 1911 PR66 Cameo NGC.** This moderately contrasted Premium Gem proof displays sharp detail and untoned, attractive surfaces. Cameos are elusive this fine, and only a handful of Ultra Cameos are reported at NGC, all numerically finer than the present Cameo. Census: 14 in 66 Cameo (1 in 66+), 32 finer (including Ultra Cameos) (10/17). NGC ID# 242T, PCGS# 85697

STANDING LIBERTY QUARTERS

- 3674 1917-D Type One MS65 Full Head PCGS.** The barest trace of light champagne toning warms the frosty, brilliant surfaces of this Gem Full Head example. The strike is sharp on the head and nearly full on the outer shield rim. A tiny tick above Liberty's knee and in the shield covering above WE are the only mentionable abrasions. NGC ID# 2432, PCGS# 5709
- 3675 1918-D MS64 Full Head PCGS.** An attractive Choice specimen of this popular date, with well-detailed design elements that show full Head definition, with just a little softness on the shield rivets. The lustrous surfaces are well-preserved, with a few highlights of pale gold and lavender toning. NGC ID# 3TWU, PCGS# 5723
- 3676 1919-S AU58 PCGS. CAC.** Although weak on Liberty's head, this olive-gray near-Mint 1919-S quarter shows above-average definition on the shield rivets and has sharp date numerals. Localized wear points appear on the breast, knee, and high point of the shield. Satiny luster remains in the fields on this entirely original semikey Standing Liberty quarter. NGC ID# 243D, PCGS# 5732
- 3677 1920 MS65 Full Head PCGS.** Liberty's head and the shield rivets are sharp, as is the leading edge of the eagle's left (facing) wing. The date numerals are flat but readable. Satiny mint luster shows a delicate champagne hue with daubs of olive-russet toning in the margins. A short mark near the eagle's tailfeathers is the only abrasion of note. NGC ID# 243E, PCGS# 5735
- 3678 1921 MS64 PCGS.** Lavender-tinted russet toning appears on both sides of this near-Gem in varying quantities, with much of the central areas of the coin showing traditional champagne color. No major abrasions are seen. The strike is typical of the issue, sharp in the centers and weak on Liberty's temple. NGC ID# 243H, PCGS# 5740

1921 Quarter, MS64 Full Head Light Golden Toning

- 3679 1921 MS64 Full Head PCGS.** This is a pleasing representative of a challenging Philadelphia issue. Low mintages characterized the Mint's production of both quarters and half dollars in 1921. No branch mint quarters were struck in 1921 (and no quarters at all in 1922). As a result, collectors must vie for a limited number of sharp P-Mint examples. Although Full Head coins are available and the shield is generally sharp, some coins are weak in other areas such as the 1s in the date and the lower obverse stars. This nearly brilliant 1921 is well-produced in those areas and sharp on the reverse, too. A faint golden sheen does not diminish the bright silver luster. Population: 76 in 64 Full Head, 83 finer (10/17). NGC ID# 243H, PCGS# 5741

- 3680 1924-D MS64 Full Head PCGS.** Sharply impressed representatives of this branch mint issue are elusive in all Mint State grades. A pleasing near-Gem, this coin exhibits a satiny sheen with speckled russet toning near the upper obverse rim. A few die cracks (as struck) are noticed around Liberty's head. The top of the date numeral blend into the pedestal, as usual. Ex: *Central States Signature* (Heritage, 4/2001), lot 6456. NGC ID# 243M, PCGS# 5749

1926-S Quarter Dollar, MS66 Luminous Original Luster

- 3681 1926-S MS66 PCGS.** This is one of the most eye-catching 1926-S quarter dollars that we have seen in recent years, showing luminous frosty mint luster and the most delicate tint of light champagne toning. Small tinges of olive and lavender color grace the peripheries. Liberty's head is about 70% defined and the toes are separated, although the shield rivets show the virtually unavoidable weakness. In terms of preservation, the obverse alone would easily grade MS67, were there not a few tiny marks in the right reverse field that hinder such a designation. Population: 23 in 66 (1 in 66+), 1 finer (10/17). NGC ID# 4462, PCGS# 5758
- 3682 1927-D MS64 Full Head PCGS. CAC.** This satiny near-Gem displays brilliant luster and has no major abrasions. Liberty's head exhibits a complete hairline, although traditional weakness is seen on the shield rivets, the bottom two stars and Liberty's toes, and the leading edge of the eagle's left (facing) wing. NGC ID# 243V, PCGS# 5763
- 3683 1927-D MS65 Full Head PCGS.** The 1927-D Standing Liberty quarter claims a low-mintage of 976,000 pieces and the issue is underrated in high grade, with the Full Head designation. This well-detailed Gem shows Full Head definition, but just a touch of the usual softness is seen on the shield rivets. The well-preserved brilliant surfaces radiate vibrant mint luster throughout. PCGS has graded 20 numerically finer Full Head examples (10/17). NGC ID# 243V, PCGS# 5763
- 3684 1930 MS67 Full Head PCGS.** Frosty original mint luster is devoid of abrasions and yields a hint of delicate iridescence. Liberty's head and the vertical shield stripes are sharp, as well as the toes and stars; the shield rivets and the leading edge of the eagle's left (facing) wing are slightly incomplete. This type-coin issue is scarce so well preserved. Population: 49 in 67 (2 in 67+) Full Head, 1 finer (10/17). NGC ID# 2445, PCGS# 5779

WASHINGTON QUARTERS

- 3685 1932-D MS63 PCGS.** The 1932-D is far scarcer than the 1932-S in MS63 grade or finer, making it the series key in those grades. This Select Uncirculated example displays an original skin of lilac-gray toning and adds olive-gray accents on the reverse. Silver luster resides fully beneath the comprehensive patina. The strike is sharp throughout both sides. NGC ID# 2448, PCGS# 5791
- 3686 1932-D MS63 PCGS. CAC.** A hint of delicate iridescence graces the satiny, lustrous surfaces of this CAC-approved Mint State example. The strike is sharp, and only a few light abrasions limit the grade. The 1932-D is a favorite key date in the Washington quarter series. NGC ID# 2448, PCGS# 5791
- 3687 1932-S MS64 PCGS.** A hint of champagne toning graces the satiny surfaces of this near-Gem. Sharp design elements complement clean fields, although a few high-point contact marks on the reverse limit the grade. The 1932-S is available in this grade but elusive finer. NGC ID# 2449, PCGS# 5792

1942-D Washington Quarter, MS68
Among the Five Finest Examples Certified

- 3688 1942-D MS68 NGC. The immaculate surfaces of this magnificent Washington quarter display vivid shades of green, russet, and crimson toning. The design elements are sharply detailed throughout, and vibrant mint luster adds to the incredible eye appeal. Census: 3 in 68 (1 in 68★), 0 finer (10/17). NGC ID# 2453, PCGS# 5818

- 3689 1943-S Doubled Die Obverse, FS-101, MS65 PCGS. The *Cherrypicker's Guide* explains that this "dramatic double die has long been known to collectors," and interest is always strong. The date, motto, LIBERTY, and designer's initials are broadly doubled. Each side of this brilliant Gem displays frosty mint luster and a few tiny grazes. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

- 3690 1960-D MS67 PCGS. This is a must-have Registry coin with brilliant centers and colorful border toning. Shades include magenta, crimson, and orange around the obverse, and dappled gunmetal-blue and russet around the lower reverse. Population: 14 in 67, 0 finer (10/17). NGC ID# 3TEX, PCGS# 5869

PROOF WASHINGTON QUARTERS

- 3691 1939 PR68 NGC. Dusky tan-gold overtones accent pastel coloration in the fields of this top-grade proof. Fully rendered design elements and virtually flawless surfaces complete the eye appeal. The 1939 proof is rare in this, the finest grade achieved at either leading service. Census: 21 in 68, 0 finer (10/17). NGC ID# 27HS, PCGS# 5978

1957 Quarter, PR69 Ultra Cameo
Obvious Registry Set Contender

- 3692 1957 PR69 Ultra Cameo NGC. Registry Set enthusiasts will find plenty to like with this near-perfect 1957 Ultra Cameo quarter. Blazing-white and entirely untoned, the jet-black fields offer maximum contrast with frosted, raised devices. The mirroring is profoundly deep and seemingly flawless. Census: 12 in 69 Ultra Cameo (1 in 69★), 0 finer (10/17). NGC ID# 4C6M, PCGS# 95989

1971-S Quarter, PR69 Deep Cameo
None Graded Higher

- 3693 1971-S PR69 Deep Cameo PCGS. A mintage of 3.2 million proofs fails to convey the conditional rarity of 1971-S quarter with Deep Cameo contrast, especially at this unsurpassed grade level. Blushes of red-gold and blue-green color accent the profoundly contrasted white-on-black surfaces. Population: 12 in 69 Deep Cameo, 0 finer (10/17). NGC ID# 27JB, PCGS# 96003

EARLY HALF DOLLARS

1802 Half Dollar, Lightly Toned VF20
O-101, T-1, Low-Mintage Issue

- 3694 1802 O-101, T-1, R.3, VF20 PCGS. A problem-free example with stone-gray surfaces that exhibit faint traces of tan toning. Only a single die marriage is known for this challenging date. Bullion depositors of the day preferred payment in silver dollars, since fewer coins needed to be counted to pay out a given amount. Ex: *Houston Signature* (Heritage, 12/2008), lot 676; *Long Beach Signature* (Heritage, 9/2009), lot 718. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

- 3695 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, XF45 NGC. Delicate aquamarine, lilac-red, and straw-gold toning visits the margins of this nicely defined early half dollar. Pockets of luster are plentiful, although we note thin marks on Liberty's neck and the field above her chest. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

**1806/5 Draped Bust Half, AU53
O-102, Luster Remaining**

- 3696** 1806/5 O-102, T-7, High R.3, AU53 NGC. The top of the underdigit 5 is visible near the top of the 6. The stars are large, and star 12 is recut with a broken tip near the highest point of star 13. The 0 in the date shows recutting. The reverse has a bold die line running right from the shield border. The lowest purported berry of the six, "without a stem," is unseen on this piece due to die clashing. AME are all joined solidly at their bases. Ample luster is visible in the recesses of this AU53 specimen, and light tan patina concentrates at the margins. The design elements are well-defined, and a few minor obverse circulation marks do not distract. A nice, problem-free Draped Bust half. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

**1806 O-109 Half Dollar, AU50
Pointed 6, No Stem, Early Die State**

- 3697** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU50 PCGS. Apparently distracted, the engraver left off the stem extending through the eagle's claw on this reverse die, proving the stem was one of the elements punched into the working dies by hand. Considerable luster remains on both sides of this pleasing About Uncirculated specimen. Pale-gray and gold toning covers both sides with splashes of iridescence. Struck from an early die stage — slightly reflective in sheltered areas, without the stars drawn to the edge and lacking the late-developing radial die crack through star 12 to the neck.

Ex: ANA Signature (Heritage, 10/2012), lot 4297; Central States Signature (Heritage, 4/2014), lot 4329. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

- 3698** 1806 6 Over Inverted 6, O-112, T-12, R.4, VF35 NGC. Tompkins Die Stage 2/1. A heavy vertical crack travels through the 8 up through the portrait. Another runs from the rim to star 11 and into the field. Once thought to be a 9, researchers have determined the underdigit is an errant inverted 6. All design elements maintain good detail despite considerable friction circulation. Steel-gray patina covers this early half dollar. NGC ID# CZEY, PCGS# 408871 Base PCGS# 6078

**1806 O-116, T-20 Half Dollar, AU50
The Usual Late Die State**

- 3699** 1806 Pointed 6, Stem, O-116, T-20, R.3, AU50 PCGS. Tompkins Die State 3/5. This richly toned, About Uncirculated example represents the normally encountered die state for the O-116 die pair. Both dies show lengthy peripheral die cracks, while the reverse has a mysterious row of raised triangular segments among the upper field stars. The current piece shows an average strike with moderate wear and traces of luster beneath golden-brown and pale-blue toning. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

- 3700** 1807 Draped Bust, O-105, T-4, R.1, AU50 ANACS. Tompkins Die State 2+1/2. Richly toned in shades of reddish-tan, blue, and walnut-brown with sea-green hues at the borders, this Overton-105 shows few marks of any kind. The coin is well-struck from an early-to-middle die state, defined by die clashing and light die cracks on both sides. Minor high point wear on the devices accompanies soft mint luster at the margins. There are no adjustment marks. Housed in a small, early generation ANACS holder. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

BUST HALF DOLLARS

- 3701** 1810 O-104a, R.3, AU58 PCGS. CAC. A strong die crack between D of UNITED and ST of STATES defines the late die stage. This near-Mint example displays bright silver luster beneath pale, almond-gold toning and cloud-gray accents. A touch of wear is visible on the sharply struck motifs. The O-104 die pair is keyed by a smudgelike die defect lump at the left upper edge of the shield. NGC ID# 24ET, PCGS# 39409 Base PCGS# 6095

- 3702** 1811 Large 8, O-104a, R.1, AU55 PCGS. CAC. Three major die cracks define the late die stage Overton-104a, the most dramatic of which nearly completely encircles the portrait from below the bust tip to the outer hair, through the right field, across the cap, to the edge above star 7. A radial crack through star 2 terminates in the left field, and yet another curved crack travels through stars 2 to 5 and ends at the forecurl. Cracked die or not, this Choice AU example is extremely sharp with barely any wear on the curls, cap, or drapery folds. Lovely pearl-gray surfaces are largely mark-free and attractive. NGC ID# 24EU, PCGS# 39426 Base PCGS# 6096

- 3703** 1820 Curl Base 2, Small Date, O-103a, R.2, AU58 NGC. A sharp die crack runs from the edge near star 11 to the top of 1 in the date to define the late die stage O-103a. The die marriage is the only 1820 variety with a non-overdated Small Date with a Curl Base 2. This still-lustrous, lilac-gray example with pale-gold at the border is sharply struck and lightly toned. A number of deep-gray spots and build-up are scattered across the portrait and several of the obverse stars. NGC ID# 24FD, PCGS# 39564 Base PCGS# 6121

- 3704** 1821 O-105a, R.1, AU58 PCGS. This amber-gold and gray piece is quite close to Mint State, with a sharp strike and essentially full luster remaining. The reverse adds notes of forest green. The later die state of O-105a shows a crack extending left and right on the reverse from TAT. NGC ID# 24FF, PCGS# 39583 Base PCGS# 6128

3705 1824 O-107, R.2, AU50 PCGS. Star 7 nearly touches the front of the cap, and crossbar 5 of the reverse shield ends before reaching the shield edge. A prominent dot fills the open space — likely a centering dot, since its position appears to be 16.25 mm from the edge along the diameter from top to bottom and left to right. Old-silver toning covers both sides, deepening near the raised elements. Marks are few on the sharply struck surfaces, while eye appeal is strong. NGC ID# 35ES, PCGS# 39628 Base PCGS# 6137

3706 1824/4 O-109, R.2, AU58 NGC. In addition to recutting on the diagonal of 4 in the date, O-109 shows the arrowheads joined together and RI of AMERICA joined at the base by a die line; C is recut at its outer curve. Only light marks and faint wear exist from brief circulation, while copper-orange luster remains beneath brownish-blue patina on this attractive near-Mint example. NGC ID# 24FK, PCGS# 39643 Base PCGS# 6140

3707 1826 O-118a, R.1, MS63 PCGS. This sharply struck and lustrous Select Mint State example of O-118a shows the diagnostic die cracks that traverse the top of the reverse legend. The stars are mostly well-formed and snug to the milling. The first A in AMERICA is higher at its base than M and TAT in STATES are nearly joined at the bottom. Blue and amber-gold toning provides strong eye appeal, and marks are absent aside from a few tiny ticks. The variety is readily available in most grades, but seldom so nice at the MS63 level. NGC ID# 24FM, PCGS# 39692 Base PCGS# 6143

3708 1827/6 O-101, R.2, AU58 PCGS. A single overdated obverse die was paired with three different reverse dies. This variety has the serif of the C in 50 C recut, a diagnostic attribution feature. A trace of high-point rub is noted on each side of this still highly lustrous example that exhibits light gold toning. NGC ID# 24FP, PCGS# 39751 Base PCGS# 6147

3709 1827 Square Base 2, O-104, R.1, MS61 NGC. A curved line extends upward from the left side of the lowest leaf pair, a feature that is diagnostic for this die marriage. This frosty Mint State half dollar has lustrous light-gray surfaces with pleasing peripheral iridescence. NGC ID# 24FN, PCGS# 39696 Base PCGS# 6144

3710 1827 Square Base 2, O-112, R.3, MS61 PCGS. Intermittent shades of slate-gray accent the lustrous, silver-gray surfaces of this scarcer Overton-112 variety. A sharply struck example, with all of the obverse stars showing full centers and only slightly drawn to the rims. A diagnostic die line to the right of the shield apex helps confirm the variety, as does joined bases of AT in STATES and the bases of TED in UNITED which are close to touching. The C in 50C is overly large. NGC ID# 24FN, PCGS# 39705 Base PCGS# 6144

3711 1833 O-109, R.3, MS63 PCGS. A die line extending off the foot of the I in AMERICA toward the C identifies this collectible variety. Satiny luster is well-preserved with olive-gold toning on each side. PLURIBUS is weak and several right-hand stars are incompletely struck, but the Liberty portrait is bold. NGC ID# 24FX, PCGS# 39897 Base PCGS# 6163

3712 1834 Small Date, Small Letters, O-109, R.1, MS62 NGC. Richly toned in silver-gray and autumn-brown shades with golden underglow, this smooth and unabraded Mint State half approaches the Select level with nearly mark-free surfaces and a deep, sharp strike. All but star 8 have their centers sharply defined, with diagnostic recutting clearly visible on stars 9 and 10. Nice eye appeal. NGC ID# 24FY, PCGS# 39913 Base PCGS# 6166

REEDED EDGE HALF DOLLARS

3713 1837 GR-7, R.2, MS62 PCGS. The Inverted G variety where the C in AMERICA looks like an inverted G. Fairly well struck for the variety, with the reverse rotated 45 degrees clockwise. Although not a rare variety, this one is extremely popular with collectors, and it is the only instance we know of with this particular die cutting blunder. This lovely Mint State example has satiny silver surfaces with brilliant luster beneath rich, golden toning. PCGS# 531053 Base PCGS# 6176

3714 1837 GR-12, R.2, MS62 PCGS. Numerous diagnostic die cracks occur on each side. This variety usually comes well-struck, as evidenced here. The stars, portrait, and eagle are boldly detailed. Appealing shades of blue, violet, and gold lightly drape the margins, while the centers maintain partial brilliance. Several marks occur on the cheek and above the eagle's head. NGC ID# 24G4, PCGS# 531058 Base PCGS# 6176

1837 Reeded Edge Half, MS64 GR-15, Light Golden Toning

3715 1837 GR-15, R.3, MS64 NGC. A fairly scarce die variety interesting for its four cracks on the lower right obverse. A lustrous golden near-Gem. Well-struck and uncommonly smooth. A railroad rim is present on the right obverse, likely caused by a slightly misaligned obverse die. 1837 is the only readily collectible issue of the two-year 50 CENTS type, struck with a steam-powered press instead of the screw press used in prior years. Ex: Beverly Hills Signature (Heritage, 11/2014), lot 3725. PCGS# 531061 Base PCGS# 6176

3716 1837 GR-19, R.3, MS62 PCGS. A die line from the neck into the field above the right (facing) wing and extension of crossbars from the shield into the left wing help identify this scarcer variety. A reddish hue lies beneath dappled, olive-gray color on the obverse of the present richly toned example. The reverse displays less red and more gray with bright silver sheen peeking through. Sharply struck although from worn dies, this lustrous and original coin shows few marks and plentiful eye appeal. PCGS# 531067 Base PCGS# 6176

3717 1837 GR-22, R.2, MS61 NGC. CAC. Sea-green, pearl-gray, and yellow-gold endow this lightly abraded and satiny Bust half. The strike is sharp except on the lower reverse and upper obverse, from an advanced die stage. The 50 CENTS reverse is a two-year type, made more desirable by the scarcity of its low-mintage, first-year 1836 counterpart. Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3706. NGC ID# 24G4, PCGS# 531071 Base PCGS# 6176

SEATED HALF DOLLARS

3718 1839 No Drapery, WB-101, XF45 NGC. Clash marks below Liberty's elbow should not be mistaken for drapery folds on this No Drapery coin. Pleasing olive-gray patina with golden accents appears on each side, and the devices are well-detailed. Scattered abrasions accompany the grade. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

1839 No Drapery Half, AU55
WB-101, Scarce One-Year Type

- 3719** 1839 No Drapery, WB-101, Die Pair 2, R.3, AU55 PCGS. A faint, diagonal die line in the lower portion of the shield is diagnostic of the reverse die, as are several vertical shield lines that extend into the feathers below the shield point. The obverse is one of two that feature Christian Gobrecht's desired No Drapery design, with the rock close to Star 1 and no drapery folds below the elbow. This is an untoned, silver-gray example with Choice About Uncirculated definition on the motifs. Tiny marks and faint field lines combine with light wear to determine the assigned grade. Population: 21 in 55, 55 finer (10/17). NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

- 3720** 1856-O WB-101, Die Pair 2, R.4, MS63+ PCGS. CAC. With a mintage of more than 2.6 millions coins, the 1856-O is seemingly a common date in the Seated Liberty series, but reality dictates that this issue is elusive in Mint State grades. This Select Mint State example is sharply struck with rich gold and iridescent toning over frosty luster. NGC ID# 24HY, PCGS# 572095 Base PCGS# 6288

- 3721** 1859 Type One Reverse, WB-101, MS64 PCGS. High-grade examples of this No Motto Philadelphia issue are scarce and underrated. A near-Gem, this piece is razor-sharp and frosty with original mint luster. Most of each side displays warm golden toning, and attractive blue and violet hues also appear around the borders. A few light contact marks do not detract. Population: 17 in 64, 23 finer (10/17). NGC ID# 24HY, PCGS# 572128 Base PCGS# 6296

- 3722** 1861-O CSA Obverse, FS-401, WB-102, Die Pair 11, R.3 — Shipwreck Effect — NGC. Ex: S.S. *Republic*. NGC notes saltwater etching on this piece, but in our opinion the coin has Uncirculated details. Moderate strike weakness is seen on Liberty's head and the adjacent stars. No toning is present. A radial die crack near Liberty's nose identifies the Confederate obverse die.

- 3723** 1861-O CSA Obverse, FS-401 (formerly FS-007), WB-102, Die Pair 11, R.3 — Shipwreck Effect — NGC. Ex: S.S. *Republic*. The tell-tale die crack in front of Liberty's profile is apparent on this coin, despite the saltwater etching of the surfaces. In our opinion, this piece has the details of an Uncirculated coin with the noted "shipwreck effect." Both sides exhibit sharp details, and the reverse luster is pleasantly satiny.

PROOF SEATED HALF DOLLARS

- 3724** 1866 Motto PR64 PCGS. This Choice proof is razor-sharp and deeply reflective beneath sea-green, lavender, and rose-gold toning. Scattered light marks account for the grade but pose no distraction due to the attractive patina. A popular type coin from the first year of the With Motto reverse. NGC ID# 27TZ, PCGS# 6424

1867 Half Dollar, PR64 Cameo
Low Proof Mintage

- 3725** 1867 PR64 Cameo PCGS. CAC. A survivor from a low proof mintage of only 625 pieces. Both sides of this Choice Cameo proof are fully brilliant and untuned, with outstanding design definition. A few wispy hairlines keep this lovely piece out of the Gem grade category. Population: 13 in 64 (1 in 64+) Cameo, 20 finer including Deep Cameo examples. CAC: 6 in 64, 7 finer (10/17). NGC ID# 27U2, PCGS# 86425

- 3726** 1869 PR64 PCGS. CAC. This beautifully toned near-Gem displays original gold, mint-green, blue, and lavender hues in concentric fashion. The strike is full, and deep reflectivity in the fields complements the toning. Rare with CAC endorsement. CAC: 7 in 64, 9 finer (11/17). NGC ID# 27U4, PCGS# 6427

- 3727** 1881 PR62 Cameo PCGS. Cameo proofs of this date are elusive. This example is well-contrasted and well-struck with hints of lavender toning in the peripheral fields. A few scattered hairlines determine the grade. Eye appeal is pleasing. NGC ID# 27UG, PCGS# 86442

1882 Half Dollar, PR66
Lovely Original Toning

- 3728** 1882 PR66 PCGS. While the various mints were concentrating on Morgan dollars throughout the 1880s, smaller denomination silver coins had extremely low mintages. For example, the Philadelphia Mint coined 5,500 half dollars in 1882, including 1,100 proofs and 4,400 circulation strikes. This Premium Gem proof exhibits deeply mirrored fields beneath thick sea-green and iridescent toning. Population: 21 in 66, 24 finer, including Cameo and Deep Cameo proofs (10/17). NGC ID# 27UH, PCGS# 6443

1882 Seated Half, Toned PR66

3729 1882 PR66 PCGS. The 1882 is one of the low-mintage issues from the 1880s, with 1,100 proofs struck out of the 5,500 total pieces produced. This richly toned coin has subtle iridescent olive-green and golden patination over each side, a full strike, and good eye appeal. A small luster graze in the obverse field fails to distract. Population: 21 in 66, 3 finer (10/17). NGC ID# 27UH, PCGS# 6443

3730 1888 PR65 PCGS. Sharply struck with frosty devices and deeply mirrored fields. A Cameo designation might have been achieved were it not for splashes of multicolor toning on each side. The reverse shows modest contrast even despite the patina. A few stray lines in the fields are hidden by the coloration. NGC ID# 27UP, PCGS# 6449

1889 Half Dollar, Sharp PR65 Brilliant Late-Series Proof

3731 1889 PR65 NGC. Circulation strikes were made in small numbers nearing the end of the Seated half series, but proof mintages remained normal. The 1889 proof count was 711 pieces struck. This example is mostly brilliant, save for a thin band of gold at the borders. The frosted central motifs show a sharp proof strike, while a few delicate lines exist on the glassy-mirrored fields. Census: 29 in 65, 23 finer (10/17). NGC ID# 27UR, PCGS# 6450

BARBER HALF DOLLARS

3732 1893-O MS64 PCGS. Dusky, minimally toned surfaces show areas of golden color over the right obverse field and within parts of the legend, but each side remains largely brilliant. Strike characteristics are typical of the New Orleans Mint, which produced nearly 1.4 million half dollars in the second year of the Barber series. Population: 44 in 64 (1 in 64+), 9 finer (10/17). NGC ID# 24LL, PCGS# 6466

3733 1898-O MS62 ANACS. From a small mintage of 874,000 pieces, this impressive MS62 specimen exhibits well-detailed design elements, with just a touch of the usual softness on the shield point and eagle's claw. The lustrous, lightly marked surfaces show highlights of sea-green and lavender color. NGC ID# 24M4, PCGS# 6481

1899 Barber Half Dollar, MS66 Vibrant Border Toning, Brilliant Centers

3734 1899 MS66 PCGS. The 1899 is a moderately available issue in the Barber half dollar series, but it is a formidable rarity in this quality. Eye appeal is exceptional, the result of colorful border toning that frames wholly brilliant, thickly frosted interiors. Fully struck on the forecurls, stars, talons, tailfeathers, and the right shield corner. The cheek and adjoining fields are devoid of contact. Population: 12 in 66 (2 in 66+), 2 finer (10/17). NGC ID# 24M6, PCGS# 6483

3735 1901-S AU55 PCGS. CAC. The 1901-S Barber half dollar is rare in Mint State, making this CAC-approved Choice AU representative highly appealing to the budget-conscious collector. The strike is bold, and high-point wear is minimal. Remnants of silver luster can be seen in the fields when rotated beneath a light. Light handling marks are consistent with the grade. NGC ID# 5EPB, PCGS# 6491

1902-O Half Dollar, MS64 Sharply Struck for the Issue

3736 1902-O MS64 PCGS. CAC. A ring of electric-blue, violet, and russet toning encircles the centers, which have a lovely dusting of gold patina. Satiny mint luster enhances the eye appeal of this sharply struck near-Gem specimen, with only the upper-right shield corner revealing the usual softness. A graze in the upper reverse field is the most noticeable mark. Population: 25 in 64 (1 in 64+), 8 finer. CAC: 6 in 64, 1 finer (10/17). NGC ID# 24MG, PCGS# 6493

3737 1903-O MS64 PCGS Secure. Violet-gray patina includes accents of blue, green, and gold. Perhaps the most impressive feature is the full strike seen on the forecurls, stars, shield corner, and fletchings. Small ticks are effectively concealed beneath the rich toning. A horizontal scratch over the lower reverse is on the holder, not the coin. Population: 47 in 64 (3 in 64+), 17 finer (10/17). NGC ID# 24MK, PCGS# 6496

3738 1907-D MS66 PCGS. The 1907-D is rarely offered in Premium Gem or finer condition. This colorfully toned example displays sun-gold, lavender, and ocean-blue over each side. Some strike weakness appears on the eagle's right (facing) talons and shoulder, as usual. Population: 13 in 66 (2 in 66+), 3 finer (10/17). NGC ID# 24MZ, PCGS# 6509

- 3739 1909 MS65 PCGS.** This frosted, lightly toned Gem example of the conditionally scarce 1909 Philadelphia half is attractive and well-made. More than 2.3 million pieces were struck, yet few of the coins reach the MS65 level and finer coins are very scarce. Splashes of deep lavender-gray toning accent the pearlescent-silver, subtly iridescent hues that cover most of the coin. The sharp strike makes us wonder why more of these simply do not exist. Population: 62 in 65, 15 finer (10/17). NGC ID# 24N8, PCGS# 6516

1910-S Barber Half, Toned MS65

- 3740 1910-S MS65 PCGS.** Surviving Mint State 1910-S half dollars are dispersed throughout many grades, but those in Gem or better condition are scarcely seen. The present coin displays frosty mint luster beneath gold, olive-green, and lavender-gray toning. The eagle's right (facing) talons and the fletchings show the only mentionable strike weakness. There are no significant abrasions. Population: 10 in 65, 19 finer (10/17). NGC ID# 24NC, PCGS# 6520

- 3741 1911-D MS65 NGC.** The highly lustrous surfaces of this D-mint Gem half dollar are visited by dapples of russet and electric-blue at the margins, and a well-directed strike leaves strong definition on the design elements, save for minor softness in the upper-right corner of the shield. A couple grade-consistent marks are noted on the cheek. Census: 15 in 65, 7 finer (10/17). NGC ID# 24NE, PCGS# 6522

1911-D Half Dollar, MS66 Reflective CAC-Approved Example

- 3742 1911-D MS66 PCGS. CAC.** The 1911-D Barber half dollar claims a low mintage of 695,080 pieces and few high-quality examples were saved by contemporary collectors. This remarkable Premium Gem exhibits well-detailed design elements with just a trace of the typical softness on the shield point and adjacent area on the wing. The well-preserved, all-brilliant surfaces show a mix of vibrant satiny mint luster and prooflike reflectivity. Population: 11 in 66 (1 in 66+), 3 finer. CAC: 3 in 66, 2 finer (10/17). NGC ID# 24NE, PCGS# 6522

- 3743 1912-D MS65 PCGS.** A sharply defined Denver Mint half dollar, this Gem Mint State piece has lovely deep-gold toning the softly lustrous, frosted-gray surfaces. The strike is sharp but not full, lacking a bit of definition at the right shield junction and talon. Scarce at this grade level, the 1912-D is very scarce in finer grades. Population: 65 in 65, 17 finer (10/17). NGC ID# 24NH, PCGS# 6525

- 3744 1913 MS62 NGC.** The 1913 Barber half dollar is a low-mintage issue (188,000 pieces struck) that is seldom seen in high grade. This attractive MS62 specimen is sharply detailed in most areas, but just a touch of the usual softness shows on the arrow fletchings. The lustrous surfaces are brilliant and lightly marked. Census: 12 in 62, 33 finer (10/17). NGC ID# 24NK, PCGS# 6527

PROOF BARBER HALF DOLLARS

1893 Barber Half Dollar, PR66 Cameo Lightly Toned, Bold Contrast

- 3745 1893 PR66 Cameo PCGS. CAC.** As the second proof date in the Barber half dollar series, the 1893 mintage of proofs dipped by 36% to just 792 pieces. The surfaces this Premium Gem example are delicately veiled in silver-gray and golden iridescence that cedes to brilliance in the open fields and over the frosted devices. Stark cameo contrast is readily evident at all angles, and the surfaces are free of even minor distractions. Both major grading services have seen few finer proofs in Cameo format. Housed in a previous generation blue label holder with barcode on the back, CAC-endorsed. Population: 22 in 66 (3 in 66+) Cameo, 9 finer; 5 in 66 Deep Cameo, 4 finer. CAC: 19 in 66, 6 finer (10/17).

Ex: Long Beach Signature (Heritage, 6/2002), lot 7297. NGC ID# 6UKV, PCGS# 86540

- 3746 1897 PR65 NGC.** Ex: Rev. Dr. James G.K. McClure. A modest production of just 731 proof Barber half dollars was struck in 1897. This delightful Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces display no mentionable distractions, with deeply mirrored fields. Vivid shades of lavender-gray, greenish-gold, and powder-blue toning enhance the outstanding eye appeal. Census: 28 in 65, 62 finer (10/17). NGC ID# 24NZ, PCGS# 6544

- 3747 1905 PR65 PCGS. CAC.** Faint olive-gold toning drifts across the glassy-mirrored surfaces of this Gem 1905 proof Barber. Slight contrast exists with the devices, which are well-struck including both left and right on the eagle. Only a half dozen examples have received CAC endorsement at the Gem grade. Population: 44 in 65, 46 finer. CAC: 6 in 65, 21 finer (10/17). NGC ID# 24P9, PCGS# 6552

1908 Barber Half Dollar, PR67 Undesignated Cameo Proof

- 3748 1908 PR67 PCGS.** Although this Superb Gem proof is not designated as a Cameo proof, the field-to-device contrast that is visible through the toning clearly indicates its actual quality. The obverse has a vibrant display of gold and green toning, while the reverse has splashes of sea-green toning on its brilliant silver surface. Population: 10 in 67, 7 finer (10/17). NGC ID# 24PC, PCGS# 6555

- 3749 1909 PR65 NGC.** Just 650 proofs were struck by the Philadelphia Mint in 1909. This Gem example was particularly well-produced with a sharp strike and lightly frosted devices. The mirrored fields have since acquired pale, reddish-gold patina with speckles of blue at the margins for excellent eye appeal. Census: 38 in 65 (1 in 65★), 68 finer (10/17). NGC ID# 24PD, PCGS# 6556

1913 Barber Half, PR66 Cameo
Delightful Golden Accents

- 3750 1913 PR66 Cameo PCGS.** Cameo examples of the proof 1913 Barber half dollar are rare. Only 27 such pieces are graded at PCGS, with five in this Premium Gem grade and six finer (11/17). There are no Deep Cameo examples at either service. This coin is boldly struck, with deep mirrors and strong contrast. A few stray lines are barely discernible upon close examination. Nearly brilliant on the obverse, an attractive ring of golden patina sits near the rims and adds a faint blush of color to Liberty's cheek. The reverse shows an overall translucent golden sheen. NGC ID# 24PH, PCGS# 86560

WALKING LIBERTY HALF DOLLARS

- 3751 1916 MS65 PCGS.** This frosty, brilliant Gem is sharp and attractive. Some faint die polish lines are visible in the right obverse field, but post-strike abrasions are not to be easily found. The first-year Walker from Philadelphia is occasionally available in this grade but seldom offered finer. NGC ID# 24PL, PCGS# 6566
- 3752 1917 MS66 PCGS.** This impressive 1917 Premium Gem half is magnificent in its luster, strike, and overall appearance. Sharply struck, the branch hand shows thumb and finger separation while Liberty's facial features are well-defined. Primarily brilliant, a faint overlay of dappled olive-gold toning exists in certain areas. Frosted silver luster dominates the visual impact. Population: 104 in 66 (3 in 66+), 3 finer (10/17).
Ex: FUN Signature (Heritage, 1/2003), lot 7311. NGC ID# 24PP, PCGS# 6569

1918-D Walking Liberty Half, MS63
Sharp and Appealing

- 3753 1918-D MS63 PCGS.** Brilliant and satiny, this Select 1918-D Walker is also sharply struck on Liberty's head and branch hand, as well as the eagle's trailing leg. Only a few light contact marks limit the grade. The 1918-D is a challenging date in Mint State, although MS63 coins are generally collectible. The present coin is high-end for the grade in terms of eye appeal. NGC ID# 24PW, PCGS# 6575

1918-D Half Dollar, MS64
Elusive in Finer Grades

- 3754 1918-D MS64 PCGS.** The 1918-D is an underrated issue in XF and better grades. Uncirculated coins are moderately scarce in MS64 and are genuinely rare finer. Strike sharpness is always a problem on this issue. This near-Gem is brilliant throughout with soft, glowing mint luster. Sharply struck for the issue, the only noticeable abrasions are a series of small milling marks in the right obverse field.
Ex: Long Beach Signature (Heritage, 2/2003), lot 6941. NGC ID# 24PW, PCGS# 6575

- 3755 1918-S MS64 PCGS. CAC.** The 1918-S is a highly respected strike and condition rarity among early Walkers. The sharpness of this piece is generally strong, lacking only slightly on Liberty's head and the eagle's trailing leg feathers, as usual. The surfaces are smooth and brilliant with no singularly mentionable abrasions. PCGS lists only 35 finer representatives (10/17).
Ex: Long Beach Signature (Heritage, 9/2002), lot 7022. NGC ID# 24PX, PCGS# 6576

1920 Half Dollar, MS65
Underappreciated Early P-Mint Issue

- 3756 1920 MS65 PCGS.** The strike is sharper than average on this Gem 1920 Walker, with only minor weakness through the central portrait and thumb definition on the branch hand. The eagle's leg plumage shows only slight blending. Satiny mint luster shines brightly through a thin veil of golden-gray toning, with much silver brilliance across both sides. A glass reveals only a few tiny abrasions and marks. The 1920 issue in high grade seems underrated by collectors, since PCGS reports just 22 numerically finer examples (11/17). NGC ID# 24R3, PCGS# 6580
- 3757 1927-S AU58 PCGS.** This was the only half dollar issue for the year. High-grade examples are scarce. This bright near-Mint Walker retains lively luster within the recesses and strong strike definition despite a hint of blending. Small marks are peppered over each side. NGC ID# 24RA, PCGS# 6587

**1929-D Half Dollar, Sharp MS65
Brilliant Silver Luster**

- 3758 1929-D MS65 PCGS. CAC.** A fully struck coin, and scarce as such. This stunning Gem example displays razor-sharp definition at the head, hand, and skirt lines, as well as the eagle's trailing leg. Thick, frosted mint luster flows throughout, while the surfaces show only a few scattered field marks, none of which are important or individually detracting. Fully brilliant and quite desirable, with surface quality and eye appeal suggestive of an even finer grade. CAC endorsed.
Ex: *FUN Signature* (Heritage, 1/2001), lot 7857. NGC ID# 24RC, PCGS# 6589

- 3759 1933-S MS64 PCGS.** This Choice 1933-S half dollar is fully struck throughout Liberty's branch hand and head, and the eagle's trailing leg and wing. A few minor abrasions are hidden beneath mottled russet toning. NGC ID# 24RE, PCGS# 6591

**1933-S Half Dollar, Stylish MS65
Finely Toned, Vibrant Luster**

- 3760 1933-S MS65 PCGS.** Thin bands of olive-gold toning take a back seat to an impressively sharp strike on this lustrous, elegant-looking 1933-S Walker. The head definition is strong and the branch hand shows full thumb and finger separation. The feathering on the eagle appears entirely complete. This is an exquisite Gem, housed in an old generation blue label holder with barcode on the back. A likely candidate for upgrade if there ever was one. NGC ID# 24RE, PCGS# 6591

- 3761 1934 MS67 PCGS. CAC.** Head and hand detail is sharp on this Superb Gem, and the eagle's leg feathers are boldly defined. A hint of light golden toning graces the frosty surfaces, and a lack of abrasions produces ample visual appeal. PCGS has seen only eight finer coins (10/17), making this CAC-approved example, in a green label holder, important for quality seekers. NGC ID# 24RE, PCGS# 6592

- 3762 1934-D MS66 PCGS.** This Premium Gem displays brilliant, frosty mint luster and generally well-struck design elements. No distracting abrasions are seen. The 1934-D is collectible in MS66, but PCGS and NGC combined have seen only five Superb Gems finer (10/17). NGC ID# 24RG, PCGS# 6593

- 3763 1934-S MS65 PCGS.** Satiny and lightly toned in champagne-gray hues, with deeper sun-gold and olive tinges in the recesses on each side. Excellent sharpness is seen along Liberty's figure and branch hand. The 1934-S half dollar is elusive any finer. NGC ID# 24RH, PCGS# 6594

**1935 Half Dollar, MS67
Only One Coin Finer at PCGS**

- 3764 1935 MS67 PCGS. CAC.** With a Philadelphia mintage of more than 9 million pieces, the certified population of Superb Gem 1935 half dollars is exceptionally low. This example dazzles the eye with its brilliant, starkly silver surfaces and sharp strike. Fleeting ice-blue and peach-gold accents accompany a thin circumference of iridescence at the obverse rim. The eagle is seldom sharper. Housed in a previous generation green label holder. Population: 58 in 67 (5 in 67+), 1 finer. CAC: 32 in 67, 1 finer (10/17). NGC ID# 24RJ, PCGS# 6595

- 3765 1935-D MS66 PCGS.** The 1935-D is one of the better dates from the 1930s and also one of the great strike rarities from that decade. This is an especially lustrous example that is more reminiscent of an S-mint from the 1940s than a Denver product. Softly struck on the highpoints, the surfaces are exceptionally well-preserved with no obvious abrasions on either side. None are finer at PCGS (10/17).
Ex: *Portland Signature* (Heritage, 3/2004), lot 5901. NGC ID# 24RK, PCGS# 6596

- 3766 1935-S MS65 NGC.** A satiny champagne-gray Gem with flecks of russet toning in the margins. No distracting abrasions are present, although Liberty's branch hand and the eagle's trailing leg are predictably weak. Higher-grade 1935-S Walkers are often elusive. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, Frosted MS66
Vibrant Original Luster**

- 3767 1935-S MS66 PCGS. CAC.** Traces of pumpkin-gold toning make a brief appearance on the otherwise brilliant and frosted-white surfaces of this delightful 1935-S half. A few light marks exist through the centers where the strike is sharp, but not full. The rest of the coin is unfailingly lustrous and nearly immaculate. Housed in a previous generation blue label holder with barcode on the back, CAC endorsed. PCGS reports just three numerically finer certifications. CAC: 42 in 66, 3 finer (10/17). NGC ID# 24RL, PCGS# 6597

**1936-D Half Dollar, MS67
None Finer Certified**

3768 1936-D MS67 PCGS. CAC. This brilliant and highly lustrous Superb Gem 1936-D Walking Liberty half dollar has pristine, untuned silver surfaces that are devoid of significant marks. The strike is typically sharp for this issue. Population: 42 in 67 (3 in 67+), 0 finer. CAC: 19 in 67, 0 finer (10/17). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

3769 1937 MS67 PCGS. Fully struck with bright mint luster and a trace of pale golden toning over each side. The surfaces are nearly perfect. The 1937 Walker is scarce in this grade, and we have not handled a finer example in more than three years. PCGS lists only five finer representatives (10/17).

Ex: Long Beach Signature (Heritage, 2/2001), lot 5929; New York Signature (Heritage, 7/2002), lot 8544. NGC ID# 256A, PCGS# 6601

3770 1937-D MS67 PCGS. Worthy of inclusion in a PCGS Registry Set, this ice-white Superb Gem is virtually devoid of bagmarks. The strike is among the sharpest that we have ever seen on a '37-D half, and the untuned surfaces showcase exceptional visual appeal. Population: 63 in 67 (2 in 67+), 0 finer (10/17).
Ex: FUN Signature (Heritage, 1/2003), lot 7377. NGC ID# 24RS, PCGS# 6602

3771 1937-S MS66 PCGS. CAC. Frosty, glistening mint luster shows no distracting abrasions on this Premium Gem, and Liberty's branch hand has partial thumb separation. A few faint luster grazes are not out of line for the grade. PCGS lists 39 finer examples of the 1937-S Walking Liberty half dollar (10/17). NGC ID# 24RT, PCGS# 6603

3772 1938 MS67 PCGS. The conditional scarcity of the 1938-P Walker is yet underrated in the shadow of the high profile semikey, the '38-D. While not a particularly flashy coin, this scarce Superb Gem has bright mint luster over each side with an overlay of dusky gray patina. Unquestionably original and fully struck in all areas. PCGS and NGC each list only a single finer example (10/17).
Ex: New York Signature (Heritage, 7/2002), lot 8547. NGC ID# 24RU, PCGS# 6604

3773 1939-D MS67 PCGS. CAC. A lovely Superb Gem example of this conditionally elusive Denver issue, showing brilliant, satiny luster and unabraded surfaces. Liberty's branch hand and the eagle's trailing leg are a trifle soft, as usual for Denver half dollars from this period. PCGS and NGC each list two numerically finer examples (10/17). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

3774 1939-S MS67 PCGS. Coruscated with brilliant, satiny luster, this Superb Gem 1939-S is an eyeful. A hint of golden glow complements ice-blue silver surfaces. The strike is strong and marks are virtually nonexistent. We note nearly full definition on the eagle's trailing leg. PCGS has certified just one numerically finer piece (10/17). NGC ID# 24RY, PCGS# 6608

**1941-D Half Dollar, MS67+
Strong Strike, Extremely Rare Any Finer**

3775 1941-D MS67+ PCGS. CAC. With 11.2 million coins struck, the 1941-D half dollar is plentiful across virtually all grade levels. It only becomes a legitimately elusive date in MS67 and is rare with a Plus designation and CAC recognition. Liberty's head and skirt lines are fully defined, and the branch hand shows partial thumb separation. Satiny and brilliant. One finer example is reported at PCGS (10/17). NGC ID# 24S4, PCGS# 6612 Base PCGS# 6612

3776 1941-S MS66+ PCGS. CAC. An elusive Premium Gem with CAC endorsement and highly appealing for its coveted Plus designation. PCGS reports only nine finer coins (10/17). This 1941-S Walker displays original, frosty mint luster with champagne toning that features daubs of deeper olive at the borders. Liberty's branch hand is weakly struck as normal. NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**1944 Walking Liberty Half Dollar, MS67+
Only One Finer Coin at PCGS**

3777 1944 MS67+ PCGS. From a mintage of more than 28 million pieces, the 1944 Walking Liberty half dollar can be located in MS67 condition occasionally, but finer coins are virtually unobtainable. This Plus-graded Superb Gem offers well-detailed design elements and impeccably preserved surfaces with vibrant mint luster throughout. PCGS has graded one numerically finer example (10/17). NGC ID# 24SC, PCGS# 6621

3778 1946 MS67 PCGS. A gorgeous, original Superb Gem. Along with gold and rose patina, speckled russet color is noted at the obverse border. This conditionally scarce Superb Gem Walker is boldly struck and carefully preserved. None are finer at PCGS. Population: 72 in 67 (5 in 67+), 0 finer (10/17).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 7060; ANA Signature (Heritage, 3/2007), lot 1145. NGC ID# 24SJ, PCGS# 6627 Base PCGS# 6627

3779 1946-D MS67 PCGS. CAC. Hints of iridescence warm frosty original surfaces on this CAC-approved Superb Gem. Sharp head and branch hand detail on Liberty is all the more appealing. The 1946-D Walker is scarce in this grade and unknown numerically finer. Population: 92 in 67 (4 in 67+), 0 finer. CAC: 51 in 67, 0 finer (10/17). NGC ID# 24SK, PCGS# 6628

3780 1946-S MS67 PCGS. The 1946-S is considered an available issue today, though Superb Gem examples are inherently difficult to acquire due to conditional scarcity. This is a delightful, largely untuned representative, exhibiting vibrant, intensely frosted luster and above-average detail at the obverse highpoints. None are finer at PCGS or NGC. Population: 78 in 67 (4 in 67+), 0 finer (10/17).
Ex: Central States Signature (Heritage, 5/2007), lot 3070. NGC ID# 24SL, PCGS# 6629

1947 Half Dollar, MS67
Suitable Registry Set Candidate

- 3781 1947 MS67 PCGS. CAC.** Ex: Jack Lee. The 1947's original mintage of over 4 million pieces is considerably lower than that of other P-mint Walkers from the 1940s. Still, its status as a final-date issue ensured that the 1947 survived in Mint State in significant numbers. On the other hand, the '47-P is quite scarce as a Superb Gem. This is simply a beautiful coin to behold. Both sides are essentially blemish-free and sharply impressed, with full mint luster shimmering beneath gold and powder-blue iridescence. Housed in a previous generation green label holder with CAC endorsement. Population: 82 in 67 (4 in 67+), 0 finer. CAC: 23 in 67, 0 finer (10/17).
 Ex: ANA National Money Show Signature (Heritage, 8/2003), lot 6096. NGC ID# 24SM, PCGS# 6630

- 3782 1947-D MS67 PCGS.** A trace of golden toning is noted on each side of this frosted, vibrantly lustrous piece. The mintage of less than 4 million pieces partly accounts for the small population in the Superb Gem grade. The strike is sharp through the centers. None are finer at PCGS, and NGC has certified just a single numerically finer example. Population: 47 in 67 (3 in 67+), 0 finer (10/17).
 Ex: ANA Charlotte National Money Show (8/2007), lot 1153. NGC ID# 5ESK, PCGS# 6631

**PROOF WALKING LIBERTY
 HALF DOLLARS**

- 3783 1936 PR63 PCGS.** A few stray lines limit the grade on this first-year proof, but the coin boasts remarkable appeal due to appreciable cameo contrast on the obverse. Both sides have a hint of light golden toning and are sharply detailed. An excellent collector-grade proof. NGC ID# 27V4, PCGS# 6636
- 3784 1936 PR64 PCGS. CAC.** A fully struck, CAC-approved near-Gem example of the first — and scarcest — proof issue in the Walking Liberty half dollar series. Light golden toning warms each side, complementing reflective fields. NGC ID# 27V4, PCGS# 6636

1936 Walking Liberty Half Dollar, PR66
Attractive Multicolor Toning

- 3785 1936 PR66 NGC.** The Philadelphia Mint resumed commercial proof set offerings in 1936 and a mintage of 3,901 Walking Liberty half dollars was achieved. This spectacular Premium Gem exhibits razor-sharp definition on all design elements and the hazily reflective fields display highlights of emerald-green and lavender toning. Overall eye appeal is outstanding. NGC ID# 27V4, PCGS# 6636

1939 Half Dollar, PR68 ★
Only One Certified Finer

- 3786 1939 PR68 ★ NGC.** A single NGC submission has received a finer PR69 grade (10/17), although it is hard to imagine a more attractive example than this incredible Superb Gem. While a hint of champagne toning is evident, the surfaces are essentially brilliant and untuned, with subtle cameo contrast on each side. NGC ID# 5ESU, PCGS# 6639

- 3787 1940 PR68 NGC.** This fully struck proof is delivered from fresh dies that do not exhibit weakened recesses due to excessive die polishing. Green and rose ribbons stretch through the upper obverse margin, but the remainder of the coin is light golden. No contact marks are seen. Census: 56 in 68 (4 in 68 ★), 0 finer (10/17). NGC ID# 27V8, PCGS# 6640

- 3788 1942 PR68 NGC.** A razor-sharp, brilliant proof with modest cameo contrast on the obverse. This high-end PR68 specimen is conditionally scarce, and NGC reports only eight numerically finer representatives (11/17). NGC ID# 282G, PCGS# 6642

FRANKLIN HALF DOLLARS

1948 Franklin Half, MS67 Full Bell Lines
Vividly Toned Registry Grade Specimen

- 3789 1948 MS67 Full Bell Lines PCGS.** Vivid shades of magenta, sea-green, and amber toning blanket the obverse of this magnificent Superb Gem, while the reverse shows only light champagne patina. The surfaces are impeccably preserved and lustrous, with sharply detailed design elements, including full definition on the bell lines. Population: 16 in 67 (1 in 67+) Full Bell Lines, 0 finer (10/17). NGC ID# 24SR, PCGS# 86651

- 3790 1953-D MS66+ Full Bell Lines PCGS. CAC.** A Plus-graded Premium Gem, with the Full Bell Lines designation and impeccably preserved lustrous surfaces. Vivid shades of lavender and sea-green toning add to the outstanding eye appeal. PCGS has graded just two numerically finer examples (10/17). NGC ID# 24T7, PCGS# 86665

- 3791 1954 MS66+ Full Bell Lines PCGS.** Ex: Radabaugh Collection. Franklin half collectors are of two ilk — those who prefer blast-white coins, and those who gravitate toward attractively toned pieces. This high-end Premium Gem is sure to satisfy the latter camp, with delightful blue, orange, and lilac shades concentrically distributed with underlying iridescence. The Full Bell Lines designation confirms a sharp strike over nearly immaculate, highly lustrous surfaces. Population: 157 in 66 (19 in 66+) Full Bell Lines, 3 finer (10/17). NGC ID# 24T9, PCGS# 86667

3792 1960 MS66+ Full Bell Lines PCGS. Ex: Radabaugh Collection. A glass reveals the merest speckling of golden brown toning that augments the primary pale ice-blue and peach gold hues that enhance, but do not limit, the frosted silver luster that is essentially brilliant to the eye. A few tiny marks exist that keep this impressive Premium Gem on the border of the Superb category. The strike is ideally sharp for a 1960 half. Population: 4 in 66+ Full Bell Lines, 1 finer (10/17). NGC ID# 5H6J, PCGS# 86678

3793 1962-D MS66 Full Bell Lines PCGS. Ex: Radabaugh Collection. This Denver issue ranks among the prime condition rarities of the Franklin half series, and it is yet to be exceeded at the numerical MS66 Full Bell Lines grade by either service. This dazzling example is a worthy representative of the highest-level circulation strike, with icy-white brilliance, imposing mint luster, and a pinpoint strike. Population: 38 in 66 (1 in 66+) Full Bell Lines, 0 finer (10/17). NGC ID# 24TS, PCGS# 86683

PROOF FRANKLIN HALF DOLLARS

1950 Half Dollar, PR66 Cameo Elusive Contrasted Example

3794 1950 PR66 Cameo PCGS. CAC. The first proof issue of the Franklin half dollar, the 1950 is elusive with any degree of contrast. This Premium Gem Cameo proof is brilliant with excellent eye appeal. Nearly 4,400 of these first year proofs have been submitted to PCGS, yet only nine examples have earned a finer Deep Cameo designation, and none are numerically finer than this Cameo proof. Population: 67 in 66 (5 in 66+) Cameo, 22 finer. CAC: 37 in 66, 16 finer (10/17). NGC ID# 6L9N, PCGS# 86691

1950 Half Dollar, PR64+ Ultra Cameo First Proof Franklin

3795 1950 PR64+ Ultra Cameo NGC. A Plus-graded Choice representative of the first proof Franklin half dollar issue, this coin exhibits sharply detailed frosty design elements that create intense cameo contrast with the deeply mirrored fields. The well-preserved, mostly brilliant surfaces show a few subtle hints of pale gold toning and eye appeal is terrific. Census: 3 in 64 Ultra Cameo (1 in 64+), 18 finer (10/17). NGC ID# 27VA, PCGS# 96691

3796 1954 PR69 NGC. From a limited mintage of 233,300 pieces, this magnificent Franklin half dollar is one tick away from perfection, with sharply detailed design elements throughout and deeply mirrored, brilliant fields on both sides. Census: 49 in 69 (6 in 69★), 0 finer (10/17). NGC ID# 27VE, PCGS# 6695

3797 1960 PR69 Cameo PCGS. This top-grade Cameo displays unimprovable contrast on the obverse, but the reverse holds it back from a Deep Cameo designation. The frosty, sharp design elements and liquidlike fields are brilliant, showing unhindered white-on-black qualities. A rarity this fine. Population: 4 in 69 Cameo, 10 PR69 Deep Cameos finer (10/17). NGC ID# 24TY, PCGS# 86701

PROOF KENNEDY HALF DOLLAR

1964 Accented Hair Kennedy Half, PR67 Profoundly Contrasted Deep Cameo

3798 1964 Accented Hair, FS-401, PR67 Deep Cameo PCGS. Type One Reverse. The 1964 Accented Hair "variety" is actually a subtype of the initial Kennedy half dollar issue of 1964. The bold part in President Kennedy's hair helps define the type, which is elusive with black-and-white contrast. This Superb Gem is fully brilliant and untuned with frosty silver devices and deeply mirrored fields. Population: 31 in 67 (1 in 67+) Deep Cameo, 18 finer (10/17). NGC ID# 24WG, PCGS# 145627 Base PCGS# 96801

EARLY DOLLARS

3799 1795 Flowing Hair, Three Leaves, B-6, BB-25, R.3, Good 4 PCGS. Bowers Die State III. This is a problem-free, smoothly worn example of the somewhat scarce B-6, BB-25, which is a Three Leaves type paired with the Head of '95 portrait. As usual, the coin is struck from lapped dies and has four-leaf cluster beneath the first S in STATES. Attractive autumn-brown toning covers both sides, with the central motifs fully outlined. Merging to the rims from wear is visible at LIB of LIBERTY and on the reverse legend where the top of UNITED is slightly faint, as is OF AMERICA. There are no adjustment marks or other distractions for the grade level. NGC ID# 24WZ, PCGS# 39975 Base PCGS# 6852

1795 Draped Bust Dollar, Fine 12 Centered Bust, B-15, BB-52

3800 1795 Draped Bust, Centered, B-15, BB-52, R.2, Fine 12 PCGS. Bowers Die State IV. Only two die varieties are known for the date and type. The centered bust, with the highest hair curl under E in LIBERTY, identifies the popular BB-52 variety. The pleasing dark lavender-gray surfaces of this Fine 12 specimen are lightly abraded, with a minor rim bruise on the obverse at 2 o'clock. The surfaces are evenly worn, with some interior detail still intact on Liberty's hair and drapery. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

- 3801** 1798 Large Eagle, Pointed 9, 5 Vertical Lines, 10 Arrows, B-17, BB-101, R.5 — Environmental Damage — NGC Details. VF. Bowers Die State V. A rare variety, almost always well-circulated with an average grade at the lowest end of the VF level. This example is finely granular with some deep-gray toning on the obverse from environmental factors, but the coin is well-defined on most of the devices. Criss crossing adjustment marks exist on the reverse at the right shield/wing junction. Irregularity at the left obverse dentils is the result of die swell, diagnostic of the latest die stage. Relatively few examples are significantly finer than the present coin from perhaps 70 to 120 survivors of the die marriage. NGC ID# 24X6, PCGS# 40017 Base PCGS# 40016

**1798 Large Eagle Dollar, XF45
B-11, BB-111, Pointed 9**

- 3802** 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3, XF45 ANACS. Bowers Die State IV. The obverse die eventually failed in its sole use striking BB-111. The average grade for surviving examples is just VF25, placing XF and AU coins throughout the entire list of notable specimens. The die marriage is virtually unknown in full Mint State. This example displays light, dappled toning over silver surfaces in shades of gold, brown, and lavender. Die buckling and a bulge beneath the chin affects even early die stage coins. This middle state shows a strong die crack through three points of star 13 to the underside of Liberty's chin. Luster remains across the minimally abraded surfaces that are sharply struck except for the central curls and the eagle's head, neck, and breast. Housed in an early generation, small ANACS holder. NGC ID# 24X6, PCGS# 40028 Base PCGS# 40018

- 3803** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF30 PCGS. Bowers Die State V, shattered lower-right obverse. Uniformly olive-gray with pewter hues. Considerable strike weakness on the lower-right bust and the corresponding reverse stars is characteristic of this die state, caused by the failing obverse die in that region. No adjustment marks are seen, and the coin is problem-free. NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

**1798 Draped Bust Dollar, XF45
Large Eagle, Pointed 9, B-8, BB-125**

- 3804** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, XF45 ANACS. Bowers Die State IV, with an extensive network of die breaks on the reverse. The effects of die failure and buckling are evident in the peripheral elements on the left, where stars 5 and 7 are very weak and the letters in UNITED are only partially legible on the reverse. Little actual wear shows on the well-detailed central devices and the lightly abraded surfaces exhibit highlights of lavender and golden-tan toning. NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

**1799 B-15, BB-152 Dollar, AU Details
13 Stars Reverse**

- 3805** 1799 Irregular Date, 13 Stars Reverse, B-15, BB-152, R.3 — Improperly Cleaned — NGC Details. AU. Bowers Die State IV. A less often seen variety, showing star 13 touching the bust. Extensive peripheral die cracks and metal flowlines identify this late die state. The strike is nonetheless sharp, and only light high-point wear is discernible. The glossy surfaces are unnaturally bright due to cleaning. A short scratch on the horizontal shield lines is the only abrasion of singular note. NGC ID# 24X7, PCGS# 40045 Base PCGS# 6880

- 3806** 1799 7x6 Stars, B-5, BB-157, R.2, VF30 PCGS. Bowers Die State III, a frequently seen die state with several reverse cracks. Nearly all examples of the B-5 dollar are die states II and III. State I apparently does not exist, and State IV is quite scarce. This pleasing original dollar has walnut-brown and olive-green toning. The surfaces show only a few scattered small marks and minor reverse residue. Ex: *Central States Signature (Heritage, 4/2012), lot 4858, which realized \$2,300.* NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

- 3807** 1799 7x6 Stars, B-10, BB-163, R.2 — Obverse Graffiti — NGC Details. VF. Bower Die State III. Deep grayish-ebony toning in the fields contrasts with light, tan-gray shades on the raised devices. Light pinscratches in the obverse field may be the initials "H" and "R." We note a V-shaped planchet flaw on the reverse rim at 9 o'clock. This is an ancient-looking BB-163 that has seen its share of use over the past 200+ years. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

**1799 Dollar, AU Sharpness
B-17, BB-164, 7x6 Stars**

- 3808** 1799 7x6 Stars, B-17, BB-164, R.2 — Improperly Cleaned — NGC Details. AU. Ex: *Pedram Collection.* Bowers Die State V. This early dollar has impressive definition and lacks any mentionable marks. The central obverse is moderately bright, and displays lemon, apricot, and stone-gray shades. The reverse is deeply patinated gunmetal-blue.

- 3809** 1799 7x6 Stars, B-9, BB-166, R.1, VF30 PCGS. Bowers Die State II. A dramatic circulation cameo, showing light gray patina on the relief elements with deep olive-gray in the fields. The coin is evenly struck with no visible adjustment marks. Problem-free surfaces are smooth and appealing for the grade. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

- 3810** 1799 7x6 Stars, B-9, BB-166, R.1, VF30 PCGS. Bowers Die State V, heavily cracked obverse. Evenly struck with complete borders and sharp central devices. The medium olive-gray surfaces are visually pleasing aside from a mint-made planchet streak from star 2 to the E in LIBERTY. Housed in an old green label holder. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1799 Dollar, B-9, BB-166, XF40
7x6 Stars, Collectible Early Type**

- 3811 1799 7x6 Stars, B-9, BB-166, R.1, XF40 ANACS.** Bowers Die State V. A die crack connects the 1 to the rim, other cracks appear near stars 10 to 12, and a die break occurs after the final S in STATES. BB-166 is the most available variety among 1799 dollars, making this a collectible example for an early dollar type set. Deep charcoal-gray patina colors the recesses and peripheral areas, lightening over exposed motifs that retain pleasing detail. A small dig on the shield is noted for accuracy. Housed in a small-sized holder. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1800 Draped Bust Dollar, XF40
B-12, BB-184, Ex: Hesselgesser**

- 3812 1800 B-12, BB-184, R.3, XF40 PCGS Secure.** Ex: Hesselgesser. Bowers Die State I. The obverse die was employed first on BB-182 and BB-183, but this BB-184 variety is the sole use of the reverse die. A die dot within D of UNITED, while a chunky die flaw at the outside of the upright of E in AMERICA confirms the attribution. Medium golden-umber color covers both sides, interrupted by lilac and blue areas that provide both interest and appeal. Aside from the expected light wear, the motifs are sharp and remaining mint luster suggest an even higher grade. Only faint abrasions exist, disguised by the toning and softened by circulation. NGC ID# 24X9, PCGS# 40070 Base PCGS# 6887

- 3813 1800 12 Arrows, B-17, BB-196, R.1 — Rim Damage — NGC Details.** VF. Bowers Die State IV. A number of small nicks and indents on both the obverse and reverse rims are seen, while the fields show somewhat mottled shades of blue and olive gray, with scattered small marks and some fine granularity. Solid VF definition remains on the motifs. Struck from a late die stage, with a diagnostic die line from just above the left foot of 1 in the date and several obverse die cracks. The reverse shows only 12 arrows.

- 3814 1801 B-2, BB-212, R.3, VF30 NGC.** Bowers Die State II, clashed. Evenly struck and well-centered with no adjustment marks. Light golden-gray patina exhibits deeper ebony overtones, mainly on the left-hand side of the reverse. A well-detailed Heraldic Eagle type coin. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

- 3815 1803 Small 3, B-1, BB-251, R.4, Fine 15 NGC. CAC.** Rev. Dr. James G.K. McClure. Bowers Die State III with a narrow vertical break beneath the R in LIBERTY. Slate devices rise above cream-gray fields. A minimally abraded representative of this better Bolender variety. A small round spot is noted on Liberty's shoulder. NGC ID# 24XD, PCGS# 40096 Base PCGS# 6900

SEATED DOLLARS

- 3816 1842 MS61 PCGS. OC-3, R.2.** Osburn-Cushing Die State c/b. Reflective surfaces from polished dies show a few light lines and minor abrasions, while diagnostic die lines parallel to Liberty's wrist above the shield define the obverse. Angled die lines at the upper left of the reverse shield confirm the OC-3 die marriage. Deep amber-orange toning at the margins deepens to rust-brown shades with touches of blue. The centers are brilliant with frost-white motifs on both sides, crisply struck except for slight blending at Liberty's lower hair curls and at the eagle's neck. Population: 24 in 61, 68 finer (10/17). NGC ID# 24YC, PCGS# 6928

- 3817 1847 AU58 PCGS. OC-1, R.1.** A pleasing near-Mint No Motto type coin, showing satiny light golden surfaces with a hint of iridescence. Several stars are slightly weak, but the strike is otherwise pleasing. The 1847 Seated dollar is available in AU grades but scarce in Mint State. NGC ID# 24YJ, PCGS# 6934

- 3818 1848 AU50 PCGS. OC-1, R.2.** Deep olive-gold and gray toning on each side masks a scattering of minor abrasions. Liberty's head and the eagle's left (facing) leg are weakly struck, but no substantial wear is seen. A linear strike-through is seen above Liberty's head. The 1848 is popular due to its low mintage of 15,000 coins. NGC ID# 24YK, PCGS# 6935

**1850 OC-1 Seated Dollar, AU55
Repunched 0 in Date**

- 3819 1850 AU55 PCGS. OC-1.** This is the only die pair identified for business strike 1850 Seated dollars, featuring a repunched 0 in the date, and a die line angling up to the left through the horizontal crossbars of the shield on the reverse. The reverse die was used to coin circulation strikes from 1848 through 1851, and may have been used in 1852. This Choice AU representative, housed in a green-label holder, has a typical strike with slight weakness of the right side stars. The reflective fields and still lustrous devices host delicate champagne toning. NGC ID# 24YM, PCGS# 6937

**1850-O OC-1 Seated Dollar, AU50
The Only Known Dies**

- 3820 1850-O AU50 PCGS. OC-1.** Only one die variety has been identified, used to coin 40,000 Seated Liberty silver dollars at the New Orleans Mint in 1850. Mint State examples are rare, and AU representatives, such as this example housed in a green-label PCGS holder, are scarce. There was apparently demand for silver dollars in New Orleans in the early 1850s, and many lower-grade circulated pieces are known. This example has light silver-gray surfaces with splashes of gold and iridescent toning that accompanies considerable luster. Population: 31 in 50, 48 finer (10/17). NGC ID# 24YN, PCGS# 6938

1853 OC-1 Silver Dollar, MS62
Diagnostic Reverse Die Lines

- 3821 1853 MS62 NGC. OC-1.** Just one circulation strike variety is known, along with one proof die pair. Myriad diagonal die lines that slant up to the right in the recesses of the shield on the reverse are diagnostic for the circulation strike variety, OC-1. Although some of the stars are flat, along with the top of the eagle's left (facing) wing, this piece has a decent strike. The brilliant and mostly untuned silver surfaces are fully lustrous. Census: 21 in 62, 45 finer (10/17). NGC ID# 24YS, PCGS# 6941

1860 OC-4 Seated Dollar, MS63

- 3822 1860 MS63 NGC. OC-4.** A small triangular die chip joins the middle arrowshaft to the arrowhead immediately below, and that is diagnostic for the reverse die that was used with two similar obverse dies. A single bar from the reverse shield is clashed in the drapery left of the base of the pole. The reverse has faint clash marks in the shield recesses with delicate die cracks at the tops of some legend letters. This lovely Select Mint State dollar has frosty silver luster that shines through gold and gray toning. Census: 19 in 63, 23 finer (10/17). NGC ID# 24Z2, PCGS# 6949

1861 Dollar, XF45
Scarce, Heavily Melted Issue

- 3823 1861 XF45 PCGS. OC-4, Low R.4.** Osburn-Cushing Die State c/a. Silver-gray surfaces show deep-gray shades around the devices with some old build-up in those areas. Lightly abraded throughout the fields with a trio of reeding marks in the right obverse field, this 1861 example is well-defined for the Choice XF level. The date is low with both 1s lower than the adjacent 86 to confirm the variety. NGC ID# 24Z4, PCGS# 6951

1872 OC-3 Seated Dollar, MS64
Misplaced Digits and Doubled Die Reverse

- 3824 1872 MS64 NGC. OC-3.** A Top-30 Variety, per Dick Osburn and Brian Cushing at www.seateddollarvarieties.com. This variety has multiple misplaced digits in the base of Liberty, and has reverse die doubling most evident in the motto. Although a common variety, it is highly popular for the unusual characteristics. A Choice Mint State example, the present piece has frosty and untuned silver surfaces and excellent design definition. Census: 21 in 64, 4 finer (10/17). NGC ID# 24ZJ, PCGS# 6968

- 3825 1872-CC — Scratches, Cleaned — NGC Details. XF.** Osburn-Cushing Die State a/a. Just 3,150 silver dollars were struck in Carson City for the year, and while the 1872-CC is somewhat more available than the 1871-CC and 1873-CC issues, it remains scarce in all grades. This silver-gray example is bright and smooth from the cleaning, with a few old scratches through the reverse scroll and motto. A small planchet flaw above Liberty's head on the obverse is a mint-related anomaly, but rim bumps at 5 o'clock on both the obverse and reverse are noted, as well as some remnant hairlines from the cleaning.

PROOF SEATED DOLLARS

1863 Silver Dollar, PR62
Scarce Civil War Issue

- 3826 1863 PR62 PCGS. OC-P1, High R.4.** Osburn-Cushing Die State a/a. Reverse rotated 20° clockwise. Just 460 pieces were struck, and perhaps as few as 210 proofs exist for this Civil War year in total. Multiple resubmissions at the grading services are indicated by the population data. The present example shows a few delicate lines that limit the grade including some short scuffs above the eagle's head, but no serious marks. A brilliant, sharply struck proof, it displays untuned surfaces save for a few glints of pale gold. Population: 56 in 62, 104 finer (10/17). NGC ID# 23BS, PCGS# 7006

- 3827 1866 Motto, PCGS Secure Genuine. Proof. OC-P2, R.3.** Osburn-Cushing Die State a/a. The PCGS number ending in 98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an Uncirculated proof specimen that has been whizzed or brushed. The surfaces have an unusual blue and violet hue at the margins, with a sharp strike and some pleasing gold toning at the centers.

TRADE DOLLARS

- 3828 1874-S MS62 PCGS.** Medium S, no period after FINE. This Mint State 1874-S Trade dollar is satiny and slightly reflective in the fields. Liberty's head shows the only mentionable strike weakness, which is mild. Scattered abrasions account for the grade, while a hint of light champagne toning graces each side. NGC ID# 2533, PCGS# 7036
- 3829 1876 Type One Obverse, Type One Reverse, MS64 NGC.** No period after FINE (scarce as such). The strike is sharp on both sides of this near-Gem 1876, one of 455,000 Trade dollars struck in the Centennial year. We note a few tiny ticks on the obverse, yet the fields are fully frosted and lustrous with no obvious signs of transport to the Orient. Attractive pale-gold toning does little to diminish the strong silver luster across Choice, attractive surfaces. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041
- 3830 1876 Type One Obverse, Type Two Reverse, MS64 NGC.** This frosted, near-Gem Trade dollar displays minimally abraded surfaces and a sharp strike, with only minor weakness at the eagle's left (facing) talon. The coin is brilliant and lustrous beneath areas of golden-gray patina that deepen slightly at the margins, plus a few splashes of blue at the rims. NGC reports just 20 numerically finer pieces (10/17). NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

1876-CC Trade Dollar, AU58 Doubled Die Reverse, FS-801

- 3831 1876-CC Doubled Die Reverse AU58 NGC. FS-801.** Type One Obverse and Reverse as always for this variety. Prominent die doubling is evident at the lower reverse, especially on the branch that is widely doubled. Slight doubling is also noted below the eagle's beak, the right (facing) wing tip, and in the letters below the eagle. The letters in the motto are also doubled. This near-Mint example exhibits slight field-to-device contrast with faint champagne toning. A lovely example of this popular and elusive variety. Census: 6 in 58, 9 finer (10/17). NGC ID# 253A, PCGS# 97042 Base PCGS# 7042

1876-S Trade Dollar, MS64 Type Two Obverse and Reverse

- 3832 1876-S MS64 PCGS.** Type Two Obverse and Reverse. A recent survey of 787 auction appearances of 1876-S Trade dollars revealed that only 105 of those were Type Two/Two examples, and that just two of the 105 graded finer than this example. Housed in a green-label PCGS holder, this untuned Choice Mint State piece has satiny silver luster and excellent design definition. This is an elusive variety in a high grade destined for a specialized collection. NGC ID# 253B, PCGS# 7043

1878-CC Trade Dollar, XF45 Low-Mintage Key Issue

- 3833 1878-CC XF45 NGC.** Only 97,000 Trade dollars were struck at the Carson City Mint in 1878, making the issue elusive in all grades. This attractive, Choice XF example shows light wear on the design elements, but the mottos and LIBERTY remain sharp. Pleasing shades of lavender-gray and champagne-gold toning blanket the lightly abraded surfaces. Census: 16 in 45, 47 finer (10/17). Ex: ANA Signature (Heritage, 2/2014), lot 3670. NGC ID# 253M, PCGS# 7047

- 3834 1878-S Doubled Die Reverse, FS-801 MS62 PCGS.** Strong doubling on the entire left side of the reverse includes the legend, motto, arrowheads, and 420 GRAINS — a scarce *Cherry-pickers'* variety, challenging to find in Mint State. Silver luster glows softly beneath a natural speckling of moderate lilac-gray toning with glimpses of gold at the outer margins. The strike is reasonably sharp throughout both sides. Housed in a previous generation green label holder. NGC ID# 253G, PCGS# 145808 Base PCGS# 7048

PROOF TRADE DOLLARS

1873 Trade Dollar, PR63 Just 865 Pieces Struck

- 3835 1873 PR63 NGC. CAC.** Deep blue-gray toning, with splashes of golden iridescence and electric blue at the rims, blanket each side of this attractive proof Trade dollar. The well-mirrored surfaces display a number of light, scattered hairlines, consistent with the grade, but the toning acts as natural camouflage, as none are visible without careful examination. From a mintage of just 865 pieces in proof format, this Select example is an ideal combination of rarity and value for the Trade dollar collector or proof type specialist. NGC ID# 27YJ, PCGS# 7053

- 3836 1875 PR63 PCGS.** Type Two Reverse. Only 700 proof Trade dollars were struck at the Philadelphia Mint in 1875. This attractive Select specimen exhibits strongly impressed design elements, with some minor loss of detail in the eagle's feathers, due to lapping. The lightly marked surfaces are blanketed in shades of slate-gray, golden-tan, and violet toning, with reflective fields underneath. NGC ID# 27YL, PCGS# 7055

1876 Trade Dollar, PR64 Cameo
Elusive Type Two Obverse and Reverse Combination

- 3837 1876 PR64 Cameo NGC.** Type Two Obverse and Reverse. A survey of 211 1876 proof Trade dollars in the Heritage Permanent Auction Archives found seven Type One obverse and reverse examples, 18 Type Two obverse and reverse pieces, and 186 Type One/Two transitional examples. Less than 10% of all 1876 proof Trade dollars are from this hub combination, and only three of the 18 appearances carry a Cameo designation. Delicate blue, lavender, and gold toning appears on both sides. Both sides have deeply mirrored fields and excellent contrast. An important opportunity for the specialist. Census: 16 in 64 Cameo, 16 finer (10/17). NGC ID# 27YM, PCGS# 87056

MORGAN DOLLARS

- 3838 1878 7/8TF Strong, VAM-36, MS63 Deep Mirror Prooflike PCGS.** Elusive in Deep Mirror Prooflike, the 1878 7/8 Tailfeathers variety is a collector favorite, especially with Strong overpunching of the tailfeathers such as this Select Uncirculated example. Richly frosted central motifs contrast boldly with the deeply mirrored fields. A few light scuffs and field chatter define the assigned grade. Population: 45 in 63 Deep Mirror Prooflike, 38 finer (10/17). NGC ID# 2TXZ, PCGS# 40216 Base PCGS# 97079

- 3839 1878 7/8TF Strong, VAM-36, MS64 Deep Mirror Prooflike NGC.** The fields are heavily polished on this piece, blending into the recesses of the eagle's wings on the reverse. Neither side is toned, and as a result modest cameo contrast is apparent. The strike is bold. A few light luster grazes on Liberty's cheek limit the grade but are not bothersome. NGC ID# 2TXZ, PCGS# 40216 Base PCGS# 97079

- 3840 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike PCGS. VAM-190, Doubled Motto.** IN GOD WE TRUST is minutely doubled on this lesser seven tailfeathers variety. This piece is brilliant and sharp with attractive cameo contrast. A few light, scattered abrasions account for the grade. The Reverse of 1878 is a popular subtype of this first-year Philadelphia issue. NGC ID# 253K, PCGS# 97075

- 3841 1878 7TF Reverse of 1879 MS65 Prooflike PCGS.** A sharp strike and frost-white luster on the devices provides modest contrast with the reflective, brilliant fields. A few light chatter marks are visible, but the overall Gem quality is appealing. The Reverse of 1879 subtype is rare this fine with Prooflike fields. Population: 6 in 65 Prooflike, 1 finer (10/17). NGC ID# 253L, PCGS# 7077

- 3842 1878-CC MS65 PCGS.** The Carson City Mint produced a small number of Trade dollars early in the year, but the facility concentrated on Morgan dollar output from the spring onward. More than 2.2 million coins were ultimately manufactured. The central hair strands are strong, and each side is brilliant and brightly frosted. NGC ID# 253M, PCGS# 7080

- 3843 1878-CC MS65 PCGS.** This first-year Gem from the Carson City Mint is far finer than the average 1878-CC Morgan dollar, which grades about MS60. The devices display a complete impression. Brilliant surfaces are frosty and minimally abraded with a single tick on the cheek. NGC ID# 253M, PCGS# 7080

- 3844 1879-CC XF45 PCGS.** The 1879-CC is famously the second-scarcest issue in the Carson City short set. This Choice XF coin is displays light, even wear with delicate champagne toning. Hints of luster remain in the protected regions of the fields. NGC ID# 253U, PCGS# 7086

1879-CC Silver Dollar, AU55
Normal Mintmark, Semikey Issue

- 3845 1879-CC AU55 PCGS.** Normal mintmark. Speckled deep-gray patina dots the surfaces on both sides of this silver-gray Carson City semikey dollar. Remnants of prooflike surface remain at the margins, while few abrasions exist and Liberty's cheek is clean. Soft mint luster glows from the Choice fields and sheltered areas of the devices. Just 756,000 pieces were struck in the second year of Morgan dollar production at the Carson City Mint due to lack of silver bullion. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, Unc Sharpness
Attractive Surfaces Remain Intact

- 3846 1879-CC — Improperly Cleaned — NGC Details. Unc.** Normal mintmark. This challenging, low mintage Carson City issue is in demand regardless of grade. Evidence of an old cleaning is sparse on this attractively toned example, and mint luster glows resolutely across the semireflective surfaces. A sharp strike confirms the Unc Details designation. The present coin would not seem out of place in a carefully assembled Uncirculated set. NGC ID# 253U, PCGS# 7086

- 3847 1879-CC Capped Die, VAM-3, Top 100, AU58 NGC.** A Top 100 Variety. Die chips around the mintmark are the chief pick-up point for this variety, although the 18 in the date are also finely recut, and the G in GOD is filled. Luster remains in the fields on this near-Mint coin, while traces of light champagne toning grace each side. Scattered abrasions are consistent with the grade. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

- 3848 1879-O MS65 PCGS.** Not since 1861 had the New Orleans Mint engaged in coining operations, but it returned in 1879 to strike a respectable 2.8 million Morgan dollars. The 1879-O is scarce but obtainable in MS65, while finer examples are rare. This remarkable Gem is fully struck, including above the ear, on the breast feathers, and talons. Radiantly frosted and untuned. PCGS notes 26 finer grading events (10/17). NGC ID# 253X, PCGS# 7090

- 3849 1879-O MS65 PCGS.** The New Orleans Mint reopened for coinage operations in February, 1879 and promptly struck nearly 2.9 million silver dollars. More would have been produced had additional silver bullion been in-hand. This Gem example is brilliant and highly lustrous with partially reflective surfaces. Just a few light bagmarks limit the grade. PCGS reports just 26 numerically finer examples (10/17). NGC ID# 253X, PCGS# 7090

3850 1879-S Reverse of 1878 MS64 PCGS. CAC. Unlike its readily available Reverse of 1879 counterpart, the 1879-S Reverse of 1878 Morgan dollar is very scarce in MS64 and rare any finer. This is a brightly frosted near-Gem with a single spot of golden color on the eagle's breast. A bold impression and minimal marks are additional attributes. CAC: 82 in 64, 6 finer (10/17). NGC ID# 253W, PCGS# 7094

3851 1879-S MS67+ PCGS. The Plus designation is the not only aspect of this coin that sets it apart from most of its peers. Splashes of multicolor toning appear on the obverse, while the reverse has blended lavender and rose hues. The strike is sharp, and no distracting abrasions are seen. NGC ID# 253X, PCGS# 7092

1880 Morgan Dollar, MS65 Deep Mirror Prooflike Seldom Seen with Full-Mirrored Fields

3852 1880 MS65 Deep Mirror Prooflike PCGS. A brilliant Deep Mirror Prooflike example, with moderate contrast between the frosted motifs and mirrored fields. Liberty's cheek and neck are smooth and nearly free of imperfections, with only tiny marks on the chin and high cheekbone. A few light abrasions in the fields are grade consistent, while the strike is razor-sharp. Population: 36 in 65 (5 in 65+) Deep Mirror Prooflike, 2 finer (10/17). NGC ID# 253Y, PCGS# 97097

1880/79-CC Morgan Dollar, MS66 Reverse of 1878, VAM-4

3853 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS66 PCGS. A Top 100 Variety. The remnants of an undertype 79 are clearly visible below the 80 in the date, and the reverse shows the parallel top arrow feather that identifies the popular Reverse of 1878. This delightful Premium Gem is well-detailed and well-preserved, with vibrant mint luster on both sides. Population: 98 in 66 (7 in 66+), 0 finer (10/17). NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

3854 1880/79-CC Reverse of 1878, VAM-4, MS64 Prooflike PCGS. A Top 100 Variety. Designated Prooflike, this brilliant cameo is borderline Deep Mirror Prooflike. Sharp, frosty design elements and deeply reflective fields reveal only light marks and have good eye appeal. This is a popular Carson City date that is heavily collected by VAM variety. NGC ID# AP7P, PCGS# 41131 Base PCGS# 7109

3855 1880-CC 8 Over High 7, VAM-5, MS65 Prooflike PCGS. A Top 100 Variety. Examples of the VAM-5 overdate are rare in Gem condition with such bold field-device contrast. Dusky pale blue and gold hues grace both sides, while the fields maintain considerable reflectivity. Crisp centers with horizontal roller marks at the upper and lower borders. NGC ID# 2542, PCGS# 41133 Base PCGS# 7103

3856 1880-CC 8 Over High 7, VAM-5, MS65 Prooflike ANACS. A Top 100 Variety. The underlying 7 is plainly visible within both loops of the second 8. Gold and lavender-rose toning appear on both sides of this piece along with highly reflective fields. The coin is well-struck and free of abrasions. NGC ID# 2542, PCGS# 41133 Base PCGS# 7103

3857 1880-CC 8 Over Low 7, VAM-6, MS66 PCGS. A Top 100 Variety. A well-struck, frosty-white Premium Gem with blazing cartwheel luster. Only a few faint grazes preclude perfection. Remnants of a 7 are visible within the loops of the second 8, identifying this in-demand Top 100 VAM variety. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104

3858 1880-O 8 Over 7 Ear, VAM-6A, MS64 NGC. A Top 100 Variety. An ear from a previous 7 extends up from the left top of the second 8 in the date, and a heavy die line extends through the berry below the UN of UNITED on this clashed dies Morgan dollar. Although not attributed on the holder, this fully brilliant and untuned Choice Mint State example ranks high in the condition census for the variety. NGC ID# 2543, PCGS# 133883 Base PCGS# 7114

1880-O Morgan Dollar, MS64+ Popular VAM-6C, 8/7 Ear

3859 1880-O 8/7 Ear, VAM-6C, MS64+ PCGS. CAC. A Top 100 Variety. The remnants of an undertype 7 show as a small "ear" mark at the left top of the second 8 in the date and a faint M clash mark is barely visible above the D in GOD, identifying the VAM-6C. This Plus-graded Choice example displays sharply detailed design elements and well-preserved brilliant surfaces, with vibrant mint luster on both sides. Population (for the variety): 2 in 64 (1 in 64+), 0 finer (10/17). NGC ID# 2543, PCGS# 517664 Base PCGS# 7114

3860 1880/9-S VAM-11, Medium S, Hot 50, MS67 PCGS. A Hot 50 Variety. Medium S. Raised metal is visible in the upper portion of the 0 in the date. This Superb Gem is well-struck and frosty with brilliant surfaces. Only the most insignificant of luster grazes on the obverse are discernible, attesting to the outstanding quality represented by the MS67 grade. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

3861 1881-CC MS66 PCGS. This razor-sharp Premium Gem displays frosty, brilliant luster and only a few faint grazes on the cheek. High-end 1881-CC dollars always show outstanding eye appeal and luster. More than 147,000 coins were represented in the GSA sales of the 1970s. NGC ID# 2549, PCGS# 7126

3862 1881-CC MS66 PCGS. Frosty, brilliant luster offers a vibrant cartwheel effect on this Premium Gem 1881-CC Morgan. A few minute marks on the cheek near Liberty's nose determine the grade but are not distracting. Eye appeal is pleasing. NGC ID# 2549, PCGS# 7126

3863 1881-CC MS66 PCGS. A crescent of sea-green, gold, and amber toning appears along lower reverse, and two short crescents of reddish-gold are seen at 10 and 1 o'clock on the obverse. The coin is frosty and well-struck with no mentionable abrasions. NGC ID# 2549, PCGS# 7126

3864 1881-CC MS66+ PCGS. Incredibly frosty, brilliant mint luster rolls around beautifully preserved surfaces on this high-end Premium Gem 1881-CC Morgan. A faint graze under Liberty's eye is all that prevents a full MS67 designation. When rotated beneath a light, the cartwheel effect is captivating. NGC ID# 2549, PCGS# 7126

**1881-CC Dollar, MS67
Four Coins Finer at NGC**

3865 1881-CC MS67 NGC. The 1881-CC Morgan dollar (296,000 coins minted) becomes conditionally scarce in MS67. Those looking for something finer will require considerable patience and resource given the extreme rarity of MS68 survivors. The obverse showcases largely golden-brown patina with ice-blue, violet, and magenta toning near the lower border. Conversely, the other side maintains its brilliance. Frosty and needle-sharp. NGC has seen just four numerically finer submissions (10/17). NGC ID# 2549, PCGS# 7126

3866 1881-O Pummeled Eye, VAM-1D, MS64 Deep Mirror Prooflike PCGS. A Hit List 40 Variety. Glints of pink and peach appear at certain angles on this otherwise silver-white near-Gem. Great reflectivity and well-preserved surfaces are interrupted only by a few small reed marks on the reverse. An attractive piece with modest cameo contrast. All varieties included, PCGS has graded 19 finer Deep Mirror Prooflike pieces (10/17).
Ex: ANA Signature (Heritage, 3/2010), lot 1369. PCGS# 412603 Base PCGS# 97129

3867 1881-S MS67+ PCGS. CAC. This early S-mint issue is popular for type purposes, given its nearly unmatched availability in high grades. The obverse has bright silver centers with surrounding shades of golden-russet, magenta, and cobalt-blue. Mixed violet, gold, and blue patina covers the other side. NGC ID# 2549, PCGS# 7130

3868 1881-S MS67+ PCGS. CAC. This Plus-graded Superb Gem Morgan boasts dazzling luster and razor-sharp delineation of Liberty's hair and headpiece. The eagle is bold and virtually white, with the reverse bearing only a touch of light gold toning. The obverse, on the other hand, is graced by a vibrant double rainbow of color in front of Liberty's face and through E PLURIBUS, giving it exceptional eye appeal. NGC ID# 2549, PCGS# 7130

**1881-S Silver Dollar, MS68
Superb, Razor-Sharp Morgan**

3869 1881-S MS68 NGC. The strike is needle-sharp on this mostly brilliant Superb Gem 1881-S. Dazzling silver luster illuminates the semireflective surfaces, which would be entirely white if not for brief speckles of umber-gray toning on the obverse and a narrow crescent of rainbow shades on the reverse. The eye appeal and technical quality are outstanding. NGC reports just one numerically finer example at MS69 (10/17). NGC ID# 2549, PCGS# 7130

3870 1881-S MS67 Prooflike PCGS. CAC. Moderate cameo contrast appears on each side of this Superb Gem Prooflike 1881-S dollar. The strike is sharp and no abrasions are seen. Gold and lavender border toning surround brilliant interiors. Prooflike coins are scarce in this grade and rarely offered finer. Population: 81 in 67 (3 in 67+) Prooflike, 5 finer. CAC: 26 in 67, 2 finer (10/17). NGC ID# 2549, PCGS# 7131

3871 1882 MS66+ PCGS. A sharp, high-end example of this early Philadelphia Morgan issue, showing frosty, brilliant surfaces and no abrasions of note. Liberty's cheek is particularly clean. PCGS has seen only 10 finer non-Prooflike coins, plus three Prooflike and Deep Mirror Prooflike pieces in MS66 (10/17). NGC ID# 254A, PCGS# 7132

3872 1882-CC MS66 PCGS. CAC. Available in MS66, the 1882-CC Morgan is seldom offered finer. This Premium Gem displays frosty, radiant cartwheel luster without toning or major abrasions. The eagle's breast shows minor strike weakness, although the eye appeal is largely unaffected. NGC ID# 254S, PCGS# 7134

3873 1882-O MS65 PCGS. The population of certified 1882-O dollars declines by nearly 94% from MS65 to MS66 or higher, highlighting the issue's conditional rarity. Both sides remain brilliant with bright satin mint luster. Seemingly clean for the grade and well-struck. NGC ID# 254C, PCGS# 7136

3874 1882-O MS65 PCGS. CAC. Bowers describes the luster on the 1882-O as "often dull and insipid," but that could not be further from the truth for this radiant Gem. Glints of gold around the border merge with brilliant centers, where the strike is extraordinarily bold for the facility. NGC ID# 254C, PCGS# 7136

**1882-O Morgan Dollar, MS66
Rare at This Level**

3875 1882-O MS66 PCGS. This New Orleans Morgan dollar issue is available by the thousands through MS65, but the certified population drops well-below 100 coins in MS66. Devoid of color and awash in satin mint luster, this Premium Gem offers a typical strike for the Southern branch mint but the surfaces are remarkably well-preserved. Population: 69 in 66 (4 in 66+), 6 finer (10/17). NGC ID# 254C, PCGS# 7136

3876 1882-O/S Recessed, VAM-4, MS64 PCGS. A Top 100 Variety. This near-Gem is among the finest VAM-4 coins attributed by PCGS. Other than a crescent of rainbow toning along the lower reverse, the coin is essentially brilliant with the faintest trace of lavender tinting. The eagle's breast feathers show slight strike weakness as usual. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

3877 1882-O/S Recessed, VAM-4, MS64 NGC. A Top 100 Variety. The untuned silver surfaces of this important variety exhibit satin luster and slight reflectivity on the obverse. Although myriad microscopic marks are noted, there are no unsightly bagmarks or other abrasions on either side of this lovely example. NGC ID# 254D, PCGS# 133891 Base PCGS# 7138

3878 1883 MS66 Prooflike PCGS. Frost-white devices complement semiprooflike fields on this contrasted Premium Gem. The hair above Liberty's ear is not quite full, but the strike is yet pleasing. Only a few faint luster grazes on the cheek limit the grade. Population: 13 in 66 (2 in 66+) Prooflike, 0 finer; 14 in 66 (2 in 66+) Deep Mirror Prooflike (10/17). NGC ID# 254G, PCGS# 7143

**1883-CC Silver Dollar, MS67
VAM-8A, Nearly Pristine**

3879 1883-CC MS67 PCGS. VAM-8A. A band of lavender, rose, orange, and blue-green toning visits the upper-left obverse. The remainder of this high-grade Carson City type coin is brilliant. Although the 1883-CC eventually emerged in quantity from the GSA holdings, relatively few such pieces are comparable in quality with the present exceptional Superb Gem. VAM-8A is an interesting variety with a clashed N in IN, a lightly repunched date, and a small dash below the second 8. NGC ID# 254J, PCGS# 7144

3880 1883-S MS62 PCGS. CAC. This satiny Mint State example displays radiant cartwheel luster and is one of only 35 pieces in this grade to be awarded a CAC green label for high-end quality (10/17). The strike is sharp, and the mainly brilliant surfaces show only light abrasions in the fields with a few more prominent marks on the cheek. A challenging San Francisco issue in Mint State. NGC ID# 254K, PCGS# 7148

3881 1883-S MS63 PCGS. The 1883-S kicks off a run of scarce-to-rare S-Mint dollars and qualifies as a semikey date in Select or finer Uncirculated conditions. This brilliant and semireflective example defines the term "cartwheel" luster, which a sharp strike shows off to optimal advantage. Some obverse field chatter defines the grade, since the reverse is clearly at least a point finer. NGC ID# 254K, PCGS# 7148

3882 1883-S MS63+ PCGS. PCGS has awarded the coveted Plus designation to only 20 Select Uncirculated 1883-S dollars. This piece is well-struck and brilliant with a strong cartwheel effect. Grade-limiting abrasions are light and uniform. The 1883-S is a better date in Uncirculated condition, and high-quality pieces are in constant demand. NGC ID# 254K, PCGS# 7148

3883 1884-CC MS66 PCGS. VAM-2. Discovered by George Mallis in 1965, this variety features repunching on 18 and the first C in the mintmark. The late die state shows heavy cracks on each side. This is a brilliant, strongly struck Premium Gem with radiant mint frost. Very scarce any finer. NGC ID# 8BBF, PCGS# 7152

**1884-CC Morgan Dollar, MS67
Satiny Prooflike Surfaces**

3884 1884-CC MS67 PCGS. A stunning Superb Gem Morgan dollar from the famous Carson City Mint, this coin exhibits sharply detailed design elements and impeccably preserved brilliant surfaces, with a mix of vibrant satiny luster and prooflike reflectivity in the fields. Housed in a green label holder. PCGS has graded three numerically finer examples (10/17). NGC ID# 8BBF, PCGS# 7152

3885 1884-CC MS66 Prooflike PCGS. CAC. A scarce, high-end Prooflike example of this otherwise plentiful Carson City Morgan. Although softly struck on the hair above Liberty's ear, the eye appeal is strong due to appreciable cameo contrast and brilliant surfaces. A few light grazes on Liberty's neck are all that limit the grade. NGC ID# 254M, PCGS# 7153

3886 1884-CC MS65 Deep Mirror Prooflike PCGS. Deep Mirror Prooflike examples of the 1884-CC dollar are much scarcer than their non- or minimally contrasted cousins, especially in Gem condition. The fields are profoundly reflective, while needle-sharp motifs display a thick layer of mint frost. Small abrasions do not overly affect the eye appeal. NGC ID# 254M, PCGS# 97153

3887 1884-CC MS66 Deep Mirror Prooflike PCGS. The incredible depth of mirroring on this Premium Gem, coupled with the frost-white, razor-sharp design elements, creates deeply prooflike white-on-black contrast. The preservation and eye appeal are outstanding. PCGS lists only three finer Deep Mirror Prooflike examples (10/17). NGC ID# 254M, PCGS# 97153

3888 1884-S AU58 PCGS. The 1884-S and 1901-P are the foremost condition rarities in the Morgan series. Each is very scarce in mint condition. This piece has almost complete mint luster with just the faintest trace of friction in the fields. Russet and blue toning surrounds the devices, more so on the reverse. NGC ID# 254P, PCGS# 7156

3889 1884-S AU58 NGC. Only a handful of collectors will ever have the luxury of owning an 1884-S dollars in mint condition. Obtaining an example in AU58 is the next best thing. Partial luster illuminates the recesses of this bright near-Mint offering. Wispy marks appear on each side, as does a trace of rub over the highest points. NGC ID# 254P, PCGS# 7156

3890 1884-S AU58 NGC. A lovely near-Mint example of this important condition rarity, this example has faint champagne toning on its brilliant silver surfaces. Wispy hairlines and scattered marks are consistent with the grade. This piece offers an affordable alternative for a collection of Mint State Morgan dollars. NGC ID# 254P, PCGS# 7156

3891 1884-S AU58 PCGS. Scarce and pricey in Mint State, the 1884-S experiences strong collector demand in the upper AU grades. This near-Mint example displays good detail and bright, luster fields. Minor surface chatter accompanies the grade but is not distracting. NGC ID# 254P, PCGS# 7156

3892 1885-CC MS64 Deep Mirror Prooflike PCGS. This piece is sharply struck with original mint luster. Mirrored fields and frosty relief elements produce modest cameo contrast, and there are only a few light grazes that limit the grade. Faint hints of champagne toning appear on each side. Housed in a green label holder. NGC ID# 254S, PCGS# 97161

3893 1885-O MS67 PCGS. CAC. The 1885-O Morgan dollar is infrequently seen in MS67 with a CAC green label. This piece is brilliant and thickly frosted, showing an above-average strike and pristine surfaces. PCGS reports only a single numerically finer coin (11/17). NGC ID# 254T, PCGS# 7162

3894 1885-S MS65 PCGS Secure. Lightly toned in gunmetal blue, golden-brown, and ivory shades, this Gem 1885-S displays great eye appeal that outshines the quality of its strike. The San Francisco Mint did not live up to its previous issues with regard to strength of strike, and nearly all examples show weakness at the centers. Bagmarks plague the issue as well, but this coin fares well in that regard, with only a pair of light reeding marks near M in UNUM. Housed in a PCGS Secure holder. Just 47 pieces have been awarded a finer numeric grade by PCGS (10/17). NGC ID# 254U, PCGS# 7164

3895 1885-S MS64 Prooflike PCGS. The 1885-S is a scarce issue in the Prooflike category and prohibitively rare in Deep Mirror Prooflike. This near-Gem coin displays brilliant luster and white-on-black cameo contrast. The design elements are well-struck and no distracting abrasions are seen. Population: 58 in 64 (2 in 64+) Prooflike, 14 finer (including a lone Deep Mirror Prooflike coin, in MS65) (10/17). NGC ID# 254U, PCGS# 7165

3896 1886-O MS61 NGC. Each side is satiny and well-defined with surprisingly clean fields. The chin has a couple of tiny contact marks, but there are no other major flaws. Struck from a clashed reverse die.

Ex: New York Signature (Heritage, 11/2003), lot 8506. NGC ID# 254W, PCGS# 7168

3897 1886-O MS62 PCGS. The 1886-O Morgan is a better date in Uncirculated grades but is yet collectible by many enthusiasts at the present MS62 grade level. Well-struck design elements and satiny, untuned luster are the chief visual attributes of this piece, and grade-limiting marks on the cheek are light and unobtrusive. NGC ID# 254W, PCGS# 7168

3898 1886-O MS62 PCGS. A pleasing lower-end Mint State example of this conditionally challenging New Orleans issue, showing sharp central definition and essentially brilliant mint luster. Grade-limiting abrasions are remarkably light and unobtrusive. NGC ID# 254W, PCGS# 7168

3899 1886-O MS63 NGC. This brilliant and lustrous condition rarity has bright silver surfaces with delicate peripheral iridescence on each side. Scattered marks are evident, but of little consequence. Few if any 1886-O Morgan dollars remained in Treasury vaults in the 1960s. NGC ID# 254W, PCGS# 7168

1886-O Dollar, Attractive MS63 CAC Endorsed

3900 1886-O MS63 PCGS. CAC. A solid Mint State example of this scarce New Orleans dollar, most of which apparently entered circulation or were later melted under the authority of the Pittman Act. The critical central devices are especially bold for the issue and both sides present a pleasing, satiny luster with just the slightest overlay of golden-gray patina on the reverse. A few light marks are the sole argument against an even finer grade.

Ex: Long Beach Bullet Sale (Heritage, 6/2000), lot 333. NGC ID# 254W, PCGS# 7168

3901 1886-S MS65 NGC. This Gem is well-struck and toned in lavender-gray and gold hues. Semiprooflike fields increase the eye appeal. The 1886-S is collectible in this grade, but NGC has certified only 19 numerically finer non-Prooflike coins (11/17). NGC ID# 254X, PCGS# 7170

3902 1887 MS67 PCGS. CAC. Brilliant surfaces are nearly perfect and yield brilliant cartwheel luster. This remarkable Superb Gem is conditionally scarce so fine, and PCGS lists only a single submission numerically finer (10/17). CAC-endorsed coins in MS67 are rarely offered and represent the finest examples with the coveted "green bean" label. CAC: 57 in 67, 0 finer (10/17). NGC ID# 27Y3, PCGS# 7172

3903 1888-S MS65 NGC. There are no identifying die characteristics on this well-made 1888-S Morgan dollar that would indicate an unusual VAM variety. This Gem exhibits brilliant silver luster and bold design definition without any toning on either side. NGC has only certified 13 finer examples of this condition rarity. NGC ID# 2557, PCGS# 7186

3904 1889-CC XF40 PCGS. This pewter-gray XF coin has deep russet and olive toning in the margins that accentuates the relief of the central devices. The surfaces are lightly marked but mainly problem-free. The 1889-CC is the rarest of the Carson City Morgans and one of the major key dates in the series overall. NGC ID# 2559, PCGS# 7190

1889-O Silver Dollar, MS65 Virtually Mark-Free and Attractive

3905 1889-O MS65 PCGS. Bits of orange-gold toning at the rims yields to brilliant and frosted surfaces on the smooth, high-luster obverse. The reverse is colorfully toned in a full palette of pastel colors ranging from lavender and blue to cherry-red, orange, and lemon-yellow. The strike is sharp except in the very centers, where faint roller marks above the ear cause slight loss of detail, and the eagle's legs lack full definition. Eye appeal is exceptional. PCGS reports just 13 numerically finer examples (11/17). NGC ID# 255A, PCGS# 7192

1889-S Dollar, MS65 Prooflike Green CAC, Green Label Holder

3906 1889-S MS65 Prooflike PCGS. CAC. The 1889-S boasts a limited mintage of 700,000 pieces and commands a premium in all grades. Prooflike examples are occasionally seen, but such are rare in Gem condition. This CAC-approved coin displays essentially brilliant surfaces and modest cameo contrast. The devices are boldly rendered, and only light contact marks are discernible. Housed in a green label holder. Population: 8 in 65 Prooflike, 9 finer (including Deep Mirror Prooflike coins in MS65 and finer). CAC: 2 in 65, 0 finer (10/17). NGC ID# 255B, PCGS# 7195

3907 1890 MS64 Deep Mirror Prooflike PCGS. At first glance, this deeply reflective circulation strike appears to be a proof. Each side is brilliant with razor-sharp motifs. The 1890 is exceedingly scarce with Deep Mirror Prooflike contrast. PCGS reports 10 such submissions finer (10/17).

Ex: Summer FUN Signature (Heritage, 7/2007), lot 1496. NGC ID# 3VX7, PCGS# 97197

3908 1890-CC MS64 PCGS. Sharply struck and minimally abraded for a Carson City dollar, this frosted near-Gem example is mostly brilliant with a few small areas of pale-gray patina. Liberty's hair is razor-sharp over the ear. More than 2.3 million pieces were struck at the old Nevada Mint, yet relatively few pieces survive any finer than this Choice example. NGC ID# 255D, PCGS# 7198

3909 1890-CC MS64 NGC. Irregular splashes of copper-gold toning affect the obverse of this satiny, well-struck representative. The surfaces are satiny in texture and without serious abrasions. Although available in this grade, the 1890-CC Morgan will be elusive for many collectors in better condition.

Ex: Long Beach Signature (Heritage, 2/2005), lot 10322. NGC ID# 255D, PCGS# 7198

1890-CC Tail Bar Dollar, VAM-4
Seldom-Seen MS63 Deep Mirror Prooflike

3910 1890-CC Tail Bar, VAM-4, MS63 Deep Mirror Prooflike PCGS. A Top 100 Variety. The substantial die gouge from the lower tail feathers is visible at arm's length and represents one of the most-desired varieties among Carson City dollars. It is also one of the most impressive anomalies in the entire Morgan series. Light abrasions pepper the mirrorlike fields, while frosted central devices earn the important Deep Mirror Prooflike designation. A sharply struck example, very scarce in the contrasted, reflective format. Population: 11 in 63 Deep Mirror Prooflike, 6 finer (10/17). NGC ID# 255D, PCGS# 43339 Base PCGS# 987199

3911 1890-O MS65 PCGS. PCGS has seen numerous Gem 1890-O dollars, but only 30 finer pieces are reported at that service (11/17). This collectible, untoned MS65 coin displays frosty cartwheel luster and a fairly clean cheek. Slight strike weakness is seen on the hair above Liberty's ear. NGC ID# 255E, PCGS# 7200

3912 1890-O MS65 NGC. CAC. This Gem 1890-O Morgan displays brilliant interiors with vivid sun-gold border toning. The strike is above-average for New Orleans dollars of this period, and Liberty's cheek is particularly clean. NGC lists only five higher-grade representatives (11/17). Housed in a prior generation holder with CAC endorsement. NGC ID# 255E, PCGS# 7200

3913 1890-S MS65 NGC. CAC. This Gem 1890-S Morgan is sharply struck and brilliant with outstanding frosted mint luster. Only a few faint grazes under Liberty's eye prevent an even finer grade. Large quantities of 1890-S dollars were paid out of the Treasury in the 1940s and 1950s, although coins grading finer than MS65 are borderline scarce. NGC ID# 255F, PCGS# 7202

1891-CC Silver Dollar, MS65
Frosty and Well-Struck

3914 1891-CC MS65 PCGS. The softly frosted mint luster of this Gem 1891-CC Morgan is familiar for the issue, although the sharp central devices are arguably an uncommon characteristic, given the frequency with which we see poorly struck examples of the 1890s Carson City issues. This piece is well-preserved and has warm golden toning. This date is rarely offered finer than MS65. NGC ID# 255H, PCGS# 7206

3915 1892 MS65 PCGS. This is a well-struck P-mint dollar with softness confined to the marginal elements of the design. Each side retains its brilliance and frosty luster. The reverse is especially clean for the grade, while Liberty's cheek shows a few small marks. The 1892 is scarce in MS65 and extremely rare any finer, where PCGS has seen just six examples (10/17). NGC ID# 255L, PCGS# 7212

3916 1892 MS65 NGC. Available in MS65, the 1892 Morgan dollar is rare any finer, with only one coin so-graded at NGC and six at PCGS (11/17). This frosty, brilliant Gem displays well-struck design elements and clean fields. Only some faint grazes on Liberty's jaw limit the grade. NGC ID# 255L, PCGS# 7212

1892 Silver Dollar, MS65
Underrated in High Grade

3917 1892 MS65 NGC. A Gem, and high-end even for that grade, this 1892 Morgan dollar offers vibrant, satiny cartwheel luster and above-average central sharpness. Liberty's cheek is fairly clean, and only a few light grazes in the adjacent field prevent a finer grade. Brilliant interiors yield to orange-gold border toning. The 1892 is available in this grade, but NGC lists only a single finer non-Prooflike pieces, plus nine Prooflike and Deep Prooflike coins in Gem condition (10/17). NGC ID# 255L, PCGS# 7212

3918 1892-CC MS62 PCGS. CAC. Brilliant, frosty luster is untuned on this Mint State 1892-CC Morgan. The reverse is nearly pristine, and the obverse has just a few light grazes on the cheek that limit the grade. Nonetheless, eye appeal is outstanding for the MS62 level. Moderate strike weakness at the centers is seen on many 1892-CC dollars. Housed in a green label holder. NGC ID# 255M, PCGS# 7214

3919 1892-CC MS63 PCGS. This well-struck Select 1892-CC Morgan dollar displays radiant original mint luster. The interiors are untuned, and yellow-gold color appears only around the extreme outer peripheries. Eye appeal surpasses expectations for the grade. NGC ID# 255M, PCGS# 7214

3920 1892-CC MS64 PCGS. An impressive Choice Morgan dollar from the famous Carson City Mint, this coin exhibits sharply detailed design elements and well-preserved, brilliant surfaces, with vibrant mint luster throughout. Eye appeal is outstanding. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
Blazing Mint Luster

3921 1892-CC MS64 PCGS. VAM-4B. With peripheral die cracks through the reverse legend and a recut mintmark, this brilliant and frosted 1892-CC is an interesting variety as well as a much-sought Carson City near-Gem dollar. We note a few glimpses of light, almond-gold toning and some strike weakness above the ear. Blazing cartwheel mint luster shines from both sides. Only a few light marks (grazes) on the cheek and neck exist, while the fields are remarkably free of bagmarks. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, Nearly Brilliant MS64
Well-Preserved, Frosted Surfaces**

- 3922 1892-CC MS64 PCGS. CAC.** The GSA sales of the early 1970s did not contain any examples of this late Carson City issue, contributing to its scarcity in high grades. This Choice example displays frosty mint luster with only minor grazes on each side limiting the grade. The eagle's breast and the hair above Liberty's ear exhibit just a touch of weakness, though the other elements are well brought up. Faint traces of light, reddish-gold color appear around the extreme outer peripheries.
Ex: *PNG Invitational Signature* (Heritage, 10/2014), lot 3852. NGC ID# 255M, PCGS# 7214

- 3923 1892-O MS64+ PCGS. CAC.** In excess of 2.7 million silver dollars were struck at the O-mint in 1892. Survivors are seldom found in high grade with CAC endorsement for quality and originality. Luster cartwheels over brilliant, lightly abraded surfaces. Typically struck over the ear, lower stars, and talons but undeniably appealing. NGC ID# 255N, PCGS# 7216

- 3924 1892-S AU50 PCGS.** A typical 1892-S dollar survives in XF40 condition. Examples are exceedingly rare in Mint State. This About Uncirculated dollar displays above-average detail and glints of luster within the protected areas of the design. Myriad marks and blending over the highest points are expected. NGC ID# 255P, PCGS# 7218

1892-S Dollar, Bright AU55

- 3925 1892-S AU55 PCGS.** The San Francisco Mint was responsible for the production of 1.2 million Morgan dollars in 1892. The issue is notoriously difficult in high grades with the average grade awarded falling just shy of XF40. Untoned surfaces are bright with hints of luster emanating from the legends and other hidden areas. Faint central softness occurs on each side, accounting for the Choice AU grade. NGC ID# 255P, PCGS# 7218

- 3926 1893 MS63 PCGS. CAC.** Blazing, frosty luster and whispers of gold toning give this Select 1893 Morgan dollar immense visual appeal. The strike is pleasing for the issue, and only a few faint luster grazes on the obverse limit the grade. Indeed, this is one of the most appealing Select coins that we have seen in recent years. NGC ID# 255R, PCGS# 7220

- 3927 1893 MS64 PCGS. VAM-3.** The 3 in the date is doubled at the top, as is the profile of Liberty and the left-side wreath leaves. This brilliant and lustrous near-Gem 1893 is one of just 389,000 pieces struck in a year of financial panic and repeal of the Sherman Silver Purchase Act. The strike is appropriately sharp (as usual) for the issue and the frosted surfaces show only a handful of light, small abrasions. Housed in an early generation blue label holder with the barcode on the back. NGC ID# 255R, PCGS# 7220

**1893 Morgan Dollar, MS65
Low-Mintage Philadelphia Scarcity**

- 3928 1893 MS65 NGC. VAM-3.** The top of the 3 is repunched, and doubling is apparent on the profile and left wreath leaves. Mixed golden-orange, plum-red, and ice-blue patina swathes the obverse. The other side is mainly untuned with pale color around the margins. This low-mintage scarcity is pinpoint-sharp with slight softness over the ear and breast. NGC reports just four numerically finer coins, regardless of the variety (10/17). NGC ID# 255R, PCGS# 7220

- 3929 1893-CC XF40 PCGS.** The GSA release of the 1970s turned up a single example of the 1893-CC, the final Morgan dollar issue from the Carson City Mint. The exposed areas are bright silver, while the recesses display mixed gold, crimson, and blue tones. Lightly worn and abraded, but appealing nevertheless. NGC ID# 255S, PCGS# 7222

- 3930 1893-O AU58 PCGS.** The 1893-O Morgan dollar claims a low mintage of 300,000 pieces. This impressive near-Mint specimen exhibits a sharp strike for a New Orleans issue, with just a trace of wear on the design elements. The lustrous, lightly abraded surfaces show highlights of lavender-gray and champagne toning. NGC ID# 255T, PCGS# 7224

- 3931 1893-S Fair 2 NGC.** Although the outer edges of this example are almost smooth due to wear, the important date and mintmark are clearly visible along with most of LIBERTY. Pleasing olive-gray patina is the order of the day. Budget-minded collectors and those assembling a Lowball Registry set will likely be competing for this piece. We note a small rim bump near 11 o'clock.
Ex: *Central States Signature* (Heritage, 4/2013), lot 4919. NGC ID# 255U, PCGS# 7226

- 3932 1893-S Good 6 PCGS.** Uniform tan-gray patina covers smooth surfaces on this low-grade, problem-free 1893-S dollar. The rims are complete, and some feather detail remains on the eagle's inner wings. The Liberty portrait is mostly an outline in this grade. A collectible example of this key San Francisco issue. NGC ID# 255U, PCGS# 7226

- 3933 1893-S Good 6 PCGS.** A well-circulated collector-grade example of this key San Francisco issue. Bright silver-gray surfaces show hints of tan-gold patina on the high points of the devices. An old reed mark in the field next to the eagle's left (facing) wing is the only abrasion of note. NGC ID# 255U, PCGS# 7226

- 3934 1893-S Good 6 PCGS.** A pleasing collector-grade example of this key San Francisco issue, showing full rims and a clear date and mintmark. Uniform pewter-gray surfaces are smooth and appealing for the grade. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, VF25
Pleasing Color and Surfaces

3935 1893-S VF25 PCGS. The 1893-S runs the gamut of circulated grades, available from Fair to About Uncirculated at every level, each successively more expensive. The true “king” of Morgan dollars does not come “cheap” in any grade. Within each grade, all manner of surface quality and eye appeal exists. This example is a reasonably smooth and attractive VF25, with a few light marks on the cheek but no heavy field marks and no rim problems. Pale russet-gold at the rims surrounds pleasing, silver-gray surfaces. NGC ID# 255U, PCGS# 7226

3936 1894 AU58 PCGS. This near-Mint 1894 dollar displays virtually full mint luster and has only a trace of friction on the eagle's breast and the hair above Liberty's ear. Brilliant surfaces show only a few light luster grazes that accompany the grade. Eye appeal is outstanding for an AU-level Morgan. NGC ID# 255V, PCGS# 7228

3937 1894 AU58 PCGS. CAC. The 1894 is a key Philadelphia Mint issue in the circulation-strike Morgan dollar series. This example has original mint luster and light golden-gray toning with a trace of rub over the design high points. Just 110,972 pieces were struck, an irresistibly low number for collectors. CAC-endorsed. NGC ID# 255V, PCGS# 7228

3938 1894-O MS61 PCGS. The softly frosted, untuned mint luster on this Uncirculated 1894-O Morgan is original, and grade-limiting abrasions are relatively light. The central high points exhibit the usual strike weakness common to this issue. NGC ID# 255W, PCGS# 7230

3939 1894-O MS61 PCGS. Any 1894-O with a measure of eye appeal is in demand among Morgan dollar collectors. David Bowers called the issue “wretched in appearance” and even the well-mannered Miles Standish called it “the least visually inspired” dollar in the series. This example has flash and a large amount of charisma. The strike is soft over the ear (after all, it is an 1894-O) but the brilliant surfaces are lustrous and frosted with surprisingly few marks for the assigned grade. NGC ID# 255W, PCGS# 7230

3940 1894-O MS61 NGC. This satiny, untuned Mint State example has relatively clean fields, but light lines and marks on Liberty's cheek limit the grade. The strike is weak at the centers, consistent with norms for the New Orleans Mint in the mid-1890s. The 1894-O is a better date in all grades. NGC ID# 255W, PCGS# 7230

3941 1894-S MS63 PCGS. The 1894-S Morgan dollar is a semikey, commanding a premium even in low circulated grades. This collectible Mint State coin is brilliant and satiny with minimal abrasions. Slight central strike weakness is normal for the branch mint issues of the mid-1890s. NGC ID# 255X, PCGS# 7232

3942 1894-S MS64 PCGS. This near-Gem has a distinctive two-faced appearance. The obverse is frosty, brilliant, and lightly marked according to the grade. The reverse is deeply prooflike, toned light golden, and nearly pristine. The strike is above-average for the issue. Finer 1894-S dollars are infrequently available. NGC ID# 255X, PCGS# 7232

3943 1894-S MS64 PCGS. CAC. A satiny, golden-toned near-Gem with a hint of reflectivity in the fields. The devices are well-defined, and Liberty's cheek is devoid of any significant abrasions. The 1894-S Morgan is available in this grade but elusive finer. NGC ID# 255X, PCGS# 7232

3944 1895-O AU55 PCGS. This Choice AU 1895-O Morgan is indeed high-end for the AU grade level, retaining much original luster in the fields with few surface abrasions. The coin is brilliant, and weakness on the eagle's breast and above Liberty's ear is more due to this issue's typically poor strike than actual wear. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, Near-Mint
Scarce O-Mint Issue

3945 1895-O AU58 PCGS. VAM-3. The year 1895 needs no introduction to Morgan dollar specialists. This near-Mint State piece would certainly make a cost-effective alternative to an Uncirculated example, boasting as it does much satin luster remaining over pale yellow centers tinged with cinnamon near the rims. A few marks on Liberty's cheek are in concert with the grade. The date is set farther right than normal, with narrow doubling on the flag of 5.
Ex: Long Beach Signature (Heritage, 9/2013), lot 5856. NGC ID# 255Y, PCGS# 7236

1895-O Dollar, Brilliant AU58
Challenging in This Grade

3946 1895-O AU58 PCGS. VAM-3. The 1895-O is the key New Orleans Morgan dollar, even scarcer than the lower mintage 1893-O. This faintly toned example has virtually full luster, and only a trace of friction on the hair above the ear. The lower obverse has a couple of moderate marks. The 5 in the date is recut.
Ex: Long Beach Signature (Heritage, 5-6/2007), lot 1597. NGC ID# 255Y, PCGS# 7236

3947 1896-O MS62 PCGS. Hints of lavender-gold border toning surround brilliant interiors on this Mint State example. The strike is predictably weak on the eagle's breast and the hair above Liberty's ear, and light, scattered abrasions account for the grade. The 1896-O is a better date in Uncirculated condition, particularly above MS62. NGC ID# 272U, PCGS# 7242

3948 1897-O MS61 PCGS. The 1897-O is far scarcer in mint condition than its 4 million coin-mintage suggests. This Uncirculated New Orleans dollar exhibits satiny luster over bright, untuned surfaces. The devices are well-struck, and the reverse is relatively clean. NGC ID# 2565, PCGS# 7248

- 3949 1897-O MS62 PCGS. CAC.** A better date in Uncirculated condition, the 1897-O Morgan dollar is genuinely scarce with a CAC green label. This piece is well-struck and brilliant with light, unobtrusive abrasions. The fields are semiprooflike. CAC: 31 in 62, 35 finer (11/17). NGC ID# 2565, PCGS# 7248

1898 Dollar, Top-Grade MS67

- 3950 1898 MS67 PCGS.** Amazingly, LaVerre Redfield hoarded as many as 15,000 pieces of the 1898 dollar. It is unlikely this Superb Gem was one of them, given its silver brilliance and nearly unmarked surfaces. As usual, the devices are razor sharp — a hallmark of the issue, which is usually well-struck. Cartwheel luster radiates from the frosted fields and fully brought-up devices. Neither service reports a numerically finer example. PCGS Population: 134 in 67 (7 in 67+), 0 finer (10/17). NGC ID# 2568, PCGS# 7252

- 3951 1898 MS66 Prooflike PCGS.** In MS66 and finer condition, contrasted 1898 Morgan dollars with mirrored fields are scarce. This Premium Gem Prooflike coin displays a sharp strike, a clean cheek, and remarkably clean fields. Blue, lavender, and gold border toning attractively frames brilliant interiors. Population: 31 in 66 (4 in 66+) Prooflike, 2 finer; 14 in 66 Deep Mirror Prooflike, 1 finer (10/17). NGC ID# 2568, PCGS# 7253

- 3952 1898-S MS65 PCGS. VAM-4, S/S Mintmark.** The typical 1898-S grades no finer than MS64, a level easily exceeded by this lustrous Gem example. A few fine scrapes on the tip of the neck truncation are the sole marks of note on the obverse, while the reverse is wholly clear of abrasions. A pair of light die scratches in the left (facing) wing confirm the VAM-4 variety. Brilliant surfaces show a few light hints of almond-gold and a bit of blending over the ear. NGC ID# 256A, PCGS# 7256

- 3953 1898-S MS65 PCGS.** The 1898-S is available in MS65 but elusive finer. Most of the high-grade population is PCGS-certified. This Gem displays champagne-tinted luster with deeper gold at the borders. The surfaces are well-preserved, but slight strike weakness is seen immediately above Liberty's ear. NGC ID# 256A, PCGS# 7256

1898-S Dollar, MS64 Deep Mirror Prooflike Reflective Cameo

- 3954 1898-S MS64 Deep Mirror Prooflike PCGS. CAC.** The 1898-S is usually available in Mint State through MS65, although Prooflike coins are elusive. This is a conditionally rare near-Gem Deep Mirror Prooflike coin, which is memorably one of the finest DMPL coins endorsed by CAC. The strike is sharp, and the brilliant surfaces display considerable cameo contrast. Population: 36 in 64 (3 in 64+) Deep Mirror Prooflike, 7 finer. CAC: 6 in 64, 0 finer (10/17). NGC ID# 256A, PCGS# 97257

- 3955 1900-O/CC VAM-8, Top 100, MS65 PCGS.** One of the more prominent varieties for the O/CC Morgan. This piece is in a very early die state of the VAM-8 pairing. The strike is sharp, and the frosty, brilliant surfaces show only trivial signs of contact. Housed in an old green label holder. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

- 3956 1900-O/CC VAM-11 MS64+ PCGS. CAC.** A Top 100 Variety. Frosty, vibrant luster shows minimal abrasions on this high-end Choice example. The obverse displays mottled olive, sea-green, and amber-gold toning, while the reverse is brilliant. Strike weakness on the eagle's breast is typical of the issue. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 3957 1900-O/CC VAM-11 MS64+ PCGS. CAC.** A Top 100 Variety. This lightly toned and sharply struck overmintmarked silver dollar features radiant luster and well-preserved fields. The portrait displays only infrequent faint grazes. Eye appeal surpasses expectations for the grade.
Ex: *Summer FUN Signature* (Heritage, 7/2011), lot 4199. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 3958 1900-O/CC VAM-11 MS65 PCGS.** A Top 100 Variety. Both underlying C's are faintly visible on this variety. Gem-quality surfaces are untuned and satiny, and the central high points are remarkably well-defined. Eye appeal is pleasing. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268

- 3959 1900-S MS65 PCGS.** Moderately well-struck and semiprooflike, this Gem 1900-S Morgan dollar shows no mentionable toning and has only a few light marks on Liberty's cheek. Roller marks are visible on the jaw under magnification, not fully struck out of the planchet. Higher-grade 1900-S Morgans are scarce. NGC ID# 256H, PCGS# 7270

- 3960 1900-S MS66 PCGS.** The 1900-S is usually available in Mint State, but collectors seeking a Premium Gem example will encounter difficulty. This piece is toned in original champagne hues with cartwheeling, frosty luster delivering the backlight. A distinct lack of abrasions is the hallmark of the grade, and trivial weakness on the hair above Liberty's ear is virtually unnoticed. PCGS has seen three Superb Gems finer (10/17). NGC ID# 256H, PCGS# 7270

1901 Morgan Dollar, MS61 Appealing for the Grade

- 3961 1901 MS61 NGC.** Among 20th century issues, the 1901 is arguably the most challenging Morgan dollar to acquire in pleasing Mint State condition. This untuned example is in an affordable numeric grade but shows no major abrasions — only light handling marks on the cheek prevent a finer designation. The eagle's breast is softly struck, as usual. NGC ID# 256J, PCGS# 7272

- 3962 1901 Doubled Die Reverse, VAM-3, AU53 PCGS.** A Top 100 Variety and a WOW! Morgan VAM. The so-called "Shifted Eagle" reverse, showing the eagle and motto IN GOD WE TRUST boldly die doubled. This piece shows light high-point wear and has some luster remaining in the fields. A hint of light golden toning graces the border regions. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

- 3963 1901-S MS64 PCGS.** The 1901-S is somewhat challenging in Mint State, though not nearly to the same extent as the famous and conditionally rare 1901-P. This well-detailed near-Gem displays shimmering frost over minimally marked, untuned surfaces. A tick on the jaw is the only overt abrasion. NGC ID# 256L, PCGS# 7276

3964 1902 MS66+ PCGS. CAC. A satiny, faintly champagne-tinted Premium Gem with remarkable surface quality. Only a fraction of the MS66 coins known are CAC-endorsed. This piece is slightly soft on the central high points but is sharp elsewhere. PCGS lists 32 Superb Gems finer (11/17). NGC ID# 256M, PCGS# 7278

3965 1902-O MS66+ PCGS. CAC. Available in MS66, the 1902-O Morgan dollar becomes a major condition rarity just one point finer. This Plus-graded, CAC-approved Premium Gem is highly appealing to the quality-conscious collector. Frosty, brilliant mint luster illuminates well-struck devices and unabraded surfaces. PCGS lists only 29 finer examples (10/17). NGC ID# 256N, PCGS# 7280

3966 1902-S MS65 PCGS. The 1902-S was paid out from the San Francisco Mint from the 1920s through the 1950s, accounting for its collectibility in Mint State. The centers are incomplete with prominent diagonal roller marks on the reverse. A brilliant, mint-fresh Gem. NGC ID# 256P, PCGS# 7282

1903 Dollar, MS67 Among the Finest at PCGS, CAC

3967 1903 MS67 PCGS. CAC. The 1903 Morgan dollar is virtually unseen in higher grades, save for a pair of MS68 coins at NGC. None are graded higher at PCGS or CAC (10/17). This outstanding Superb Gem is fully struck and wholly brilliant with remarkably unabraded fields. A single tick on the breast prevents an even higher grade. Much prooflike character exists on both sides for terrific all-around appeal. NGC ID# 256R, PCGS# 7284

3968 1903-S AU50 PCGS. This satiny AU coin displays light golden-gray toning over moderately abraded surfaces. Sharp detail remains on the devices, and the protected regions of the fields exhibit semiprooflike reflectivity. The 1903-S is a better date, with a low mintage for the period of little more than 1.2 million coins. NGC ID# 256T, PCGS# 7288

3969 1903-S AU53 PCGS. A relatively low mintage of 1.2 million coins and widespread circulation account for the issue's semikey status and rarity in high grades. This is a lightly circulated representative with partial remaining luster and minor friction. Scattered wisps appear over bright surfaces. Far finer than the average Choice VF example. NGC ID# 256T, PCGS# 7288

3970 1903-S Micro S, VAM-2, Top 100, XF45 PCGS. A Top 100 Variety. VAMWorld.com states in part: "VAM-2 coins are very hard to find in XF and above." The difficulty is not only due to the scarcity of the variety but the elusive nature of the 1903-S Morgan overall. This Choice XF coin displays bright, satiny surfaces and excellent detail for the grade. NGC ID# 256T, PCGS# 133967 Base PCGS# 7306

3971 1904-S AU58 PCGS. A satiny, partially lustrous, and collectible near-Mint example of the better-date 1904-S Morgan dollar. Hints of light golden toning appear on each side, and little high-point wear is present. Quite appealing for the grade. NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLAR

1886 Morgan Dollar, PR64 Subtle Field-Motif Contrast

3972 1886 PR64 PCGS. A blush of champagne toning graces modestly contrasted devices and fields on this deeply mirrored near-Gem proof. The strike is sharp throughout, and no distracting marks are present. A few faint hairlines appear only under a loupe. The 1886 proof Morgan is relatively scarce in Choice and finer condition, with most such pieces lacking strong cameo contrast. NGC ID# 27ZF, PCGS# 7321

PEACE DOLLARS

3973 1921 MS65 PCGS. This 1921 High Relief example is better-struck than many, with some central hair definition and sharp definition throughout the other devices. Traces of golden-gray toning overlay bright-silver luster across the satin-smooth, minimally marked surfaces. Always in demand for its type and beauty. NGC ID# 2U4E, PCGS# 7356

3974 1922-D MS66 PCGS. This lovely Premium Gem features a bold strike and brilliant silver luster that shines through splashes of iridescent toning that is intense on the obverse and delicate on the reverse. PCGS has only certified three finer examples (11/17). NGC ID# 257D, PCGS# 7358

3975 1922-D MS66 PCGS. Liberty's cheek is smooth with nearly full hair definition, while an unusual, light die crack runs from in front of the neck truncation through T in TRUST and terminates in the right field just beyond the hair. Brilliant and lustrous surfaces show only a few tiny marks and luster grazes. Numerically finer coins are scarcely available above the Premium Gem grade, with just three pieces at MS67 PCGS and none finer at that service (10/17). NGC ID# 257D, PCGS# 7358

3976 1922-D MS66 PCGS. Well-struck and satiny with mainly brilliant surfaces. This Premium Gem 1922-D Peace dollar is from a late die state with peripheral die cracks and minor metal flowlines. Pieces in this grade are occasionally available, but PCGS lists only three Superb Gems finer (11/17). NGC ID# 257D, PCGS# 7358

3977 1922-S MS65 PCGS. Smooth, frosted surfaces display radiant cartwheel luster throughout both sides of this Gem 1922-S. Struck from widely spaced dies, the central hair definition and the eagle's plumage are incompletely brought up — a characteristic of virtually all examples of the San Francisco Mint's first Peace dollar. This coin is sharper than many, with Mint-fresh appeal and only a few tiny marks. PCGS reports just 12 numerically finer pieces (10/17). NGC ID# 257E, PCGS# 7359

1923-D Peace Dollar, MS65
Scarce in Finer Grades

3978 1923-D MS65 PCGS. CAC. The 1923-D Peace dollar claims a substantial mintage of 6.8 million pieces, but the issue becomes quite elusive in grades above the MS65 level. This impressive Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces that show subtle hints of pale gold patina. Overall visual appeal is terrific. NGC ID# 257G, PCGS# 7361

3979 1925-S MS64+ PCGS. CAC. Mottled lavender-gray toning masks any minor grade-limiting abrasions on this high-end Choice example. The strike is sharply rendered. The 1925-S Peace dollar is elusive in Gem condition, with PCGS having certified only 41 coins finer than the present (10/17). NGC ID# 257M, PCGS# 7366

3980 1926-D MS66 PCGS. The strike is razor sharp on this Premium Gem Denver example. Completely untoned, the coin displays brilliant-silver cartwheels and nearly unmarked central motifs. A few tiny field ticks are little more than minute luster grazes — nothing of concern to detract from the overwhelmingly lustrous eye appeal. PCGS has certified a mere eight numerically finer pieces (10/17). NGC ID# 257P, PCGS# 7368

1926-D Peace Dollar
Impressive, Sharply Struck Premium Gem

3981 1926-D MS66 PCGS. CAC. Essentially brilliant with the strength of strike and intensity of luster that the '26-D often displays — perhaps more than any other Peace dollar issue. Both sides have a curving die crack that is reminiscent of its D-mint predecessors, yet marks are remarkably few with only trivial luster grazes and tiny ticks anywhere on the coin. Brief splashes of russet-tan toning are secondary to the dazzling, silver-white fields and devices. PCGS reports just eight numerically finer examples (10/17).
Ex: Long Beach Signature (Heritage, 6/1999), lot 6432; Central States Signature (Heritage, 4/2002), lot 4334. NGC ID# 257P, PCGS# 7368

3982 1927 MS65 PCGS. 1927 Peace dollars are elusive in MS65 condition, although they are considerably more available in Select Uncirculated and near-Gem condition. This coin is finer than that — a full-fledged Gem, with a strong strike and few abrasions. We note two tiny reeding marks above IN GOD WE as the sole marks of note on the obverse. The reverse shows a few ticks and tiny field marks, but nothing of consequence. Silver luster outshines some faint traces of golden-gray patina. PCGS reports only 16 numerically finer pieces (10/17). NGC ID# 257S, PCGS# 7370

3983 1927 MS65 PCGS. CAC. The conditionally rare 1927 issue is scarcely available above the Gem level, making this CAC-endorsed MS65 example a wise selection. Almond-gold toning deepens at the borders and creamy silver luster glows from the sharply struck central devices. Marks and abrasions are minimal on this well-defined, impeccably preserved Peace dollar. PCGS reports just 16 pieces in a finer numeric grade (11/17). NGC ID# 257S, PCGS# 7370

1927-D Peace Dollar, MS65
Rarely Encountered Any Finer

3984 1927-D MS65 PCGS. The 1927-D is arguably the second-rarest Peace dollar in the entire series when in Uncirculated condition (behind the 1934-S). In full Gem state, it is an important condition rarity as well. This brilliant example is sharply struck with strong central hair definition. The eagle's plumage is sharp, too. A few light grazes on the obverse and small ticks in the rays beneath E PLURIBUS are the only grade limiting factors. Frosted mint luster is terrific throughout both sides. NGC ID# 257T, PCGS# 7371

3985 1928 MS64 PCGS. The key Philadelphia issue is available in MS64 for budget-conscious collectors. This satiny example is well-struck and quite well-preserved for the grade. Light golden toning on each side is a familiar characteristic of Uncirculated 1928 Peace dollars. NGC ID# 257V, PCGS# 7373

1928 Peace Dollar, MS65
Low-Mintage Key Date

3986 1928 MS65 PCGS. Famously the key date in the Peace dollar series, the 1928 comes from a mintage of only 360,649 pieces. Nonetheless, examples are available for a price through MS64. This Gem is above-average in terms of quality, and finer pieces are rare. Although a trifle soft in the centers, the strike is bold elsewhere, complemented by frosty luster and light champagne hue. Liberty's cheek is clean. PCGS reports 18 numerically finer representatives (10/17). NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65
Low-Mintage Key**

3987 1928 MS65 NGC. From a mintage of 360,469 pieces, the 1928 Peace dollar is always in demand. Examples in MS65 condition can be found with patience, but finer coins are rare. This attractive Gem offers well-detailed design elements and well-preserved lustrous surfaces, with speckled highlights of russet and sea-green toning. NGC has graded five numerically finer examples (10/17). NGC ID# 257V, PCGS# 7373

3988 1934 MS66 PCGS. In contrast to the branch mint issues in 1934, the Philadelphia Peace dollar is frequently available in high Uncirculated grades. The present example will be hard to surpass, with exceptional Premium Gem strike and surface quality as well as outstanding eye appeal. A dusting of grayish-gold patina sits on vibrant and lustrous silver surfaces. Liberty shows strong definition on the central hair and marks are minimal. PCGS reports just three numerically finer examples (10/17). NGC ID# 257Y, PCGS# 7375

3989 1934-D MS65 PCGS. Micro D mintmark (also called Small D) — not filled, as seen on the Medium D varieties. This is a sharply struck, brilliant and frosted example with a few light luster grazes but no significant marks. A trace of gray toning does little to limit the brilliant-silver surfaces that dominate both sides. More than 1.5 million pieces were struck, but relatively few examples outrank this lustrous Gem. NGC ID# 257Y, PCGS# 7376

3990 1934-S AU58 NGC. CAC. Only a trace of high-point friction on the eagle's wing and Liberty's cheek prevents a Mint State grade for this satiny and lustrous 1934-S dollar. The surfaces are smooth and devoid of the scattered abrasions typically associated with AU-level silver dollars. The CAC endorsement is a seldom-seen characteristic on coins in this grade. NGC ID# 257Z, PCGS# 7377

**1935-S Peace Dollar, MS66
Exceptional Final-Year Example**

3991 1935-S MS66 PCGS. This delightful Premium Gem represents the final year of the popular Peace design, an important consideration for type purposes. The design elements are sharply detailed throughout and the well-preserved surfaces radiate vibrant mint luster on both sides. A few subtle hints of pale gold toning enhance the outstanding eye appeal. PCGS has graded three numerically finer examples (10/17). NGC ID# 2583, PCGS# 7379

PROOF EISENHOWER DOLLARS

**1976-S Clad Type Two Ike, PR70 Deep Cameo
Unimprovable Registry Set Essential**

3992 1976-S Clad, Type Two, PR70 Deep Cameo PCGS. Ike dollars seldom reach perfection, yet this Clad Type Two example easily makes the grade. The impeccably mirrored fields stand in stark contrast to the razor-sharp design elements. Type Two Eisenhower dollars were struck in the Bicentennial year (1976) with thinner, more delicate lettering on the reverse legend. This is an unimprovable representative of the issue. Population: 27 in 70 Deep Cameo (10/17). NGC ID# B77T, PCGS# 97435

3993 1976-S Silver PR70 Deep Cameo PCGS. An impressive example with the Type One reverse as always on the silver-clad issues, this piece has brilliant gray surfaces with deeply mirrored fields and highly lustrous devices. Population: 71 in 70 Deep Cameo (10/17). NGC ID# 64AW, PCGS# 97436

SACAGAWEA DOLLAR

3994 2000-P Wounded Eagle, FS-901, MS67+ PCGS. A popular *Cherry-pickers'* variety, showing a heavy die line cutting through the eagle's body on the reverse. This piece is among the finer-known examples and conditionally rare. Sharp design elements and beautifully preserved satin luster offer strong eye appeal. Population: 29 in 67 (1 in 67+), 3 finer (10/17). PCGS# 147883 Base PCGS# 506153

MODERN BULLION COINS

1988 Silver Eagle, MS70

3995 1988 Silver Eagle MS70 PCGS. With low unemployment and interest rates, all was well on the American front in 1988, and numismatics was experiencing a boom as Wall Street showed an interest in rare coin investment following the advent of third-party grading services beginning with PCGS in 1986. This example is certified by that service and features flawless and fully brilliant silver surfaces with bold design motifs and a high degree of eye appeal. PCGS Population: 38 in 70 (10/17). NGC ID# 26J8, PCGS# 9816

3996 1991 Gold Eagle Proof Set, Saint-Gaudens Signature, PR70 Ultra Cameo NGC. Includes the \$5 tenth ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Gold Eagles, housed in individual NGC holders with a common grade of PR70 Ultra Cameo. The one-ounce proof is a West Point issue, while the three lower denominations were struck at Philadelphia. (Total: 4 coins)

3997 1993-W One-Ounce Gold Eagle, Saint-Gaudens, PR70 Ultra Cameo NGC. The 1993-W one-ounce Gold Eagle is elusive in this ultimate grade. Only 34,369 proofs were sold. Rich yellow-gold surfaces exhibit stark contrast, with razor-sharp, frosted motifs set against jet-black fields. Captivating eye appeal. NGC ID# 28Z5, PCGS# 100090 Base PCGS# 9875

3998 1994-W Gold Eagle Proof Set, Saint-Gaudens Signature, PR70 Ultra Cameo NGC. Includes the \$5 tenth ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Gold Eagles, housed in individual NGC holders with a common grade of PR70 Ultra Cameo. In 1994, proof coinage of the lower three denominations was transferred from Philadelphia to West Point, making this the first four-coin proof set in the Gold Eagle series with four W mintmarks. (Total: 4 coins)

1995-W Silver Eagle, PR69 Ultra Cameo Low-Mintage Key Issue

3999 1995-W Silver Eagle PR69 Ultra Cameo NGC. This nearly flawless, PR69 Ultra Cameo American Silver Eagle seemingly has room to move up a grade, with impeccable glassy-mirrored fields and pearlescent frost-white, high-contrast devices. Buyers, sellers, and graders are choosy when it comes to the hands-down key to the Silver Eagle series, yet this example should win over even the most particular viewer. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR69 Deep Cameo The Famed Key to the Series

4000 1995-W Silver Eagle PR69 Deep Cameo PCGS. Only 30,125 1995-W Silver Eagle proofs were sold at the time of issue. The coins were available in anniversary sets for what was then considered an exceedingly high price (\$999). Today, examples in PR69 Deep Cameo easily command thousands of dollars at auction. Here is a virtually flawless black-and-white example that will surely be the highlight of any Silver Eagle set. NGC ID# CFWX, PCGS# 9887

1995-W 10th Anniversary Bullion Proof Set All Five Coins, PR69 Deep Cameo

4001 1995-W 10th Anniversary American Eagle Proof Set, PR69 Deep Cameo PCGS. This is an original set, individually housed in consecutively numbered holders and accompanied by the original Mint box and presentation case. Only 30,125 sets were sold, and most are broken up due to the massive demand for the Silver Eagle in Registry Sets. Each West Point-struck coin in this set is fully detailed and virtually pristine, with stark field-motif contrast. The box shows some wear, but the inner presentation case is in excellent condition. (Total: 5 coins)

4002 1995-W Gold Eagle Proof Set, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC. Includes the \$5 tenth ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Gold Eagles, housed in individual NGC holders with a common grade of PR70 Ultra Cameo. The 1995-W proofs are popular due to their association with the West Point Silver Eagle of this year, which is a modern key date. The four Gold Eagle proofs of this year were sold in the 10th Anniversary Set with the Silver Eagle, but also separately. (Total: 4 coins)

1997 American Eagle, MS70 One-Ounce Gold Eagle

4003 1997 One-Ounce Gold Eagle MS70 PCGS. The mintage of gold eagles rose considerably from the previous few years, perhaps as a result of the lower gold prices that were as low as \$290 per ounce at the end of the year. The average price for an ounce of gold in 1997 was 15% lower than the previous year. This perfect Mint State example has brilliant and satiny yellow-gold luster with bold design definition. PCGS Population: 39 in 70 (10/17). NGC ID# 26PL, PCGS# 9927

4004 1997-W Platinum Eagle Set PR69-PR70 Ultra Cameo NGC. This four piece set of American Eagle platinum coins includes: \$10 tenth-ounce PR70 Ultra Cameo NGC; \$25 quarter-ounce PR69 Ultra Cameo NGC; \$50 half-ounce PR69 Ultra Cameo NGC; and \$100 one-ounce PR69 Ultra Cameo NGC. Each piece is a stunning light gray example with black-and-white cameo contrast. (Total: 4 coins)

4005 1999 Quarter-Ounce Gold Eagle MS70 PCGS. The regular-issue quarter-ounce 1999 Gold Eagle is scarce in MS70, although it does not get due credit in the shadow of its more famous W-mintmarked counterpart. This piece is flawlessly struck and equally well-preserved. The satiny yellow-gold surfaces entice the viewer. PCGS lists only 68 coins this fine (10/17). NGC ID# 26MG, PCGS# 9941

4006 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS. The Unfinished Proof Dies designation means that dies intended for West Point proof quarter-ounce eagles remained unpolished, creating a small number of sharply struck examples that have all earmarks of a proof strike except for the deeply mirrored finish. This lovely yellow-gold Superb Gem is a virtually perfect example of the popular variety. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4007 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC. The West Point Mint was the producer of proof Gold Eagles in 1999. This variety was created when a mintmarked but unpolished proof die was used briefly for regular coinage. The coin is sharply struck and displays satiny golden luster. A couple of microscopic ticks on Liberty's bust determine the grade, and there is a small planchet defect in the far left obverse margin. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4008 West Point American Gold Eagle Trio. This lot contains: 1999-W \$10 Quarter-Ounce Gold Eagle PR70 Ultra Cameo NGC; 1999-W \$25 Half-Ounce Gold Eagle PR69 Ultra Cameo NGC; and a 1999-W \$50 One-Ounce Gold Eagle PR69 Ultra Cameo NGC. Each is an impressive, virtually perfect example with amazing cameo contrast. (Total: 3 coins)

1999 Gold Eagle, MS70

4009 1999 One-Ounce Gold Eagle MS70 PCGS. An extremely important issue in perfect MS70 preservation as PCGS has only certified 64 of these pieces (10/17), despite the high production totals that were spurred on by unfounded "Y2K" fears that suggested world-wide computer systems would crash due to the millennial change. That never happened and the new Millennium came without incident. This perfect example has satiny yellow-gold luster, bold design motifs, and pristine surfaces. NGC ID# 26PN, PCGS# 9945

4010 1999-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS. A flawlessly preserved Deep Cameo proof in a standard PCGS holder, ideal for date set inclusion. This West Point proof comes from a limited 31,427-coin mintage and is scarce so fine at PCGS. Fully struck design elements and liquidlike mirroring in the fields are the chief visual attributes. NGC ID# 293E, PCGS# 9946

2001 Gold Eagle, MS70

4011 2001 One-Ounce Gold Eagle MS70 PCGS. Following four years of higher mintages, production of one-ounce gold eagles dropped measurably to only 143,605 Mint State pieces in 2001. This perfect example is one of less than four dozen similar coins that PCGS has examined. The surfaces are flawless with satiny yellow luster and excellent eye appeal. PCGS Population: 45 in 70 (10/17). NGC ID# 26PR, PCGS# 9958

4012 Three-Piece 20th Anniversary Gold Eagle Set. This set contains: 2006-W One-Ounce Gold Eagle MS70 NGC; 2006-W One-Ounce Gold Eagle PR70 Ultra Cameo NGC; and 2006-W One-Ounce Gold Eagle Reverse PR70 NGC. Each example is pristine and perfect with brilliant yellow-gold surfaces. (Total: 3 coins)

2006-W One-Ounce Gold Eagle Reverse Proof 20th Anniversary Issue, PR70

4013 2006-W One-Ounce Gold Reverse Proof, 20th Anniversary, First Strike, PR70 PCGS. The 2006-W reverse proof boasts a small mintage of 9,996 pieces, distributed only through 20th Anniversary American Gold Eagle sets that included the reverse proof, a burnished circulation strike, and a regular proof, all struck at the West Point Mint. This piece is flawlessly preserved and displays stark field-device contrast. Eye appeal is generous. NGC ID# CNCZ, PCGS# 89995 Base PCGS# 89994

2006-W One-Ounce Gold Eagle Reverse Proof 20th Anniversary Set Issue, PR70

4014 2006-W One-Ounce Gold Eagle, 20th Anniversary, Reverse Proof, Augustus Saint-Gaudens, PR70 NGC. In 2006, a special 20th anniversary one-ounce Gold Eagle set was issued, including Uncirculated, proof, and reverse proof types. The 2006-W reverse proof has a reported mintage of 9,996 pieces. This example is fully struck and pristine in every way. Stark "reverse cameo" contrast characterizes each side. PCGS# 100201 Base PCGS# 89994

4015 2006-W One-Ounce Gold Buffalo, First Strikes, PR70 Ultra Cameo NGC. The first year of issue for the American Buffalo gold bullion coins saw a production of 337,012 Mint State pieces and 246,267 proofs as the design enjoyed a high degree of demand from the American public. This magnificent Superb Gem has mirrored fields and frosty devices with outstanding eye appeal. NGC ID# 26RM, PCGS# 99990 Base PCGS# 9990

4016 2006-W One-Ounce Gold Buffalo, First Strikes, PR70 Ultra Cameo NGC. Among the early issues of the American Buffalo gold bullion coin series were the First Strikes of the 2006-W one-ounce pieces that were first offered on June 22, 2006. One of those early issues was this perfect proof example with black-and-yellow cameo contrast. NGC ID# 26RM, PCGS# 99990 Base PCGS# 9990

4017 2007-W One-Ounce Gold Buffalo, .9999 Fine Gold PR70 Ultra Cameo NGC. The American Buffalo gold bullion coins were first issued in 2006, and have been produced each year since that time, always in the one-ounce size offered here. Fractional sizes were only issued in 2008. This perfect yellow-gold Ultra Cameo proof has impressive contrast between its mirrored fields and lustrous devices. NGC ID# BNKS, PCGS# 149583

- 4018 2007-W One-Ounce Gold Buffalo, .9999 Fine Gold PR70 Ultra Cameo NGC.** The West Point Mint produced 58,998 proof American Buffalo one-ounce gold bullion coins in 2007. One of those is this perfect proof example with reflective, textured fields and frosty yellow devices. NGC ID# BNKS, PCGS# 149583
- 4019 2007-W Gold Eagle Proof Set, Augustus Saint Gaudens, PR70 Ultra Cameo NGC.** Includes the \$5 tenth ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Gold Eagles, housed in individual NGC holders with a common grade of PR70 Ultra Cameo. The West Point proofs of 2007 were supplemented by lower-mintage W-mint issues with a burnished finish, and both the proofs and burnished coins are highly collectible today. (Total: 4 coins)
- 4020 2007-W One-Ounce Gold Buffalo, Early Releases, PR70 Ultra Cameo NGC.** A technically perfect example of this one-ounce gold bullion issue, with the Early Releases designation from NGC, this coin displays fully detailed frosty design elements that contrast profoundly with the textured mirrored fields. NGC ID# 26RP, PCGS# 149586 Base PCGS# 149583
- 4021 2008-W Quarter-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** The West Point Mint struck proof quarter-ounce Gold Buffalos only in 2008, and to the extent of just 13,125 pieces. This flawlessly preserved example displays full detail and dramatic field-device contrast. Essential for a complete denomination set. NGC ID# 26RH, PCGS# 399934
- 4022 2008-W Quarter-Ounce Gold Buffalo, Fraser Signature, PR70 Ultra Cameo NGC.** The 2008-W proof quarter-ounce Gold Buffalo claims a mintage of 13,125 pieces and is a single-year type. Fractional coins were only produced in 2008. Profound contrast occurs between the watery mirrors and thickly frosted motifs. PCGS# 91017 Base PCGS# 399934
- 4023 2008-W Quarter-Ounce Gold Buffalo, Fraser Signature, PR70 Deep Cameo PCGS.** The proof quarter-ounce Gold Buffalo was struck only in 2008. This West Point issue is usually available in PR70, although PCGS has slabbed only 45 examples so fine in the Fraser Signature holder (10/17). This piece is sharp and perfect with unblemished eye appeal. PCGS# 91017 Base PCGS# 399934
- 4024 2008 One-Ounce Gold Buffalo, Early Release, MS70 NGC.** A unique year in the American Buffalo gold bullion coin program, 2008 saw the production of fractional sizes in addition to the one-ounce pieces that went on sale on July 22. This Early Release example was sold in the first 30 days of distribution. A perfect Gem example, this Mint State piece has brilliant yellow surfaces and exquisite design definition. NGC ID# 26RS, PCGS# 393327
- 4025 2008-W One-Ounce Gold Buffalo, Fraser Signature, MS70 PCGS.** This was the final year the Burnished finish was employed on Gold Buffalo coins. Only 9,074 pieces were sold, making the one-ounce 2008-W the key to the series. Each side is yellow-gold with an almost mattelike texture. Absolutely pristine. PCGS# 91019 Base PCGS# 400037
- 4026 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** Many collectors consider the Saint-Gaudens double eagle design to be the most beautiful design in all of American numismatics, and those collectors can acquire the ultimate example of that design in this piece, a perfect Mint State piece with brilliant yellow surfaces and deep mirroring on both sides. NGC ID# 26S4, PCGS# 407404
- 4027 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** Satiny and prooflike characteristics melt into the golden, pristine surfaces of this top-grade example. The market for these beautiful modern replicas of Saint-Gaudens' 1907 Ultra High Relief pattern is every bit as active as it was in 2009, when the coin was struck. We frequently handle examples, but seldom do we see the same coin twice. NGC ID# 26S4, PCGS# 506602
- 4028 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** This piece is fully struck and deeply mirrored from extremely fresh dies. A thin wire rim around most of each side is reminiscent of that seen on the original 1907 High Reliefs. This coin is pristine and beautiful. NGC ID# 26S4, PCGS# 506602
- 4029 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** Full design sharpness and mirrored surfaces give this yellow-gold piece exceptional eye appeal. No imperfections are observed. The 2009 Ultra High Relief twenty is often heralded as the most beautiful modern coin issued, although the design and the concept of the extremely high relief were crafted more than a century ago. NGC ID# 26S4, PCGS# 506602
- 4030 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** Two spectacular Ultra High Relief double eagle patterns from 1907 exist on thick, small diameter planchets. Since those coins are both in the Smithsonian Institution, these one-ounce gold pieces are the closest collectors can hope to acquire. This perfect Mint State piece has fully prooflike surfaces and exceptional eye appeal. NGC ID# 26S4, PCGS# 506602
- 4031 2009-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC.** Radiant matte devices contrast with fields that are either darkly reflective or brightly textured, dependant upon the orientation with the light. The popular James Earle Fraser designs. NGC ID# 26RU, PCGS# 414463
- 4032 2009-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** This is a stunning, perfect Deep Cameo proof with brilliant yellow surfaces and outstanding field-to-device contrast. The PCGS First Strike designation is reserved for coins that are submitted within the first 30 days of the coin's release from the Mint. NGC ID# 26RU, PCGS# 414465 Base PCGS# 414463
- 4033 2009-W One-Ounce Gold Buffalo, Early Releases, PR70 Ultra Cameo NGC.** Unforeseen circumstances caused a delay, and the 2009-W proof American Buffalo gold coins finally became available on October 29. Therefore, the Early Releases were those pieces issued from that date until November 27, 2009. The entire production of 200,000 Mint State pieces (available on October 15) and 49,306 proofs were distributed in two months. This perfect proof exhibits extraordinary field-to-device contrast on its brilliant yellow-gold surfaces. NGC ID# 26RU, PCGS# 414465 Base PCGS# 414463
- 4034 2010-W Half-Ounce Gold Eagle, First Strike PR70 Ultra Cameo NGC.** Designated as an Early Release on the NGC holder, meaning that NGC has received the coin in the first 30 days since the issue was released from the Mint. This perfect yellow-gold proof is one such example that has impressive field-to-device contrast with deeply mirrored fields and lustrous devices. NGC ID# 26P7, PCGS# 502744 Base PCGS# 502743
- 4035 2010-W One-Ounce Gold Buffalo, .9999 Fine Gold PR70 Ultra Cameo NGC.** This perfect proof has extraordinary contrast between the textured, mirrored fields and the frosty devices. This is an impressive example of West Point artistry with brilliant yellow surfaces. NGC ID# 26RW, PCGS# 418865
- 4036 2010-W One-Ounce Gold Buffalo, Early Releases, PR70 Deep Mirror Prooflike NGC.** Struck during the first 30 days of proof American Buffalo gold coins, this perfect yellow-gold proof is designated as an Early Release and represents an extremely important opportunity for the modern-issue collector. NGC ID# 26RW, PCGS# 418866 Base PCGS# 418865
- 4037 2011-W Gold Eagle 25th Anniversary Proof Set, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** Includes the \$5 tenth ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Gold Eagles, housed in individual NGC holders with a common grade of PR70 Ultra Cameo. The year 2011 marked the 25th anniversary of Gold Eagle production, which began in 1986. (Total: 4 coins)

4038 2011-W One-Ounce Gold Buffalo PR70 Ultra Cameo NGC. The West Point Mint converted 28,693 ounces of gold into one-ounce proof American Buffalo gold bullion coins in 2011. Using the James Earle Fraser design for the Buffalo nickel, these pieces are the first U.S. Mint issues produced in pure .9999 fine (24-karat) gold. This gorgeous Superb Gem is a perfect representative with deeply mirrored fields and frosty devices. A yellow-gold beauty. NGC ID# 26RY, PCGS# 506885

4039 2012-W Gold Eagle Proof Set, Saint-Gaudens Signature, PR70 Ultra Cameo NGC. Includes the \$5 tenth ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Gold Eagles, housed in individual NGC holders with a common grade of PR70 Ultra Cameo. Proof Gold Eagle coinage in 1912 was less than half of 2011 totals. The lowest mintage in this four-coin set belongs to the half-ounce proof, of which only 12,919 pieces were struck. (Total: 4 coins)

4040 2012-W One-Ounce Gold Eagle, First Strike, Burnished, MS70 PCGS. West Point struck 23,805 proof one-ounce Gold Eagles in 2012, and only 6,118 Burnished coins, with a satin finish. This example of the latter is flawless in strike and preservation and displays rich golden luster. A popular issue in a First Strike PCGS holder. NGC ID# BNL1, PCGS# 514712 Base PCGS# 514673

4041 2014-W One-Ounce Gold Buffalo, Edmund C. Moy Signature, PR70 Ultra Cameo NGC. Edmund C. Moy was the 38th director of the U.S. Mint, serving from 2006 through 2011. He was at the Mint in the beginning days of the American Buffalo gold bullion coin program, and saw several other special issues during his administration. This hand-signed Edmund Moy label American Buffalo gold piece is a perfect proof with exceptional yellow-gold contrast. NGC ID# B4WD, PCGS# 527904 Base PCGS# 527905

4042 2014-W One-Ounce Gold Buffalo, Early Releases, PR70 Ultra Cameo NGC. The U.S. Mint accepted orders for the 2014 proof American Buffalo gold pieces on May 8, 2014, and sold nearly 8,000 pieces in the first week. The Early Release pieces were those received by NGC no later than June 6, 2014. This perfect Ultra Cameo proof is a gorgeous yellow-gold example of the design. NGC ID# B4WD, PCGS# 527905 Base PCGS# 527904

4043 2015-W High Relief One-Ounce Gold, First Strike, MS70 PCGS. This is an absolutely sensational American Liberty one-ounce gold piece struck in high relief, featuring fully lustrous and satiny yellow-gold surfaces and outstanding eye appeal. NGC ID# BY88, PCGS# 545533 Base PCGS# 545532

4044 2016-W One-Ounce Gold Buffalo, Tenth Anniversary, Edmund C. Moy Signature, PR70 Ultra Cameo NGC. Issued for the 10th anniversary of the American Buffalo gold coinage program, this perfect yellow-gold Ultra Cameo proof is housed in an NGC holder that includes an Edmund C. Moy signed label. NGC ID# CCKZ, PCGS# 593786

4045 2016-W One-Ounce Gold Buffalo, Tenth Anniversary, First Day of Issue, John M. Mercanti, PR70 Ultra Cameo NGC. An exceptional First Day of Issue Ultra Cameo proof, this perfect example is housed in a John M. Mercanti-signed NGC holder. Mercanti was the 12th Chief Engraver of the U.S. Mint. NGC ID# CCKZ, PCGS# 593786

4046 2016-W One-Ounce Gold Buffalo, Tenth Anniversary, First Day of Issue Denver PR70 Ultra Cameo NGC. A perfect Ultra Cameo proof American Buffalo one-ounce gold coin is housed in a special 10th anniversary, Edmund C. Moy signed NGC label as the first day of issue from Denver. PCGS# 598425 Base PCGS# 593786

S.S.C.A. RELIC GOLD MEDAL

1855 Kellogg Fifty, Gem Proof S.S.C.A. Relic Gold Medal

4047 1855 S.S.C.A. Relic Gold Medal "1855 Kellogg & Co. Fifty" Gem Proof PCGS. An attractive large-format simulated modern restrike from the 2001 private commemorative strikings that contained gold from the S.S. *Central America*. The design elements are sharply detailed and the fields are deeply mirrored and well-preserved. The coin was struck on September 12, 2001, according to the punch on the reverse. NGC ID# 33YJ, PCGS# 10235

COINS OF HAWAII

4048 1847 Hawaii Cent MS63 Brown PCGS. Medcalf 2CC-5. Plain 4, 13 berries. Both the I in AUPUNI and the W in HAWAII are recut. This attractive Select example displays a sharp strike and satiny walnut-brown patina. Scattered minor handling marks define the grade. The Medcalf 2CC-5 is a relatively available variety of this popular issue. NGC ID# 2C52, PCGS# 10965

4049 1883 Hawaii Quarter MS66 PCGS. CAC. An impressively well-preserved example with a sharp strike and coveted CAC endorsement. The vibrantly lustrous surfaces display champagne toning overall with deeper olive and multicolor hues around the borders. PCGS reports only 19 Superb Gems finer. CAC: 54 in 66, 17 finer (11/17). NGC ID# 2C58, PCGS# 10987

GSA DOLLAR

4050 1885-CC GSA MS64 Prooflike NGC. A highly lustrous and essentially brilliant Carson City dollar. The fields are well-preserved, and the cheek has only minor blemishes. The 1885-CC is popular due to its low mintage of 228,000 pieces and the generally strong eye appeal that GSA coins offer. The box and certificate of GSA issue accompany the lot; the box lid is separated from the lower half.

Ex: Central States Signature (Heritage, 4/2006), lot 5436. NGC ID# 254M, PCGS# 518876 Base PCGS# 7161

CERTIFIED MODERN PROOF SETS

- 4051 Five-Piece 1937 Proof Set, PR64 to PR67 NGC.** The set includes the following five coins, all housed in prior generation holders with consecutive serial numbers:
Cent PR64 Red. CAC. Fully struck with glimmering fields and copper-gold and rose hues. A partial print is in the field behind Lincoln's portrait.
Nickel PR67. CAC. Needle-sharp and perfect in every way, showing delicate lavender and champagne tinting in the fields.
Dime PR66. CAC. Flecks of russet and gold in the fields complement champagne toning overall on this sharp Premium Gem proof.
Quarter PR66. This high-end, beautifully preserved proof displays a full strike and delicate iridescent toning.
Half Dollar PR67. CAC. Champagne toning warms mirrored surfaces and sharp motifs, with some deeper gold color around the obverse periphery. (Total: 5 coins)
- 4052 Five-Piece 1939 Proof Set, PR65 to PR67 NGC.** The set includes:
Cent PR65 Red. Copper-orange and sharp with a few unobtrusive specks.
Nickel — Reverse of 1938 — PR65. CAC. Sharply struck and high-end for the grade with a delicate hint of lavender toning over each side.
Dime PR67. CAC. A virtually brilliant Superb Gem with tremendous eye appeal and full design sharpness.
Quarter PR66. CAC. Brilliant and deeply mirrored, this Premium Gem is high-end for the grade.
Half Dollar PR67. CAC. Tied with the dime for the finest piece in the set, this Superb Gem half dollar also shows modest cameo contrast on the obverse. Both sides are brilliant. (Total: 5 coins)

INGOT

San Francisco Mint Silver Ingot, 26.53 Ounces Oval Type Two Hallmark on the Front Round 1956-Dated Hallmark on the Back

- 4053 San Francisco Mint Silver Ingot. 26.53 Ounces.** The strong suit of this ingot is its dual hallmarks. The front side has a Type Two Oval hallmark, while the back side has a Round 1956-Dated Hallmark. While not unprecedented, this pairing is definitely unusual. Ken Conaway, silver ingot specialist, has recorded only 15 examples. The serial numbers of the pieces known range from a low of 37 to a high of 1959. Most of the known examples are from lot 164, as is this one. Of the known ingots with dual hallmarks, nine others are from lot 164 (as is this one), one is from lot 2, and six are from unknown lots. This is a well laid out ingot. The front side has a well-impressed oval hallmark (slightly rotated) / 1604 / 26.53 OZS / 999.75 FINE. The lot number is located on the short bottom edge. The back side has the round 1956-dated hallmark located toward the top and again rotated. The surfaces are bright silver with a slight tinge of reddish patina. An opportunity for the specialist in this fascinating series.

End of Session Two

SESSION THREE

GOLD DOLLARS

- 4054 1851-C AU58 NGC. Variety 3.** High date. A diagnostic die crack from the edge to the second S in STATES keys the variety. Light, yellow-gold surfaces have a greenish tinge with much luster remaining across the smooth and minimally marked surfaces. The strike is sharp throughout. NGC ID# 25BL, PCGS# 7514
- 4055 1852-D AU55 NGC. Variety 4-F.** The only known variety. From a tiny mintage of 6,360 pieces, the 1852-D gold dollar is the third rarest Type One gold dollar from the Dahlonega Mint. Doug Winter estimates a surviving population of about 120-160 pieces in all circulated grades, while Q. David Bowers suspects the total may run to as many as 200 examples. Only 40 pieces coins are known in the Choice AU grade according to the combined PCGS and NGC populations. The present coin is sharply struck for an 1852-D, and a few abrasions on Liberty's nose are the only flaws worthy of mention. Census: 20 in 55, 63 finer (10/17).
Ex: *The Lucy Llewellyn Collection of Southern Gold/ANA Signature (Heritage, 3/2010), lot 1989.* NGC ID# 25BS, PCGS# 7519

**1853 Type One Gold Dollar, MS66
Impeccably Preserved and Lustrous**

- 4056 1853 MS66 PCGS.** More than 4 million gold dollars were struck in the Philadelphia Mint in 1853, but the issue is very scarce in MS66 condition and finer coins are condition rarities. This delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces with radiant mint luster. Population: 63 in 66 (8 in 66+), 12 finer (10/17). NGC ID# 25BU, PCGS# 7521
- 4057 1853-O MS63 NGC. Variety 1.** This Select Mint State 1853-O gold dollar displays remarkably sharp detail despite metal flowlines in the fields that indicate a late die state. No distracting abrasions are seen, and the coloration is a pleasing straw-gold hue. High-grade New Orleans gold dollars are highly sought-after. NGC ID# 25BX, PCGS# 7524
- 4058 1854 Type One MS65+ NGC.** This Plus-graded Gem offers well-detailed design elements, with some dramatic clash marks on the reverse. The well-preserved orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. This was the final year of the Type One design. Census: 68 in 65 (1 in 65+), 16 finer (10/17). NGC ID# 25BY, PCGS# 7525
- 4059 1854 Type Two MS62 NGC.** A well-struck, lustrous Mint State type coin with original orange-gold coloration. Scattered light abrasions account for the grade. The Type Two gold dollar increased the denomination's diameter from 13 mm to 15 mm, replaced the peripheral stars with the legend UNITED STATES OF AMERICA, enlarged the wreath, and substituted an Indian Princess head for the more familiar Liberty head of the Type One issues. NGC ID# 25C3, PCGS# 7531
- 4060 1855-O AU53 NGC. Variety 1.** In an unlapped state of the reverse die. The Type Two design was limited to three years of production, but the O-mint only struck coins in 1855. A total of 55,000 pieces were made. This pale wheat-gold dollar is typically defined and lightly marked. NGC ID# 25C7, PCGS# 7535

- 4061 1857-C XF40 PCGS. Variety 1.** This mostly reddish-gold Charlotte gold dollar also features glints of green. The legends and mintmark are bold, while the highest points of the design display moderate blending. From a mintage of 13,280 coins, Doug Winter suggests 300 to 400 pieces survive. NGC ID# 25CE, PCGS# 7545
- 4062 1879 MS65 PCGS. CAC.** From a nominal mintage of 3,000 pieces, this attractive Gem exhibits sharply detailed design elements and dramatic clash marks on both sides. The well-preserved orange-gold surfaces are lustrous and appealing. Population: 57 in 65, 52 finer. CAC: 12 in 65, 12 finer (11/17). NGC ID# 25DH, PCGS# 7580
- 4063 1879 MS61 Prooflike NGC.** NGC has certified nine 1879 gold dollars in Prooflike and Deep Prooflike grades. Only 3,000 pieces were struck of this date, but ample saving at the time of issue makes survivors collectible today. This coin is well-struck and deeply reflective. Handling marks in the fields limit the grade. Census: 3 in 61 Prooflike, 5 finer (10/17). NGC ID# 25DH, PCGS# 7580
- 4064 1889 MS64 Prooflike NGC.** This reflective near-Gem appears finer than the stated grade to the naked eye, although a loupe reveals faint lines in the fields that prevent an MS65 designation. The strike is sharp, and the yellow-gold surfaces are appealing. Prooflike examples of this final-year issue are scarce and popular for type purposes. Census: 14 in 64 Prooflike, 18 finer (10/17). NGC ID# 25DU, PCGS# 77590

PROOF GOLD DOLLAR

**1878 Gold Dollar, PR62
20 Proofs Struck, About 15 Survive**

- 4065 1878 PR62 PCGS.** The design elements are as sharp as one would expect for a proof of this vintage. Stark contrast is seen between the frosty motifs and the reflective orange-peel fields, although PCGS has not awarded a formal Cameo designation. This piece was probably gently wiped a long time ago, resulting in faint wispy lines on each side that limit the grade. The 1878 gold dollar has a paltry total-mintage of 3,000 circulation strikes and merely 20 proofs, making this a very rare specimen in the absolute sense. Population: 1 in 62, 3 finer in non-Cameo (10/17). NGC ID# 5PED, PCGS# 7628

EARLY QUARTER EAGLE

1830 Capped Head Left Quarter Eagle, AU58 BD-1, Reduced Diameter

- 4066** 1830 BD-1, R.4, AU58 PCGS. Bass-Dannreuther Die State a/a. A single die variety is known for the date. From a mintage of 4,540 pieces, the 1830 Capped Head Left quarter eagle has a surviving population of 80-100 pieces in all grades. This impressive near-Mint specimen shows just a trace of wear on the well-detailed design elements, and the lightly abraded lemon-yellow surfaces retain much original mint luster. NGC ID# BFW8, PCGS# 45524 Base PCGS# 7670

CLASSIC QUARTER EAGLES

1834 Quarter Eagle, MS61 Variety 4, Broken M

- 4067** 1834 MS61 NGC. **Variety 4, R.3.** The right diagonal of the M in AMERICA is missing, and that feature is diagnostic for the scarce variety. Stars 2 and 3 are repunched on the Large Head obverse. Both dies are perfect without die cracks, clash marks, or signs of lapping. This pleasing Mint State piece has the expected quota of trivial marks on each side, with full lustrous. The strike is a trifle weak at the centers. NGC ID# 25FS, PCGS# 7692
- 4068** 1836 Script 8 AU55 NGC. **Breen-6143, Variety 11, R.2.** Bright mint luster remains in the protected areas of this greenish-gold, Choice AU quarter eagle. Light field chatter and some smooth wear on the highest curls represent time spent in circulation, while a lengthy die crack at star 6 through the coronet to Liberty's hair suggests a later state of the dies. NGC ID# 25FU, PCGS# 7694
- 4069** 1836 Script 8 MS61 NGC. **Breen-6143, Variety 13, R.4.** The top pair of leaves yields a distinctive berry and the middle arrowhead extends past C in AMERICA to confirm the scarce Variety 13 die marriage. Lengthy die cracks intersect at Liberty's hair above the ear. The upper-left shield corner is characteristically weak on this variety, as are Liberty's highest curls, yet the other elements are sharply struck. We note some fine granularity on the portrait, but marks are minimal on the medium-gold surfaces with hints of orange at the margins. NGC ID# 25FU, PCGS# 7694

4070 No Lot.

LIBERTY QUARTER EAGLES

- 4071** 1844-D XF40 PCGS. **Variety 5-I.** This, the more plentiful variety, shows the mintmark high and vertical, separated from the 1 in the fraction. The present example is lightly circulated with pleasing olive-gold color. The centers exhibit considerable strike weakness, a normal characteristic of Dahlonega gold from this period. NGC ID# 25GV, PCGS# 7736

1854-C Quarter Eagle, AU53 Smooth, Satiny Surfaces

- 4072** 1854-C AU53 NGC. **Variety 1.** A peach-gold example with pleasing sharpness on the stars and dentils, though the centers show incompleteness, most visible on the eagle's central plumage. No marks are remotely mentionable aside from a hair-thin line near star 3 to the nose. The 1854-C quarter eagle is scarce even by Charlotte Mint standards. Just 7,295 pieces were struck, and Doug Winter estimates that only 105 to 145 representatives survive in all grades. Census: 22 in 53 (1 in 53+), 62 finer (10/17). NGC ID# 7J2P, PCGS# 7770

1855-C Quarter Eagle, AU50 Low Charlotte Mintage

- 4073** 1855-C AU50 NGC. **Variety 1.** The 1855-C boasts the lowest mintage of the Charlotte quarter eagle series, excluding the 1843-C Small Date variety. Only 3,677 coins were struck, and these circulated extensively. Doug Winter estimates that only 85 to 105 pieces are extant, which would suggest that the certified population figures are inflated by resubmissions. Our experience with this issue is that its rarity promotes active and frequent trading of examples at auction, giving the perception that it is more plentiful than it actually is. The present AU coin shows weakness of strike on the central eagle but is better-defined near the borders. Other than an old vertical mark on Liberty's neck, the surfaces are smooth and appealing. Census: 6 in 50, 56 finer (10/17). NGC ID# 25J5, PCGS# 7775

**1859 Quarter Eagle, MS62
Rare Old Reverse Variant**

- 4074 1859 Old Reverse, Type One, MS62 NGC.** The Old Reverse is identified by the large arrowheads. Type Two coins are more available by an estimated rate of 2 to 1. PCGS suggests a Type One survivorship of merely 75 coins across all grade levels. This bright yellow-gold offering enjoys strong stars with the exception of the first two. The eagle is well-defined, except for the left leg. Census: 15 in 62, 5 finer (10/17). NGC ID# 25JK, PCGS# 97788

- 4075 1861 New Reverse, Type Two, MS63 NGC.** This satiny yellow-gold example is sharply struck from lightly clashed dies. A few scattered marks limit the grade but none are individually significant. The Type Two reverse is the more plentiful variety of this year, ideal for type representation. NGC ID# 25JX, PCGS# 7794

- 4076 1861 New Reverse, Type Two, MS64 PCGS.** Smaller arrowheads and a wider space between the claw and fletchings identify the Type Two Reverse. Frosty luster, rose-gold coloration, and a pinpoint impression are attributes of this phenomenal Choice Uncirculated quarter eagle. A lint mark appears on the tip of Liberty's bust. NGC ID# 25JX, PCGS# 7794

- 4077 1880 MS61 PCGS.** A mere 2,960 coins constituted the entire production of quarter eagles in 1880. CoinFacts estimates 60 or so examples survive in Mint State. This brightly lustrous MS61 two and a half dollar gold piece has undeniable semiprooflike qualities, with partly reflective fields and full design definition. Scattered abrasions. NGC ID# 25L4, PCGS# 7832

- 4078 1888 MS65 NGC.** According to Mint records, 16,001 Liberty quarter eagles were struck at the Philadelphia Mint in 1888, a small total in absolute terms, but actually quite generous in the context of the series. This attractive Gem displays well-preserved peach-gold surfaces, with vibrant satiny mint luster and sharply detailed design elements. Eye appeal is terrific. Census: 28 in 65 (2 in 65+), 6 finer (10/17). NGC ID# 25LC, PCGS# 7840

- 4079 1900 MS66 PCGS.** Nearly pristine peach-gold surfaces glow with frosty mint luster, and the eye appeal is as strong as the impression is bold. There are a couple of dark spots near the ear and left of the date. Only 67,000 quarter eagles were struck in Philadelphia in 1900. PCGS shows 16 higher grading events (10/17). NGC ID# 25LR, PCGS# 7852

- 4080 1901 MS65 PCGS.** An impressive Gem representative of this popular 20th century type issue, this coin offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. NGC ID# 25LS, PCGS# 7853

- 4081 1906 MS67 NGC.** The 1906 appears only occasionally at the MS67 level from a mintage of 176,300 pieces. Frosted yellow-gold surfaces display pleasing olive-gold overtones throughout this lustrous, conditionally scarce quarter eagle. Exceptional for type or for an advanced Liberty Head gold collection. NGC shows just three numerically finer coins (10/17). NGC ID# 7JW8, PCGS# 7858

PROOF LIBERTY QUARTER EAGLE

**1904 Quarter Eagle, PR62
Entry Point Into the Proof Gold Series**

- 4082 1904 PR62 PCGS. CAC.** The appeal of proof gold from the 19th and early 20th centuries is unlike that of anything else in American numismatics. This collectible PR62 quarter eagle is truly an example of the Mint's best capabilities, with razor-sharp detail throughout and the orange-peel textured fields that collectors have come to expect. Each side is mirrored with scattered signs of contact, limiting the grade. The Mint struck 170 proof quarter eagles in 1904, in line with other proof mintages from the period. Population: 10 in 62, 47 finer. CAC: 2 in 62, 5 finer (10/17). NGC ID# 288U, PCGS# 7930

INDIAN QUARTER EAGLES

- 4083 1910 MS64 PCGS. CAC.** Deep peach patina adorns this sharply impressed and satiny Choice Indian type coin. Mentionable marks are absent save for a single line beneath the I in LIBERTY. Certified in a green label holder.
Ex: Long Beach Signature (Heritage, 9/2012), lot 4810. NGC ID# 2892, PCGS# 7941

**1911-D Quarter Eagle, AU58
Strong Eye Appeal**

- 4084 1911-D AU58 NGC.** A shadow of a D mintmark is apparent, confirming that this near-Mint State piece derives from the series-low mintage of 55,680 coins accomplished at the Denver Mint in 1911. Attractive reddish-gold surfaces maintain nearly full luster and generally strong detail, with slight softness over the central headdress and eagle's shoulder. A few light marks exist beneath LIBERTY. Any example of the famous 1911-D is highly desirable. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, Bold AU58

- 4085 1911-D AU58 NGC.** Each side features even, orange-gold coloration and bold design detail. The eagle's shoulder tip is the only point of incompleteness. The fields are smooth and minimally abraded, showing a couple of tiny color specks near the claws. A partial wire rim encircles the borders. This a terrific near-Mint example of the most famous date in the series. NGC ID# 7KR7, PCGS# 7943

1911-D Indian Quarter Eagle, AU58 Low-Mintage Series Key

- 4086 1911-D AU58 NGC.** The motifs are sharply struck on this near-Mint Denver key issue, although the eagle's shoulder shows a bit of weakness at its highest point. The headdress is well-defined. The low mintage of 55,680 pieces makes the 1911-D the scarcest Indian quarter eagle by far. This example approaches full Mint State with only light marks and pleasing orange-gold color. The visible mintmark is an important attribute. NGC ID# 7KR7, PCGS# 7943
- 4087 1912 MS64 PCGS. CAC.** An important Indian quarter eagle, the 1912 is rarely encountered in grades finer than this lovely Choice Mint State piece. PCGS has only certified 89 finer examples (11/17). This specimen has brilliant yellow-gold luster and bold design motifs. NGC ID# 7KR8, PCGS# 7944
- 4088 1914-D MS64 PCGS.** The 1914-D Indian quarter eagle becomes very scarce in grades above the MS64 level. This sharply detailed Choice specimen exhibits well-preserved orange-gold surfaces with satiny mint luster. PCGS has graded 52 numerically finer examples (11/17). NGC ID# 2899, PCGS# 7947
- 4089 1914-D MS64 PCGS.** Satiny straw-gold luster on this near-Gem offers pleasing visuals despite a few scattered abrasions. The lower headdress feathers are incompletely struck. Under a loupe, a tiny rim cud is visible next to the mintmark. Finer 1914-D quarter eagles are scarce. NGC ID# 2899, PCGS# 7947
- 4090 1915 MS64+ PCGS. CAC.** Sharply struck with delightful orange-gold coloration, this high-end Choice Uncirculated quarter eagle has the combination of excellent quality that endears the 1915 to type and series collectors. We note two tiny abrasions, one near the mouth and another between B and E of LIBERTY. A CAC-endorsed near Gem. NGC ID# 7KRC, PCGS# 7948

THREE DOLLAR GOLD PIECES

- 4091 1854 MS61 NGC.** An attractive MS61 specimen of this popular first-year type issue, with sharply detailed design elements and lustrous orange-gold surfaces that are lightly marked for the grade. Overall eye appeal is quite strong. NGC ID# 25M3, PCGS# 7969
- 4092 1854 MS61 NGC.** Shimmering peach-gold luster illuminates minimally marked surfaces on this Mint State first-year type coin. The bowknot is a trifle soft as usual, but the strike is otherwise pleasing. In 1854, the three dollar denomination circulated far more than it did in the 1880s, although this issue is yet among the more plentiful in the series in Mint State. NGC ID# 25M3, PCGS# 7969
- 4093 1854 MS62 PCGS.** The three dollar gold denomination was introduced in 1854, an important consideration for type purposes. This attractive MS62 specimen is well-detailed and lightly marked, with satiny orange-gold surfaces. NGC ID# 25M3, PCGS# 7969

1854-O Three Dollar, XF40 Old Green Holder With CAC Approval

- 4094 1854-O XF40 PCGS. CAC. Variety 2.** Bowers and Winter explain: "Soon after they were struck the 1854-O \$3 pieces were placed into circulation, where they soon became worn. Distribution from the New Orleans Mint was widespread, including through ships in the coastwise and international trade calling at New Orleans." Detail is typically shallow on the obverse lettering and wreath ribbon but good elsewhere. A pleasing orange-gold single-year type coin. Encapsulated in an old green label holder. NGC ID# 25M5, PCGS# 7971

1854-O Three Dollar, Choice XF Necessary for New Orleans Type

- 4095 1854-O XF45 PCGS. Variety 2.** Always in demand as the only New Orleans three dollar gold piece in the long-running series, the mintage of 24,000 pieces was accomplished by a single die pair. Variety 1 represents the scarce unlapped state of the dies, and Variety 2 shows a later, lapped die state. This Variety 2 example has weakness at STATES OF, the mintmark, and the ribbon/bow from die lapping. Traces of prooflikeness remains within the obverse legend and around the wreath. Numerous light abrasions pepper both sides of this Choice XF example, housed in a previous generation green label holder. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU50
Above-Average Detail**

- 4096 1854-O AU50 NGC. Variety 2.** Aside from softness on OF and lapping on the wreath ribbon, this lightly circulated three dollar gold piece is relatively strong for the issue. Wispy marks over light orange-gold surfaces are unsurprising. The singular New Orleans issue in the three dollar gold series is often seen in VF-XF grades, but it becomes much scarcer in AU condition or finer. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU53
Only O-Mint Issue in the Series**

- 4097 1854-O AU53 PCGS. Variety 2.** The usual lapped state of Variety 1 with a die crack through the right ribbon end and mintmark. Subdued orange-gold surfaces show softness on OF and friction over the high points. The only New Orleans three dollar gold issue claims a mintage of 24,000 coins, examples of which are highly sought-after. NGC ID# 25M5, PCGS# 7971
- 4098 1857 AU53 PCGS.** The 1857 three dollar gold piece claims a mintage of 20,891 pieces, a tiny production total in absolute terms, but not unduly small in the context of the series. This attractive AU53 specimen exhibits lightly worn, lightly abraded orange-gold surfaces, with much original mint luster still intact. NGC ID# 7K5G, PCGS# 7976
- 4099 1857-S VF35 PCGS.** The San Francisco and New Orleans Mints were the only branch facilities to strike three dollar gold pieces, and neither in significant quantities. In 1857, San Francisco coined only 14,000 pieces. This Choice VF example displays even wear and smooth olive-gold surfaces. A hair-thin diagonal line across Liberty's cheek is mentioned for accuracy. NGC ID# 7K5H, PCGS# 7977

- 4100 1868 AU58 PCGS.** Just the slightest trace of friction shows on the sharply detailed design elements of this impressive near-Mint specimen, with lightly abraded orange-gold surfaces that show a mix of satiny mint luster and prooflike reflectivity. NGC ID# 25MP, PCGS# 7989
- 4101 1874 MS62 PCGS.** Shimmering mint luster bathes this Mint State type coin in lovely orange-gold, olive, and rose hues without the heavy abrasions often associated with gold pieces in the lower Uncirculated grades. Weakly struck on the bowknot, as usual. NGC ID# 7KDE, PCGS# 7998

**1879 Three Dollar, MS61
Only 3,000 Coins Minted**

- 4102 1879 MS61 PCGS.** Only 3,000 three dollar gold pieces were struck in 1879 after a record-setting quantity was produced the year before. Contrary to belief, the reaching of parity between gold and paper money had no effect on stimulating demand for this denomination. Semiprooflike orange-gold surfaces exhibit strong detail and partial reflectivity in the fields, where wispy, grade-limiting marks occur. NGC ID# 25N2, PCGS# 8001

**1887 Three Dollar, MS62
Popular Low-Mintage Issue**

- 4103 1887 MS62 PCGS.** The 1887 is always popular with collectors because of its low mintage of 6,000 coins. This late-date three dollar gold piece displays bright mint luster and pleasing, yellow-gold coloration. Crisp detail on the headdress, lower curls, wreath leaves and bow heighten the appeal, which is unaffected by minor grade-limiting marks. Slightly reflective fields. NGC ID# 25NA, PCGS# 8009
- 4104 1888 MS62 NGC.** The Mint struck 5,000 three dollar gold pieces in 1888 as the series neared its close. The coins were unseen in circulation and mostly acquired as gifts. The central reverse legends are boldly defined, as is the left wreath leaf. Moderately reflective with shimmering luster and yellow-gold color. Light field marks, including one between AM, define the grade. NGC ID# 25NB, PCGS# 8010
- 4105 1888 MS62 PCGS.** An attractive MS62 specimen of this late-series issue, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate satiny mint luster. From a mintage of 5,000 pieces. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar, MS62
5,000 Coins Struck**

- 4106 1888 MS62 NGC.** Unseen in commerce, essentially reduced to Christmas gifts, and just one year away from its eventual demise, the three dollar gold piece was struck to the extent of 5,000 coins in 1888. Apricot-gold color melds with bright mint frost. Typically struck with wispy marks that limit the grade. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLE

1798 Half Eagle, BD-5, XF Details
Large Eagle, Large 8, 13 Stars Reverse

- 4107** 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-5, High R.5 — Damage — PCGS Genuine. XF Details. Bass-Dannreuther Die State b/b. This is a rare early die pairing among the Large Eagle, Large 8 half eagle varieties of this date (BD-2 through BD-5). All of those varieties are rare or nearly so, but Dannreuther estimates that the BD-5 is High R.5, or 30-40 known, which would make it the rarest of the four by a slim margin if the other varieties' survival estimates are accurate. Both the 8 and 9 in the date are large and about even at their tops. The reverse shows a perfect cross pattern in the stars, and the first A is above and not touching feather 4. In this die state a crack proceeds from star 7 to the rear curls, but does not visibly show down into the date. This sandy-gold coin shows regular but extensive microabrasions throughout much of the surfaces on both sides, but more heavily on the obverse. A couple of heavier abrasions still show on the central profile of Liberty, which also shows a somewhat sunken appearance. A rare coin, but one for which a personal inspection (a good idea on any coin) is suggested.

CLASSIC HALF EAGLES

- 4108** 1834 Plain 4, Second Head, Breen-6502, McCloskey 2-A, R.1, AU50 NGC. CAC. The first year of issue for the Classic Head gold design following a weight reduction to bring the gold value in line with the face value of these coins. Delicate rose toning appears on the light yellow surfaces of this lightly worn half eagle. NGC ID# 25RR, PCGS# 8171
- 4109** 1836 AU58 NGC. Breen-6509, McCloskey 4-C, R.3. Large Date. The stars and central devices all show excellent strike sharpness, and the bright yellow-gold fields are partially lustrous. Trivial high-point friction and scattered light abrasions account for the grade. A good Classic Head type coin. NGC ID# 25RY, PCGS# 8174

LIBERTY HALF EAGLES

- 4110** 1839 XF45 NGC. An attractive Choice XF specimen of this early series Liberty half eagle, with light wear on the design elements and lightly abraded orange-gold surfaces that retain a few subtle traces of original mint luster. NGC ID# 25S7, PCGS# 8191

1839 Liberty Half Eagle, AU58
Excellent Luster

- 4111** 1839 AU58 PCGS. The 1839 half eagle issue marks the first of the Liberty Head design by Christian Gobrecht, and it is a one-year-only type. Mint State survivors are quite rare, and the average certified survivor is XF45 to AU50. This near-Mint State example boasts great eye appeal on mellow orange-gold surfaces with excellent luster and minimal marks. Population: 19 in 58, 24 finer (10/17). NGC ID# 25S7, PCGS# 8191
- 4112** 1843-D Medium D XF40 PCGS. Variety 10-G. Three tiny die lumps are located between the first and second obverse stars, with others noted below the 12th star and above 43 in the date. This piece is well-struck for a Dahlonega Mint product, showing just a bit of weakness on the fletchings. The surfaces are free of individually mentionable marks, and the highpoints only display a modest degree of wear for the grade. The coloration is a pleasing olive-gold hue.
Ex: Long Beach Signature (Heritage, 2/2008), lot 2495. NGC ID# 25T4, PCGS# 8215
- 4113** 1845-D — Cleaned — PCGS Genuine. XF Details. Variety 13-H, as usual, with the date low and left. This well-detailed Dahlonega five displays pleasing olive-gold patina and is moderately appealing to the unaided eye. A loupe reveals hairlines on each side that prevent a numeric grade from PCGS.

1846-D Liberty Half Eagle, XF45
Normal Mintmark, Variety 15-H

- 4114** 1846-D XF45 PCGS. Variety 15-H. Four varieties of the 1846-D Liberty half eagle are known, two with a normal mintmark and two with a repunched mintmark. The Normal Mintmark varieties are both scarce and underrated issues in high grade. This lightly worn and lightly abraded specimen represents Variety 15-H, with the date placed high on the obverse and the Normal Mintmark centered under the arrow feather. Population: 29 in 45, 47 finer (10/17). NGC ID# 25TH, PCGS# 8228
- 4115** 1847-C VF35 PCGS. CAC. Variety 1. A tan-gold Charlotte type coin without any noticeable abrasions. The curls display wear but considerable plumage definition persists. Only one die pair is known despite a reasonable mintage by C-mint standards of 84,151 pieces. The 1847-C half eagle is a popular type coin from this mint.
Ex: Dallas Signature (Heritage, 3/2013), lot 4226. NGC ID# 25TN, PCGS# 8233

4116 1848-D XF40 NGC. Variety 20-L. Generally green-gold with rich russet toning in protected obverse areas, this XF 1848-D half eagle is moderately circulated but minimally abraded. The reverse die has a radial crack from the rim at 4:30 through the tips of the upper two arrowheads. The crack resumes above the beak to the rim at 11 o'clock.
Ex: New York Signature (Heritage, 3/2012), lot 4053. NGC ID# C5XA, PCGS# 8238

4117 1849/49 AU55+ NGC. CAC. VP-001. NGC has certified this coin as a repunched date, with their Variety Plus designation of VP-001. The last two digits of the date are clearly repunched north of the undertype 49. This Plus-graded Choice AU specimen is lightly worn and lightly abraded, with traces of original mint luster. NGC ID# C5XC, PCGS# 8240

4118 1849-C XF45 PCGS. Variety 1. Pleasing olive-gold color remains on this Choice XF example, with only grade-consistent wear tempering the sharply struck devices. Unlike many examples of the 1849-C, marks are not a problem. A few light abrasions are noted but for the most part the fields and devices are free of marks. NGC ID# C5XD, PCGS# 8241

4119 1849-C AU50 PCGS. Variety 1. The availability of the 1849-C half eagle in the context of Charlotte gold makes it popular with branch mint type collectors. However, high-grade pieces with original coloration are scarce. This AU coin displays a bold strike and luminous olive-gold patina. Two marks appear in the left obverse field. NGC ID# C5XD, PCGS# 8241

4120 1849-D VF35 NGC. Variety 25-S. The 1849-D is scarce with fewer than 200 pieces believed known in all grades. Specialist Doug Winter considers it one of the final Dahlonega half eagles that is usually available with a good strike. This Choice VF coin shows the remnants of sharp central definition amid light wear. The bright brass-gold surfaces are lightly abraded as normal. NGC ID# C5XE, PCGS# 8242

4121 1851-D VF25 PCGS. Variety 31-V. This important Dahlonega half eagle has a strong D mintmark. The right curve of the mintmark touches the stem of the olive branch on this reverse. Traces of lilac patina are noted in the protected areas of this light yellow-gold example. Both sides exhibit the usual handling marks consistent with the grade. NGC ID# 25U8, PCGS# 8248

4122 1852-D — Rim Damage — PCGS Genuine. AU Details. Variety 32-V. The rim damage noted by PCGS is visible along the lower-right obverse, although it mostly blends into the characteristically weak dentils of this variety and is hardly obtrusive. AU details complement satiny yellow-gold surfaces. Scattered handling marks are typical of the issue.

1852-D Five Dollar, AU55 Dahlonega Type Coin

4123 1852-D AU55 PCGS. Variety 32-V. The 1852-D is among the more plentiful Dahlonega half eagles, ideal for type representation. This Choice AU coin is partially lustrous with mainly brass-gold color. An area of reddish patina surrounds star 1. As usual for the issue, the dentils are poorly defined, and the central hair curls and the eagle's right (facing) talons are weakly struck. No major abrasions are noted. Population: 20 in 55, 22 finer (10/17). NGC ID# 25UC, PCGS# 8252

4124 1854 MS61 NGC. For the period, the 1854 half eagle is fairly plentiful, but Mint State examples are conditionally scarce. The strike on this piece is sharp, and softly frosted yellow-gold luster is original. Minor field chatter limits the grade in the absence of true distractions. Census: 13 in 61, 34 finer (10/17). NGC ID# 25UG, PCGS# 8256

4125 1856-C — Rim Damage — NGC Details. AU. Variety 1. Fewer than 200 examples are believed known of this scarce Charlotte half eagle. This present coin is remarkably well-struck both at the dentils and in the centers. The orange-gold surfaces display modest luster. There are several old digs in the reverse rim but these are not distracting. Of much greater interest is a planchet lamination that cuts through the AT in STATES.

1856-C Five Dollar, AU55 Well-Defined and Choice Surfaces

4126 1856-C AU55 PCGS. CAC. Variety 1. The medium, greenish-gold surfaces retain soft mint luster and glimpses of orange at the margins, while abrasions are noticeably infrequent across the smooth, well-defined surfaces. We note a scrape on the bridge of the nose, a pinscratch at the date, and a few light marks on the reverse, all of which require a loupe to view. CAC endorsement is important at this Choice About Uncirculated level, where the present coin is the sole example to achieve the green CAC label. Population: 10 in 55, 18 finer. CAC: 1 in 55, 4 finer (10/17). NGC ID# 25UW, PCGS# 8267

4127 1857 MS61 PCGS. CAC. From a smallish mintage of 98,188 pieces, the 1857 Liberty half eagle is an elusive and underrated issue in the series. This attractive MS61 specimen offers well-detailed design elements and lustrous orange-gold surfaces, with the expected number of minor contact marks for the grade. Housed in an old green label holder. Population: 14 in 61, 32 finer. CAC: 5 in 61, 2 finer (10/17). NGC ID# 25V2, PCGS# 8271

4128 1865-S Fine 15 PCGS. CAC. Fewer than 100 1865-S half eagles are believed to survive from a mintage of 27,612 pieces. Compared to the more heavily collected Southern gold issues, this date is heavily underrated. Moderate, even wear leaves each side with smooth olive-gold patina. CAC has only stickered seven examples of this issue in all grades combined. Population: 5 in 15, 42 finer. CAC: 1 in 15, 5 finer (10/17). NGC ID# 25VX, PCGS# 8299

4129 1874-S VF35 PCGS. The two leading grading services have seen fewer than 200 submissions of the 1874-S half eagle (16,000 coins struck), and none in mint condition. This Choice VF five dollar gold piece circulated out West for some time, but good detail remains. Marks are peppered over reddish-gold surfaces. Population: 8 in 35, 48 finer (10/17). NGC ID# 25WR, PCGS# 8335

**1880-CC Five Dollar, Choice AU
Reflective Reverse**

4130 1880-CC AU55 NGC. A mintage of 51,017 five dollar gold coins is somewhat middle-of-the-road for the Carson City Mint, which produced as few as 6,887 and as many as 208,000 half eagles during its 23 years of operation. The obverse is bright straw-gold, while the reverse displays deeper yellow-gold color and considerable reflectivity in the fields. A thin horizontal scrape across the neck identifies this particular Choice AU representative. NGC ID# 25XB, PCGS# 8352

4131 1882-CC XF40 PCGS. Variety 1-A. A collectible, lightly circulated Carson City half eagle, showing excellent bronze-gold color and pleasing detail for the grade. Hints of luminance remain in the reverse fields. The only mentionable abrasions are a tiny dig in the field near Liberty's nose and a mark on the arrow shafts of the reverse. NGC ID# 25XH, PCGS# 8359

4132 1890-CC AU58 NGC. CAC. Variety 1-A. Mintage of half eagles resumed at the Carson City Mint in 1890, after a six-year break in production. This attractive near-Mint specimen shows only a trace of wear on the well-detailed design elements and the orange-gold surfaces are lightly abraded and lustrous. NGC ID# C5XF, PCGS# 8376

4133 1891-CC AU58 PCGS. Variety 1-A. Some field luster remains on this near-Mint 1891-CC half eagle. The strike is sharp, and only slight high-point friction is observed. The 1891-CC is an available Carson City issue, ideal for collectors seeking a single, attractive coin from this mint. NGC ID# 25Y5, PCGS# 8378

**1891-CC Five Dollar, MS63
High-End Nevada Mint Representative**

4134 1891-CC MS63 PCGS. Variety 1-A, with a crack from the bust tip to star 1 and up. This scintillating Carson City five dollar gold piece is nearly fully struck. Orange-gold surfaces radiate frosty mint luster and exhibit relatively few major marks. The 1891-CC (208,000 coins minted) ranks among the more collectible half eagles from this always-popular facility. NGC ID# 25Y5, PCGS# 8378

4135 1892-CC AU58 PCGS. Variety 1-A. This vibrantly lustrous near-Mint coin shows sharp details and rich orange-gold coloration. Scattered abrasions and trivial high-point friction on the Liberty portrait prevented a Mint State grade from PCGS. Housed in a green label holder, this piece is easily the most eye-appealing AU coin that we have seen in recent years. NGC ID# 25Y7, PCGS# 8380

4136 1893-CC AU58 NGC. Variety 2-A. The date is noticeably low and to the left on this variety. Luster remains in the fields, and the central devices are sharp. Eye appeal is similar to what many low-end Uncirculated coins offer, with light handling marks in the fields being the chief evidence of circulation. Final-year Carson City half eagles are in constant demand. NGC ID# 25YB, PCGS# 8384

4137 1894-O MS61 NGC. Variety 1. This New Orleans half eagle is scarce in Mint State and rare finer than MS61. This piece displays pleasing orange-gold color and deeply mirrored fields from an early die state. Moderate strike weakness — common to New Orleans issues of the mid-1890s — is seen on select stars, the hair curls around Liberty's face, and the eagle's talons. Census: 69 in 61 (1 in 61 ★), 13 finer (10/17). NGC ID# 25YF, PCGS# 8388

4138 1895-S MS61 NGC. The 1895-S is scarce across all grade levels, and probably only 25 to 50 Mint State examples survive. This marvelous green and orange-gold Uncirculated half eagle maintains partial luster and enjoys an original look that specialists should appreciate. Well-struck. NGC ID# 25YJ, PCGS# 8391

4139 1895-S MS61 PCGS. The 1895 -S half eagle is unlikely to be located any finer than the MS61 level of preservation; PCGS and NGC report fewer than 30 submissions grading higher (10/17). The peach-gold surfaces display hints of green and show considerable luster, and importantly are minimally marked for the designated grade. Moreover, the design features are sharply defined. These attributes combine to make for an attractive specimen that may well lay claims to a higher grade. NGC ID# 25YJ, PCGS# 8391

4140 1901/0-S FS-301 MS64 PCGS. This well-known *Guide Book* variety shows the remnants of an undertype 0 to the northeast of the final 1 in the date. This sharply detailed orange-gold example is well-preserved and lustrous, with outstanding eye appeal. Population: 99 in 64 (7 in 64+), 24 finer (11/17). NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

4141 1901/0-S FS-301 MS64 PCGS. As the last of "true overdates" among federal coinage, the 1901/0-S shows the clear remnants of a final digit 0 beneath the second 1 in the date, where the upper curve of the underdigit remains visible to the right of the primary digit. Later overdates exist in several series, but they are all believed to have been created by employing hubs of two different dates while preparing the working die, rather than a single digit punch. Attractive, rich-gold color has a greenish tinge throughout this sharply struck, Choice Uncirculated example. Population: 99 in 64 (7 in 64+), 24 finer (10/17). NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

4142 1904 MS65+ NGC. CAC. An impressive Gem, and conditionally elusive at the grade. This piece has brilliant and highly lustrous yellow-gold surfaces with full mint frost and sharp design elements. Census: 56 in 65 (1 in 65+), 26 finer. CAC: 10 in 65, 15 finer (10/17). NGC ID# 25Z6, PCGS# 8409

INDIAN HALF EAGLES

1908 Indian Head Half Eagle, Bold MS64+

4143 1908 MS64+ PCGS. CAC. The inaugural-year issue in the Pratt half eagle series typically comes with incomplete detail on the headdress and shoulder tip, but this marvelous MS64+ coin with CAC-approval is boldly defined on those usual trouble spots. Warm yellow-gold color and radiant mint luster combine over well-preserved surfaces. Minor die buckling occurs around the reverse rim. NGC ID# 28DE, PCGS# 8510

4144 1911-D — Improperly Cleaned — NGC Details. Unc. Hairlines in the fields are visible under a loupe, although this unworn 1911-D half eagle is otherwise pleasing with brass-gold color and well-struck design elements. Due to the scarcity of problem-free pieces in Mint State, this still-attractive example is a reasonable option that will fit in well with other Mint State coins visually. NGC ID# 28DR, PCGS# 8521

4145 1911-S MS62+ PCGS. CAC. Although the 1911-S Indian half eagle had the second highest mintage of the series, it ranks 13th out of 24 issues for the total PCGS population in MS62 and higher grades. A glass is required to see the myriad marks on this exceptional example that has the eye appeal of a higher grade with brilliant and frosty yellow-gold luster. NGC ID# 25ZM, PCGS# 8522

4146 1912 MS64 PCGS. An attractive coin for the grade that has a mixture of light, yellow-gold color intermixed with pale shades of orange, particularly on the reverse. Surprisingly clear of marks for an MS64, this coin displays ample bright, sparkling luster. Housed in a previous generation green label holder.
Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 8511. NGC ID# 28DS, PCGS# 8523

4147 1913 MS64 PCGS. A sharply detailed Choice example of this popular date, with vivid orange-gold surfaces that radiate vibrant mint luster on both sides. The 1913 Indian half eagle is an elusive issue in grades above MS64. PCGS has graded 56 numerically finer examples (11/17). NGC ID# 28DT, PCGS# 8525

4148 1913 MS64+ PCGS. CAC. Exhibiting virtual Gem quality, this Plus-designated near-Gem has bold design motifs with satiny yellow-gold luster. PCGS has only certified 56 finer examples (11/17). NGC ID# 28DT, PCGS# 8525

4149 1913 MS64+ PCGS. CAC. Apricot-gold color dominates this lovely MS64+ half eagle, undeniably at the upper end of the scale for quality within the grade. Each side boasts a bold impression, and the only overt marks pass through the I in IN and the T in TRUST. PCGS reports 56 finer grading events (10/17). NGC ID# 28DT, PCGS# 8525

4150 1913-S AU58 PCGS. CAC. A pleasing light yellow near-Mint half eagle, this piece shows a trace of high-point wear with a hint of green and rose overtones. NGC ID# 25ZP, PCGS# 8526

1913-S Half Eagle, MS62+ Elusive Condition Rarity

4151 1913-S Weak S MS62+ NGC. David Akers wrote: "In MS-63 or higher grade, this issue is really very rare and gems are almost never available." This MS62+ nearly qualifies for that rarified grade, falling fractionally short. Soft luster emanates from light gold surfaces that show a few grease strike-throughs. As noted on the holder, the S mintmark is incomplete with only the lower loop readily apparent — a typical feature of the 1913-S. The NGC Census lists 40 higher grading events (11/17). NGC ID# 25ZP, PCGS# 8526

4152 1914 MS64 PCGS. 30th Anniversary Green Label Holder. The 1914 Indian Head five is usually available in MS64 but is seldom seen finer. This lustrous orange-gold near-Gem is sharply struck and appealing, showing minimal field marks. There are 34 finer examples reported at PCGS, including possible resubmissions (11/17). NGC ID# 28DU, PCGS# 8527

1914 Half Eagle, MS64 Rare Any Finer

4153 1914 MS64 PCGS. A deep orange-gold hue provides color to this near-Gem half eagle. Both sides show near-complete design detail. Frosty luster and minimal surfaces abrasions round out the appeal. The 1914 becomes exceedingly rare any finer, putting greater demand on coins of this quality. PCGS shows 34 higher submissions (11/17). NGC ID# 28DU, PCGS# 8527

1914-S Half Eagle, MS62 S-Mint Condition Rarity

4154 1914-S MS62 PCGS. Series specialists recognize the 1914-S as one of the top condition rarities in the series despite a fairly innocuous mintage of 263,000 coins. Anything finer than this MS62 is rare. The surfaces are minimally abraded, but frosty luster remains throughout this pale yellow-gold representative. Well-struck with slight die buckling around the reverse. NGC ID# 28DW, PCGS# 8529

LIBERTY EAGLES

4155 1847-O AU58 NGC. Variety 1. Ex: S.S. Republic. This attractive near-Mint specimen is one of 12 examples of this date recovered from the wreck of the *S.S. Republic*. Just a trace of wear shows on the high points of the well-detailed design elements, and the lustrous orange and yellow-gold surfaces exhibit the expected number of minor abrasions for the grade. The reverse displays several die cracks through the peripheral legend and the denominator. NGC ID# 2632, PCGS# 8598

4156 1852 MS60 NGC. A substantial mintage of 263,106 coins does little to tell of the importance of this piece. Gold coinage was obviously needed in commerce at the time — silver coinage scarcely circulated — and the average grade of survivors falls in the XF range. Mint State pieces are rarely seen. This lustrous example has sharp details with light yellow mint frost. Trivial marks on each side are consistent with the grade. Census: 8 in 60, 30 finer (10/17). NGC ID# 263C, PCGS# 8608

**1853 Ten Dollar, MS60
Conditionally Rare**

4157 1853 MS60 NGC. NGC and PCGS report a combined total of 84 Uncirculated submissions for the 1853 ten dollar gold piece. However, it is likely that a significant number of those grading events represent resubmissions. Red-gold color is profound, lightened by glints of peripheral luster. Slightly soft with myriad marks but appealing nonetheless. Census: 12 in 60, 31 finer (10/17). NGC ID# C82G, PCGS# 8610

4158 1854-S VF35 PCGS. Examples of this first-year San Francisco issue are in perpetually high demand, a reflection of the historical and numismatic significance of the 1854-S eagle. This well-circulated Choice VF ten presents myriad abrasions over reddish-gold surfaces. Pleasing detail remains. NGC ID# 263K, PCGS# 8615

4159 1870-S — Improperly Cleaned — NGC Details. AU. The San Francisco issues of 1870 are highly popular. Only 8,000 gold eagles were struck, and fewer than 100 examples are likely known to survive. This AU-level representative is well-detailed with olive-gold and deep orange hues. Faint hairlines on the obverse prevent a numeric grade from NGC but are not particularly bothersome.

**1874-S Ten Dollar, XF45
Only 10,000 Pieces Produced**

4160 1874-S XF45 PCGS. A planchet void at the UN in UNITED is unique to this coin and will serve as a pedigree identifier. Sharp detail prevails despite light wear, and the surfaces show bright yellow-gold color with hints of semiprooflike mirroring in the fields. The 1874-S eagle comes from a mintage of 10,000 pieces and is elusive in all grades. Population: 22 in 45, 24 finer (10/17). NGC ID# 2659, PCGS# 8671

4161 1878 MS62 NGC. A conditionally scarce Mint State example of this better Philadelphia issue, with few finer pieces known. A sharp strike complements frosty orange-gold luster. Scattered abrasions limit the grade but none are individually significant. Eye appeal is pleasing. Census: 26 in 62, 17 finer (10/17). NGC ID# 265J, PCGS# 8680

4162 1880-O VF30 NGC. Variety 2. The New Orleans Mint struck only 9,200 eagles in 1880, as production efforts were heavily focused on silver dollars. This midgrade circulated 1880-O ten displays even wear and medium olive-gold patina. Scattered light marks include one near star 2 in the field. NGC ID# 265U, PCGS# 8689

4163 1880-S MS63 PCGS. A tall S mintmark is positioned well left of the arrow feather and high above the left serif of the N in TEN. Another variety has a small mintmark centered between the arrow feather and the right top of the N in TEN. The Liberty gold coins of the San Francisco Mint are fertile hunting grounds for little studied die varieties. This Select Mint State piece has brilliant yellow-gold luster with pleasing, minimally marked surfaces. NGC ID# 265V, PCGS# 8690

4164 1881 MS63+ PCGS. CAC. This frosty and highly lustrous light yellow-gold eagle exhibits a sharp strike and minimal grade-consistent marks, including a single small mark from the beak to the scroll. The overall eye appeal is strong, and few are known in finer grades, including just 38 higher grade pieces at PCGS (11/17). NGC ID# 265W, PCGS# 8691

4165 1881-O AU53 NGC. Variety 1. Some satiny luster remains in the fields on this AU 1881-O eagle, while lightly worn devices determine the grade grade. A small reed mark near Liberty's chin is the only singular abrasion. The '81-O ten is a major rarity in Mint State, increasing demand for About Uncirculated pieces. NGC ID# 265Y, PCGS# 8693

4166 1883 MS63 NGC. This Philadelphia Mint issue is scarce any finer than the MS62 grade level, and rare any finer than MS63. This is a lovely, frosty Select Mint State representative with light coloration and an intense, radiant sheen across both sides. NGC and PCGS each have seen only three numerically finer representatives (11/17). NGC ID# 2666, PCGS# 8699

4167 1885 MS63 NGC. The 1885 ten is scarce in MS63 and decidedly rare any finer. This piece displays a sharp strike and original orange-gold mint luster. Scattered light abrasions account for the grade but pose limited distraction. Census: 29 in 63, 6 finer (10/17). NGC ID# 266D, PCGS# 8706

4168 1887-S MS63 PCGS. The 1887-S Liberty eagle is a condition rarity in grades above the MS63 level. This sharply detailed Select example displays lightly marked orange-gold surfaces, with slightly subdued mint luster. PCGS has graded five numerically finer examples (11/17). NGC ID# 5552, PCGS# 8711

**1890-CC Liberty Eagle, AU50
Variety 1-A**

4169 1890-CC AU50 PCGS. Variety 1-A. A single pair of dies was used to coin the small production of 17,500 eagles at Carson City in 1890. These were the first eagles coined at that facility since 1884. Although lightly worn, this piece retains noticeable luster in the protected areas with delicate orange overtones. A shallow scrape is visible on Liberty's cheek and neck. NGC ID# 266S, PCGS# 8718

4170 1891 MS63+ PCGS. The four finest coins at PCGS grade MS64, and this high-end MS63+ representative comes up just behind them. Coruscating mint frost rolls over each side, featuring a strong impression on the stars, portrait, and eagle. Numerous die cracks encircle the reverse legends. A pleasing, minimally marked 1891 eagle with reddish-gold color and greenish accents. Population: 57 in 63 (2 in 63+), 4 finer (10/17). NGC ID# 266T, PCGS# 8719

1891-CC/CC Liberty Ten, MS61
Repunched Mintmark, Vibrant Luster

4171 1891-CC/CC FS-501 MS61 PCGS. Variety 4-C. Both C's in the mintmark are repunched, although the second C is more obviously so. The *Cherry-pickers'* reverse is paired to a late-state obverse on Variety 4-C that shows a die crack through the left-hand stars. This Mint State coin is sharply struck with lovely orange-gold color. Moderate abrasions determine the grade. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

4172 1892-O MS61 PCGS. Variety 1. The strike is remarkably sharp for this oft-maligned New Orleans issue, which can show high point weakness and uneven strikes. The yellow-gold surfaces are brightly lustrous with the expected scattered abrasions, here in the form of light field chatter. We note a small scrape above star 1 but no heavy marks. NGC ID# 266X, PCGS# 8723

4173 1892-S MS63 PCGS. CAC. The mintmark leans slightly to the left. This Select Mint State 1892-S eagle has a sharp strike with frosty yellow-gold surfaces and splendid light rose overtones. This is an important issue in Mint State grades. Population: 80 in 63 (5 in 63+), 4 finer. CAC: 3 in 63, 0 finer (11/17). NGC ID# 266Y, PCGS# 8724

4174 1893-S MS63 PCGS. The 1893-S ten is scarce in MS63 and decidedly rare finer. This Select example offers vibrant yellow-gold luster and sharp detail. Chatter on the cheek and in the fields limits the grade. Population: 73 in 63 (1 in 63+), 4 finer (10/17). NGC ID# 2674, PCGS# 8728

4175 1894 MS64+ PCGS. CAC. This readily available Philadelphia issue hits the brakes and becomes a major condition rarity at the Gem grade level. The present coin is ideally positioned as a Plus-graded near-Gem, essentially the finest that most collectors will be able to acquire. Vibrant and well-preserved, it displays sharp detail and frosty orange-gold luster. The few light, scattered grazes in the fields that determine the grade pose little distraction. Only a single numerically finer coin is reported at PCGS. NGC ID# 2675, PCGS# 8729

4176 1899 MS64 NGC. Frosty orange-gold luster illuminates sharp design elements on this Choice 1899 eagle, while only a few light marks on the obverse prevent a Gem designation. The 1899 is available in this grade but scarce in better condition. NGC ID# 267J, PCGS# 8742

4177 1901 MS64+ PCGS. CAC. Undeniably clean for the assigned grade, as affirmed by the added recognition from PCGS and CAC. Luminous mint frost rolls over the light peach-gold surfaces of this strong near-Gem. The population falls significantly in higher grades. NGC ID# 7LHF, PCGS# 8747

1901 Ten Dollar, MS66
Few Known in Higher Grades

4178 1901 MS66 NGC. A superb 20th century type coin, showing sharp motifs and frosty yellow-gold surfaces. This Premium Gem is impressively well-preserved, save for a couple of tiny ticks near star 5 that limit the grade. The 1901 eagle is scarce in this grade and extremely rare any finer. Census: 54 in 66 (1 in 66+, 1 in 66★), 7 finer (10/17). NGC ID# 7LHE, PCGS# 8747

4179 1904 MS63 PCGS. The 1904 eagle is a low-mintage emission with a total production of 161,900 coins. Double eagles were the gold coins of choice at Philadelphia, and at San Francisco, the latter mint not producing any eagles during the year. This pleasing Select Mint State example has satiny light yellow luster and sharp design features with minimal marks. PCGS has only certified 57 finer examples (11/17). NGC ID# 267Y, PCGS# 8755

4180 1904 MS64 PCGS. CAC. The wheat-gold surfaces brim with frosted mint luster over this near-Gem 1904 eagle, a great choice for a type set. The well-struck surfaces show a couple of tiny ticks and small luster grazes, none of them overt. This issue is seldom seen any finer and usually appears in lower grades. Population: 53 in 64 (2 in 64+), 4 finer. CAC: 15 in 64, 2 finer (10/17). NGC ID# 267Y, PCGS# 8755

4181 1905 MS64 PCGS. The 1905 Liberty eagle becomes very scarce in grades above the MS64 level. This sharply detailed Choice example displays well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. PCGS has graded 32 numerically finer examples (11/17). NGC ID# 7LD3, PCGS# 8757

1905-S Ten Dollar, MS63
Elusive 20th Century Issue

4182 1905-S MS63 PCGS. This is the most challenging 20th Liberty Head eagle to locate in high grade. Select Uncirculated coins are nearly impossible to upgrade with four finer grading events at both services combined. This green and rose-gold ten is well-struck everywhere except the middle curls and olive leaves. Abrasions are unobtrusive and generally only seen under magnification. Population: 11 in 63, 4 finer (10/17). NGC ID# 2683, PCGS# 8758

INDIAN EAGLES

4183 1907 No Motto MS63 PCGS. An impressive Select specimen of the short-lived No Motto design, with well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 28GF, PCGS# 8852

- 4184 1907 No Motto MS63 PCGS.** A sharp No Motto type coin with satiny yellow-gold luster and luminous surfaces. Curved abrasions in the left obverse field limit the grade. The reverse alone appears almost a grade point finer. NGC ID# 28GF, PCGS# 8852
- 4185 1907 No Motto MS63 PCGS.** This frosty Select Mint State Indian ten is an excellent representative of the new design that debuted that year. This piece is fully brilliant and lustrous with light yellow surfaces. NGC ID# 28GF, PCGS# 8852
- 4186 1908 Motto MS63 NGC.** A splendid Select Mint State example, this With Motto Indian ten represents the transitional year. Splashes of dark toning appear on the lustrous yellow-gold surfaces of this example that was likely once stored in an overseas vault. NGC ID# 28GJ, PCGS# 8859
- 4187 1908 Motto MS64 PCGS.** The 1908 eagle is not known for its striking quality, but this near-Gem is well-detailed on the headdress and only marginally incomplete on the tip of the eagle's wing. Glimmering luster merges with warm, honey-gold coloration and tinges of lilac. Minute luster grazes and a tick behind the eye define the grade. NGC ID# 28GJ, PCGS# 8859
- 4188 1908-S AU58 NGC.** The 1908-S Indian eagle, with a limited mintage of only 59,850 coins, is an important component of a complete set of the series. Although a moderately accessible supply of these coins exist, few carry the eye appeal of this highly lustrous example with its frosty light yellow surfaces. NGC ID# 28GL, PCGS# 8861
- 4189 1909 MS63 NGC.** The 1909 Indian eagle becomes scarce in grades above the MS63 level. This attractive Select specimen exhibits well-detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. Overall eye appeal is outstanding. NGC ID# 28GM, PCGS# 8862
- 4190 1909 MS63 PCGS.** From a mintage of 184,789 pieces, the 1909 Indian eagle is one of the scarcer Philadelphia issues in the series, usually underrated outside of series specialists. This well-detailed Select example displays vivid greenish-gold surfaces with vibrant mint luster and only minor signs of contact. NGC ID# 28GM, PCGS# 8862
- 4191 1909-D MS61 PCGS.** The 1909-D Indian eagle claims a smallish mintage of 121,540 pieces, making it a challenging issue in high grade. This well-detailed Mint State specimen retains much of its original mint luster, and the orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 28GN, PCGS# 8863
- 4192 1910 MS64 PCGS.** This Philadelphia issue is favored for type through the MS65 grade, although the near-Gem level is perhaps the sweet spot for finding value. This MS64 example is sharply struck with attractive, finely textured greenish-gold surfaces. Only a few tiny marks exist on the Choice, lustrous surfaces. NGC ID# 28GR, PCGS# 8865
- 4193 1910 MS64+ PCGS. CAC.** Available through MS64, the 1910 Indian eagle becomes somewhat scarce in MS65. This Plus-graded Choice example boasts a seldom-seen CAC green label. Lovely orange and peach hues intermingle across the golden surfaces, while boldly struck design elements add to the eye appeal. NGC ID# 28GR, PCGS# 8865
- 4194 1910-D MS64+ PCGS.** This is one of the most accessible issues in the series, especially among branch mint coins. Each side is satiny with light yellow-gold color and minimal distractions for the grade. Crisply defined and only a touch incomplete over the highest central design points. NGC ID# 28GS, PCGS# 8866

- 4195 1910-D MS64+ PCGS. CAC.** Most ten dollar gold pieces struck at the Denver Mint in 1910 survive in MS61 to MS63. Near-Gems, especially those that are high-end for the grade, are scarce by comparison. This well-struck example is peach-gold with glowing satin luster. Smooth fields. NGC ID# 28GS, PCGS# 8866
- 4196 1910-S MS62 NGC.** From a mintage of 811,000 pieces, the 1910-S Indian eagle becomes somewhat scarce in grades above the MS62 level. This well-detailed MS62 specimen displays lustrous orange-gold surfaces with some scattered, minor contact marks on both sides. NGC ID# 268D, PCGS# 8867
- 4197 1910-S MS62 PCGS.** Satiny luster displays attractive orange-gold patina on this Mint State 1910-S eagle. Metal flowlines are seen at the borders, and minor strike softness occurs in the centers. The 1910-S is a better date in high grade, particularly above MS62 where examples are genuinely scarce. NGC ID# 268D, PCGS# 8867
- 4198 1911 MS64+ PCGS.** Lovely rose- and green-gold hues decorate the original, frosty surfaces of this high-end Choice 1911 Indian eagle. Cartwheel luster is highly appealing. A few marks on Liberty's cheek alone prevent a finer grade. NGC ID# 28GT, PCGS# 8868

**1911-D Eagle, AU53
Denver Key Date**

- 4199 1911-D AU53 NGC.** Like the 1911-D quarter and half eagles, this Denver ten dollar emission claims a low mintage (30,100 coins) and serves as a key date within the Saint-Gaudens series. Mint condition coins are exceedingly scarce, so most collectors have to vie for a pleasing AU representative. This example has bright straw-gold surfaces with myriad ticks and marks. Blending occurs over the high points of the design. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, AU55
Lowest Mintage in the Series**

- 4200 1911-D AU55 NGC.** This is the lowest-mintage regular issue in the series. Only 30,100 examples were struck at the Denver Mint in 1911. Few survive in mint condition. Satin luster and reddish-gold coloration are hallmarks of this pleasing Choice About Uncirculated ten dollar. Small abrasions and trace amounts of friction correspond to brief time spent in circulation. Struck from rotated dies. NGC ID# 28GU, PCGS# 8869
-

**1911-S Ten Dollar, MS60
Low-Mintage S-Mint Issue**

4201 1911-S MS60 PCGS. Tawny, medium orange-gold color covers the finely grained surfaces of this sharply struck 1911-S. Scarce in all Mint State grades, this coin is housed in a previous generation green label holder and exhibits only scattered marks for the bottom-level Uncirculated grade. We note a short scrape near the edge opposite Liberty's chin, and a tiny mark in the field near the eagle's lower neck. Soft luster glows beneath the original patina. Just 51,000 pieces were struck. NGC ID# 28GV, PCGS# 8870

4202 1912 MS64+ PCGS. This high-end near-Gem straddles the line between conditionally scarce and rare, as full Gems are seldom offered. The fields are clean, and pleasing yellow-gold coloration adorns each side. The extreme centers are slightly soft, but the outer motifs display a bold strike. NGC ID# 28GW, PCGS# 8871

4203 1912 MS64 PCGS. CAC. An impressive Choice Mint State piece, and conditionally rare any finer. This example has frosty yellow-gold luster with faint pinkish tendencies. PCGS has certified only 55 finer examples (11/17). NGC ID# 28GW, PCGS# 8871

4204 1912-S MS62 PCGS. This medium orange-gold piece has soft yet pleasing luster. A faint vertical mark appears on the eagle's body. A handful of abrasions on the portrait largely determine the grade. NGC ID# 269G, PCGS# 8872

**1913-S Ten Dollar, AU58
S-Mint Semikey**

4205 1913-S AU58 NGC. Specialists in this series immediately recognize the 1913-S for the key date that it is. Only 66,000 pieces were struck, among the lowest totals behind a handful of other issues. Examples generally saw circulation, and Uncirculated representatives are very scarcely seen. Textured green-gold surfaces are partly lustrous. Liberty's hair is a touch soft, as is the eagle's shoulder tip. Reddish accents appear within the protected areas. NGC ID# 28GZ, PCGS# 8874

**1913-S Indian Eagle, AU58
Low-Mintage Semikey**

4206 1913-S AU58 PCGS. From a small mintage of 66,000 pieces, the 1913-S is one of the most challenging issues of the ten dollar Indian series. This impressive near-Mint representative shows just a trace of wear on the well-detailed design elements and the pleasing orange-gold surfaces retain traces of original mint luster in sheltered areas. NGC ID# 28GZ, PCGS# 8874

**1914 Saint-Gaudens Eagle, MS64
Difficult to Upgrade**

4207 1914 MS64 NGC. Mint State 1914 eagles are usually found between MS61 and MS63. Near-Gems are very scarce. This is such a coin with vibrant mint luster and strong strike characteristics. The obverse is clearly finer than the grade suggests, while small marks appear in the reverse fields and within the eagle's feathers. An attractive example with rich yellow-gold color. NGC ID# 28H2, PCGS# 8875

**1914 Ten Dollar, MS64
Clean Fields**

4208 1914 MS64 PCGS. This is an exceedingly scarce issue in Choice Uncirculated condition and one that is rarely encountered in higher grades. A couple of marks appear on Liberty's portrait, but the fields are relatively clean on each side. Soft mint frost rolls over well-detailed medium yellow-gold surfaces. NGC ID# 28H2, PCGS# 8875

4209 1914-S AU58 NGC. The scarcity of the 1914-S in mint condition puts added pressure on borderline-Uncirculated survivors like the one offered here. Abundant luster remains over lightly abraded surfaces with trivial high-point friction. A few portrait marks identify the coin. NGC ID# 28H4, PCGS# 8877

4210 1914-S AU58 PCGS. CAC. Production was halted after 208,000 Indian eagles were coined at San Francisco in 1914. This example, with a trace of high-point wear, exhibits scattered grade-consistent marks. Both sides retain nearly full yellow-gold luster. NGC ID# 28H4, PCGS# 8877

1915-S Eagle, AU55
Challenging in High Grades

- 4211 1915-S AU55 PCGS.** Mint frost remains, although a brief stay in circulation has subdued luster in the exposed areas. Well-detailed motifs show slight blending and there are small abrasions over each side. The 1915-S claims a tiny mintage of 59,000 coins and provides a serious challenge in high grades. NGC ID# 28H6, PCGS# 8879

1915-S Indian Eagle, AU55
Low-Mintage Branch Mint Issue

- 4212 1915-S AU55 PCGS. CAC.** With a low mintage of 59,000 pieces, the 1915-S ten dollar Indian is an elusive issue in high grade. This Choice AU specimen exhibits just a touch of wear on the well-detailed design elements and the pleasing orange-gold surfaces retain much of their original mint luster. An appropriate number of grade-consistent abrasions are evident on both sides. NGC ID# 28H6, PCGS# 8879

1915-S Ten Dollar, AU58
Small Mintage of 59,000 Coins

- 4213 1915-S AU58 NGC.** Just 59,000 coins constitute the entire production of 1915-S eagles. Survivors are very scarce in Mint State, and borderline-Uncirculated examples are a slightly more accessible alternative. A touch of blending on the forecurls, shoulder tip, and talons is minor and overall design detail is strong. Remaining frost brightens orange-gold surfaces with peppered marks. NGC ID# 28H6, PCGS# 8879

- 4214 1916-S — Rim Damage — NGC Details. Unc.** The 1916-S eagle (138,500 coins), although the most collectible issue from this facility, is still a scarce date in Uncirculated condition. This piece shows numerous ticks and areas of rubbing around the borders, but the obverse and reverse are minimally worn with remaining luster. NGC ID# 28H7, PCGS# 8880

1932 Ten Dollar, MS65
Excellent Indian Head Type Coin

- 4215 1932 MS65 PCGS.** The 1932 ten dollar in Gem condition is the ideal issue-grade combination to represent the Saint-Gaudens type. Examples are widely collectible in MS65 but prove exceedingly scarce any finer. This is a frosty, yellow-gold representative, strongly struck with the only exception being the eagle's wingtip. Smooth and eye-appealing. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Liberty Double Eagle, AU50
Popular First-Year Type Coin

- 4216 1850 AU50 NGC.** The double eagle denomination was introduced in 1850, to take advantage of the massive influx of gold from the California gold fields. A substantial mintage of 1.1 million pieces was accomplished at the Philadelphia Mint, making the issue relatively available to this day. This attractive AU specimen is lightly worn and moderately abraded with pleasing yellow-gold surfaces that retain traces of original mint luster. NGC ID# 268F, PCGS# 8902

- 4217 1851 AU50 NGC.** A attractive AU50 representative from the second year of the denomination, this coin shows some light wear on the well-detailed design elements and the lustrous yellow and orange-gold surfaces exhibit a peppering of minor abrasions on both sides. NGC ID# 268H, PCGS# 8904

1851 Liberty Twenty, AU55
Early Type One Double Eagle

- 4218 1851 AU55 NGC.** With an ample supply of bullion from the California gold fields, more than 2 million Liberty double eagles were struck at the Philadelphia Mint in 1851. Most of the coins circulated heavily at the time of issue and few have survived in high grade. This impressive Choice AU specimen displays some light wear on the well-detailed design elements and the pleasing orange-gold surfaces are moderately abraded. NGC ID# 268H, PCGS# 8904

- 4219 1852 XF45 PCGS.** This Choice XF Type One double eagle is from the pre-San Francisco Mint, Gold Rush era, when California gold was shipped to Philadelphia and New Orleans for coinage. The coin is well-detailed and retains small hints of luster. Both sides are heavily abraded as usual. NGC ID# 268K, PCGS# 8906

**1852/1852 Twenty Dollar, AU55
FS-301, Broadly Repunched Date**

- 4220 1852/1852 FS-301 AU55 NGC.** All four date digits are broadly repunched, earning this variety a place in the *Cherrypickers' Guide*. Strong detail occurs on the stars and feathers despite minimal friction, while the curls are typically struck. The recesses emit glowing luster. An attractive Type One twenty with deep reddish-gold color. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

**1852-O Double Eagle, AU53
Variety 1**

- 4221 1852-O AU53 PCGS. Variety 1.** Only one variety is currently identified for the 1852-O double eagles, somewhat surprising given the mintage of 190,000 coins. Sharp eye collectors might want to watch for a second variety. This piece has pleasing greenish-gold surfaces with generous portions of mint luster remaining on each side. The surfaces have typical marks expected on these large gold coins. NGC ID# 268L, PCGS# 8907

**1853 Double Eagle, AU58
Still-Lustrous Type One Representative**

- 4222 1853 AU58 NGC.** Type One double eagles are without exception scarce-to-rare in Mint State, making About Uncirculated coins the grade level of choice for many collectors. This near-Mint 1853 has the flash of a Brilliant Uncirculated coin and less "chatter" than many lower-end Uncirculated examples. A crisp strike covers the central motifs, stars, and legends. We note a pair of reeding marks on the neck and numerous light abrasions, but no other marks of significance. Nearly full luster remains beneath frosted, yellow-gold surfaces. NGC reports just 55 numerically finer pieces (10/17). NGC ID# 268M, PCGS# 8908

**1853 Twenty Dollar, AU58
Terrific Eye Appeal**

- 4223 1853 AU58 NGC.** This early No Motto double eagle has terrific eye appeal. Coloration is medium orange-gold with occasional khaki accents over the highest points. Original luster remains within the protected areas of the design. The star radials, curls, and feathers are well-delineated with minimal friction. Chatter occurs throughout but is undistracting. An exceedingly rare Type One issue in higher grades. NGC ID# 268M, PCGS# 8908

**1855-S Double Eagle, AU58
Second Issue From the California Mint**

- 4224 1855-S AU58 NGC.** The second-year 1855-S double eagle "is one of the better-made Type One double eagles from this mint. The obverse shows good hair detail with clear separation on many of the curls. The stars generally show full radial lines and the denticles are clearly separated," according to Winter. Such is the case here. Remaining mint luster and yellow-gold coloration are additional hallmarks of this strong, minimally circulated No Motto twenty. NGC ID# 268X, PCGS# 8916

- 4225 1856-S — Improperly Cleaned — NGC Details. AU.** Light hairlines are evident on both sides, and especially visible on the obverse of this early San Francisco Mint product, coined in only the third year of production at that facility. Luster remains visible in the protected areas of the obverse and across much of the reverse.

**1856-S No Motto Twenty, AU58
Attractive Coloration**

- 4226 1856-S AU58 NGC.** This borderline-Uncirculated San Francisco double eagle is characteristically strong for the facility and period. Minor friction is present, but the stars, curls, and eagle's feathers are well-formed. Natural rose-gold surfaces display the faintest hints of green. Frosty with peppered abrasions. NGC shows 41 finer submissions (11/17). NGC ID# 2692, PCGS# 8919

1857 Twenty Dollar, Semiprooflike AU55

4227 1857 AU55 PCGS. Profound semiprooflike reflectivity is especially apparent on the obverse, showing moderate depth of field and partly frosted, razor-sharp motifs. Both sides are bright yellow-gold with minimal rub over the high points, although scattered marks are plentiful. Extensive circulation of the 1857 explains the dearth of high-grade examples. NGC ID# 2693, PCGS# 8920

4228 1857-S XF40 NGC. This impressive Type One double eagle displays moderate wear on the design elements and the moderately abraded orange-gold surfaces retain a few traces of original mint luster. From a substantial mintage of 970,500 pieces. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, AU58
Popular No Motto Type Coin**

4229 1857-S AU58 PCGS. Thousands of Mint State 1857-S double eagles were recovered from the S.S. *Central America* but they still realize strong prices when offered. This borderline-Uncirculated coin is a more affordable option for type collectors with still-vibrant luster and rich orange-gold color. A strongly struck Type One twenty with a few noticeable pedigree markers in the obverse field and on Liberty's cheek. NGC ID# 2696, PCGS# 8922

**1858 Liberty Double Eagle, AU50
Sharply Detailed Type One Example**

4230 1858 AU50 PCGS. The 1858 usually shows an average strike, but this AU50 example displays pinpoint detail for a Type One twenty with full star centers and radials, bold curls, and crisp feathers. Rich, orange and green-gold surfaces show a scattering of abrasions consistent with brief circulation. Double eagle production at the Philadelphia Mint was limited to 211,714 coins in 1858. NGC ID# 2697, PCGS# 8923

4231 1859-S XF45 NGC. A pleasing Choice XF example, this 1859-S double eagle retains traces of luster with a few trivial handling marks and a few small copper inclusions on the obverse. NGC ID# 269C, PCGS# 8928

**1860 Twenty Dollar, AU58
Still-Lustrous Fields**

4232 1860 AU58 PCGS. The scarcity of the 1860 double eagle in Mint State makes high-end AU coins attractive alternatives for the budget-conscious collector. This near-Mint piece displays substantial remaining luster in the fields and boldly detailed design elements. Light, scattered handling marks in the fields are a familiar sight for the grade. NGC ID# 269D, PCGS# 8929

4233 1861 XF45 NGC. A Choice AU specimen of this popular Type One issue, with light-to-moderate wear on the devices and pleasing orange-gold surfaces that are lightly abraded for the grade. A few traces of original mint luster are still evident. NGC ID# 269G, PCGS# 8932

**1861 Liberty Twenty, AU58
Popular Type One Issue**

4234 1861 AU58 PCGS. The Philadelphia Mint struck a really large production of more than 2.7 million Liberty double eagles in 1861. Before the recovery of the S.S. *Central America*, with its hoard of 1857-S twenties, the 1861 was the Type One double eagle most often seen in the marketplace. This impressive near-Mint specimen shows just a trace of high-point wear and the lightly abraded orange-gold surfaces retain much of their original mint luster. NGC ID# 269G, PCGS# 8932

**1861 Liberty Double Eagle, MS60
Nice Luster and Color**

4235 1861 MS60 PCGS. The 1861 lays claim to the highest mintage among Liberty Head double eagles. The *Mint Director's Report* of that year noted an influx of gold and high demand for the denomination from depositors, leading to a production of 2.9 million twenty dollar gold pieces. Lustrous, red and green-gold surfaces are eye-appealing despite scattered grazes. Strike detail is good, if a touch soft on the curls. NGC ID# 269G, PCGS# 8932

- 4236 1861-S VF35 PCGS.** Some moderate, even wear shows on the design elements of this Choice VF specimen, and the surprisingly lustrous orange-gold surfaces show the expected number of minor abrasions for the grade. NGC ID# 269K, PCGS# 8935

**1861-S Twenty Dollar, AU53
Low Survival Rate**

- 4237 1861-S AU53 NGC.** San Francisco Mint personnel were instructed to return to using the normal reverse after the Paquet design was used to strike 19,250 twenty dollar gold coins early in the year. More than 750,000 1861-S double eagles were struck after that point, less than 1% of which are believed extant. This is a medium orange-gold example with partial luster. Myriad abrasions and slightly incomplete detail are characteristic. Bold die break through OF AM. NGC ID# 269K, PCGS# 8935

- 4238 1863-S VF30 PCGS.** Small S mintmark. While many 1863-S double eagles arrived on the numismatic market via long-term storage in European bank vaults or as shipwreck salvage, this circulated example clearly served its intended purpose as a vital part of daily trade. Rubbed and abraded from regular use, but with good color and no real problems. NGC ID# 269R, PCGS# 8940

**1863-S Double Eagle, AU55
Pleasing Orange-Gold Surfaces**

- 4239 1863-S AU55 NGC.** More high-grade examples of the 1863-S double eagle are available than in earlier times thanks to shipwreck recoveries from the *S.S. Republic* and the *S.S. Brother Jonathan*, but even today, the average certified survivor is only AU50 or so. This Choice AU example boasts partial glowing luster over orange-gold surfaces with scattered light marks consistent with a short spate in circulation. "Ear bars" show on Liberty from clashing with the reverse.

Ex: *Central States Signature (Heritage, 4/2015)*, lot 6421. NGC ID# 269R, PCGS# 8940

- 4240 1865 — Improperly Cleaned — NGC Details. AU.** The gold treasures lost in 1865 and recently recovered have insured a strong supply of San Francisco Mint double eagles from this issue, but few from Philadelphia. This example has considerable luster remaining in the protected areas with trivial signs of cleaning. NGC ID# 269U, PCGS# 8943

- 4241 1865-S VF30 PCGS.** A wheat-gold representative of the penultimate West Coast No Motto issue. Free from any individually consequential abrasions. Though the portrait shows wear, hints of luster accompany the reverse legends, rays, and shield. NGC ID# 269V, PCGS# 8944

- 4242 1866-S No Motto AU58 NGC.** This impressive Type One double eagle was struck early in the year, before the dies with the motto IN GOD WE TRUST arrived at the San Francisco Mint. This specimen is lightly worn and lightly abraded, with lustrous orange-gold surfaces. NGC ID# 269W, PCGS# 8945

**1866 With Motto Twenty, AU53
An Especially Lustrous Example**

- 4243 1866 Motto AU53 NGC.** Just shy of 700,000 pieces were struck with With Motto at the Philadelphia Mint in 1866. Few pieces were saved despite the Congressional push to add IN GOD WE TRUST to America's coinage, particularly for the double eagle that was primarily used for trade and large-scale bank to bank transactions. Often transported and stored in bag quantities, most twenties have numerous abrasions and this briefly circulated piece shows a few bagmarks and related field chatter. Gleaming mint luster remains across the sharply struck, rich-gold surfaces. NGC ID# 269X, PCGS# 8949

**1866 With Motto Twenty, Choice XF
Doubled Motto Reverse**

- 4244 1866 Doubled Motto, FS-801, XF45 NGC.** NGC's VP-001 is cross-referenced on their VarietyPlus page to Breen-7225, although the Breen's variety is described in his *Encyclopedia* as a proof issue with the misplaced digit outside the dentils. The anomaly within the dentils on this coin may be related to the die line that emerges into the field below the 8 at a diagonal. Of more interest on this piece is the *Cherrypickers'* doubling on the reverse, which is plainly visible on some letters of IN GOD WE TRUST. The coin is well-detailed and yields smooth honey-gold surfaces with elements of luster in the protected regions of the fields. Eye appeal is extraordinary for the grade. NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

- 4245 1869-S AU55 NGC.** A pleasing Choice AU specimen of this popular Type Two issue, with some light wear on the well-detailed design elements and moderately abraded orange-gold surfaces that retain traces of original mint luster. NGC ID# 26A6, PCGS# 8956

- 4246 1870-S AU50 NGC.** The 1870-S is a popular Type Two issue and the Saddle Ridge Hoard slightly increased the number of high grade specimens available to collectors. This lightly worn AU50 example displays still-lustrous orange-gold surfaces with the expected number of minor abrasions for the grade. NGC ID# 26A9, PCGS# 8959

**1870-S Double Eagle, Bold AU58
Vibrant Remaining Luster**

- 4247 1870-S AU58 NGC.** The 1870-S is collectible in XF through lower AU grades but becomes scarce in near-Mint condition. Vibrant remaining mint luster brightens each side of this moderately abraded, boldly struck example. Housed in a former generation holder.
Ex: New York Signature (Heritage, 7/2002), lot 9518. NGC ID# 26A9, PCGS# 8959

- 4248 1871-S AU58 PCGS.** *Ex: Granite Lady Hoard.* This impressive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded, with a minor rim bruise on the obverse at 5:30. NGC ID# 26ND, PCGS# 8962

- 4249 1872 AU53 NGC.** This attractive Type Two double eagle shows some light wear on Liberty's hair, but the pleasing orange-gold surfaces retain a surprising amount of original mint luster. The expected number of minor abrasions are evident, but the only individually noticeable flaw is an arcing scratch in the lower right obverse field. NGC ID# 26AD, PCGS# 8963

**1872 Twenty Dollar, MS60
Pleasing Reddish-Gold Representative**

- 4250 1872 MS60 PCGS.** Although a couple of Premium Quality Uncirculated 1872 double eagles are known, all but a handful of mint condition examples survive in MS60 or MS61. Here is a pleasing reddish-gold representative with slightly better strike detail than usual. Myriad marks appear in the fields and on Liberty's cheek. NGC ID# 26AD, PCGS# 8963

- 4251 1872-S AU58 NGC.** Just a trace of high-point wear is evident on the sharply defined design elements of this attractive near-Mint representative. The lightly abraded yellow-gold surfaces radiate vibrant mint luster with outstanding eye appeal. NGC ID# 26AF, PCGS# 8965

- 4252 1872-S AU58 PCGS. CAC.** An impressive near-Mint Type Two double eagle, this 1872-S has frosty yellow luster and dark patina on the lightly worn high points of the design. NGC ID# 26AF, PCGS# 8965

**1873 Open 3 Twenty, MS62
Exemplary Luster**

- 4253 1873 Open 3 MS62 PCGS.** Remarkably frosty, original yellow-gold luster illuminates this Mint State Open 3 double eagle. Aside from a few faint peripheral cracks on the reverse, the die state is relatively early with no visible lapping. Scattered abrasions limit the grade, but their mild interruption in the patina serves to amplify the perceived luminance of the luster. A quite appealing coin for the grade. NGC ID# 26AL, PCGS# 8967

- 4254 1873 Open 3 MS62 PCGS.** As expected from the grade, the lustrous yellow-gold surfaces of this impressive MS62 example show a number of minor contact marks, but the design elements are sharply detailed and overall eye appeal is quite strong. NGC ID# 26AL, PCGS# 8967

- 4255 1873 Open 3 MS62 PCGS.** An impressive MS62 specimen of this popular Type Two issue, with sharply detailed design elements and lustrous yellow-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26AL, PCGS# 8967

- 4256 1873 Open 3 MS62 PCGS.** This well-detailed MS62 example shows a little softness on the date, which was struck with the Open 3 punch, suggested by Chief Coiner A. Loudon Snowden because the earlier Closed 3 looked too much like an 8. The lustrous, vivid orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26AL, PCGS# 8967

**1873 Twenty Dollar, MS62
Open 3 Example With Great Eye Appeal**

- 4257 1873 Open 3 MS62 NGC. CAC.** A few streaks of blue color across the right reverse accent peach-gold hues overall. Thick mint frost radiates from each side of this Open 3 double eagle, the more available variant for the year among coins from this facility. The stars exhibit full radial lines, and the eagle's neck feathers are completely defined. Minimally abraded for the grade. NGC ID# 26AL, PCGS# 8967

- 4258 1873 Open 3, Doubled Die Obverse, FS-101, MS62 PCGS. CAC.** LIBERTY is die doubled south on this popular *Cherrypickers'* variety. A sun-gold example with good luster and a clean reverse. The obverse exhibits the expected number of scattered small abrasions. The Type One design is available in Mint State due to shipwreck hoards, and Type Three twenties are plentiful in Uncirculated grades because of foreign bank holdings. But the Type Two design is conditionally elusive. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

- 4259 1874 MS61 PCGS. CAC.** Like most Type Two double eagles, the 1874 is seldom encountered in high grade. This impressive MS61 example is well-detailed and surprisingly lustrous, with vivid orange-gold surfaces that show the expected number of grade-consistent contact marks. NGC ID# 26AN, PCGS# 8970

**1874-CC Double Eagle, XF45
Attractive for the Grade**

- 4260 1874-CC XF45 PCGS. CAC. Variety 3-A.** The mintmark is widely spaced and positioned almost entirely over the N in TWENTY. XF and AU examples of this Carson City issue are in demand due to the rarity of Mint State coins. This CAC-approved Choice XF representative displays original straw-gold patina with relatively light surface chatter. Hints of luster remain in the protected regions of the fields. NGC ID# 26AP, PCGS# 8971

- 4261 1875 MS61 NGC.** This is an impressive Mint State example from a relatively low production in Philadelphia, having a mintage of 295,720 coins. Frosty rose-gold luster imparts full brilliant to this example that hosts only minimal handling marks on each side. The reverse is especially free of marks. NGC ID# 2547, PCGS# 8973

**1876 Liberty Twenty, MS62
Scarce in Finer Grades**

- 4262 1876 MS62 PCGS.** Incredibly frosty luster creates a glowing cartwheel effect on this lightly abraded Mint State coin. The strike is sharp, even on the border dentils and stars. The original yellow-gold surfaces are highly appealing for the grade. The 1876 double eagle is occasionally available in this grade, but finer coins are scarce. NGC ID# 26AV, PCGS# 8976

- 4263 1876-S MS62 NGC.** An impressive Liberty double eagle from the final year of the Type Two design, this coin exhibits well-detailed design elements, with lightly marked orange-gold surfaces and vibrant mint luster throughout. NGC ID# 26AX, PCGS# 8978

**1877 Twenty Dollar, MS62
Rare in Finer Condition**

- 4264 1877 MS62 PCGS.** Available in MS62, the debut Type Three double eagle from the Philadelphia Mint is a rarity in finer grades, with only 18 such pieces reported by PCGS (10/17). This collectible example displays a sharp strike and radiant cartwheel luster with excellent yellow-gold coloration. Light surface marks limit the grade but are mostly unobtrusive. NGC ID# 2547, PCGS# 8982

**1877 Liberty Double Eagle, MS62
Seldom Encountered Finer**

- 4265 1877 MS62 NGC.** The 1877 Liberty double eagle claims a mintage of 397,670 pieces. Most of the coins were released into circulation and few were saved for numismatic purposes. Today, the 1877 becomes scarce at the MS62 grade level, and finer coins are rare. This well-detailed MS62 specimen exhibits lustrous orange-gold surfaces that are lightly marked for the grade. NGC has graded 17 numerically finer examples (10/17). NGC ID# 2547, PCGS# 8982

**1877 Double Eagle, MS61 Prooflike
Deeply Reflective Fields**

- 4266 1877 MS61 Prooflike NGC.** This deeply reflective Type Three double eagle is tied with eight others as the finest Prooflike coin of this date at NGC (10/17). The coin is fully struck with outstanding straw-gold color and an active cartwheel effect. Moderate abrasions limit the grade, as expected. High-end examples of this issue are scarce even without Prooflike mirroring. NGC ID# 26AY, PCGS# 78982

**1877-CC Double Eagle, XF45
Inaugural Type Three Issue**

- 4267 1877-CC XF45 NGC. Variety 1-A.** Clash marks near the ear, a die line from the rim to star 10, and an even the mintmark are diagnostic. Yellow-gold surfaces display partial semiprooflikeness in the fields. The outer elements are bold, while the centers show more pronounced merging. An abrasion above Liberty's ear is the only singular distraction for this first-year Type Three representative. NGC ID# 26AZ, PCGS# 8983

**1877-S Double Eagle, MS62
Slightly Reflective Fields**

- 4268 1877-S MS62 NGC.** Uncirculated 1877-S double eagles are usually available for a price, but rarely are they seen finer than the present MS62 coin. This piece displays sharp motifs with a hint of reflectivity in the fields. Original straw-gold surfaces exhibit expected abrasions, along with a pedigree-identifying russet spot near star 13. NGC lists only nine finer examples (10/17). NGC ID# 254B, PCGS# 8984

**1878 Double Eagle, MS62
Doubled Die Reverse**

- 4269 1878 MS62 PCGS. Minor Variety, Doubled Die Reverse, Variety 1.** Doubling is strongest on TWENTY DOLLARS but is also partly visible on the base of STATES. Bright mint frost illuminates this lively yellow-gold double eagle. The strike is exceedingly strong, and few ticks and grazes are seen for the grade. Alloy spots appear around star 2 and across the eagle's tailfeathers. The 1878 becomes conditionally rare in higher grades. NGC ID# 26B3, PCGS# 8985

- 4270 1878 Doubled Die Reverse MS62 PCGS.** There are actually three different doubled die reverse varieties known for 1878, and this is the variety with doubling at the base of STATES. This piece has brilliant yellow luster with frosty surfaces and splashes of coppery-rose toning on the reverse. NGC ID# 26B3, PCGS# 8985

**1878 Double Eagle, MS62
Frosty Peach-Gold Surfaces**

- 4271 1878 MS62 PCGS.** The highest reasonably obtainable grade for the 1878 double eagle is MS62. The issue carries an average certified assessment just shy of MS60, but the population declines markedly in Select Uncirculated condition. Attractive peach-gold color and uninhibited mint frost blend over lightly abraded surfaces. Every design point is strongly impressed. NGC ID# 26B3, PCGS# 8985

- 4272 1879-S MS60 NGC.** An impressive Mint State specimen of this popular Type Three double eagle, with well-detailed design elements and bright yellow-gold surfaces that show myriad minor contact marks on both sides, as expected for the grade. Vibrant mint luster throughout. NGC ID# 26B9, PCGS# 8991

**1882-CC Twenty Dollar, XF45
Original Red-Gold Color**

- 4273 1882-CC XF45 PCGS. Variety 1-A.** Gorgeous reddish-gold and khaki coloration confirms the originality of this Choice XF double eagle. Hints of partial luster remain, heightening the visual allure. There is expected friction over the major relief elements, but that comes with the territory for an original, lightly circulated gold piece of this size. NGC ID# 26BF, PCGS# 8997

- 4274 1882-CC — Tooled — PCGS Genuine. AU Details. Variety 1-B.** This AU-level Carson City double eagle is sharply detailed and offers original olive-gold patina with infused overtones of peach-orange. The coin is highly attractive for the issue aside from a few tool marks above the date and along the front of Liberty's neck.

- 4275 1883-CC — Harshly Cleaned — NGC Details. AU. Variety 2-A.** This rose-gold AU 1883-CC double eagle is sharply detailed and yields glimpses of semiprooflike reflectivity in the protected portions of the fields. No significant abrasions are present, although extensive hairlines on each side prevent a numeric grade. NGC ID# 26BH, PCGS# 8999

1884-CC Twenty Dollar, XF45
Red and Khaki-Gold Hues

- 4276 1884-CC XF45 PCGS. Variety 1-A.** Lightly circulated examples of the 1884-CC double eagle are always in demand among type collectors, Carson City specialists, and those putting together complete date-mintmark sets. Khaki-gold color is obviously original. The finer design details show moderate blending, but the overall impression is still strong. The faintest traces of luster remain. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Head Twenty, AU53
Smooth, Luminous Surfaces

- 4277 1884-CC AU53 PCGS. Variety 1-A.** Original luster glows in the fields when rotated beneath the light, illuminating fairly smooth surfaces on this About Uncirculated Carson City twenty. The strike is sharp and wear is slight. The 1884-CC is plentiful in AU grades but elusive in Mint State. Examples in any grade are scarce with smooth, appealing surfaces. NGC ID# 26BK, PCGS# 9001

1884-S Double Eagle, MS63
Above-Average for a Mint State Coin

- 4278 1884-S MS63 PCGS.** In the past several decades, the 1884-S double eagle has been recognized as available in average Uncirculated condition. However, the present MS63 coin can be considered above average. Examples are challenging in this grade in comparison to MS62 coins, and PCGS has certified only 28 finer representatives (10/17). Sharp design elements complement satiny yellow-gold luster. Mild field chatter limits the grade in the absence of severe abrasions. NGC ID# 26BL, PCGS# 9002

1884-S Double Eagle, MS63
Rare in Finer Grades

- 4279 1884-S MS63 NGC.** Most Uncirculated 1884-S double eagles grade only MS61 or MS62. This Select example is scarce by comparison, and NGC has seen only nine finer coins (10/17). Sharp design elements and radiant cartwheel luster are hallmarks of the eye appeal, and a few scattered abrasions are hardly bothersome. The wheat-gold coloration is original. NGC ID# 26BL, PCGS# 9002

1885-S Liberty Double Eagle, MS63
Appealing Color and Luster

- 4280 1885-S MS63 NGC.** The 1885-S double eagle is slightly more plentiful in MS63 than the previous issue from this mint, although finer examples are still rare. NGC has seen only 11 higher-grade representatives (11/17). This collectible Select coin displays frosty yellow-gold luster in the margins with warmer peach-orange interior hues. Light marks on Liberty's cheek are all that limit the grade, as this coin is somewhat more appealing than many of its peers. NGC ID# 26BP, PCGS# 9005

1885-S Twenty Dollar, MS63
Lovely Mint Luster

- 4281 1885-S MS63 PCGS.** The Saddle Ridge Hoard, a hidden cache of gold coins discovered in California in 2013, contained 20 examples of the 1885-S double eagle, although the Mint State population of this date was not significantly altered as just five of them were unworn. This collectible Select coin is likely from other, numismatic sources, as the rose- and mint-gold coloration differs from the bright yellow-gold look of the Saddle Ridge coins. The strike is sharp, and aside from a few marks on the cheek and in the adjacent field, the coin is quite attractive. PCGS has seen 40 finer representatives (11/17). NGC ID# 26BP, PCGS# 9005

1885-S Double Eagle, MS63
Seldom Offered Finer

4282 1885-S MS63 PCGS. In their gold coin *Encyclopedia*, Garrett and Guth write: "The population numbers for MS-63 examples are probably inflated greatly by resubmissions. The 1885-S issue jumps rapidly in price at all levels of Mint State." This is likely true to a certain extent. PCGS has seen only 40 finer examples of the date (10/17). The present coin displays sharp detail and frosty wheat-gold luster with light, scattered abrasions. NGC ID# 26BF, PCGS# 9005

1887-S Double Eagle, MS62
Scarce Finer

4283 1887-S MS62 PCGS. During the 1880s, the San Francisco Mint was the chief producer of double eagles, although the 1887-S has the lowest mintage from this mint for the decade at 283,000 coins. This collectible Mint State example displays sharp devices and bright yellow-gold mint luster. Abrasions on the cheek and in the field limit the grade. In higher grades, the 1887-S is scarce. NGC ID# 26BS, PCGS# 9007

1887-S Twenty Dollar, MS62
Conditionally Rare California Issue

4284 1887-S MS62 PCGS. The 1887-S must have endured considerable abuse in Western circulation or rough overseas transport. Mint State examples are rarely seen above the MS62 grade level. A strong impression and swirling mint frost are the defining characteristics of this pretty yellow-gold survivor. Myriad abrasions, as expected. NGC ID# 26BS, PCGS# 9007

1887-S Liberty Double Eagle, MS62
Elusive S-Mint Issue in High Grade

4285 1887-S MS62 PCGS. Greenish-gold color deepens to a band of olive-gold at the margins, confirming the original surfaces of this conditionally scarce S-Mint twenty. The strike is impressively sharp for the issue, with lightly marked surfaces but no individually heavy abrasions. The 1887-S remains a scarce Type Three double eagle in MS62 and a rare issue any finer, since most pieces returning from foreign holdings grade no finer than MS61. NGC ID# 26BS, PCGS# 9007

1887-S Double Eagle, MS62
Above-Average Strike

4286 1887-S MS62 PCGS. The design elements are well-impressed throughout this lustrous example, which is toned a rich apricot-gold with green overtones at the borders. A few light-to-moderate abrasions are evident, especially on Liberty's cheek, as well as in the upper-left and lower-right obverse fields. Housed in a previous generation blue label holder with its barcode on the back, this conditionally scarce 1887-S is attractive for the grade. PCGS reports only 76 numerically finer examples (11/17). Ex: *New York Signature* (Heritage, 7/2004), lot 8500. NGC ID# 26BS, PCGS# 9007

4287 1888 MS62 PCGS. This is an important Philadelphia Mint double eagle that survives from a mintage of only 226,161 pieces. This example has a hint of pink on its frosty yellow-gold surfaces with minimal, grade-consistent marks. PCGS has certified only 33 finer pieces (11/17). NGC ID# 26BT, PCGS# 9008

1888 Liberty Head Twenty, MS62
Upper-End Example for the Date

4288 1888 MS62 PCGS. Bowers writes: "Grades range from VF to MS-62, but above that, the 1888 is a rarity. I recall that in the 1950s there were a lot of these in shipments from Europe." Coruscating frost blends with green and rose-gold coloration. This upper-end offering is well-struck and typically abraded. NGC ID# 26BT, PCGS# 9008

1888-S Twenty Dollar, MS63
Crisp Impression

- 4289 1888-S MS63 NGC.** The borders and design elements are needle-sharp on this boldly struck San Francisco double eagle. Each side showcases eye-catching, frosty mint luster. A linear grease mark occurs on Liberty's middle curls. The MS63 grade is considerably higher than what is normally awarded for the issue and reflects the small number of marks. Only 39 higher grading events at NGC (11/17). NGC ID# 26BU, PCGS# 9009

1889 Double Eagle, MS62
Exceedingly Rare in Finer Grades

- 4290 1889 MS62 NGC.** Double eagle mintages were low throughout the 1880s until 1887, only to slump again in 1889. Just 44,070 pieces were struck, and while the 1889 is relatively available in grades through MS61, it is challenging in MS62 and very rare any finer. This richly frosted example shows myriad light abrasions and luster grazes, but no heavy marks. The strike is quite sharp. NGC records just 10 examples in numerically finer grades. All are MS63 (11/17). NGC ID# 2695, PCGS# 9010
- 4291 1889-S MS62 PCGS. CAC.** This impressive Type Three double eagle exhibits lightly marked orange-gold surfaces with vibrant mint luster throughout. The design elements are sharply detailed and overall eye appeal is outstanding. NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS63
Eye-Appealing Original Toning

- 4292 1889-S MS63 PCGS.** The Saddle Ridge Hoard added more than 300 examples to the 1889-S PCGS certified population, most of which were in Uncirculated grades. This resplendent, Select Uncirculated twenty is housed in a previous generation blue label holder that pre-dates the Saddle Ridge coins. It displays smooth, largely unabraded surfaces. A few isolated marks exist, including one grade-determining abrasion near the eye. Shades of lilac, orange, and green shimmer across the lustrous, brassy-gold surfaces, while the strike is pleasingly sharp on both sides. NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS63
Impressively Sharp and Colorful

- 4293 1889-S MS63 NGC.** Light chatter on Liberty's cheek and the adjacent fields is the sole grade-limiting factor on this lustrous and attractive 1889-S twenty. Cartwheel luster rolls beneath greenish-gold surfaces that display bright, rose-gold centers. The strike is sharp throughout both sides. NGC reports just 52 numerically finer examples (11/17). NGC ID# 26BW, PCGS# 9012

1889-S Twenty Dollar, MS63
Vibrant Mint Luster

- 4294 1889-S MS63 PCGS.** The 1889-S is reasonably collectible in Mint State grades through the MS63 level, becoming progressively scarce in near-Gem or Gem conditions. This Select example is lustrous with lightly abraded, rich-gold surfaces and a needle-sharp strike. Small ticks and marks limit the grade, but do little to diminish the eye appeal. NGC ID# 26BW, PCGS# 9012

1889-S Twenty Dollar, MS63
Original Mint Luster

- 4295 1889-S MS63 PCGS.** The 1889-S double eagle is collectible in MS63 but scarce finer. This Select representative displays sharp design elements and original straw-gold mint luster. Scattered light abrasions determine the grade but none are individually significant. Hints of lovely rose-gold warm the central regions. NGC ID# 26BW, PCGS# 9012

**1890-CC Twenty Dollar, Choice XF
Collectible Nevada Mint Type**

- 4296** 1890-CC XF45 NGC. **Variety 1-A.** Centered mintmark with lapped rightmost tailfeathers. The Carson City Mint accomplished a production of 91,209 double eagles in 1890, making this a moderately available issue across most grade levels. Crusty gold surfaces feature an attractive reddish cast. A thin horizontal depression below ST identifies this well-struck example. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, AU Details
Attractive Orange-Gold Color**

- 4297** 1890-CC — Improperly Cleaned — NGC Details. AU. **Variety 1-A.** Light hairlines run vertically to confirm the cleaning, visible with the aid of a strong light and a loupe. Attractive orange-gold color remains across slightly reflective surfaces. Only small abrasions are otherwise present, while the strike is quite sharp. A few small rim nicks detract little from the overall visual appeal of this show-after Carson City issue.

1892-CC Double Eagle, Attractive XF45

- 4298** 1892-CC XF45 PCGS. CAC. **Variety 1-A.** Reddish-gold surfaces retain considerable brightness. Obverse star radials and the eagle's feathers are mostly well-delineated, while Liberty's curls display more noticeable blending. There are remarkably few abrasions for the grade, and the eye appeal of this Choice XF survivor is excellent, hence the CAC endorsement. NGC ID# 26C6, PCGS# 9020
- 4299** 1893 MS63 PCGS. An impressive Select Mint State example that features frosty yellow mint luster and trivial handling marks with delicate pink overtones. This conditionally elusive issue is accessible at this grade level, but elusive any finer, with only 94 better PCGS certified examples (11/17). NGC ID# 26C8, PCGS# 9022

- 4300** 1893 MS63 NGC. An impressive Select Type Three double eagle, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster on both sides. NGC has graded 66 numerically finer examples (10/17). NGC ID# 26C8, PCGS# 9022

**1893-S Liberty Head Double Eagle
Frosty Select Uncirculated Example**

- 4301** 1893-S MS63 NGC. The certification totals decline markedly in higher grades at both services, and NGC has seen merely 21 finer examples. Mint luster is expectedly frosty and attractive over appealing, medium orange-gold surfaces. Strike detail is good, if a touch incomplete. Well above-average for the issue. NGC ID# 26CA, PCGS# 9024

**1893-S Liberty Head Twenty, MS63
Low Population in Finer Grades**

- 4302** 1893-S MS63 PCGS. The 1893-S becomes moderately scarce at the MS63 grade level and quite scarce any finer. This is a vibrant Select Uncirculated example with frosted cartwheel mint luster and hints of rose over lightly abraded, medium-gold surfaces. The strike is about average for the issue, with a few obverse stars lacking full central detail and a bit of weakness at the tops of LIBERTY and the highest hair curls. Eye appeal is strong. PCGS reports 63 numerically finer pieces (11/17). NGC ID# 26CA, PCGS# 9024

1893-S Double Eagle, Peach-Gold MS63

- 4303** 1893-S MS63 PCGS. Only scattered, minor abrasions and tiny marks are seen on the smooth and attractive surfaces of this Select Mint State twenty. Bright mint luster illuminates the frosted peach-gold surfaces with glints of green and orange. A sharp strike adds to the considerable eye appeal. NGC ID# 26CA, PCGS# 9024

**1893-S Liberty Twenty, MS63+
Elusive Issue in Higher Grades**

4304 1893-S MS63+ NGC. Despite the substantial mintage of 996,175 pieces, the 1893-S Liberty double eagle is very scarce in grades above the MS63 level. This Plus-graded Select example offers well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. NGC has graded 21 finer examples (10/17). NGC ID# 26CA, PCGS# 9024

4305 1894 MS63+ PCGS. A Plus-graded Select specimen of this popular Type Three issue, with sharp definition on the design elements and vibrant mint luster on both sides. The pleasing peach-gold surfaces are lightly marked and appealing. NGC ID# 26CB, PCGS# 9025

**1894 Twenty Dollar, MS64
Few Known Finer**

4306 1894 MS64 PCGS. In some ways, the 1894 Philadelphia twenty is the embodiment of several Type Three double eagles from the 1890s — moderately available through the near-Gem grade, and extremely rare any finer. This medium-gold example is lustrous and sharply struck, with a few light abrasions in the obverse fields and bits of "mint grime" on the cheek, neck, and coronet. PCGS reports just three numerically finer examples (11/17). NGC ID# 26CB, PCGS# 9025

**1894 Double Eagle, MS64
Very Rare in Higher Grades**

4307 1894 MS64 NGC. Elusive at the MS64 grade level and rare any finer, this Choice Uncirculated example is sharply struck with lively toning accents over pleasing and frosty orange-gold surfaces. Some light, high point marks and rim chatter are noted, consistent with the near-Gem grade. NGC has seen just eight numerically finer examples, a situation that has not changed in recent memory (11/17). NGC ID# 26CB, PCGS# 9025

**1894 Liberty Head Twenty, MS64
Few Marks, Rich and Frosted Coloration**

4308 1894 MS64 PCGS. Brilliant cartwheel luster underpins the richly toned, thickly frosted surfaces of this near-Gem 1894 twenty. Attractive lime-green highlights and hints of pale-rose enrich the brilliant, sun-gold surfaces. A few scattered bagmarks are revealed with a lens, but they are mostly confined to the reverse. The strike is crisp and sharp at the borders, although a bit less-so at the centers. The eye appeal is terrific. Population: 157 in 64 (8 in 64+), 3 finer (10/17). NGC ID# 26CB, PCGS# 9025

**1894-S Twenty Dollar, MS62 Prooflike
Profound Field Mirroring**

4309 1894-S MS62 Prooflike NGC. NGC has certified 5,794 1894-S double eagles (including Details coins). Yet, only 34 of those have received a Prooflike designation, and one other was awarded a Deep Prooflike designation. This fully struck double eagle has deep orange-gold coloration and profound mirroring in the fields that should appeal to most anyone. Scattered marks explain the grade. Census: 12 in 62 Prooflike, 3 finer (10/17). NGC ID# 26CC, PCGS# 79026

4310 1895 MS64 PCGS. A sun-gold near-Gem double eagle with lively luster and terrific eye appeal as a result. Strike definition is complete. A couple notable marks occur on the portrait. The 1895 can be collected through near-Gem condition, but there are only a few finer pieces known. PCGS reports just five higher-graded submissions (10/17). NGC ID# 26CD, PCGS# 9027

4311 1895 MS64 PCGS. An amazing Choice Mint State 1895 double eagle, and extremely rare in finer grades, with only five numerically finer examples certified by PCGS (11/17). This piece features a bold strike and exhibits satiny, semi-reflective luster with a hint of cameo contrast on the obverse. NGC ID# 26CD, PCGS# 9027

4312 1895 MS61 Prooflike NGC. The 1895 Liberty double eagle is seldom encountered with the prooflike reflective surfaces seen on this impressive MS61 specimen. The design elements are sharply detailed and the yellow-gold surfaces show the expected number of minor contact marks for the grade. Census: 19 in 61 Prooflike, 31 finer (10/17). NGC ID# 26CD, PCGS# 79027

**1895-S Twenty Dollar, MS64
Rare Just One Grade Finer**

- 4313 1895-S MS64 NGC.** Limited marks and good luster combine to make this Choice Uncirculated 1895-S a worthy target for double eagle specialists. Pleasing orange-gold coloration displays olive-green overtones, while the smooth surfaces show only minor distractions. The strike is sharp throughout. This example has the usual Medium S mintmark perched high and to the right. Both services combined report less than two dozen numerically finer coins (10/17). NGC ID# 26CE, PCGS# 9028

- 4314 1896 Repunched Date, FS-301, MS63 NGC.** All date digits show broad repunching north, attributing *Cherrypickers'* variety FS-301. Glowing yellow-gold surfaces show accents of rose over the centers. Small marks appear on the cheek. Census: 32 in 63 (1 in 63★), 12 finer (10/17). NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

- 4315 1896 Repunched Date, FS-301, MS63 PCGS.** Remnants of the undertype date are visible to the north of all four primary digits. This attractive Select specimen is sharply detailed throughout, and the lightly marked orange-gold surfaces radiate vibrant mint luster. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

**1898 Double Eagle, MS63
Terrific Overall Quality**

- 4316 1898 MS63 PCGS.** The 1898 has a reputation for quality, and this glowing Select example lives up to it. A pinpoint-sharp impression is evident on each side, where thick mint frost emanates from peach-gold surfaces. There are luster grazes and flecks throughout but none of any import, save for a mark on the neck. A grease stain occurs left of the U in UNITED. PCGS has seen 20 higher-graded submissions (11/17). NGC ID# 26CK, PCGS# 9033

- 4317 1899 MS64+ PCGS. CAC.** A Plus-graded Choice example of this popular turn-of-the-century issue, with well-detailed design elements and an extensive network of faint peripheral die cracks on both sides. The vivid orange-gold surfaces are lightly marked, with vibrant mint luster throughout. PCGS has graded 32 numerically finer examples (11/17). NGC ID# 26CM, PCGS# 9035

- 4318 1899 MS64+ PCGS. CAC.** The 1899 Liberty double eagle is a popular Type Three issue, with special appeal because of its end-of-the-century date. This Plus-graded Choice example offers well-detailed devices and shows a number of faint die cracks on both sides. The well-preserved orange-gold surfaces radiate vibrant mint luster. NGC ID# 26CM, PCGS# 9035

- 4319 1899-S MS63+ PCGS.** A Plus-graded Select representative of this turn-of-the-century branch mint issue offers well-detailed design elements, with just a touch of softness on some star centers. The lightly marked orange-gold surfaces radiate vibrant mint luster throughout. NGC ID# 26CN, PCGS# 9036

- 4320 1900 MS64+ PCGS. CAC.** More than 1.8 million double eagles were manufactured at the Philadelphia Mint in 1900. This popular type coin is widely available through MS64 but is exceedingly scarce in higher grades. This is a warm, honey-gold near-Gem with crisp strike characteristics. Blatantly high-end for the grade. NGC ID# 26CP, PCGS# 9037

- 4321 1900 MS64+ PCGS. CAC.** The 1900 Liberty double eagle is a perennially popular issue and this Plus-graded Choice example offers sharply detailed design elements and lustrous orange-gold surfaces, with only minor signs of contact. NGC ID# 26CP, PCGS# 9037

- 4322 1900 MS64+ PCGS. CAC.** The 1900 Liberty double eagle is always popular because of the turn-of-the-century date. This Plus-graded Choice specimen is sharply detailed, with lustrous orange-gold surfaces that show only minor signs of contact. NGC ID# 26CP, PCGS# 9037

- 4323 1900 MS64+ PCGS. CAC.** A Plus-graded Choice example of this perennially popular Type Three issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. NGC ID# 26CP, PCGS# 9037

**1900-S Twenty Dollar, MS63
Attractive Patina**

- 4324 1900-S MS63 PCGS. CAC.** Liberty's curls are fully delineated on this lovely yellow and rose-gold double eagle with swirling mint frost. The stars and feathers are also well-struck. Clearly high-end and appealing for the grade. Housed in a green label holder. CAC: 20 in 63, 10 finer (10/17). NGC ID# 26CR, PCGS# 9038

- 4325 1901 MS64+ PCGS.** This Plus-graded Choice specimen exhibits sharp definition on the central design elements, but a touch of softness shows on some star centers. A faint die crack connects most of the stars on the left. The well-preserved orange-gold surfaces are lustrous and appealing. NGC ID# 26CS, PCGS# 9039

- 4326 1901-S MS63 PCGS.** A sharply detailed Select specimen of this popular late-series issue, with lightly marked orange-gold surfaces that show a few hints of lilac and especially vibrant mint luster. Eye appeal is outstanding. NGC ID# 26CT, PCGS# 9040

- 4327 1901-S MS63 NGC.** The 1901-S Liberty double eagle is a plentiful issue in MS63 condition, but finer coins are scarce. This sharply detailed yellow-gold specimen offers lightly marked surfaces, with vibrant mint luster and outstanding eye appeal. NGC has graded 72 numerically finer examples (10/17). NGC ID# 26CT, PCGS# 9040

**1902 Double Eagle, Undervalued MS62
Semikey 20th Century Issue**

- 4328 1902 MS62 NGC.** The low mintage of just 31,140 pieces puts the 1902 twenty in the same rarity category as the 1905 double eagles. Both issues are rare in MS63 and very rare any finer. This attractive MS62 example offers an optimal opportunity for collectors, with lustrous and frosted surfaces that show relatively few marks for the grade. The rich, yellow-gold surfaces are tinged with green, and the strike is sharp including the obverse star centers. A gathering of light abrasions above the date seemingly accounts for the assigned grade, since the eye appeal and overall surface quality suggest an even finer level. Census: 131 in 62, 18 finer (10/17). NGC ID# 26CU, PCGS# 9041

**1902 Double Eagle, MS62
Low Mintage**

- 4329 1902 MS62 PCGS.** At just 31,140 pieces, the mintage of the 1902 double eagle is the lowest in the series after the close of the low-production Carson City Mint in 1893. This Philadelphia coin is bright yellow-gold in color with sharp design elements. Light abrasions are mostly on the obverse, while the reverse is attractive and luminous. Finer examples are elusive. NGC ID# 26CU, PCGS# 9041

- 4330 1902-S MS63 PCGS.** The 1902-S Liberty double eagle is a plentiful issue in MS63 condition, but finer coins are scarce. This impressive MS62 specimen is sharply detailed and lightly marked, with lustrous orange-gold surfaces. NGC ID# 26CV, PCGS# 9042

- 4331 1905-S MS63 PCGS.** The pleasing orange-gold surfaces of this impressive Select specimen are lightly marked and both sides radiate vibrant mint luster. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 26D3, PCGS# 9048

- 4332 1905-S MS63 NGC.** An attractive Select example of this popular late-series issue, with well-detailed design elements and lustrous yellow-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 26D3, PCGS# 9048

- 4333 1905-S MS63 NGC.** The design elements of this attractive Type Three double eagle are sharply detailed throughout, and the well-preserved orange-gold surfaces display radiant cartwheel mint luster with outstanding eye appeal. NGC ID# 26D3, PCGS# 9048

**1906-D Twenty Dollar, MS63
Satin Orange-Gold Example**

- 4334 1906-D MS63 NGC.** Denver Mint officials were productive in their year striking double eagles. The facility accomplished a mintage of 620,250 coins. Production quality was high, and this Select offering shows a strong strike and radiant, satiny mint luster. Luster grazes and ticks prevent a higher grade. NGC ID# 26D5, PCGS# 9050

- 4335 1907 MS64+ PCGS.** A short mark on Liberty's jaw prevents a Gem designation, as this frosty wheat-gold 1907 Liberty Head twenty is otherwise devoid of bothersome abrasions. This final-year issue is available in MS64 for type purposes, but Plus-graded coins are in high demand due to the rarity of Gems. PCGS lists only 21 coins finer than this piece (10/17). NGC ID# 26D7, PCGS# 9052

**1907-D Double Eagle, Near-Gem
Gleaming Satin Mint Luster**

- 4336 1907-D MS64 NGC.** The second and final Liberty Head double eagle issue from the Denver Mint saw a production of 842,250 coins. The curls, stars, and eagle are crisply impressed and illuminated by gleaming satin mint luster. A couple of flecks on the cheek and thin grazes in the adjacent field define the Choice assessment. NGC ID# 26D8, PCGS# 9053

**1907-S Liberty Head Double Eagle
Frosty MS64**

- 4337 1907-S MS64 PCGS.** Although the 1907-S double eagle is moderately available in MS64, we offer coins in this grade less frequently than one might assume considering the certified population. A majority of these coins are PCGS-graded. This near-Gem displays a bold strike and frosty yellow-gold luster. Light chatter on Liberty's cheek is all that limits the grade. PCGS lists 14 finer examples (11/17). NGC ID# 26D9, PCGS# 9054

**1907-S Liberty Head Twenty, MS64
Very Rare in Better Condition**

- 4338 1907-S MS64 PCGS.** The final year of issue in the Liberty Head series saw more than 2.1 million double eagles struck at the San Francisco Mint. The 1907-S becomes a major rarity in higher grades. Vibrant frost shimmers across orange-gold surfaces with occasional rose accents. Razor-sharp, though some of the middle curls lack complete delineation. The PCGS *Population Report* shows 14 finer submissions (11/17). NGC ID# 26D9, PCGS# 9054

**1907-S Double Eagle, MS64
Beautiful Luster**

- 4339 1907-S MS64 NGC.** Although Saint-Gaudens' double eagle design was in production at Philadelphia in 1907, the branch mints were not issued the new dies until 1908. The 1907-S represents the last of the Liberty Head double eagles from San Francisco. This near-Gem example displays lovely, frosty luster and remarkably few abrasions. Orange-gold coloration is highly appealing. NGC lists only 19 Gems finer (11/17). NGC ID# 26D9, PCGS# 9054

**1907-S Twenty Dollar, MS64
Rarely Offered Finer**

- 4340 1907-S MS64 NGC.** This well-struck, frosty near-Gem displays lovely rose-gold luster. A singular mark on Liberty's cheek limits the grade. The 1907-S double eagle is available in this grade but rarely seen finer, with only 19 such pieces reported by NGC (11/17). In their gold coin *Encyclopedia*, Garrett and Guth write: "In choice condition, the 1907-S double eagle is the rarest of the three 1907 issues." NGC ID# 26D9, PCGS# 9054

**1907-S Liberty Twenty, MS64
Lustrous and Appealing**

- 4341 1907-S MS64 NGC.** The 1907-S is the scarcest of the final-year Liberty Head double eagles, although it is available to a certain extent in MS64 for type purposes. Gems are rarely offered, which heightens demand for coins such as the present. The strike is sharp, and frosty original mint luster displays lovely prairie-gold color. A small planchet depression on Liberty's cheek should not be mistaken for an abrasion. Only 19 coins are finer at NGC (11/17). NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

- 4342 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. Reportedly from a hoard of more than 1,000 1907 and 1908 No Motto twenties, this original-looking example is frosted with a few light ticks but sharply struck devices. Strong mint luster flows over Choice, greenish-gold surfaces. NGC ID# 26F5, PCGS# 9141
- 4343 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. Both sides of this greenish-gold No Motto twenty are smooth and relatively free of abrasions. A few marks on liberty's hair and above her shoulder are noted, although the forward leg is clear of all but the most minor ticks. The strike is sharp overall, with slight blending of the fingers on the torch hand. The mint luster is exceptionally strong. NGC ID# 26F5, PCGS# 9141
- 4344 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. The Capitol dome and windows are well-defined and a sharp strike covers the central motifs on both sides. A greenish tinge adds eye appeal to the yellow-gold surfaces. Choice Uncirculated 1907 No Motto twenties are readily available, but not all are as sharp as this impressive example. NGC ID# 26F5, PCGS# 9141
- 4345 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. Both the obverse and reverse show a few light abrasions and slight weakness at the torch top and fingers are noted, but the flashy surfaces and rich, straw-gold color create much eye appeal. Light field chatter is grade-appropriate for the Choice Uncirculated level. NGC ID# 26F5, PCGS# 9141
- 4346 1907 Arabic Numerals MS64 PCGS.** Ex: Rough Rider Hoard. Numerous No Motto twenties emerged from this hoard, many in Choice Uncirculated condition. This lustrous and frosted example displays flashy sun-gold surfaces with some tiny abrasions on Liberty's forward leg and on the eagle's top wing. Eye appeal is strong. NGC ID# 26F5, PCGS# 9141

**1907 Saint-Gaudens Double Eagle, MS65
First-Year Arabic Numerals Variant**

- 4347 1907 Arabic Numerals MS65 PCGS.** Although the High Relief design was produced in limited numbers the same year, this impressive Gem represents the first large scale production of Augustus Saint-Gaudens' iconic design for the double eagle. The design elements are sharply detailed and the pleasing orange-gold surfaces are particularly well-preserved. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 26F5, PCGS# 9141

**1907 Saint-Gaudens Twenty, MS65+
Arabic Numerals**

- 4348 1907 Arabic Numerals MS65+ PCGS.** This is the first year of issue for the Saint-Gaudens double eagles, and a two-year type that lacks the motto on the reverse. An exquisite Gem, this example has frosty and fully lustrous light yellow surfaces and lacks distracting marks of any sort. NGC ID# 26F5, PCGS# 9141
- 4349 1908 No Motto MS66 PCGS.** Ex: Wells Fargo Nevada Gold. Most of the 1908 No Motto double eagles in Premium Gem or finer grades come to collectors by way of the Wells Fargo hoard, an amazing accumulation of 19,900 Saint-Gaudens twenties, all dated 1908 from the No Motto dies. This frosted and well-struck example is housed in a previous generation green label holder representing its original certification from the hoard. A few small marks exist in the rays beneath the eagle. NGC ID# 26F6, PCGS# 9142
- 4350 1908-D No Motto MS64+ PCGS. CAC.** Long Rays Obverse. A crisply struck orange-gold representative of this briefly coined subtype. Much scarcer in high grades than the 1908 No Motto, and an excellent value relative to the cost of a full Gem. NGC ID# 26F7, PCGS# 9143

**1908 Double Eagle, MS64
First With Motto Issue**

- 4351 1908 Motto MS64 PCGS.** The 1908 Motto double eagle had a rather low mintage of 156,258 coins, and survivors are seldom found in Gem condition. This near-Gem has a sharp strike with brilliant yellow luster and delicate orange overtones. Both sides are frosty and attractive.
Ex: FUN Signature (Heritage, 1/2013), lot 3766. NGC ID# BNAK, PCGS# 9147

**1908-D Double Eagle, MS64
First With Motto Issue**

- 4352 1908-D Motto MS64 PCGS.** Long Rays on obverse. Finely grained fields and frosted mint luster give this lustrous and sharply struck 1908-D a crisp, Mint-fresh look. The strike is extra-sharp throughout both sides. Abrasions are few and well-spaced for visual appeal that exceeds the stated near-Gem grade level and, in fact, the coin will slip seamlessly into any fully Gem set. Lovely orange-gold color covers both sides. NGC ID# 26F9, PCGS# 9148
- 4353 1908-D Motto MS64 PCGS.** An impressive Choice example of this popular branch mint issue, from the first year of the Motto design. This coin exhibits well-detailed design elements, with just a touch of softness on the torch, and well-preserved orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 26F9, PCGS# 9148

**1908-D Double Eagle, MS65
First With Motto Issue**

- 4354 1908-D Motto MS65 PCGS.** The Denver Mint coined slightly over 1 million double eagles in 1908, and about one-third of those carried the motto IN GOD WE TRUST on the reverse. While frequently encountered at the Gem grade, finer examples are rare with only 37 PCGS certified examples in numerically finer grades (11/17). This splendid example has frosty and fully lustrous light yellow-gold surfaces with excellent eye appeal. NGC ID# 26F9, PCGS# 9148

4355 1909/8 FS-301 MS61 PCGS. An impressive MS61 specimen of this popular *Guide Book* variety, with well-detailed design elements and lustrous green and orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

1909/8 Double Eagle, MS62 A Highly Prized Variety

4356 1909/8 FS-301 MS62 PCGS. There are only two overdate varieties in the entire 20th century U.S. gold series, the 1901/0-S half eagle, and this 1909/8 double eagle. Specialists highly prize both varieties. The total production of Philadelphia Mint double eagles in 1909 was limited to 161,282 coins, and that total was about equally divided between the normal 1909 twenties, and the overdate coins. This pleasing light yellow example exhibits slight weakness on the high points that is masked under dark patina, with scattered marks as expected for the grade. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

4357 1909 MS63 PCGS. Struck from regular (non-overdated) dies, this brilliant, yellow-gold example is highly lustrous with great eye appeal. A few light marks exist across the finely textured, flashy surfaces, but no heavy abrasions need mention. Slight weakness at the torch flame and fingers does not detract from the overall crisp strike, with only minor incompleteness at the Capitol dome. NGC ID# 26FC, PCGS# 9150

1909-D Double Eagle, MS62 Elusive Low-Mintage Issue

4358 1909-D MS62 PCGS. With a total production of only 52,500 coins, the 1909-D had the lowest double eagle mintage of the year, and the fourth lowest mintage of the Saint-Gaudens series. This issue is rarely encountered in any grade with at total PCGS population of only 774 coins (11/17), an impressively small quantity given the more than 980,000 Saint-Gaudens double eagles that service has examined. Only 14 issues have a lower total population at PCGS. Only a few small marks appear on the satin surfaces of this attractive yellow double eagle. NGC ID# 26FD, PCGS# 9152

4359 1910-D MS65 PCGS. Sharply struck with minimal abrasions or marks, the honey-gold surfaces of this Gem 1910-D offer few distractions. The figure of Liberty is particularly sharp and unabraded. A few tiny marks on the eagle can be found with diligence and a strong lens. This Denver issue is scarce any finer. NGC ID# 26FG, PCGS# 9155

4360 1910-D MS65 PCGS. Fiery sun-glow-orange color frames lemon-gold centers of this dazzling Gem 1910-D. The issue rivals the 1923-D for the most attractive Denver Mint twenty, since both dates offer equally impressive production quality. With a mintage that is one-fourth that of the '23-D, the 1910-D is measurably more challenging in high grades, such as this sharply struck, minimally marked MS65 example. NGC ID# 26FG, PCGS# 9155

4361 1910-S MS64 PCGS. Four different mintmark sizes were used on the 1910-S — two Large S, one Medium S, and a Small S. The tight, compact mintmark on this example is the Small S variety. This is a crisply struck, orange-gold example with a few light marks across the Choice, lustrous and frosted surfaces. NGC ID# 26FH, PCGS# 9156

4362 1910-S MS64 PCGS. The strike is sharp throughout both sides of this near-Gem 1910-S double eagle. A few small abrasions beneath the branch are the sole marks to mention, and perhaps keep this attractive San Francisco wheat-gold twenty from an even finer grade. Strong eye appeal remains. NGC ID# 26FH, PCGS# 9156

1911 Double Eagle, MS64 Conditionally Elusive

4363 1911 MS64 PCGS. The 1911 is a lower mintage issue from a production of 197,250 coins that is elusive in higher Mint State grades. While Choice Mint State pieces such as this example are occasionally encountered, finer pieces are extremely hard to locate. PCGS has only certified 71 examples in higher numerical grades (11/17). This splendid representative has no distracting marks on its frosty and highly lustrous yellow surfaces. NGC ID# 26FK, PCGS# 9157

1911-D Double Eagle, MS66 Extremely Rare in Finer Grades

4364 1911-D MS66 PCGS. Although the 1911-D is plentiful in all Mint State grades through MS66, it is rarely encountered in finer grades, with just seven better examples certified at PCGS in more than 30 years (10/17). This gorgeous example features a bold strike, highly lustrous surfaces, and lovely orange-gold brilliance. NGC ID# 26FK, PCGS# 9158

4365 1911-D/D FS-501 MS65 PCGS. The mintmark is widely doubled, with the initial impression well east of the primary mark. This wheat-gold Gem shows few marks or abrasions and the strike is sharp. Liberty's face is fully struck and unmarked. The 1911-D/D is one of the most dramatic mintmark doublings of the Saint-Gaudens series — a popular *Cherrypickers'* variety, especially in MS65 grade. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1911-D/D Twenty Dollar, MS66
FS-501, Remarkably Clean**

4366 1911-D/D FS-501 MS66 PCGS. The D mintmark displays broad repunching. The doubled mintmark is one of the few interesting and collectible varieties in the Saint-Gaudens double eagle series, though premiums are small, especially when the coin is found this fine. A single tick occurs above the third ray from the left, leaving the rest of the obverse and much of the reverse virtually unmarked. This glowing Premium Gem is needle-sharp and eminently appealing. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

4367 1911-S MS64+ PCGS. CAC. Locating a high-end, minimally abraded example of the 1911-S with good eye appeal can be surprisingly difficult. This near-Gem has luminous orange-gold surfaces and well-struck relief elements. Small marks occur within the design features but are largely unseen in the fields. NGC ID# 26FL, PCGS# 9159

1911-S Double Eagle, MS65

4368 1911-S MS65 PCGS. This is an important condition rarity, frequently available in MS65, but elusive in any finer grades, with only 43 higher grade pieces certified by PCGS (11/17). This example has a hint of rose toning on its frosty yellow-gold surfaces, resulting in exceptional aesthetic appeal. NGC ID# 26FL, PCGS# 9159

**1911-S Saint-Gaudens Double Eagle, MS65
Outstanding Branch Mint Type Coin**

4369 1911-S MS65 PCGS. This Gem 1911-S excels both in eye appeal and surface quality. Fine-grained and sharply struck, the issue characteristically displays vibrant mint luster across sun-gold fields and crisp devices. The present example has only a few incidental marks, none of which are of any consequence. The strike is uniformly sharp across both sides. PCGS reports just 43 numerically finer coins (11/17). NGC ID# 26FL, PCGS# 9159

1913 Saint-Gaudens Twenty, MS64

4370 1913 MS64 PCGS. An important issue, one of the series of scarce P-Mint double eagles from 1909 to 1915. This choice Mint State specimen has satiny yellow luster and sharp design elements with pristine surfaces. Available without undue difficulty at this grade level, but virtually impossible any finer. PCGS has only certified 15 finer submissions (10/17).

Ex: FUN Signature (Heritage, 1/2011), lot 7493; Beverly Hills Signature (Heritage, 11/2011). NGC ID# 26FN, PCGS# 9161

4371 1913-D MS64 PCGS. Vibrant mint luster shines from rich, orange-gold surfaces of this sharply struck, Choice Uncirculated Denver double eagle. Lilac accents encircle the obverse, which shows a few tiny ticks but no heavy marks or abrasions. The strike is consistently sharp on both sides. Despite a reasonably preserved mintage of 393,500 pieces, Gem representatives are elusive, adding to the appeal of this near-Gem example. NGC ID# 26FP, PCGS# 9162

**1913-S Twenty Dollar, MS62
Popular Low-Mintage Issue**

4372 1913-S MS62 PCGS. CAC. The 1913-S twenties are scarce by demand rather than by sheer numbers, despite a low mintage of just 34,000 pieces. Its popularity coincides more closely with its certified population at each successive grade level, since it is scarce in an absolute sense in mid-to-higher Uncirculated grades. This CAC-endorsed MS62 is an ideal entry point for many collectors. Surface quality is good with few abrasions and lustrous, medium green-gold color. The strike is bold for the issue. CAC: 21 in 62, 100 finer (11/17). NGC ID# 26FR, PCGS# 9163

**1913-S Double Eagle, MS63
Low-Mintage San Francisco Issue**

4373 1913-S MS63 NGC. Just 34,000 pieces were struck of this low-mintage San Francisco issue, although Mint State survivors exist in adequate numbers despite the limited production. This is a frosted, fully lustrous Select Uncirculated example, with some high-point gray toning that visits the medium-gold surfaces. The strike is quite sharp for the issue, although the Capitol dome shows some typical loss of definition. NGC ID# 26FR, PCGS# 9163

**1914 Double Eagle, MS63
Low-Mintage Issue**

- 4374 1914 MS63 PCGS. CAC.** The Philadelphia Mint coined 95,250 double eagles in 1914, the sixth lowest production in the Saint-Gaudens double eagle series. This example that is housed in a green-label PCGS holder has lovely satin luster and minimal, microscopic marks on its pleasing yellow-gold surfaces. NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64
Few Coins Graded Higher**

- 4375 1914 MS64 PCGS.** The PCGS *Population Report* confirms the rarity of the 1914 double eagle in high grades, showing merely 44 submissions in MS65 or above (11/17). This is a more affordable alternative with brightly lustrous surfaces and good detail on the relief elements. Varying shades of light yellow and orange-gold color each side. A gouge occurs above Liberty's head with silver-colored residue that has rubbed off on the surrounding areas. NGC ID# 26FS, PCGS# 9164

**1914 Saint-Gaudens Twenty, MS64+
Low-Mintage Early Series Issue**

- 4376 1914 MS64+ PCGS. CAC.** From a small mintage of 95,250 pieces, the 1914 Saint-Gaudens double eagle can be located in MS64 condition with a little patience, but finer coins are very scarce. This Plus-graded Choice example is a good balance of quality and value, with sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show minimal signs of contact. PCGS has graded 44 numerically finer examples (10/17). NGC ID# 26FS, PCGS# 9164

- 4377 1914-D MS65 PCGS.** Although the 1914-D is relatively available through the MS65 level, few examples have the Mint-fresh luster and frosted, sun-gold eye appeal of this sharply struck twenty. The issue is scarce a mere grade point finer, making the Gem level the optimal collecting grade for this Denver double eagle. PCGS reports just 76 numerically finer pieces (10/17). NGC ID# 26FT, PCGS# 9165

- 4378 1914-S MS65 PCGS.** Minted in large quantity (nearly 1.5 million pieces struck), the 1914-S is not always well-produced. This finely grained example stands out not only for its exuberant mint luster, but for its lack of bagmarks or other abrasions. Orange-gold overtones hold sway over vibrant, medium-gold surfaces. The strike is noticeably sharp on Liberty and the major design elements. NGC ID# 82KA, PCGS# 9166

- 4379 1915-S MS65 PCGS. CAC.** More satiny than frosted, the vibrant medium-gold surfaces display a characteristically sharp strike that many 1915-S double eagles possess. Unlike most other examples of the issue, marks and abrasions are nearly nonexistent on the smooth, high-quality fields and devices. Fleeting rose and olive accents add eye appeal to this CAC-endorsed Gem twenty. NGC ID# 26FW, PCGS# 9168

**1915-S Double Eagle, Strong MS66+
Only Two Coins Finer**

- 4380 1915-S MS66+ NGC.** The strike is exceptionally strong throughout this top-quality San Francisco double eagle. Radiant mint frost rolls over surfaces that show profound orange-gold coloration. A few splashes of lighter rose color accent the centers. NGC has certified only two finer submissions (11/17). NGC ID# 26FW, PCGS# 9168

**1916-S Double Eagle, MS65
Final Issue of the Decade**

- 4381 1916-S MS65 PCGS.** Aside from a small number of commemorative gold dollars coined at Philadelphia in 1916 and 1917, there were no gold emissions struck east of California in 1916, and none anywhere in the country from 1917 through 1919 as the United States was involved in World War I. This Gem, housed in a green-label PCGS holder, exhibits exceptional eye appeal and frosty light yellow luster. NGC ID# 34NJ, PCGS# 9169

**1920 Saint-Gaudens Twenty, MS64
Very Rare Any Finer**

- 4382 1920 MS64 NGC.** Fewer than a dozen coins have achieved the full Gem level, making MS64 examples the go-to grade for advanced collectors needing a sharp 1920 twenty. This smoothly lustrous near-Gem offers high surface quality and eye appeal, coupled with a sharp strike. Scattered light marks and abrasions require magnification to view. Choice orange-gold color of medium intensity radiates plentiful eye appeal. NGC has certified just eight numerically finer examples (11/17). NGC ID# 26FY, PCGS# 9170

**1920 Double Eagle, MS64
Extremely Important Conditional Rarity**

- 4383 1920 MS64 PCGS.** Although quite a number of 1920 Saint-Gaudens double eagles have earned the MS64 grade at PCGS, only one finer example has ever been submitted to that grading service (10/17). While this issue is considered a common date in lower Mint State grades, the Mint only coined 228,250 examples. This piece is highly lustrous and shows only trivial, grade-consistent marks on its fully brilliant yellow surfaces. NGC ID# 26FY, PCGS# 9170
- 4384 1922 MS64 NGC.** VP-002. NGC has certified this coin with their Variety Plus designation VP-002. Some light doubling is evident on the date and some right-side stars are tripled. This sharply detailed Choice specimen displays lustrous orange-gold surfaces with minimal signs of contact. NGC ID# 26G3, PCGS# 9173

1922-S Twenty Dollar, Semiprooflike MS63

- 4385 1922-S MS63 PCGS.** The Saint-Gaudens double eagle is rarely encountered with semiprooflike surfaces, but the present better date example is uncommonly flashy for the type, particularly on the obverse. This pumpkin-gold piece is lustrous and has only a few minor marks near the stem of the branch. A good strike save for softness on the Capitol building. NGC ID# 26G4, PCGS# 9174

1922-S Double Eagle, MS63+

- 4386 1922-S MS63+ PCGS. CAC.** The Saint-Gaudens double eagles from 1922 through 1928 are all plentiful if they were struck in Philadelphia, and rare if they were struck in Denver or San Francisco. The only exception to that rule is the scarce 1922-S and the common 1923-D. This piece is a lovely Select Mint State representative with frosty yellow-gold luster and considerable eye appeal. The reverse is rotated a few degrees clockwise. NGC ID# 26G4, PCGS# 9174

- 4387 1923 MS64+ PCGS.** Attractive honey-gold color is strongly lustrous and the central elements of this radiant 1923 are particularly sharp. Slight weakness at the peripheries affects the Capitol building and some of the adjacent stars, which are incompletely brought up. The reverse is razor-sharp, and both sides are free of all but the most trivial marks. A high-end near-Gem, as indicated by the PCGS Plus designation. NGC ID# 26G5, PCGS# 9175

- 4388 1923 MS64+ PCGS. CAC.** This high-end near-Gem is well-struck on the torch and Capitol, and the satiny surfaces display attractive rose-gold luster. Only a few light marks on the devices limit the grade. Although readily available below MS65, the 1923 Saint-Gaudens double eagle is scarce in near-Gem condition with the CAC green label offered here. NGC ID# 26G5, PCGS# 9175

**1923 Twenty Dollar, MS65
Rare Any Finer**

- 4389 1923 MS65 PCGS.** Frosty original luster displays rich rose-gold and peach-orange hues throughout the thick "skin" of this Gem 1923 Saint. The strike is bold, and Liberty's figure shows only a few high-point marks. An unobtrusive coppery alloy spot appears near the obverse rim at 9 o'clock, and a few other tiny ones are seen in the eagle's feathers. PCGS reports just four numerically finer representatives (11/17). NGC ID# 26G5, PCGS# 9175

**1923-D Twenty, MS66
Popular Denver Issue**

4390 1923-D MS66 PCGS. An impressive Premium Gem, this Denver Mint issue is elusive in higher grades with only 76 finer PCGS certified pieces identified (11/17). This lovely piece has a sharp strike with satiny light yellow surfaces and delicate rose overtones. This Denver issue is the only plentiful branch mint twenty of the decade. NGC ID# 26G6, PCGS# 9176

4391 1924 MS66 PCGS. A beautifully preserved Saint-Gaudens type coin, showing not only clean fields but also remarkably unabraded central devices. The strike is sharp, and eye appeal surpasses that of many other Premium Gem Saints that we have seen. Housed in a green label holder. NGC ID# 26G7, PCGS# 9177

4392 1924 MS66 PCGS. With nearly 15,000 combined certifications by PCGS and NGC, the 1924 twenties are immensely popular for type and for high-end gold specialists. This Premium Gem example leaves nothing to be desired, with lustrous, frosted surfaces and a needle-sharp strike. Liberty's portrait is nearly unmarked, as are the smooth surrounding fields and outer devices. Hints of rose embellish gleaming, sun-gold color across both sides. NGC ID# 26G7, PCGS# 9177

4393 1924 MS66+ NGC. A Plus-graded Premium Gem specimen of this perennially popular type issue, with sharply detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster throughout. NGC ID# 26G7, PCGS# 9177

4394 1925 MS66 PCGS. Radiant cartwheel luster abounds on each side of this near-pristine Premium Gem 1925 double eagle, one of the most plentiful issues in the series in such a grade. A small mark in the left obverse field is among few distractions on this lovely piece, exhibiting deep reddish-orange patina. NGC ID# 26GA, PCGS# 9180

1925 Double Eagle, Smooth MS66

4395 1925 MS66 PCGS. CAC. The 1925 Saint-Gaudens double eagle may be widely accessible in Premium Gem condition, but it is rarely offered in MS66 with CAC approval and finer examples in MS67 are very rare, commanding well-over five figures. This is a smooth, thickly frosted twenty with a crisp strike and unimprovable eye appeal. Seven finer examples at PCGS (11/17). NGC ID# 26GA, PCGS# 9180

4396 1926 MS66 PCGS. The 1926 Saint-Gaudens double eagle is plentiful through MS66, but PCGS lists only five submissions finer than this level (10/17). Here is a satiny orange-gold type coin with sharp design elements and exemplary preservation. The originality of the surfaces is unquestioned. NGC ID# 26GD, PCGS# 9183

4397 1926 MS66 PCGS. While Premium Gem examples of the 1926 are somewhat available, numerically finer coins are great rarities. This eye-catching MS66 approaches a finer grade, with satin-smooth, nearly unmarked fields and outstanding, variegated coloration. Vibrant orange and lilac accents enliven blond-gold shades. A solitary mark in the eagle's upper wing is short and shallow, a minor consideration given the overall quality of this double eagle. NGC ID# 26GD, PCGS# 9183

4398 1926 Tripled Die Obverse, FS-101, MS64 PCGS. Tripling is evident on the date, rays, and monogram. This attractive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 26GD, PCGS# 145744 Base PCGS# 9183

4399 1927 MS66 PCGS. An incredible Premium Gem, this lovely Saint-Gaudens double eagle has delightful luster with hints of pink and greenish patina. The 1927 is rarely found finer, with only 22 better PCGS certified examples (10/17). NGC ID# 26GG, PCGS# 9186

1927 Double Eagle, MS66+

4400 1927 MS66+ PCGS. Although PCGS has certified a large number of Premium Gem 1927 double eagles, they have only certified 179 submissions in MS66+, and just 22 finer pieces (11/17). This example, with its frosty yellow-gold luster and sharp design elements has outstanding eye appeal. NGC ID# 26GG, PCGS# 9186

**1928 Double Eagle, MS66
Rarely Certified Finer**

4401 1928 MS66 PCGS. Although a large number of 1928 double eagles are certified at this grade level, numerically finer examples are few and far between, with only 93 Superb Gems graded by PCGS (11/17). This example has exceptional eye appeal with hints of coppery toning on its frosty yellow surfaces. NGC ID# 34VK, PCGS# 9189

TERRITORIAL GOLD

1852 Humbert Ten Dollar, AU Details K-10a, Favorite Gold Rush Issue

- 4402** 1852 Humbert Ten Dollar — Repair — NGC Details. AU. K-10a, Low R.4. A small depression near the neck and an area of smoothing on the shield may represent the repair noted on the holder, although surface granularity blurs most of the design elements. The effect is similar to several shipwreck coins we have seen of the Kagin-10 and 10a varieties, but there is no such information on the holder. Struck from an advanced die state with strong die cracks on the obverse, including one that reshapes the U in UNITED to look like I I. Rim crumble eliminates most of the dentils. This coin remains a collectible Gold Rush memento from the days when assayer Augustus Humbert was the nominal leader of the U.S. Assay Office. Listed on page 397 of the 2018 *Guide Book*.

1860 Clark, Gruber Ten Copper Die Trial K-3, Choice VF

- 4403** 1860 Clark, Gruber \$10 Copper Die Trial, K-3, Low R.7, VF35 PCGS. The dies for this copper trial were engraved by a Philadelphia die sinker who had never seen Pikes Peak, resulting in a triangular mountain that looked nothing like the real landscape. The copper die trials are rare. This Choice VF example is evenly worn with medium chocolate-brown color. Under a loupe, several ancient, linear marks are visible horizontally across the mountain. NGC ID# ANLE, PCGS# 10145

1861 Clark, Gruber Quarter Eagle, Unc Details Copper Die Trial, K-9

- 4404** 1861 Clark, Gruber \$2 1/2 Copper Die Trial, K-9, R.7 — Polished — NGC Details. Unc. The 1861 quarter eagle die trials are known in two varieties, those struck without without a collar (K-9) and those struck in a collar (K-9a). This attractive K-9 specimen exhibits strong striking details with complete hair curls and feathers on the eagle. The surfaces are a pleasing yellow-gold over most of each side, but there are a couple of bluish-gray stains in the obverse fields and some blue outlines around the reverse devices.

CALIFORNIA FRACTIONAL GOLD

1854 Liberty Octagonal Dollar, AU58 Eagle Reverse, BG-504

- 4405** 1854 Liberty Octagonal Dollar, Eagle, BG-504, Low R.5, AU58 PCGS. Die State III, with a reverse die crack from the rim, through the left star and on to the scroll. The BG-504 is a scarce issue that is seldom encountered in Mint State. The present coin is an impressive near-Mint specimen, with semiprooflike fields and just a trace of wear on the well-detailed design elements. The reverse of this design is an obvious borrowing from the Humbert-Assay Office fifty dollar slugs of 1851 and 1852, adding to its popularity. Population: 10 in 58, 23 finer (10/17). NGC ID# 2BKZ, PCGS# 10481

- 4406** 1870 Liberty Round 25 Cents, BG-808, R.3, MS67 PCGS. Although the BG-808 variety is plentiful, Superb Gem examples are elusive, and no finer pieces have been certified by PCGS. This diminutive gold coin has immense eye appeal with brilliant yellow luster. Satiny fields envelop the lustrous devices. Population: 7 in 67 (2 in 67+), 0 finer (10/17). NGC ID# 2BSW, PCGS# 10669

1871 Round Liberty Dollar, MS63 Prooflike BG-1204, Tied for Finest Certified

- 4407** 1871 Liberty Round 1 Dollar, BG-1204, High R.5, MS63 Prooflike NGC. This impressive Select specimen is tied with one other coin at NGC for finest certified honors (10/17). The design elements are well-detailed, with a touch of the always seen softness on the centers. The lightly marked orange-gold surfaces exhibit prooflike reflectivity in the fields and eye appeal is quite strong. Census: 2 in 63 Prooflike, 0 finer (10/17). NGC ID# 2C43, PCGS# 710949

- 4408** 1872 Indian Round 1 Dollar, BG-1207, R.4, AU58 PCGS. A collectible Period Two round dollar by Christopher Mohrig of San Francisco. This near-Mint coin shows olive-gold color and smooth prooflike fields. The strike is bold and only light high-point friction is observed. The reverse orientation is coin-turn. NGC ID# 2C46, PCGS# 10952

COMMEMORATIVE SILVER

- 4409** 1937 Antietam MS67+ PCGS. CAC. The Antietam half dollar is one of the few Civil War-related commemorative half dollar issues, along with the Lincoln-Illinois half dollar, the Grant half dollar and gold dollar, the Stone Mountain half dollar, and the Gettysburg half dollar. A touch of gold visits the obverse border of this brilliant and highly lustrous Superb Gem. NGC ID# BYF4, PCGS# 9229

- 4410** 1935-S Arkansas MS67 PCGS. A ring of crimson and gold patina around the rims accents frosty interiors with pale pastel hues. This Superb Gem is strongly detailed and devoid of any significant imperfections. Population: 27 in 67 (3 in 67+), 0 finer (10/17). NGC ID# BYF7, PCGS# 9235

4411 1938 Arkansas MS66 PCGS. CAC. The 3,156-coin distribution of the 1938 Arkansas Centennial half dollar was in three-coin sets with examples of the two branch mint issues. Premium Gem survivors are scarce, and this issue is genuinely rare any finer. This satiny MS66 coin displays full detail and a hint of light golden toning that complements clean surfaces. PCGS lists 16 higher-grade coins (10/17). NGC ID# BYFE, PCGS# 9245

4412 1935/34 Boone PDS Set MS67 NGC. This well-preserved trio includes: **1935/34 MS67 NGC**, lavender-gold across the interiors with crimson and russet border toning on the reverse; **1935/34-D MS67 NGC**, satiny and sharp with consistent light golden toning and no abrasions; **1935/34-S MS67 NGC**, similar in appearance to the Denver coin but with tinges of deep russet at the outer reverse periphery. The coins are individually holdered with consecutive serial numbers. (Total: 3 coins)

4413 1938 Boone PDS Set MS65 to MS66 NGC. CAC. The well-matched set includes: **1938 MS66 NGC CAC**, sharp and satiny with intermingled lavender, gold, and amber-orange toning; **1938-D MS66 NGC CAC**, similar in appearance to the Philadelphia coin but with even sharper reverse definition; **1938-S MS65 NGC CAC**, boldly defined and satiny with more golden toning than lavender. The coins are individually holdered with consecutive serial numbers. (Total: 3 coins)

4414 1925-S California MS67 NGC. A pinpoint freckling of almond-gold toning visits both sides of this lustrous, sharply struck California Diamond Jubilee half. The folds of the miner's shirt and the grizzly bear's shoulder are well-defined. Silver luster shines across the Superb Gem surfaces. NGC reports just 15 numerically finer examples (11/17). NGC ID# BYGA, PCGS# 9281

4415 1893 Columbian MS66+ PCGS. CAC. All the hallmarks of an originally preserved Columbian half dollar are present throughout this gorgeous Premium Gem, including soft mint luster and delicate ice-blue, violet, and gold patina from the edges inward. Fully struck and rarely found finer. NGC ID# BYGG, PCGS# 9297

1893 Columbian Half Dollar, MS67 Great Original Color

4416 1893 Columbian MS67 PCGS. Dusky gray centers merge with multicolor tones around the borders, including shades of cobalt-blue, magenta, gold, and sea-green. The fields are devoid of major marks, and strike detail is pinpoint-sharp. This Superb Gem is among the finest second-year commemorative survivors at PCGS. Population: 34 in 67 (3 in 67+), 0 finer (10/17). NGC ID# BYGG, PCGS# 9297

4417 1936 Elgin MS67 PCGS. CAC. The half dollar commemorating the centennial of the founding of Elgin, Illinois, is famous for its typically frosted luster and exemplary eye appeal. This CAC-approved Superb Gem delivers on both of those characteristics and also showcases beautiful multicolor tab toning on the obverse with dusky gold on the reverse. PCGS lists only seven finer submissions (10/17). NGC ID# BYGL, PCGS# 9303

4418 1918 Lincoln MS67 PCGS. The most famous statesman of Illinois, Abraham Lincoln, is featured on the obverse of this half dollar that marks the states centennial. This Superb Gem has frosty and essentially untuned silver surfaces. PCGS has only certified three finer examples (11/17). NGC ID# BYGU, PCGS# 9320

1936 Long Island Half, MS67+ Tied for Finest at PCGS

4419 1936 Long Island MS67+ PCGS. CAC. Distinctively tab-toned from its original holder, this high-end Superb Gem example of the Long Island Tercentenary half dollar celebrates the Dutch heritage of Long Island. The conjoined portraits of a Dutch settler and an Algonquin Indian are frost-white and nearly entirely free of marks (highly unusual for this carelessly produced issue). Iridescent colors lurk behind tobacco-brown toning on the obverse, while the Dutch sailing vessel on the reverse is immersed in rainbow hues. None are certified finer at PCGS. Population: 9 in 67+, 0 finer. CAC: 60 in 67, 0 finer (10/17). NGC ID# BYGX, PCGS# 9322

4420 1936 Lynchburg MS67 PCGS. CAC. The Lynchburg, Virginia, Sesquicentennial half dollar is elusive in MS67 and extremely rare finer with only one such piece at PCGS (10/17). This CAC-endorsed Superb Gem displays bold design sharpness and satiny, iridescently toned mint luster. No abrasions are seen. NGC ID# BYDJ, PCGS# 9324

4421 1921 Missouri MS65 PCGS. CAC. This satiny Gem displays sharp devices and only a few high-point contact marks. The central obverse and most of the reverse display warm champagne toning. Deep russet, gold, and crimson color surrounds the obverse border. Fewer than 100 finer examples are reported at PCGS and NGC combined. CAC: 57 in 65, 10 finer (10/17). NGC ID# BYH2, PCGS# 9330

1938 New Rochelle Half Dollar Lightly Toned, MS67+

4422 1938 New Rochelle MS67+ PCGS. CAC. Only 15,266 New Rochelle half dollars were distributed, unsurprising considering the issue's highly specific subject matter. Today, examples are collectible through MS67, but high-end Superb Gems are elusive and there are only a few finer MS68 examples available. Dusky powder-blue, lavender-gray, and golden patina lightly blankets near-pristine surfaces. Excellent visual appeal. NGC ID# BYDX, PCGS# 9335

4423 1938 Oregon PDS Set MS65 to MS67 NGC. This well-matched set includes: **1938 MS65 NGC CAC**, sharply struck with champagne-gray interiors and sun-gold borders, showing only a couple of marks in the Indian's knee; **1938-D MS67 NGC**, toned similarly to the Philadelphia coin but slightly weak in strike on the rear of the wagon; **1938-S MS67 NGC CAC**, as sharp as the Philadelphia coin and as pristine as the Denver coin with matching coloration. In individual holders with consecutive serial numbers. (Total: 3 coins)

4424 1939 Oregon PDS Set MS66 NGC. CAC. Includes three high-end coins: 1939 MS66 NGC CAC, satiny, sharp, and cast in delicate champagne toning with no mentionable abrasions; 1939-D MS66 NGC CAC, an above-average strike and warm golden toning make this piece highly attractive; 1939-S MS66 NGC CAC, similarly toned and sharp as the Philadelphia and Denver coins with nearly pristine surfaces. Housed in individual holders with consecutive serial numbers. (Total: 3 coins)

4425 1939 Oregon PDS Set MS66 to MS67 NGC. CAC. The satiny trio includes: 1939 MS66 NGC CAC, razor-sharp and lightly toned in golden hues; 1939-D MS67 NGC CAC, virtually perfect preservation with silvery interiors and olive-gold borders; 1939-S MS66 NGC CAC, sharply struck and finer than many other Premium Gems that we have seen, showing similar toning to the Denver coin. Individually slabbed with consecutive serial numbers. (Total: 3 coins)

4426 1939 Oregon PDS Set MS67 NGC. The set includes three high-end coins in prior generation holders with near-consecutive serial numbers: 1939 MS67 NGC, fully struck and toned golden, with occasional glimpses of russet at the outer peripheries; 1939-D MS67 NGC, well-struck and satiny with light golden color; 1939-S MS67 NGC, virtually as sharp as the Philadelphia coin and softly frosted with a hint of iridescence. (Total: 3 coins)

4427 1915-S Panama-Pacific MS65 PCGS. The richly toned obverse displays earthy colors of gunmetal-blue, russet-red, and forest-green with golden accents at the borders, while the reverse is brilliant at the centers with reddish-tan and blue at the borders. A crisply struck Gem half from Farran Zerbe's Panama-Pacific International Exposition, housed in a rare, early generation PCGS doily label holder (11/17). NGC ID# BYHP, PCGS# 9357

4428 1915-S/S Panama-Pacific, FS-501, MS66 PCGS. The serif of an errant S is visible to the right of the primary mintmark. Although PCGS has attributed only 13 examples of this *Cherry-pickers'* variety, the Repunched Mintmark is readily collectible and an important part of an advanced classic commemorative collection. This Premium Gem displays sharp detail and satin luster. Lavender-gray interiors cede to olive-green and gold border toning. NGC ID# BYHP, PCGS# 145748 Base PCGS# 9357

4429 1936-D Rhode Island MS67 PCGS. CAC. Ex: Paul Denby. The Rhode Island half dollar commemorates the 300th anniversary of the founding of Providence, even though the city is not mentioned on the coin. This Superb Gem is conditionally scarce, and finer examples are extremely rare. Satiny surfaces show no abrasions and have multicolor toning that appears in concentric rings from rim to center. Population: 75 in 67 (5 in 67+), 1 finer. CAC: 30 in 67, 0 finer (10/17). NGC ID# BYHU, PCGS# 9364

1926 Sesquicentennial Half Dollar, MS65+ Peripheral Iridescence

4430 1926 Sesquicentennial MS65+ PCGS. CAC. This satiny Gem exhibits delicate peripheral iridescence at the right side of the obverse and at the right side of the reverse. The Sesquicentennial half dollars are known for light strikes, but this one is a pleasant exception to the rule. PCGS has only certified 10 finer pieces (11/17). NGC ID# BYJ4, PCGS# 9374

4431 1935 Spanish Trail MS67+ PCGS. A total of 10,000 coins were distributed to collectors and dealers (eight more were used for assay purposes). This Plus-graded Superb Gem approaches the finest survivors. Pristine surfaces are satiny, devoid of both color and marks. Only three finer submissions at PCGS (10/17). NGC ID# BYJ5, PCGS# 9376

4432 1935 Texas PDS Set MS65 to MS67 NGC. CAC. A uniformly sharp and frosty set, including: 1935 MS67 NGC CAC, exemplary sharpness and preservation with delicate champagne toning; 1935-D MS67 NGC CAC, glistening mint frosty and sharp design elements complement brilliant interiors with a frame of golden peripheral toning; 1935-S MS65 NGC CAC, attractive with warm rose-gold toning and a few unobtrusive marks. Individually holdered with consecutive serial numbers. (Total: 3 coins)

4433 1937 Texas PDS Set MS66 to MS67 NGC. CAC. The toned set includes: 1937 MS67 NGC CAC, satiny with light golden interiors and amber margins; 1937-D MS66 NGC CAC, a well-struck, softly frosted coin with splashes of amber-gold and orange toning on each side; 1937-S MS66 NGC CAC, champagne-tinted in the centers with multicolor border hues. Individually slabbed with consecutive serial numbers. (Total: 3 coins)

1937 Texas Half Dollar, MS68 Lone Star Commemorative

4434 1937 Texas MS68 NGC. A stunning representative of the Texas Centennial half dollar series featuring an eagle and Lone Star motif on the obverse, representing the independence of Texas. The proper date for the centennial was 1936, but the coins were issued from 1934 through 1938. Only 6,571 examples of this issue were distributed, and this Superb Gem with its satin luster and lovely iridescent toning is tied for the finest certified. Census: 7 in 68, 0 finer (10/17). NGC ID# BYJH, PCGS# 9390

4435 1946 Booker T. Washington PDS Set MS67 PCGS. CAC. A three-coin set, all pieces identically graded. The Philadelphia Mint coin has deep russet, sea-green, and lavender-gray toning, the Denver Mint piece has dappled sea-green and blue-steel toning, and the San Francisco Mint piece has intense russet, sea-green, and iridescent obverse toning with lavender-gray, magenta, and greenish-gold on the reverse. (Total: 3 coins)

1948 Booker T. Washington Half, MS67 Tied for Finest Graded, Either Service

4436 1948 Booker T. Washington MS67 PCGS. CAC. Typically untuned and brilliant, this Superb Gem Booker T. Washington half has a sheen of pale champagne-gold to add substantial eye appeal. The lustrous, satiny surfaces exude high quality, with remarkably few marks for the issue and a lack of graininess that plagues the issue. Struck from 1946 to 1951, this 1948 representative is an important component to a high-grade set. Housed in a retro white label PCGS holder, seldom seen (so far). Population: 10 in 67, 0 finer. CAC: 7 in 67, 0 finer (10/17). NGC ID# BYJY, PCGS# 9412

4437 1949 Booker T. Washington MS67 PCGS. CAC. Issued in three-mint sets, the 1949 Booker T. Washington half dollar had a distribution of only 6,004 coins, including assay pieces. This Superb Gem is among the finest survivors and is rare as such. Each side is sharp and nearly perfect with a hint of champagne toning. Some russet overtones appear along the lower reverse. Population: 31 in 67, 0 finer. CAC: 22 in 67, 0 finer (10/17). NGC ID# BYK3, PCGS# 9416

4438 1950 Booker T. Washington MS67 PCGS. This frosted Superb Gem is among the finest certified of this small net distribution of 6,000 pieces. A trace of rim color accentuates the strong eye appeal. Note how clean the face of Booker T. Washington is, showing none of the abrasions usually seen even on Mint State coins. The reverse is similarly nice. Conditional rarities such as this piece are terribly underrated in today's market. Population: 24 in 67, 0 finer (10/17). NGC ID# BYK6, PCGS# 9420

4439 1953-S Washington-Carver MS67 NGC. A spectacular Superb Gem silver commemorative, with well-detailed design elements and well-preserved lustrous surfaces under delicate shades of lavender-gray and greenish-gold toning. Census: 18 in 67 (3 in 67★, 1 in 67+★), 0 finer (10/17). NGC ID# 332B, PCGS# 9440

4440 1936 Wisconsin MS68 NGC. Lovely olive-apricot and crimson-orange toning blankets the satiny surfaces with a few isolated areas of near-brilliance on the lower obverse. This is an exceptionally smooth representative, conditionally scarce in this grade with none numerically finer. Census: 41 in 68 (7 in 68★, 1 in 68+★), 0 finer (10/17). Ex: Long Beach Signature (Heritage, 10/2000), lot 6610. NGC ID# BYKU, PCGS# 9447

COMMEMORATIVE GOLD

**1903 Louisiana Purchase Gold Dollar, MS67
Jefferson Obverse, None Grade Finer at PCGS**

4441 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. The rims are broad and the central motifs razor-sharp on this Superb Gem Louisiana Purchase gold dollar. The inner fields are smooth, though die erosion becomes increasingly apparent around the legends. Minor softness and a couple of microscopic marks occur at the upper reverse. A terrific example with none graded finer at PCGS (11/17). NGC ID# BYLD, PCGS# 7443

**1903 Louisiana Purchase Gold Dollar, MS67
Jefferson Type, Tied for Finest at PCGS**

4442 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 PCGS. From a mintage of 17,500 coins, the Jefferson variant of the Louisiana gold dollar becomes conditionally rare at the Superb Gem level. PCGS has yet to see a finer example (11/17). Each side is frosty and yellow-gold with virtually complete design detail, save for the usual softness on HA in PURCHASE. Exceptionally clean. NGC ID# BYLD, PCGS# 7443

4443 1905 Lewis and Clark Gold Dollar MS64+ PCGS. CAC. A wonderful Choice Mint State piece, this lustrous Lewis and Clark gold dollar has brilliant yellow-gold surfaces and bold design motifs with outstanding eye appeal. NGC ID# BYLG, PCGS# 7448

4444 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Brilliant, coruscating luster gleams from frosted, greenish-gold surfaces that flash fleeting glimpses of pale-rose. The strike is sharp including the Torch of Liberty and the lower scroll end. A few tiny, scattered marks are less numerous than usual for the issue, and there are no bothersome alloy spots on this attractive, frosted Gem. NGC ID# 2FE9, PCGS# 7466

4445 1926 Sesquicentennial Quarter Eagle MS65+ PCGS. Only a few trivial marks are present on this Gem 1926 Sesquicentennial gold quarter eagle that features frosty mint luster and brilliant yellow surfaces. NGC ID# 2FE9, PCGS# 7466

PATTERN

**1869 Standard Silver Half in Silver
Judd-754, Toned PR66**

4446 1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR66 PCGS. A bust of Liberty wears a headband inscribed LIBERTY and ornamented with a star facing right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse has 50 CENTS centered in a wreath of oak and laurel with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. Deep violet and iridescent toning on the obverse, and gold, violet, and green toning on the reverse, mask the fully mirrored surfaces of this beauty. NGC ID# 29T5, PCGS# 60984

MINT SETS

- 8303** 1947 Double Mint Set, Uncertified. Includes 28 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1947 (no half dollars were struck at San Francisco that year). The coins are lightly or moderately toned and housed in original cardboard holders. Includes the original kraft envelope. (Total: 28 coins)
- 8304** 1948 Double Mint Set, Uncertified. Includes 28 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1948 (no half dollars were struck at San Francisco that year). The coins are lightly toned and housed in original cardboard holders. Includes the original kraft envelope and outer mailing envelope. (Total: 28 coins)
- 8305** 1948 Double Mint Set, Uncertified. Includes 28 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1948 (no half dollars were struck at San Francisco that year). The coins exhibit light to moderate toning and are housed in original cardboard holders. Includes the original kraft envelope and outer mailing envelope. (Total: 28 coins)
- 8306** 1949 Double Mint Set, Uncertified. Includes 28 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1949 (no quarter dollars were issued from San Francisco that year). The coins exhibit light to moderate toning and are housed in original cardboard holders. Includes the original kraft envelope and the torn outer mailing envelope. (Total: 28 coins)

- 8307 1949 Double Mint Set, Uncertified.** Includes 28 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1949 (no quarter dollars were issued from San Francisco that year). The coins exhibit light to moderate toning and are housed in original cardboard holders. Includes the original kraft envelope and the torn outer mailing envelope. (Total: 28 coins)
- 8308 1951 Double Mint Set, Uncertified.** Includes 30 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1951. The coins show light to moderate toning and are housed in original cardboard holders. Includes the original kraft envelope and outer mailing envelope. (Total: 30 coins)
- 8309 (3) 1952 Double Mint Sets, Uncertified.** Includes 90 coins, three sets each with two examples of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1952. The coins exhibit light to moderate toning and are housed in original cardboard holders. All three sets include an original kraft envelope, and one also comes with an outer mailing envelope. (Total: 90 coins)
- 8310 1952 Double Mint Set, Uncertified.** Includes 30 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1952. The coins exhibit light to moderate toning and are housed in original cardboard holders. Includes the original kraft envelope. (Total: 30 coins)
- 8311 1953 and 1954 Double Mint Sets, Uncertified.** Includes 60 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1953 and 1954. The coins exhibit light to moderate toning and are housed in original cardboard holders. Both sets include the original kraft envelopes. (Total: 60 coins)
- 8312 1953 and 1954 Double Mint Sets, Uncertified.** Includes 60 coins, two sets each with one example of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1953 and 1954. The coins are lightly to moderately toned and housed in original cardboard holders. Both sets include the original kraft envelope, but the 1954 set also includes the outer mailing envelope. (Total: 60 coins)
- 8313 1953 and 1954 Double Mint Sets, Mostly Complete, Uncertified.** Includes 59 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1953 and 1954, sale for a single missing 1954-D half dollar. The coins are lightly toned and housed in original cardboard holders. Both sets include the original kraft envelope, and the 1954 set also includes the outer mailing envelope. (Total: 59 coins)
- 8314 1953 and 1954 Double Mint Sets, Uncertified.** Includes 60 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1953 and 1954. The coins exhibit light to moderate toning and are housed in original cardboard holders. The 1953 set includes the original kraft envelope; the 1954 set includes the kraft envelope and outer mailing envelope. (Total: 60 coins)
- 8315 1953 and 1954 Double Mint Sets, Uncertified.** Includes 60 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1953 and 1954. The coins exhibit light to moderate toning and are housed in original cardboard holders. Both sets include the original kraft envelopes. (Total: 60 coins)
- 8316 (4) 1954-1956 Double Mint Sets, Uncertified.** Includes one 1954 Mint Set and three 1956 Mint Sets for a total of 86 coins. Each set includes two of each denomination struck that year at the operating mints. The coins show light to moderate toning and are housed in original cardboard holders. The 1954 set and one 1956 set include the original kraft envelopes. (Total: 86 coins)
- 8317 (3) 1954-1957 Double Mint Sets, Uncertified.** Includes one 1954, one '56, and one '57, for a total of 70 coins. Each set contains two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in those years. The coins exhibit light to deep toning and are housed in original cardboard holders. The 1954 set includes the original kraft envelope. (Total: 70 coins)
- 8318 (4) 1954-1957 Double Mint Sets, Uncertified.** Includes one 1954, two 1956, and one 1957, for a total of 86 coins. Each set includes two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in that year. The coins exhibit light to moderate toning and are housed in original cardboard holders. Each includes the original kraft envelope. (Total: 86 coins)
- 8319 (3) 1954-1957 Double Mint Sets, Uncertified.** Includes one 1954, one 1956, and one 1957, for a total of 68 coins. Each set contains two of each denomination struck at the operating mints in those years. The coins are lightly to moderately toned and housed in original cardboard holders. The 1954 and 1957 sets include the original kraft envelopes. (Total: 68 coins)
- 8320 (3) 1955 Double Mint Sets, Mostly Complete, Uncertified.** Includes 62 coins, three sets each with two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1955, save for two of the sets which are missing the Philadelphia half dollars. (No half dollars were struck in Denver that year, and San Francisco issued only cents and dimes.) The coins exhibit light to moderate toning and are housed in original cardboard holders. All three sets include original kraft envelopes, and one also includes an outer mailing envelope. (Total: 62 coins)
- 8321 (4) 1955-1958 Double Mint Sets, Uncertified.** Includes 90 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1955, '56, '57, and '58. The coins show light to moderate toning and are housed in original cardboard holders. Each set includes the original kraft envelope and outer mailing envelope. (Total: 90 coins)
- 8322 (4) 1955-1958 Double Mint Sets, Uncertified.** Includes 90 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1955, '56, '57, and '58. The coins show light to moderate toning and are housed in original cardboard holders. Each set includes the original kraft envelope and outer mailing envelope. (Total: 90 coins)
- 8323 (4) 1955-1958 Double Mint Sets, Uncertified.** Includes 90 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1955, '56, '57, and '58. The coins show light to moderate toning and are housed in original cardboard holders. Each set includes the original kraft envelope and outer mailing envelope. (Total: 90 coins)
- 8324 (4) 1955-1958 Double Mint Sets, Uncertified.** Includes 90 coins, two of each denomination struck at the Philadelphia, Denver, and San Francisco Mints in 1955, '56, '57, and '58. The coins show light to moderate toning and are housed in original cardboard holders. Each set includes the original kraft envelope and outer mailing envelope. (Total: 90 coins)
- 8325 (4) 1956 Double Mint Sets, Uncertified.** Includes 72 coins, four sets each with two examples of each denomination struck at the Philadelphia and Denver Mints in 1956 (no half dollars were struck at Denver that year). The coins show light to moderate toning and are housed in original cardboard holders. Each set includes the original kraft envelope and outer mailing envelope. (Total: 72 coins)

8326 (4) 1958 Double Mint Sets, Uncertified. Includes 80 coins, composed of four sets each containing two examples of each denomination struck at the Philadelphia and Denver Mints in 1958. The coins are housed in original cardboard holders. Three sets include the original kraft envelope, and the fourth includes the original mailing envelope. (Total: 80 coins)

8327 (4) 1958 Double Mint Sets, Uncertified. Includes 80 coins, composed of four sets each containing two examples of each denomination struck at the Philadelphia and Denver Mints in 1958. The coins are housed in original cardboard holders. Three sets include the original kraft envelope and outer mailing envelope, and the fourth includes only the kraft envelope. (Total: 80 coins)

U.S. PRESIDENTS & STATESMEN

8328 Two-Piece Lot of Lincoln Campaign Medals, NGC-Certified. Included are: 1860-Dated Abraham Lincoln Campaign Medal, DeWitt-AL-1860-59, MS61, Brass, 24 mm; (1864) Abraham Lincoln Campaign Medal, DeWitt-AL-1864-37, AU55, Brass, 22 mm, Holed. (Total: 2 coins)

- 8346** 1905 Lewis & Clark Expo, Oregon Mountain Round Quarter, Gold X-Tn1, R.4, MS66 Deep Prooflike NGC. Plain edge, 10 mm, 0.2 gm. Medal turn.

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the H.A.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at H.A.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:

- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Nineteen and one-half percent (19.5%) on Comic and Movie Poster Auction lots;
- Twenty percent (20%) on Currency, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
- Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of H.A.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: H.A.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on H.A.com. Review at <http://www.ba.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,999	\$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,999	\$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the H.A.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

Terms and Conditions of Auction

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:

a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**

b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.

c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and

Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California: Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas: In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions:

COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. - It is the Third Party Shipper's responsibility to pack (or crate) and ship (or freight) your purchase to you. Please make all payment arrangements for shipping with your Shipper of choice.
- Any questions concerning Third Party Shipping can be addressed through our Client Services Department at 1-866-835-3243.
- Successful bidders are advised that pick-up or shipping arrangements should be made within ten (10) days of the auction or they may be subject to storage fees as stated in Heritage's Terms & Conditions of Auction, item 35.

NOTICE of CITES COMPLIANCE; When purchasing items made from protected species.

Any property made of or incorporating endangered or protected species or wildlife may have import and export restrictions established by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These items are not available to ship Internationally or in some cases, domestically. By placing a bid the bidder acknowledges that he is aware of the restriction and takes responsibility in obtaining and paying for any license or permits relevant to delivery of the product. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or for failure to mark lots containing protected or regulated species.

MyRECOMMENDATIONS

Online Suggestion Tool

THE LAST PIECE OF THE PUZZLE? HERITAGE HAS IT.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with MyRecommendations visit Heritage's US Coin pages now at HA.com/Coin.
